Are you struggling to identify what to measure and how to identify the most important metrics for the services you provide through your library? The FEDLINK Research and Metrics Working Group hosting a Webinar for federal libraries and information centers to tackle this topic once and for all.

The Webinar, moderated by Richard Huffine, Librarian, Consumer Financial Protection Bureau, will discuss the appropriate measures for different types of products like journal access, books (print and digital), data resources, e-learning products, news, and more.

Have a question about metrics that you would like to see addressed in this event? Please send an email to FLICCFNO@loc.gov.
