Some dates can be coded easily using ISO 8601 in the appropriate subfield of optional field 046; others need a specialized standard such as the Extended Date/Time Format (EDTF)—here are typical examples of each:

RDA dates in ISO 8601 date scheme (no need to provide a source in \$2)		
Category	RDA presentation	ISO 8601 coding in 046
Single year	1964	1964
Year/Month/Day	1964 June 27	19640627
Early A.D. date	65 A.D.	0065
B.C. date	361 B.C.	-0360 <i>(note there is a difference of one because the B.C. system has no year zero)</i>
Century 20	th century	19

RDA dates in EDTF date scheme (provide 'edtf' in 046 \$2)

Probable date	1816?	1816?
Approximate date	Approximately 931	0931~
Known to be one of two years	1666 or 1667	[1666,1667]
