Here are entered works discussing lingua francas which are native to none of those using them and are characterized by a simplified grammar and often mixed vocabulary. Works discussing auxiliary, sometimes mixed, languages used among groups having no other language in common are entered under the heading Lingua francas. Works discussing languages resulting from the intermingling of phonological, grammatical and/or lexical elements from different languages in areas of intensive language contact are entered under the heading Languages, Mixed. Works discussing pidgin languages that have become established as the native languages of a speech community are entered under the heading Creole dialects.

Here are entered works on land development projects which have been zoned to allow flexibility in building siting and multiple land use. Works on planned new municipalities are entered under New towns. Works on new urban entities consisting of a combination of residential, commercial, social, educational, and/or recreational areas, incorporated or unincorporated, but of smaller scope than municipalities are entered under Planned communities.

Programmed instruction *(May Subd Geog)*
[LB1028.5]
Here are entered general discussions on, and/or texts for, a step-by-step teaching method, often using a teaching machine, that employs small units of information or learning material and frequent testing and allows students to control the pacing of the learning process.
UF Programed instruction
Programmed learning
Programmed textbooks
