Exercise 5 -- Identifying Expressions

What is the *authorized access point* for the following expressions, based on LC policy? Give the MARC tags used in a bibliographic record: 1XX/240/245. Because the identification of an *expression* is built on the identification of a *work*, you should refer back to Exercise 4. As in Exercise 4, the only conflicts in the database are the ones indicated below.

- a. a German translation of a journal with the title proper “Advances in astrophysics”

- b. a Spanish translation of a book by Susan Smith with the title “Spain and Portugal”

- c. a Portuguese translation of a book with no known authors with the title “Spain and Portugal” published in 2008 by ABC Press

- d. a Portuguese translation of another book with no known authors with the title “Spain and Portugal” published in 2011 by DEF Press

- e. a compilation of works by Roberto Lopez with the title “Complete works”, published in 2009
