**The James Melville Gilliss Library**, located on the grounds of the United States Naval Observatory, is one of the preeminent astronomical libraries in the United States. The library's collection includes over 90,000 books and an 800-volume rare book collection featuring many of the most important scientific works dating from 1482 to 1800, making it one of the largest such collections in the country.

The tour will feature the facility, highlights from the rare book collection, and an opportunity to see the observatory's telescope, master clocks, and a view of the city from the rooftop.
