

Appendix A. Fields not included in the CEG

MARC 21 defined

With the full implementation of format integration in 1996, all fixed and variable fields are defined for serials. The *CONSER Editing Guide* includes those fields that are considered most likely to be used in serial records. Those that have not been included are listed below. In this category are all fields that relate to archival materials. Inclusion of a field in this appendix does not preclude its use in a serial record(1). For further information on these fields, consult the *MARC 21 Format for Bibliographic Data*.
