- Charged several Task Groups of expert catalogers to develop reworked PCC BSR (BIBCO Standard Records) for non-book formats to use one encoding level. This charge involved Cartographic Materials, Rare Books, Notated Music, Sound Recordings, Moving Image Materials, Graphic Materials, and Electronic Resources. These BSRs were reviewed by SCS at every stage of development and sent to PoCo in June 2010. They were accepted and went into effect on October 1, 2010.
- Reviewed and recommended changes to the Provider Neutral Guidelines (and Vendor Guide). These were posted on the PCC Website on September 15, 2010.
- Reviewed and recommended changes to the BSR for Printed Books (now Textual Monographs). These were changes arising from discussions with the aforementioned Task Groups. This has gone into effect on Oct. 1, 2010.

Current Activities:

- Development of BIBCO Standard Record Supplemental Requirements for electronic monographic resource other than Leader/06=Computer Files Materials. This is a bridging document between the Provider Neutral Guidelines and the non-book formats. Expected completion date to turn over to PoCo: Early November 2010
- Consideration of two more BSRs (one for Collections and one for Archival Collections). Expected completion date to turn over to PoCo: Early December 2010
