

## Appendix B

### Mapping of FRBR to MARC Data Elements

#### Purpose

The tables that follow map the entities, logical attributes, and relationships defined in the model developed for the IFLA study on the Functional Requirements for Bibliographic Records (FRBR) to data elements contained in the MARC format. The mapping is part of a functional analysis of the MARC format that is intended to serve as a means of establishing a frame of reference for future development of the format. More specifically, the analysis is intended to provide a tool that will serve to relate the design of the format, at a logical or conceptual level, to the design of the descriptive standards that govern the key data content of the MARC record. The project will serve as well to provide an analytical focus for a number of critical issues related to the description of electronic resources and the use of MARC data in a cross-sectoral networked environment.

#### Scope

The tables list the entities, attributes, and relationships defined in the FRBR model that have corresponding data elements defined in the MARC bibliographic and holdings formats. The FRBR entities are listed in the order in which they are presented in the FRBR model. Under each entity, attributes pertaining to the entity that is the primary object of description in the record are listed first, followed by relationships to other entities of the same type and attributes of those related entities.

#### Symbols

- |   |  |
|---|--|
| ≈ | A wavy equals sign indicates an inexact correspondence between the entity attribute or relationship defined in FRBR and the corresponding MARC data element. The anomaly is explained in an accompanying footnote. |
| ⇒ | An arrow indicates that the MARC data element pertains to an attribute of a related entity, not the entity that is the primary focus of the record, or to a relationship between that entity and a related entity. |
| ? | A question mark indicates that clarification is required on the nature or scope of application of the MARC data element before its correspondence to FRBR can be confirmed.  |

## **Terminology**

The names of FRBR entities, attributes, and relationships are taken directly from the FRBR model. In some cases they have been abbreviated or shortened to fit within the layout of the table.

The names of MARC data elements are taken directly from the format documentation. In some cases they have been abbreviated or shortened to fit within the layout of the table.

**Notes:**

1. The data recorded in MARC 130 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
2. The data recorded in MARC 240 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
3. The data recorded in MARC 243 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
4. The data recorded in MARC 630 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
5. The title recorded in MARC 740 subfield ‡a corresponds to the attribute defined in FRBR as “title of work” (pertaining to a component work contained in the manifestation described) if the value of the second indicator is “2”; otherwise the title may correspond to “title of work” for a related work.
6. The title recorded in MARC 740 subfield ‡n corresponds to the attribute defined in FRBR as “title of work” (pertaining to a number for a component work contained in the manifestation described) if the value of the second indicator is “2”; otherwise the title may correspond to “title of work” (i.e., number of work) for a related work.
7. The title recorded in MARC 740 subfield ‡p corresponds to the attribute defined in FRBR as “title of work” (pertaining to a part or section for a component work contained in the manifestation described) if the value of the second indicator is “2”; otherwise the title may correspond to “title of work” (i.e., number of work) for a related work.
8. The values “a” (single map), “d” (globe) and “e” (atlas) in MARC 006 (Maps) character position 08 correspond to form of work as defined in FRBR. The value “b” (map series) concatenates form of work with a manifestation-to-manifestation relationship (whole/part). The value “c” (map serial) concatenates form of work with a sub-category of manifestation (serial). The value “f” (separate map supplement for another work) concatenates form of work with a work-to-work relationship (supplement). The value “g” (map bound as part of another work) concatenates form of work with an item-to-item relationship (reconfiguration).
9. The values “k” (calendar), “l” (puzzle), and “n” (game) in MARC 006 (Maps) character positions 16-17 correspond to form of work as defined in FRBR. The values “j” (picture card, post card), “o” (wall map), “p” (playing cards), and “r” (loose-leaf) correspond to form of carrier (an attribute of manifestation). The value “e” (manuscript) has no corresponding attribute defined in FRBR, but it would be more appropriately associated with manifestation.
10. The values “d” (diorama), “g” (game), “i” (picture), “l” (technical drawing), “n” (chart), “r” (realia), and “w” (toy) in MARC 006 (Visual Materials) character position 16 correspond to type of work as defined in FRBR. The values “k” (graphic) and “q” (model) correspond to form of expression. The values “b” (kit), “f” (filmstrip), “m” (motion picture), “o” (flash card), “p” (microscope slide), “s” (slide), “t” (transparency), and “v” (videorecording) correspond to form of carrier (an attribute of manifestation). The correspondence between the values “g” (game), “r” (realia), and “w” (toy) to attributes of the entities defined in FRBR is ambiguous. The values “a” (art original) and “c” (art reproduction) concatenate form of work with a manifestation-to-manifestation relationship type (reproduction).

11. The values “a” (single map), “d” (globe) and “e” (atlas) in MARC 008 (Maps) character position 25 correspond to form of work as defined in FRBR. The value “b” (map series) concatenates form of work with a manifestation-to-manifestation relationship (whole/part). The value “c” (map serial) concatenates form of work with a sub-category of manifestation (serial). The value “f” (separate map supplement for another work) concatenates form of work with a work-to-work relationship (supplement). The value “g” (map bound as part of another work) concatenates form of work with an item-to-item relationship (reconfiguration).
12. The values “k” (calendar), “l” (puzzle), and “n” (game) in MARC 008 (Maps) character positions 33-34 correspond to form of work as defined in FRBR. The values “j” (picture card, post card), “o” (wall map), “p” (playing cards), and “r” (loose-leaf) correspond to form of carrier (an attribute of manifestation). The value “e” (manuscript) has no corresponding attribute defined in FRBR, but it would be more appropriately associated with manifestation.
13. The values “d” (diorama), “g” (game), “i” (picture), “l” (technical drawing), “n” (chart), “r” (realia), and “w” (toy) in MARC 008 (Visual Materials) character position 33 correspond to type of work as defined in FRBR. The values “k” (graphic) and “q” (model) correspond to form of expression. The values “b” (kit), “f” (filmstrip), “m” (motion picture), “o” (flash card), “p” (microscope slide), “s” (slide), “t” (transparency), and “v” (videorecording) correspond to form of carrier (an attribute of manifestation). The correspondence between the values “g” (game), “r” (realia), and “w” (toy) to attributes of the entities defined in FRBR is ambiguous. The values “a” (art original) and “c” (art reproduction) concatenate form of work with a manifestation-to-manifestation relationship type (reproduction).
14. The data recorded in MARC 300 subfield †e may include elements corresponding to form of work (e.g., “atlas”) for a component as defined in FRBR. It may also include elements corresponding to form of carrier (e.g., “computer disc”).
15. The values “a” (single map), “d” (globe) and “e” (atlas) in MARC 841 (Maps) subfield †b, character position 25 correspond to form of work as defined in FRBR. The value “b” (map series) concatenates form of work with a manifestation-to-manifestation relationship (whole/part). The value “c” (map serial) concatenates form of work with a sub-category of manifestation (serial). The value “f” (separate map supplement for another work) concatenates form of work with a work-to-work relationship (supplement). The value “g” (map bound as part of another work) concatenates form of work with an item-to-item relationship (reconfiguration).
16. The values “k” (calendar), “l” (puzzle), and “n” (game) in MARC 841 (Maps) subfield †b, character positions 33-34 correspond to form of work as defined in FRBR. The values “j” (picture card, post card), “o” (wall map), “p” (playing cards), and “r” (loose-leaf) correspond to form of carrier (an attribute of manifestation). The value “e” (manuscript) has no corresponding attribute defined in FRBR, but it would be more appropriately associated with manifestation.
17. The values “d” (diorama), “g” (game), “i” (picture), “l” (technical drawing), “n” (chart), “r” (realia), and “w” (toy) in MARC 841 (Visual Materials) subfield †b, character position 33 correspond to type of work as defined in FRBR. The values “k” (graphic) and “q” (model) correspond to form of expression. The values “b” (kit), “f” (filmstrip), “m” (motion picture), “o” (flash card), “p” (microscope slide), “s” (slide), “t” (transparency), and “v” (videorecording) correspond to form of carrier (an attribute of manifestation). The correspondence between the values “g” (game), “r” (realia), and “w” (toy) to attributes of the entities defined in FRBR is ambiguous. The values “a” (art original) and “c” (art reproduction) concatenate form of work with a manifestation-to-manifestation relationship type (reproduction).

18. In special cases the medium of performance recorded in MARC 048 subfield ‡a may correspond to the medium of performance for an arrangement rather than the medium of performance for which the work was originally composed.
19. In special cases the medium of performance recorded in MARC 048 subfield ‡b may correspond to the medium of performance for an arrangement rather than the medium of performance for which the work was originally composed.
20. The information recorded in MARC 555 subfield ‡a may also correspond to a whole/part work-to-work relationship as defined in FRBR.
21. The data recorded in MARC 730 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
22. The data recorded in MARC 760 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
23. The data recorded in MARC 762 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
24. The data recorded in MARC 765 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
25. The data recorded in MARC 767 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
26. The data recorded in MARC 770 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
27. The data recorded in MARC 772 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
28. The data recorded in MARC 773 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
29. The data recorded in MARC 774 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
30. The data recorded in MARC 775 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”

31. The data recorded in MARC 776 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
32. The data recorded in MARC 777 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
33. The data recorded in MARC 780 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
34. The data recorded in MARC 785 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
35. The data recorded in MARC 786 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
36. The data recorded in MARC 787 subfield ‡s may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
37. The data recorded in MARC 830 subfield ‡a may include elements that correspond to the attributes defined in FRBR as “other distinguishing characteristic.”
38. The value “a” (language material) in MARC 006 (Books) character position 00 corresponds to “alpha numeric notation” as a form of expression as defined in FRBR. The value “t” (manuscript language material) concatenates form of expression as defined in FRBR with an attribute that is undefined in FRBR but which would be more appropriately associated with the manifestation.
39. The values “a” (numeric data), “c” (representational), “d” (document), and “h” (sound) in MARC 006 (Computer files) character position 09 correspond to form of expression as defined in FRBR. The values “b” (computer program), “e” (bibliographic data), “f” (font), “g” (game), and “i” (interactive media) appear to correspond to form of work as defined in FRBR.
40. The value “e” (cartographic material) in MARC 006 (Maps) character position 00 corresponds to “cartographic image” and “cartographic object” as forms of expression as defined in FRBR. The value “m” (manuscript cartographic material) concatenates form of expression as defined in FRBR with an attribute that is undefined in FRBR but which would be more appropriately associated with the manifestation.
41. The values “i” (non-musical sound recording) and “j” (musical sound recording) in MARC 006 (Music) character position 00 concatenate form of expression as defined in FRBR (spoken word and musical sound) with a sub-category of manifestation (sound recording). The values “c” (printed music) and “d” (manuscript music) concatenate form of expression (musical notation) as defined in FRBR with attributes that are undefined in FRBR but which are more appropriately associated with the manifestation.
42. The value “b” (two-dimensional nonprojectable graphic) in MARC 006 (Visual Materials) character position 00 concatenates form of expression (graphic image) with form of carrier (an attribute of the manifestation). The value “g” (projected medium) corresponds to a sub-category of manifestation as

defined in FRBR (visual projection). The value “o” (kit) corresponds to form of carrier (an attribute of manifestation). The value “r” (three-dimensional artifact or naturally occurring object) corresponds to form of expression.

43. The value “a” (map) in MARC 007 (Map) character position 00 corresponds to two forms of expression (cartographic image and cartographic object) as defined in FRBR, but it specifically excludes one sub-type of cartographic object (globe).
44. The value “d” (globe) in MARC 007 (Globe) character position 00 corresponds to cartographic object as a form of expression defined in FRBR, but it is specifically limited to only one sub-type of cartographic object.
45. The value “k” (nonprojected graphic) in MARC 007 (Nonprojected Graphic) character position 00 corresponds to graphic as a form of expression as defined in FRBR but the category is restricted to images embodied in specific forms of carrier (i.e., nonprojectable carriers).
46. The values “a” (numeric data), “c” (representational), “d” (document), and “h” (sound) in MARC 008 (Computer files) character position 26 correspond to form of expression as defined in FRBR. The values “b” (computer program), “e” (bibliographic data), “f” (font), “g” (game), and “i” (interactive media) appear to correspond to form of work as defined in FRBR.
47. The values “a” (numeric data), “c” (representational), “d” (document), and “h” (sound) in MARC 841 (Computer files) subfield ‡b, character position 26 correspond to form of expression as defined in FRBR. The values “b” (computer program), “e” (bibliographic data), “f” (font), “g” (game), and “i” (interactive media) appear to correspond to form of work as defined in FRBR.
48. The relationship reflected in MARC 775 subfield ‡i may also correspond to the reproduction relationship (manifestation-to-manifestation) as defined in FRBR.
49. The place code recorded in MARC 008 (All) character positions 15-17 may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
50. The place code recorded in MARC 044 subfield ‡a may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
51. The place code recorded in MARC 044 subfield ‡b may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
52. The place code recorded in MARC 044 subfield ‡c may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
53. The place code recorded in MARC 841 subfield ‡b, character positions 15-17 may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
54. The date recorded in MARC 008 (All) character positions 07-10 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).

55. The date recorded in MARC 008 (All) character positions 11-14 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
56. The date recorded in MARC 046 subfield ‡b may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
57. The date recorded in MARC 046 subfield ‡c may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
58. The date recorded in MARC 046 subfield ‡d may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
59. The date recorded in MARC 046 subfield ‡e may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
60. The date recorded in MARC 841 subfield ‡b, character positions 07-10 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
61. The date recorded in MARC 841 subfield ‡b, character positions 11-14 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
62. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Books) character position 06 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
63. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Maps) character position 12 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
64. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Music) character position 06 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR

corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).

65. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Serials) character position 06 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
66. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Visual Materials) character position 12 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
67. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Mixed Materials) character position 06 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
68. The values in MARC 007 (Map) character position 01 concatenate form of carrier as defined in FRBR with form of expression.
69. The value “r” (regular print reproduction) in MARC 008 (Books) character position 23 concatenates form of carrier as defined in FRBR with a type of manifestation-to-manifestation relationship (reproduction).
70. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Maps) character position 29 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
71. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Music) character position 23 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
72. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Serials) character position 23 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
73. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Visual Materials) character position 29 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).

74. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Mixed Materials) character position 23 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
75. The data recorded in MARC 242 subfield ‡h may correspond to a form of expression as defined in FRBR (e.g. “music,” “text”), or it may concatenate a form of work with a manifestation-to-manifestation relationship (e.g., “art reproduction”).
76. The data recorded in MARC 245 subfield ‡h may correspond to a form of expression as defined in FRBR (e.g. “music,” “text”), or it may concatenate a form of work with a manifestation-to-manifestation relationship (e.g., “art reproduction”).
77. The data recorded in MARC 246 subfield ‡h may correspond to a form of expression as defined in FRBR (e.g. “music,” “text”), or it may concatenate a form of work with a manifestation-to-manifestation relationship (e.g., “art reproduction”).
78. The data recorded in MARC 247 subfield ‡h may correspond to a form of expression as defined in FRBR (e.g. “music,” “text”), or it may concatenate a form of work with a manifestation-to-manifestation relationship (e.g., “art reproduction”).
79. The value “r” (regular print reproduction) in MARC 841 (Books) subfield ‡b, character position 23 concatenates form of carrier as defined in FRBR with a type of manifestation-to-manifestation relationship (reproduction).
80. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 841 (Maps) subfield ‡b, character position 29 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
81. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 841 (Music) subfield ‡b, character position 23 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
82. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 841 (Serials) subfield ‡b, character position 23 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).
83. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 841 (Visual Materials) subfield ‡b, character position 29 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation).

84. The values "a" (microfilm), "b" (microfiche), and "c" (microopaque) in MARC 841 (Mixed Materials) subfield ‡b, character position 23 correspond to form of carrier as defined in FRBR. The value "d" (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value "f" (Braille). The value "r" (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value "s" (electronic) corresponds to capture mode (an attribute of manifestation).
85. The data recorded in MARC 300 subfield ‡a may also include elements corresponding to extent of expression (an attribute of expression) as defined in FRBR.
86. The values "a" (regular print) and "b" (large print) in MARC 007 (Text) character position 01 correspond to type size (an attribute of manifestation) as defined in FRBR. There are no attributes defined in FRBR corresponding to the values "c" (Braille) or "d" (loose leaf).
87. One element of the information recorded in MARC 546 subfield ‡b may correspond to file characteristics (an attribute of manifestation) as defined in FRBR.
88. The information recorded in MARC 538 subfield ‡a may also include elements corresponding to file characteristics and special reproduction characteristic (attributes of manifestation) as defined in FRBR.
89. The data recorded in MARC 300 subfield ‡b may include elements corresponding to physical medium, capture mode, playing speed, groove width, kind of cutting, tape configuration, kind of sound, special reproduction characteristics, colour, polarity, presentation format, and file characteristics (all attributes of manifestation) as defined in FRBR. It may also include elements corresponding to form of work (e.g. "illustration").
90. The place code recorded in MARC 533 subfield ‡7, character positions 09-11 may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
91. The place code recorded in MARC 843 subfield ‡7, character positions 09-11 may correspond to place of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the place code may correspond to place of manufacture (another attribute of manifestation).
92. The date recorded in MARC 533 subfield ‡7, character positions 01-04 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
93. The date recorded in MARC 533 subfield ‡7, character positions 05-08 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
94. The date recorded in MARC 843 subfield ‡7, character positions 01-04 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 1 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).

95. The date recorded in MARC 843 subfield †7, character positions 05-08 may correspond to date of publication/distribution (an attribute of manifestation) as defined in FRBR. However, the date recorded as Date 2 may correspond to date of manufacture (another attribute of manifestation) or date of expression (an attribute of expression).
96. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 006 (Serials) character position 05 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation). Note also that the carrier referenced by the values in MARC 006 (Serials) character position 05 is not the carrier of the manifestation described in the record, but the carrier of the original manifestation of the serial.
97. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 008 (Serials) character position 22 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation). Note also that the carrier referenced by the values in MARC 006 (Serials) character position 05 is not the carrier of the manifestation described in the record, but the carrier of the original manifestation of the serial.
98. The value “r” (regular print reproduction) in MARC 533 subfield †7, character position 14 concatenates form of carrier as defined in FRBR with a type of manifestation-to-manifestation relationship (reproduction).
99. The values “a” (microfilm), “b” (microfiche), and “c” (microopaque) in MARC 841 (Serials) subfield †b, character position 22 correspond to form of carrier as defined in FRBR. The value “d” (large print) corresponds to type size (another attribute of manifestation) as defined in FRBR. There is no attribute defined in FRBR corresponding to the value “f” (Braille). The value “r” (regular print reproduction) corresponds to a manifestation-to-manifestation relationship (reproduction). The value “s” (electronic) corresponds to capture mode (an attribute of manifestation). Note also that the carrier referenced by the values in MARC 006 (Serials) character position 05 is not the carrier of the manifestation described in the record, but the carrier of the original manifestation of the serial.
100. The value “r” (regular print reproduction) in MARC 533 subfield †7, character position 14 concatenates form of carrier as defined in FRBR with a type of manifestation-to-manifestation relationship (reproduction).
101. The name recorded in MARC 720 subfield †a corresponds to the attributes defined in FRBR as “name of person” if the value of the first indicator is “1”; otherwise the name may correspond to “name of corporate body” (an attribute of corporate body).
102. In some cases the data recorded in MARC 100 subfield †c may correspond to the attribute defined in FRBR as “other designation associated with the person”.
103. In some cases the data recorded in MARC 600 subfield †c may correspond to the attribute defined in FRBR as “other designation associated with the person”.

104. In some cases the data recorded in MARC 700 subfield ꞑc may correspond to the attribute defined in FRBR as “other designation associated with the person”.
105. In some cases the data recorded in MARC 800 subfield ꞑc may correspond to the attribute defined in FRBR as “other designation associated with the person”.
106. The data recorded in MARC 110 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
107. The data recorded in MARC 111 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
108. The data recorded in MARC 610 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
109. The data recorded in MARC 611 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
110. The data recorded in MARC 710 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
111. The data recorded in MARC 711 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
112. The data recorded in MARC 810 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
113. The data recorded in MARC 811 subfield ꞑa may include elements that correspond to the attributes defined in FRBR as “place associated with the corporate body,” “date associated with the corporate body,” or “other designation associated with the corporate body.”
114. The data recorded in MARC 110 subfield ꞑd may include the date of signing of a treaty, which is defined in FRBR as date of work (an attribute of work).
115. The data recorded in MARC 610 subfield ꞑd may include the date of signing of a treaty, which is defined in FRBR as date of work (an attribute of work).
116. The data recorded in MARC 710 subfield ꞑd may include the date of signing of a treaty, which is defined in FRBR as date of work (an attribute of work).
117. The data recorded in MARC 810 subfield ꞑd may include the date of signing of a treaty, which is defined in FRBR as date of work (an attribute of work).

118. The data recorded in MARC 518 subfield ꞑa may also include elements corresponding to term for place (an attribute of place) as defined in FRBR.
