Notes

1. Only the vowel forms that appear at the beginning of a syllable are listed; the forms used for vowels following a consonant can be found in grammars; no distinction between the two is made in transliteration.

2. The vowel *a* is implicit after all consonants and consonant clusters and is supplied in transliteration, with the following exceptions:
 - a) when another vowel is indicated by its appropriate sign; and
 - b) when the absence of any vowel is indicated by the subscript symbol (_̣) called *halanta* or *virāma*.
3. Exception: *Anusvāra* is transliterated by:
 - a) *ṅ* before gutturals,
 - b) *ñ* before palatals,
 - c) *ṇ* before cerebrals,
 - d) *n* before dentals, and
 - e) *m* before labials.
4. When doubled, *avagraha* is transliterated by two apostrophes (" ' ' ").
