Foreword

In her foreword to the 2002 revision of *The Basic Serials Cataloging Workshop* Jean Hirons wrote that since the workshop was released in 1999, it "has been given in numerous venues throughout the United States and has been translated into Spanish, French, and Chinese for workshops presented in Mexico, Canada, and Taiwan. The success of this course has led to the development of other workshops..." SCCTP now has five workshops in place. Throughout the years, many dedicated, talented SCCTP trainers have kept the material up to date and experimented with delivering it in online formats.

Jean's statement in 2002 that the "enthusiasm and commitment of so many to this program attests to the great need for training in the area of serials cataloging" is still true as I update the foreword for the 2008 edition.

The 2008 edition of the *Basic Serials Cataloging Workshop* was completed by Melissa Beck, Valerie Bross, and Peter Fletcher, all from UCLA. I thank them for their hard work and dedication to the project which included several drafts of the revised workshop, classroom testing, and completion of the final PowerPoint and PDF files. I am also grateful to their institution and their managers who saw the value in this work and allowed them to volunteer their time and expertise.

Hien Nguyen (LC) worked with Judy Kuhagen (LC/CPSO) to provide careful review and feedback and coordinated the successful *Basic Serials Cataloging Trainers Refresher Workshop* during ALA Annual in June 2008. Several experienced SCCTP trainers gave us feedback based on sessions given using various revisions and during the *Refresher Workshop* at ALA. To one and all, my sincere thanks!

There is an evaluation form in appendix I, the last appendix in the manual. Please be sure to provide us your comments on the material for future revisions and interests in other training needs you have.

This workshop was designed to be given by SCCTP trained-trainers and it is recommended that SCCTP trainers be engaged for training for optimum results; however, anyone familiar with serials cataloging can use the materials to provide training for others. They can also be used for self-study.

For schedules of workshops taught by SCCTP trainers and to learn more about SCCTP, visit the Web site at: <http://www.loc.gov/acq/conser/scctp>

Preface to the 2008 Edition

The 2008 Edition is organized into seven sessions; all but the first have exercises. The workshop provides the basic principles of serials cataloging for original and copy cataloging of print serials. It focuses on the elements contained in the CONSER standard record (CSR), including appropriate MARC 21 tagging, as well as problem-solving and decision-making advice relative to serials cataloging.

Based on feedback provided from workshop trainers and attendees over the years, two optional sessions included in the previous edition of the Basic Serials Cataloging Workshop have not been included in the 2008 edition: "Electronic Serials" and "What is the Serial About?" (on subject cataloging). It was felt that the SCCTP Electronic Serials Cataloging Workshop, once updated with material from the CONSER standard record would be a better source for e-serials cataloging instruction. Similarly there are several subject related workshops available from the Cataloger's Learning Workshop: <http://www.loc.gov/catworkshop/> that provide more detailed and useful instruction on subject cataloging.

Each session may start with a brief warm up exercise and conclude with a summary of the major points presented and references to relevant CONSER documentation. Please remember to fill out the evaluation form in appendix I. This will be most helpful in refining and re-working the training materials as well as their presentation. Your help in this is appreciated.

***BASIC SERIALS
CATALOGING
WORKSHOP***

1-1

Workshop goals

- Identify serials and distinguish them from monographs and integrating resources
- Become familiar with MARC 21 tags used for serials
- Create original serials cataloging records
- Identify “appropriate” serial copy and needed edits

1-2

Session 1: Introduction

- Where do serials fit in the world of continuing resources?
- How does serials cataloging differ from the cataloging of monographs and integrating resources?
- What are the current conventions and practices?
- What tools are available?

1-3

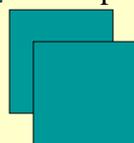

Representation of Bibliographic Resources

Finite resources

Monographs

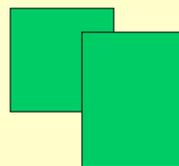

Multi-parts

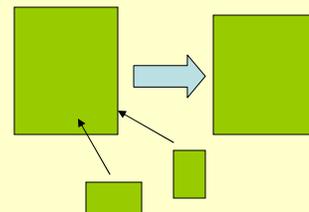

Continuing resources

Serials

Updates remain discrete

Integrating resources

Updates do not remain discrete 1-4

Serials, Seriality, and Continuing Resources

- Serials are one category of “continuing resource”
- Integrating resources are the other category
- Both exhibit *seriality* because they are issued or updated over time and can change
- Because they are issued in a different manner, the cataloging rules for them differ

1-5

Serial Cataloging Records

- Reflect the whole publication
- Are dynamic because they incorporate changes over time
- Are cooperative creations (e.g., one library may create the record, another may update it)
- Are important to the overall control of the serial and often are essential to other records (holdings, check-in)

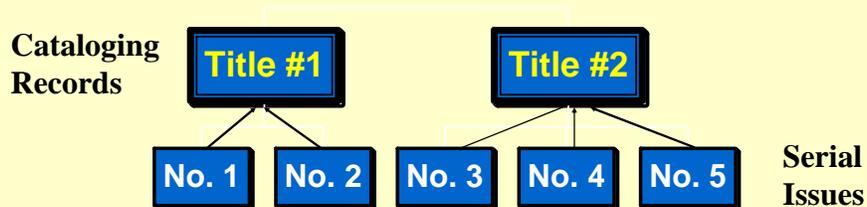

1-6

Successive Entry Cataloging

- Convention applied to all serials cataloged according to AACR2
- Any major change results in the creation of a new (successive) record
- Records are linked using 780/785 fields

1-7

A Many to Many Relationship

Session 6: Working with Copy: What to Edit?

- Which edits are critical?
- Which edits are needed for access?
- Which edits are needed for serials control?
- How do I edit a pre-AACR2 record?
- How do I edit an AACR2 record?
- What doesn't need to be changed?

Criteria for Editing Copy

- Local decision
- Report the desired change to your utility?
- Added value for end users and processing staff
- Other fields may need editing:
 - Input standards for local system and utility

Keep in Mind ...

- Do not edit records to conform to new standard
- Do not delete data unless incorrect
- Maintain changes that affect access to the record
- Records may contain a mix of old and new practices (as always)
- Watch out for consolidation of CONSER records

Session 7: When Do I Need a New Record?

- What constitutes a major title change?
- What other situations require a new record?
- How do I close out a record for a serial that has ceased?
- How do I link records?

7-1

Decision Process: Determining Major Changes

- AACR2/LCRI:
 - 21.2C (Serial title changes)
 - 21.3B (Responsible body changes for serials)
- CONSER Cataloging Manual, Module 16
- Publisher really intend to change the title?
- Look at all the issues in hand
- Check in OCLC

7-2

Major and Minor Changes

AACR2 uses the concepts of “major change” and “minor change” as follows:

- A major change is a change that requires a new record
- A minor change does not require a new record and can be noted in the record when important

7-3

Major and Minor Changes

- Major changes include:
 - Major changes in title
 - Changes of corporate body in main entry (as 110 heading or 130 qualifier)
 - Edition statement (in some cases)
 - Physical medium
- Minor changes include:
 - Minor title changes
 - Numbering
 - Edition statement (in some cases)
 - Changes other than corporate body to uniform title qualifiers

7-4

Changes in Title Proper

7-5

A Few Considerations

- Consider only the title proper (\$a, \$n, \$p)
 - Changes to other title information do not matter!
- When considering whether a title has changed, always test it against the title proper (recorded in field 245)
 - **Not** against the latest variant in 246!

7-6

Major Title Changes

= Changes that occur in the first five words (or six when initial article) AACR2 21.2C2., a.
(Note: there are many new exceptions to this rule)

The vocational guidance quarterly → Career development quarterly

Iowa historical record → Iowa journal of history

Chemical engineering and mining review → Mining & chemical engineering review

Major Title Changes

= Changes that occur after the first five words that change the meaning of the title or the scope of the serial (AACR2 21.2C2., a.)

The best bed & breakfast in the world → The best bed and breakfast in England, Scotland, & Wales

World meetings. Social & behavioral sciences, education & management →

World meetings. Social & behavioral sciences, human services & management

7-8

Major Title Changes

= The name of the corporate body given in the title changes (AACR2 21.2C2., a.) i.e., the change would require a new heading

Reports of the Institute of **High Speed Mechanics**,
Tohoku University
↓
Reports of the Institute of **Fluid Science**, Tohoku
University

7-9

Minor Title Changes

- AACR2 21.2C2,b. (CCM 16.2.4) lists 9 categories of minor changes
- Most of these are exceptions to the first major change rule (changes in the 1st five words)

7-10

Minor Title Changes

Includes 9 provisions:

- Category i. Representation of a word
- Category ii. Articles, prepositions, conjunctions
- Category iii. Name of corporate body
- Category iv. Punctuation
- Category v. Order of titles (parallel titles)
- Category vi. Words linking to numbering
- Category vii. Fluctuating titles
- Category viii. Words in a list
- Category ix. Words that denote type of resource

7-11

Minor Title Changes: Category i

- BUT NOT:*** Europe through the back door → Rick Steves' Europe through the back door {John Muir publisher}

7-16

Minor Title Changes: Category iv

- Category iv: The only change is one of punctuation
 - GBB → G.B.B.

7-17

Minor Title Changes: Category v

- Category v: changes in the order of titles when there are parallel titles

South African medical journal = Suid Afrikaanse tydskrif vir geneeskunde

changes to:

Suid Afrikaanse tydskrif vir geneeskunde = South African medical journal
- ***But not***: if the title chosen as title proper is dropped. In that case, consider the change to be major

7-18

Minor Title Changes: Category vi

- **Category vi:** words linking the title to the numbering are added, deleted, changed
 - Annual report 2000
 - Annual **report for** 2001

7-19

Minor Title Changes: Category vii

- **Category vii:** two or more titles proper used according to a regular pattern

- Not included:
 - changes from one “type of resource” word to another
 - words that indicate frequency

7-24

7-26

Changes in Corporate Body Main Entry

(AACR2 21.3B1, a., LCRI 21.3B.)

7-27

Session 7: Exercises

In part A, indicate whether the change is major or minor according to the rules given below. The emphasis in this section is simply on recognizing when a new record is required.

In part B, complete the abbreviated workforms to indicate the tagging and coding of the relevant bibliographic data. The emphasis in this section is on closing out the old record and tagging and coding the bibliographic data in the new record or editing an existing record.

From AACR2:

If a major change occurs in the title proper of a serial, make a new entry.
21.2C2. Definition of major and minor title changes for serials

a) **Major changes.** In general, consider as a major change in a title proper of a serial the addition, deletion, change, or reordering of any of the first five words (the first six words if the title begins with an article) unless the change belongs to one or more of the categories listed in 21.2C2b.

Consider also as a major change the addition, deletion, or change of any word after the first five words (the first six words if the title begins with an article) that changes the meaning of the title or indicates a different subject matter.

Also consider as a major change in title proper a change in a corporate body name given anywhere in the title if it is a different corporate body.

b) **Minor changes.** In general, consider the following to be a minor change in a title proper of a serial:

- i) a difference in the representation of a word or words anywhere in the title (e.g., one spelling vs. another; abbreviated word or sign or symbol vs. spelled-out form; arabic numeral(s) vs. roman numeral(s); numbers or dates vs. spelled-out form; hyphenated words vs. unhyphenated words; one-word compounds vs. two-word compounds, whether hyphenated or not; an acronym or initialism vs. full form; or a change in grammatical form (e.g., singular vs. plural))
- ii) the addition, deletion, or change of articles, prepositions, or conjunctions anywhere in the title
- iii) a difference involving the name of the same corporate body and elements of its hierarchy or their grammatical connection anywhere in the title (e.g., the addition, deletion, or rearrangement of the name of the same corporate body or the substitution of a variant form)
- iv) the addition, deletion, or change of punctuation, including initialisms and letters with separating punctuation vs. those without separating punctuation, anywhere in the title
- v) a different order of titles when the title is given in more than one language in the chief source of information, provided that the title chosen as title proper still appears as a parallel title
- vi) the addition, deletion, or change of words anywhere in the title that link the title to the numbering
- vii) two or more titles proper used on different issues of a serial according to a regular pattern

- viii) the addition to, deletion from, or change in the order of words in a list anywhere in the title, provided that there is no significant change in the subject matter
- ix) the addition, deletion, or rearrangement anywhere in the title of words that indicate the type of resource such as “magazine,” “journal,” or “newsletter” or their equivalent in other languages.

In case of doubt, consider the change to be a minor change.

Part A

Indicate whether the following situations constitute a major or minor change. For major changes, indicate the reason; for minor changes, the category under rule 21.2C2 that applies.

Editorial pages

These pages are most often found in periodicals and usually contain the masthead in a boxed area. The title may be found at the head of the page.

Electronic resource

Material (data and/or program(s)) encoded for manipulation by a computerized device. This material may require the use of a peripheral directly connected to a computerized device (e.g., a CD-ROM drive) or a connection to a computer network (e.g., the Internet).

Newspapers usually have a masthead rather than a cover and are normally larger than A3 (297 mm x 420 mm.) in size.

Numeric designation	A number or combination of numbers, dates, letters, or words that identifies an issue of a serial within a numeric sequence.
Other title information	A title borne by an item other than the title proper or parallel or series title(s) including subtitles.
Parallel title	The title proper in another language and/or script.
Periodical	A serial published more frequently than annually. Each issue normally contains separate articles, stories or other writings.
Physical carrier	A physical medium in which data, sound, images, etc., are

stored. For certain categories of material, the physical carrier consists of a storage medium (e.g., tape, film).

Predominant name

The name or form of name of a person or corporate body that appears most frequently (1) in the person's works or works issued by the corporate body, or (2) in reference sources, in that order of preference.

Qualifier

A parenthetical word or phrase added to a corporate body heading or uniform title to distinguish the body or title from others with the same name or title.

Reciprocal relationship

The relationship between two items, as represented by paired linking fields (e.g., 780/785) or by a link with the same tag that is given in each related record (e.g., 775).

RECON

Retrospective conversion of manual cataloging records to machine readable format.

Record consolidation

The merging of information from multiple records into fewer records, and the deletion of records no longer needed to describe a resource. Involves selecting a record to retain, modifying that record, and reporting superseded records for deletion. Also called record merging.

Record maintenance

The process of ensuring the continued authoritativeness of a record through additions, changes, or deletions: a) to correct obvious errors, b) to reflect changes in the resource, or c) to reflect changes to policies and practices used for the bibliographic control of the resource. Includes but is not limited to Bibliographic File Maintenance (BFM), which generally refers to making corrections in LC records because of reported errors or to update access points affected by NACO/SACO authority work.

Record separation

The breaking up of one bibliographic record into two or more records, as required by current cataloging standards and policies.

Remote access (Electronic resources)

The use of electronic resources via input/output devices connected electronically to a computer.

Reprint

1. A new printing of an item made from the original type image, commonly by photographic methods. The reprint may reproduce the original exactly (an impression) or it may contain minor but well defined variations (an issue).

	2. A new edition with substantially unchanged text.
Retrospective conversion	The process of converting bibliographic records on catalog cards into machine readable form to provide access through the online catalog.
Running title	A title or abbreviated title that is repeated at the head or foot of each page or leaf.
Section	A separately published part of a bibliographic resource, usually representing a particular subject category within the larger serial and identified by a designation that may be a topic, or an alphabetic or numeric designation, or a combination of these.
Serial	A continuing resource issued in a succession of discrete parts, usually bearing numbering that has no predetermined conclusion. Examples of serials include journals, magazines, electronic journals, continuing directories, annual reports, newspapers, and monographic series.
Series	1. A group of separate items related to one another by the fact that each item bears, in addition to its own title proper, a collective title applying to the group as a whole. The individual items may or may not be numbered. 2. Each of two or more volumes
Series title page	An added title page bearing the series title proper and usually, though not necessarily, other information about the series (e.g., statement of responsibility, numeric designation, data relating to publication, title of the item within the series).
Spine title	A title appearing on the spine of an item.
Standing order	An order on which all volumes of a series are automatically received.
Statement of responsibility	A statement transcribed from the item being described, relating to persons responsible for the intellectual or artistic content of the item, to corporate bodies from which the content emanates, or to persons or corporate bodies responsible for the performance of the content of the item.
Subseries	A series within a series (i.e., a series that always appears in

conjunction with another, usually more comprehensive, series of which it forms a section). Its title may or may not be dependent on the title of the main series.

Successive entry

The convention of creating a new record for a serial each time a major change occurs.

Supplement

An item, usually issued separately, that complements one already published by bringing up-to-date or otherwise continuing the original or by containing a special feature not included in the original. The supplement has a formal relationship with the original as expressed by common authorship, a common title or subtitle, and/or a stated intention to continue or supplement the original.

Supplied title

A title provided by the cataloger for an item that has no title proper on the chief source of information or its substitute. It may be taken from elsewhere in the item itself or from a reference source or it may be composed by the cataloger.

Surrogate

A substitute for the basis of description (such as an issue of a serial) on which a bibliographic record is based. Includes copies of the chief source of information and any other sources with additional information on which cataloging should be based.

Title

A word, phrase, character, or group of characters, normally appearing in an item, that names the item or the work contained in it.

Title page

A page at the beginning of an item bearing the title proper and usually, though not necessarily, the statement of responsibility and the data relating to publication.

Title page substitutes

When a serial does not have a true title page, another page may substitute. AACR2 12.02B provides the order of preference for title page substitutes: analytical title page (for a serial issued as part of a series); cover, caption; masthead; editorial pages; colophon; other pages.

Title proper

The chief name of an item, including any alternative title but excluding parallel titles and other title information.

Title screen (Electronic resources) In the case of a computer file, a display of data that includes the title proper and usually, though not

necessarily, the statement of responsibility and the data relating to publication.

Updating loose-leaf

An integrating resource that consists of one or more base volumes updated by separate pages that are inserted, removed, and/or substituted.

Uniform title

1. The particular title by which a work is to be identified for cataloguing purposes. 2. The particular title used to distinguish the heading for a work from the heading for a different work. 3. A conventional collective title used to collocate publications of an author, composer, or a corporate body containing several works or extracts, etc., from several works (e.g., complete works, several works in a particular literary or musical form).

URL

Uniform Resource Locator. Location information of an electronic resource expressed in a standardized format, which allows for computer files to be sent and received automatically. The World Wide Web uses the URL as the basis of linking to other files and documents around the Internet.

Verso

1. The left-hand page of a book, usually bearing even page numbers. 2. The side of a printed sheet intended to be read second.

Volume title page

A page that contains the title and designation for an entire volume, rather than the designation for a specific issue. Volume title pages are often issued separately once the volume is complete.

Whole numbers

Continuous numbers that do not repeat. In addition to numbered serials, the term "whole numbers" is also used for alternative numbering schemes.

Appendix E: Pre-Workshop Exercises

Please print out the following exercises and complete as many of as you can. The purpose of these exercises is to help you determine what areas of serials cataloging you may want to pay particular attention to during the workshop.

Bring the completed exercises and any questions you may have with you to the workshop to facilitate discussion about the examples during the scheduled sessions.

Please also note that bibliographic information used in these exercises may have been altered to illustrate various points of serials cataloging practice.

Part A: Is It a Serial?

Give as many reasons as you think applicable in each case below.

Example 1:

Cover:	Today's Education The Journal of the National Education Association
Contents page:	The Annual of the National Education Association 1982-83 Volume 71, Number 3
	Today's Education
Verso of contents page:	Published once a year by ... (ISSN) 0271-3573

Is this a serial? Circle one: **Yes** No

1. It has enumeration/chronology.
2. It bears an ISSN.
3. The publisher's statement of frequency indicates intent to continue indefinitely.

Example 2:

It is known that the following is issued annually.

CD-ROM label:	Who's Who in Canadian Business 17th Edition 1997 ISSN 1209-8299
---------------	--

Is this a serial? Circle one: **Yes** No

1. It bears an ISSN.
2. Editions appear frequently.

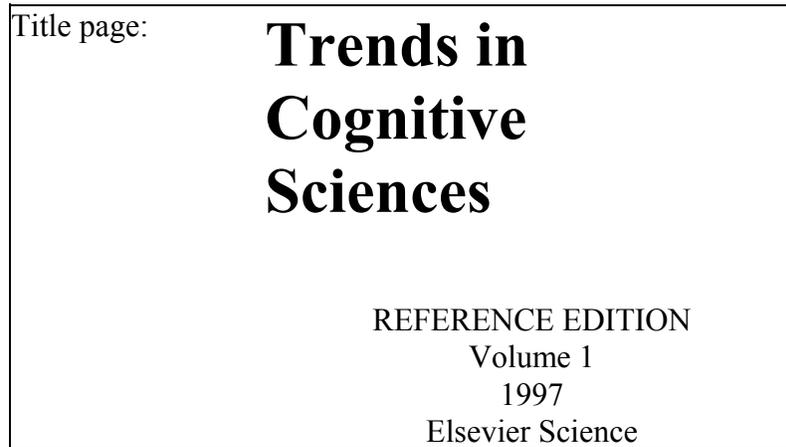

Example 3:

First issue title page:	Proceedings of the Twelfth Annual Symposium on Computational Geometry
Second issue title page:	Proceedings of the Thirteenth Annual Symposium on Computational Geometry

Is this a serial? Circle one: **Yes** No

1. Words such as "Annual" indicate this is an ongoing conference.
2. Terms like "12th" and "13th" serves as numbering.

Example 4:

Is this a serial? Circle one: **Yes** No

1. Title words such as "Trends in ..." and "Progress in ..." are usually interpreted to indicate intent to publish indefinitely.
2. It has enumeration and chronology.

Example 5:

It is known that the 3rd edition was published in 1989, the 4th edition in 1992, and the 5th edition in 1998.

Is this a serial? Circle one: Yes **No**

This title would not usually be cataloged as a serial since the editions are so infrequent.

Example 6:

title page:	Expenditures on Children by Families 1997 Annual Report UNITED STATES DEPARTMENT OF AGRICULTURE Miscellaneous Publication Number 1528-1997
-------------	---

Is this a serial? Circle one: **Yes** No

1. The title is issued annually and the date is a year of coverage.

Trainers: note that the series could also be cataloged as a serial with this title as a serial analytic.

Part B: Is A New Record Required?

Example 1:

Title 1:	Marriage and divorce statistics
New issue:	Marriage, divorce and adoption statistics

Would you create a new record? Circle one: **Yes** No

There is a change within the first five words of the title.

Example 2:

Title 1:	Organic chemistry
New issue:	Organic chemistry review

Would you create a new record? Circle one: Yes **No**

The addition of a word indicating the type of resource is considered to be a minor change.

Example 3:

Title 1:	Annual report of the President's Commission on Children for 2002
New issue:	President's Commission on Children annual report 2003

Would you create a new record? Circle on: Yes **No**

The rearrangement of the corporate body from end of title to beginning is a minor change.

Example 4:

Title 1:	Doing Business in the Czech and Slovak Republics
New issue:	Doing Business in the Czech Republic

Would you create a new record? Circle one: Yes **No**

There is no change within the first five words but the scope of the publication has changed significantly.

Example 5:

Title 1:	STATISTIQUES ÉPIDÉMIOLOGIQUES ET DÉMOGRAPHIQUES ANNUELLES
----------	--

New issue:	ANNUAL EPIDEMIOLOGICAL AND VITAL STATISTICS
	ANNUAL EPIDEMIOLOGICAL AND VITAL STATISTICS
	STATISTIQUES ÉPIDÉMIOLOGIQUES ET DÉMOGRAPHIQUES ANNUELLES

Would you create a new record? Circle one: Yes **No**

There is no need for a new record since it is only the order of the parallel titles that has changed. A 500 note would typically be added to account for this.

Example 6:

Title 1:	Architectural Review Volume 17, April 1910
New issue:	Architectural Review New Series, Volume 1, January 1912

Would you create a new record? Circle one: Yes **No**

Although the enumeration has started over from volume one, there is no change in the title. The designation includes the phrase "new series" which will be included in the 362 field when edited to reflect this change.

Example 7:

Title 1 record:	130 Historian (Kingston, R.I.) 245 The Historian. 022 ISSN 0018-2370
New issue:	The Historian ISSN 0018-2370 Now published: Allentown, PA

Would you create a new record? Circle one: Yes **No**

There is no need for a new record since it is the place of publication that has changed. This would be noted in a 500 field and the fixed field place of publication code would be updated.

Part C: Closing Out and Linking Records

Edit the cataloging data in the forms below. Add or change any data you think appropriate.

Please note that not all possible fields have been used. Supply information only for the fields indicated and do not worry about authorized forms for headings

Session 2: Answers to Exercises

Give as many reasons as you can (there may be more than one per example) why the following titles should or should not be cataloged as serials.

Exercise 1 Adobe Magazine

1. ISSN
2. Enumeration and chronology
3. Statement of frequency indicates continuing publication
4. The word “magazine.”

Exercise 2 World Stock Exchange Fact Book

1. ISSN
2. There is a coverage date on the cover, 2000.
3. There is a stated frequency.

Exercise 3 SERVICE INDUSTRIES USA

It is known that this title is issued every two years.

1. ISSN
2. 3rd ed. can serve as enumeration since we know it is issued frequently.

Exercise 4 Academic Freedom

The numbering changes from chronological to numeric, but there is clear numbering on each issue.

Exercise 5 Tokyo Stock Exchange

From the two pieces it is clear that the title is issued annually and that the dates are years of coverage.

Exercise 6 The Frank C. Brown Collection of North Carolina Folklore

This is a multi-part monograph complete in five volumes and not a serial.

**Exercise 7 UNITED NATIONS LITERACY DECADE 2003-2013
Annual Report For 2008**

This is a publication of limited duration that has a stated frequency and numbering and can be treated as a serial according to 12.0A.

**Exercise 8 PROCEEDINGS OF THE EIGHTH ANNUAL ACM-SIAM
SYMPOSIUM ON DISCRETE ALGORITHMS**

This can be cataloged as a serial since it is an ongoing symposium and has terms (8th) that can serve as enumeration.

Exercise 9 BUILDING THE PUBLIC CITY

This is a monograph appearing in the numbered series: Urban Affairs Annual Review. It could be cataloged either as a serial under the series title or as a monograph with a series tracing.
