

MDS Bibliographic and Authority Files from July 2012 Corrected and Re-Posted

On Saturday, July 14 and Sunday July 15, the MDS Bibliographic and Authority (new/change) records input files were inadvertently processed as null files—thus resulting in incorrect distribution files being posted for those days.

This was not determined until after the Monday, July 16 daily processing of that day's Bibliographic and Authority records.

After Monday's daily processing was completed, the corrected Bibliographic and Authority files from July 14 and July 15 were re-processed.

This serves as an announcement of the re-posting of the July 14 and July 15 corrected distribution files. MDS-Books All Daily and Daily Names subscribers are encouraged to reprocess, if they have not already done so, the new distribution files for July 14 and 15.
