

## Report of the PCC LCRI-RDA Task Force

The task force looking at the *Library of Congress Rule Interpretations* (LCRI) and their disposition in relation to the provisions of *Resource Description and Access* (RDA) has completed its task and a table of LCRI, RDA guideline and disposition recommendations is below. Each member of the group volunteered to look at the LCRI for particular chapters of AACR2 and make disposition recommendations under RDA. The chapters were divided as follows:

Chapter 1: Sherman Clarke  
Chapter 2: Hideyuki Morimoto  
Chapter 3: Hideyuki Morimoto  
Chapter 4: Robert Maxwell  
Chapter 5: Robert Maxwell  
Chapter 6: Robert Maxwell  
Chapter 7: Adam Schiff  
Chapter 8: Sherman Clarke  
Chapter 9: Renette Davis  
Chapter 10: Sherman Clarke  
Chapter 11: Robert Hiatt  
Chapter 12: Renette Davis  
Chapter 13: Renette Davis  
Chapter 21: All members took several LCRI to evaluate  
Chapter 22: Robert Hiatt  
Chapter 23: Robert Hiatt  
Chapter 24: Robert Hiatt  
Chapter 25: Robert Hiatt  
Chapter 26: Hideyuki Morimoto  
Appendices: Hideyuki Morimoto

The evaluation was done with the RDA files for constituency review with the exception of chapter 25 for which the guidelines for music titles had not been completed. The evaluation for chapter 25 was done against the final text of RDA.

The Library of Congress has already begun its evaluation of the LCRI disposition. The Policy and Standards Division has about completed its recommendations on disposition of the LCRI for the RDA test to the Acquisitions and Bibliographic Access Management Team which will consider those recommendations in October.

LCRI	RDA	Retain In full	Retain revised	Omit	Decision Needed	Notes
1.0 [General rules for descriptio n.Decision s before cataloging ]			X			This LCRI is a good summary of issues of type of record, etc., and not replaced by RDA as far as I can see
1.0A3 [Chief source of informatio n]				X		
1.0C [Punctuati on/spacin g]			X			This partly depends on whether North American practice remains ISBD
1.0E [Languag e and script of the deccsriptio n]		X				
1.0G [Accents and other diacritical marks]				X		RDA essentially says same as LCRI
1.1B1 [Title proper]	2.3.1.4 2.3.1.6			X		Punctuation instructions seem to go against the spirit of RDA
1.1C [GMD]				X		
1.1D2 [Parallel titles]				X		“second-level description” no longer relevant
1.1E [Other title informatio n]				X		
1.1E5 [Other title informatio n]	2.3.1.7 2.3.5			X		
1.1F1 [Statemen ts of responsibi lity]	2.4		X			The LCRI advice about bibliographic significance is useful; I assume under RDA we would continue in most cases to ignore statements about cover

LCRI	RDA	Retain In full	Retain revised	Omit	Decision Needed	Notes
						designers, etc. Slight revision needed (e.g., probably delete the part about added entries)
1.1F4 [Statements of responsibility]	2.4.1.5 2.4.1.6		X or =>	X		Doesn't seem relevant to RDA which contemplates (I believe) recording separate statements in separate data "boxes" (?). Might still be relevant when doing ISBD presentation.
1.1F6 [Statements of responsibility]				X		LCRI just a "see" reference to LCRI 1.1E
1.1F7 [Statements of responsibility]				X		RDA does not require added entries to be justified within the body of the entry
1.1F11 [Statements of responsibility]	2.4.3		X			NOTE: I assume LC would want to make decisions for most "non-core" elements, including elements for which there isn't a current LCRI. Since parallel statements of resp. are not required in RDA, there probably needs to be some sort of LCRI saying not to apply 2.4.3.
1.1F15 [Statements of responsibility]	2.4.1.1		X			I can't see anything about this in RDA. LCRI is simply saying this sort of statement is not a "statement of responsibility" and offers helpful guidance. Could be reworded to "Illustration statements such as "117 photogravure plates, 26

LCRI	RDA	Retain In full	Retain revised	Omit	Decision Needed	Notes
						colour plates," "with 115 illustrations," "illustrated with 10 woodcuts," etc., are not statements of responsibility unless an artist or illustrator is named in the phrase."
1.1G1 [Items without a collective title]	2.3.2.9		X			Useful guidance not to apply second paragraph of 2.3.2.9 unless 1st paragraph is inapplicable
1.1G2 [Items without a collective title]	2.3.2.9		X =>	X		Combine with revised LCRI 1.1G1 if LC wants to continue to allow cataloger judgment for maps, microforms, rare materials
1.1G3 [Items without a collective title]	2.3.2.9			X		Doesn't seem relevant in RDA environment (see 1.1F4 comment)
1.2B4 [Edition statement]	2.5.2.2 with 2.2.4		X			Under 2.2.4 an edition statement doesn't need to come from the item itself, so presumably under RDA the cataloger could make up an edition statement if "records would otherwise show exactly the same information", but it isn't obvious in RDA, so if LC wants to continue the practice an RI is needed.
1.2B5 [Edition statement]	2.5.3		X			See 1.1F11 comment

1.4A2 [Sources of information]	2.2.4 2.20.7.3		X			The information about what to do about stamps or labels seems useful, and not explicitly in RDA although notes for stamps/labels are mentioned in 2.20.7.3. The stuff about CIP should be deleted and moved to a CIP manual (applies to more than publisher statements, anyway)
1.4C7 [Place of publication, distribution, etc.]	2.8.2.3		X			Useful guidance for when it is “important for identification or access” to include the address. The LCRI is rather complex, however, and could be simplified. NOTE: A basic LCRI needed on whether to record place of publication at all since it is not core.
1.4D1 [Name of publisher, distributor, etc.]	2.8.4.1		X			Useful guidance for what constitutes a “publisher”, not found in the RDA definition.
1.4D2 [Name of	2.8.1.4 2.8.4.3		X			RDA does not contemplate shortening

publisher, distributor , etc.]						publisher names. LCRI needs to say whether to apply the optional omission in 2.8.1.4
1.4D3 [Name of publisher, distributor , etc.]	2.8.1.4 2.8.4.3			X		RDA does not contemplate shortening publisher names so no need for rules about what to retain or omit
1.4D4 [Name of publisher, distributor , etc.]	2.8.4 core note 2.8.4.5 2.8.4.7 2.9		X			LCRI needed on whether to record publisher names beyond the core first recorded name. The LCRI could be greatly simplified, however. Guidance about recording distributor would be helpful since it's not core unless there's no publisher. CIP info should go to a separate CIP manual.
1.4D5 [Name of publisher, distributor , etc.]	2.8.4.7			X		
1.4D6 [Name of publisher, distributor , etc.]	2.8.4.7			X		"s.n." not used in RDA, instructions on what to do are clear
1.4E [Statemen t of function of publisher, distributor , etc.]	2.9.4.4 option	X				
1.4E1 [Statemen t of function of publisher, distributor , etc.]	2.9.4.4			X

n, distribution, etc.]						an RI continuing the connection of the publication date with the edition, which seems to be lost in RDA. In the existing RI, the guidance for Gregorian and non-Gregorian dates seems still relevant and not in RDA. Info about later publication dates is implicit in RDA but not spelled out, so still useful. Move CIP stuff to separate manual.
1.4F2 [Date of publication, distribution, etc.]	2.10.6			X		Probably not necessary, though the info about how to interpret GPO dates is possibly useful. The guidance for multiple dates does not seem necessary for identification of the resource, though useful for some early pre-Gregorian dates.
1.4F5 [Date of publication, distribution, etc.]	2.11		X			LCRI needs to say whether to record copyright date even if there's already a publication date, since in that case it's a non-core element. Delete part about the symbol (RI might say whether to use "©" or "copyright", though)
1.4F6 [Date of publication, distribution, etc.]			X or	X		Some useful guidance but seems excessively complex

distribution, etc.]						
1.4F8 [Dates for serials, integrating resources, and multipart items]	2.8.6.5			X		Not an option in RDA; the guidance about temporary dates might be useful, but found in 1.0C
1.4G [Place of manufacture, name of manufacturer, date of manufacture]				X		Only relevant in ISBD environment
1.4G4 [Place of manufacture, name of manufacturer, date of manufacture]			X or	X		Since date of manufacture is not core unless there is no date of publication present, RI possibly needed to decide whether to record both. However, this RI seems unnecessarily fussy. I suggest deleting and always going for the publication date even if cataloging a later printing and the library doesn't have the first printing (except possibly in rare materials cataloging)

						LCRI gives useful guidance for when to record the relationship. It should probably be given with ch. 27 (related manifestations). The guidance for recording the relationship with a collection is a whole-part relationship between works—should probably go somewhere in 24.4. But I would think we still need guidance on when to record the relationship

Titles]	2.3; 6.2; 6.15; 6.20; 6.23; 6.26		x			This LCRI is still necessary as it gives guidance on WHEN to record variant titles, including making up variants out of whole cloth (e.g. “&” expanded to “and”). It will be tricky to correctly split out and connect all the parts of this LCRI to the many places in RDA that deal with variant titles. This mammoth and complex LCRI could also stand a great deal of simplification. But much of the guidance is still needed
