

Federal Library Bibliographic Record Analysis
2014

U.S. Government Printing Office, Library Services & Content Management Government Printing Office

<http://catalog.gpo.gov>

Note: Government Printing Office (GPO) records do not represent GPO holdings. Most holdings will be found within the Federal Depository Library network.

In accordance with Title 44 of the United States Code, GPO is responsible for administering the nationwide Federal Depository Library Program (FDLP), as well as the Cataloging & Indexing Program (C&I). Through the FDLP, information products from all three branches of the Federal Government are disseminated to Federal depository libraries nationwide that, in turn, maintain and provide free public access to these information products. Anyone can locate one of the almost 1,200 nationwide libraries using GPO's Federal Depository Library Directory. In addition, GPO makes electronic Government information products accessible to the public via its Federal Digital System. GPO is also charged with creating cataloging and a comprehensive index for all public documents issued or published by the Federal Government that are not confidential in character.

Bibliographic level as percent of total records
