Librarian Spofford’s report to Congress, 1897.

Management Concerns

- The Librarian reports:

  “...newspapers are piled upon the floor filled aisles and alcoves of seven of the nine decks of the south stacks. The unbound mass, which could be estimated only by tons, occupied three large rooms...it was piled upon the floor 6 feet deep.” (1902)

1920-1940: More Room!

The Librarian reports:

“The difficulty in preserving the files in their present unbound condition is obvious. The wear while in use, chances of mutilation, and the danger of loss of copies, are all greatly increased. Meanwhile the demand for these files is continuous. Unless relief can be found from the existing situation we are threatened with serious losses and gaps in our greatest newspaper collections.” (1916)
