

1. The subdivision -Imprints. Use the free-floating form subdivision **-Imprints** under individual regions, countries, cities, etc., for lists of works published in those places without regard to the language in which they were published, for example, **United States-Imprints**.

2. Phrase headings. Use phrase headings of the type **[language] imprints** for lists of works published in a particular language. Use geographic subdivision to refer to the place of origin, for example, **English imprints-India**.

3 Imprints from places where a single language predominates. As a general rule, assign only the heading **[place]-Imprints** for lists of works published in places where a single language is predominant, for example, the United States. Since English is the predominant language in the United States, do not assign an additional heading of the type **English imprints- United States**.

4. Assignment of additional heading with [language] imprints. When assigning a heading of the type **[language] imprints** subdivided by place, assign an additional heading of the type **[place]-Imprints**. *Example:*

Title: A list of books in English published in India.
 650 #0 \$a English imprints \$z India.
 651 #0 \$a India \$v Imprints.

5. Catalogs. For catalogs listing imprints existing at designated localities or available from specified sources, assign as appropriate either **[place]-Imprints-Catalogs** or **[language] imprints-Catalogs**.

Note: The place used with either heading refers to place of origin.

Example:

Title: The Rajasthan University Library catalog of Indian imprints in English.
 650 #0 \$a English imprints \$z India \$v Catalogs.
 651 #0 \$a India \$v Imprints \$v Catalogs.
 610 20 \$a Rajasthan University Library \$v Catalogs.

H 1660 Imprints

6. *-Bibliography not used.* Do not further subdivide headings of the type [*language*] **imprints** and [*place*]-**Imprints** by the subdivision **-Bibliography**.

7. *Imprints on a specific topic.* For lists of imprints on a specific topic, also assign a heading of the type [*topic*]-**Bibliography**. *Example:*

Title: A list of English-language books on medicine published in India.

650 #0 \$a Medicine \$v Bibliography.
650 #0 \$a English imprints \$z India.
651 #0 \$a India \$v Imprints.
