**Registration**

This program is FREE, but [registration](#) is required. Limited to 25 attendees.

# FEDLINK Great Escapes Tour

## National Institute of Standards and Technology (NIST) Research Library

Founded in 1901, NIST is a non-regulatory federal agency within the U.S. Department of Commerce. NIST's mission is to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve the quality of life. The mission of the Information Services Office (ISO) is "to support and enhance NIST's scientific and technological community through a comprehensive program of knowledge management." To support this mission, ISO provides professional scientific and technical information assistance to NIST research staff throughout their research and publishing cycles.

The NIST Research Library was the proud winner of the 2003, 2008 and 2013 Federal Library of the Year Award and the 2007 Silver Award from the Maryland Performance Excellence Award (MPEA) Program. Tour of the library includes the Innovation Corner, Emerging Technology Bar, 3D Printers and Data Visualization tools. Also included will be updates on plans for the Library of the 21st Century, digitization projects within the NIST Digital Archives and a tour of the NIST Museum.
