1033. The Draft Amendments to the Penal Code of El Salvador, in an article entitled “Perfidy”, provide for a prison sentence for “anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, simulates the status of a protected person”, including the wounded and sick.¹¹⁰⁶

1034. Under Ireland’s Geneva Conventions Act as amended, any “minor breach” of AP I, including violations of Article 37(1) AP I, is a punishable offence.¹¹⁰⁷

1035. Nicaragua’s Draft Penal Code, in an article entitled “Perfidy”, punishes “anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, simulates the status of a protected person”, including the wounded and sick.¹¹⁰⁸

¹¹⁰² US, *Air Force Pamphlet* (1976), § 8-6(a), see also § 8-3(a).

¹¹⁰⁸ Nicaragua, *Draft Penal Code* (1999), Articles 449 and 452.

1036. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹¹⁰⁹

National Case-law

1037. No practice was found.

Other National Practice

1038. No practice was found.

III. Practice of International Organisations and Conferences

United Nations

1039. No practice was found.

Other International Organisations

1040. No practice was found.

International Conferences

1041. Commenting on Article 35 of draft AP I (now Article 37 AP I), a Working Group reporting to Committee III of the CDDH stated that "feigning death in order to kill an enemy once he turned his back would be perfidy".¹¹¹⁰

IV. Practice of International Judicial and Quasi-judicial Bodies

1042. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1043. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that "to pretend being incapacitated by wounds or sickness" constitutes an act of perfidy.¹¹¹¹

VI. Other Practice

1044. No practice was found.

¹¹⁰⁹ Norway, *Military Penal Code as amended* (1902), § 108(b).

Simulation of surrender

Note: For practice concerning the improper use of the white flag of truce which does not amount to perfidy, see *supra* section B of this chapter.

I. Treaties and Other Instruments

Treaties

1045. Article 37(1)(a) AP I lists “the feigning... of a surrender” as an act of perfidy. Article 37 AP I was adopted by consensus.¹¹¹²

1046. Under Article 85(3) AP I, “the perfidious use, in violation of Article 37, ... of ... protective signs recognized by the Conventions or this Protocol” is a grave breach of AP I. Article 85 AP I was adopted by consensus.¹¹¹³

1047. Article 21(1) of draft AP II submitted by the ICRC to the CDDH provided that “when carried out in order to commit or resume hostilities, ... the feigning... of a surrender” was considered as perfidy.¹¹¹⁴ However, this proposal was deleted from draft Article 21 adopted in Committee III of the CDDH.¹¹¹⁵

1048. Under Article 8(2)(b)(vii) of the 1998 ICC Statute, “making improper use of a flag of truce, ... resulting in death or serious personal injury” is a war crime in international armed conflicts.

Other Instruments

1049. Article 8 of the 1880 Oxford Manual prohibits the making of “treacherous attempts upon the life of an enemy; as for example... by feigning to surrender”.

1050. Paragraph 111(b) of the 1994 San Remo Manual states that “perfidious acts include the launching of an attack while feigning... surrender”.

1051. Pursuant to Article 20(b)(v) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “the perfidious use of... recognized protective signs” is a war crime.

1052. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(vii), “making improper use of a flag of truce, ... resulting in death or serious personal injury” is a war crime in international armed conflicts.

II. National Practice

Military Manuals

1053. Argentina’s Law of War Manual provides that “feigning the intent... to surrender” is an example of perfidy.¹¹¹⁶ It also states that “the perfidious

¹¹¹² CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 May 1977, p. 103.

¹¹¹³ CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 291.

¹¹¹⁴ CDDH, *Official Records*, Vol. I, Part Three, Draft Additional Protocols, June 1973, p. 39.

¹¹¹⁶ Argentina, *Law of War Manual* (1989), § 1.05(2)(1).

use...of...recognised protective signs" is a grave breach of AP I and a war crime.¹¹¹⁷

1054. Australia's *Commanders' Guide* provides that "acts which constitute perfidy include feigning of...an intent to...surrender".¹¹¹⁸ In a section entitled "Perfidy", it states that "it is unlawful to feign surrender for the purpose of inviting an enemy to lower his guard".¹¹¹⁹ The Guide further considers that "the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: ... feigning surrender in order to obtain military advantage".¹¹²⁰

1055. Australia's *Defence Force Manual* stresses that "acts which constitute perfidy include feigning of...an intent to...surrender".¹¹²¹ It further considers that "the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: ... feigning surrender in order to obtain military advantage".¹¹²²

1056. Belgium's *Teaching Manual for Officers* prohibits perfidy. For example, "feigning to surrender and then opening fire at the enemy who collects you as 'prisoner of war' is an aggravated act of perfidy if the white flag, which is a protective sign, is used".¹¹²³

1057. Belgium's *Teaching Manual for Soldiers* states that "using a white flag or feigning surrender in order to attack an adversary is strictly prohibited and constitutes a grave breach of the laws of war".¹¹²⁴

1058. Cameroon's *Instructors' Manual* provides that "feigning to surrender" is an example of perfidy.¹¹²⁵

1059. Canada's *LOAC Manual* states that "the following are examples of perfidy if a hostile act is committed while: ... feigning... to surrender".¹¹²⁶ It also considers that "feigning surrender of an aircraft and then firing on an unsuspecting adversary after such surrender was accepted" constitutes perfidy in air warfare.¹¹²⁷ It further identifies as a grave breach of AP I and a war crime the "perfidious use of... protective signs recognized by the Geneva Conventions or AP I".¹¹²⁸

1060. Colombia's *Directive on IHL* punishes "the perfidious use of... protective signs recognised under the law of war (the white flag... for example)".¹¹²⁹

¹¹¹⁷ Argentina, *Law of War Manual* (1989), § 8.03.

¹¹²⁶ Canada, *LOAC Manual* (1999), p. 6-2, § 9(a) (land warfare) and p. 7-2, § 17(a) (air warfare), see also p. 8-11, § 81(b) (naval warfare).

¹¹²⁷ Canada, *LOAC Manual* (1999), p. 7-2, § 18(b).

¹¹²⁸ Canada, *LOAC Manual* (1999), p. 16-2, § 8(a) and p. 16-3, § 16(f).

¹¹²⁹ Colombia, *Directive on IHL* (1993), Section III(D).

1061. Colombia's *Instructors' Manual* provides that "feigning surrender and then attacking is perfidy".¹¹³⁰

1062. Croatia's *LOAC Compendium* provides that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹¹³¹

1063. Croatia's *Commanders' Manual* states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: . . . feigning surrender".¹¹³²

1064. Ecuador's *Naval Manual* states that "feigning surrender in order to lure the enemy into a trap is an act of perfidy".¹¹³³ It adds that "it is a violation of the law of armed conflict to kill, injure, or capture the enemy by false indication of an intent to surrender . . . Such [act] of perfidy [is a] punishable war [crime]".¹¹³⁴ In addition, the manual states that "the following acts constitute war crimes: . . . treacherous request for quarter (for example, feigning surrender in order to gain a military advantage)".¹¹³⁵

1065. France's *LOAC Summary Note* provides that "it is prohibited to feign a protected status to invite the confidence of the enemy (abuse of . . . the white flag)".¹¹³⁶ Furthermore, it notes that "the perfidious use of protected signs and signals" is a grave breach of the law of war and a war crime.¹¹³⁷

1066. France's *LOAC Teaching Note* states that the recourse to perfidy is prohibited, "notably the abuse of the white flag".¹¹³⁸

1067. France's *LOAC Manual* states that "using a protective sign to deceive the enemy and reach an operational goal constitutes an act of perfidy".¹¹³⁹ It specifies that "simulating surrender to deceive the enemy is an act of perfidy which is prohibited by the law of armed conflicts".¹¹⁴⁰ It further provides that "the perfidious use of any protective sign recognised by international law constitutes a war crime".¹¹⁴¹

1068. Germany's *Military Manual* states that "it is . . . prohibited . . . to feign surrender".¹¹⁴² It further provides that "grave breaches of international humanitarian law are in particular: . . . perfidious . . . use of recognized protective signs".¹¹⁴³

1069. Under Hungary's *Military Manual*, feigning surrender constitutes an example of perfidy.¹¹⁴⁴ It also states that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹¹⁴⁵

- 1070.** Indonesia's Military Manual provides that "it is prohibited to kill or injure the enemy by perfidy, such as . . . to misuse the flag of truce".¹¹⁴⁶
- 1071.** Referring to Israel's Law of War Booklet, the Report on the Practice of Israel states that the IDF "prohibits the resort to perfidy to kill, injure or capture an adversary. Therefore, the IDF does not feign intent to surrender."¹¹⁴⁷
- 1072.** Israel's Manual on the Laws of War gives the following example of perfidy: "It is forbidden to use a white flag for an inappropriate purpose (posing as persons surrendering . . . with a view to gaining a military advantage)."¹¹⁴⁸
- 1073.** Under Italy's IHL Manual, grave breaches of international conventions and protocols, including "the perfidious use . . . of international protective signs", constitute war crimes.¹¹⁴⁹
- 1074.** Italy's LOAC Elementary Rules Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: . . . feigning of surrender".¹¹⁵⁰
- 1075.** Kenya's LOAC Manual notes that "the feigning of an intent to surrender . . . [is an example] of treachery".¹¹⁵¹
- 1076.** Under Madagascar's Military Manual, feigning surrender is prohibited.¹¹⁵²
- 1077.** The Military Manual of the Netherlands states that AP I "gives a number of examples of treacherous behaviour: . . . feigning to surrender".¹¹⁵³
- 1078.** The Military Handbook of the Netherlands provides that it is a prohibited method of warfare "to perform treacherous acts (for example, feigning . . . to surrender and then suddenly resume fighting)".¹¹⁵⁴ It also states that "misuse of the white flag is treachery".¹¹⁵⁵
- 1079.** New Zealand's Military Manual provides that "the feigning . . . of a surrender" is an example of perfidy.¹¹⁵⁶ It states that "another example of perfidious conduct, although rare, would be surrendering an aircraft and then firing on an unsuspecting adversary after the surrender was accepted".¹¹⁵⁷ The manual further states that "perfidious use of . . . protective signs recognised by the [Geneva] Conventions or [AP I]" constitutes a grave breach of AP I and a war crime.¹¹⁵⁸

¹¹⁵⁸ New Zealand, *Military Manual* (1992), §§ 1701(1) and 1703(3)(f).

1080. Nigeria's Military Manual gives the following example of "perjury" (perfidy): "feigning surrender".¹¹⁵⁹

1081. Nigeria's Manual on the Laws of War considers that "feigning submission for the purpose of misleading the enemy" is an "illegitimate tactic".¹¹⁶⁰ It adds that "treacherous request for quarter" constitutes a war crime.¹¹⁶¹

1082. Under Romania's Soldiers' Manual, feigning surrender is an act of perfidy.¹¹⁶²

1083. South Africa's LOAC Manual, in a paragraph on perfidy, provides that "it is forbidden to feign surrender".¹¹⁶³ It states that "the perfidious use of . . . the white flag" is a grave breach of AP I and a war crime.¹¹⁶⁴ In addition, the manual provides that "treacherous requests for mercy" are also grave breaches of the law of war and war crimes.¹¹⁶⁵

1084. Spain's LOAC Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: . . . feigning of surrender".¹¹⁶⁶ Feigning surrender is an example of a perfidious act.¹¹⁶⁷ The manual also states that it is a grave breach and a war crime "to make a perfidious use of recognised protective signs".¹¹⁶⁸

1085. Switzerland's Basic Military Manual prohibits perfidy. Thus, it states that "it is notably forbidden . . . to feign surrender".¹¹⁶⁹ It considers the "perfidious use of . . . distinctive signs recognised by the [Geneva] Conventions or [AP I], in violation of Article 37 [AP I]," as a grave breach of AP I.¹¹⁷⁰

1086. The UK Military Manual, in connection with the requirements to be granted the status of combatant, notes in particular that irregular troops "should have been warned against the employment of treachery [and] improper conduct towards flags of truce".¹¹⁷¹ The manual states that "it would be treachery for a soldier . . . to pretend that he had surrendered and afterwards to open fire upon or attack an enemy who was treating him as *hors de combat* or a prisoner".¹¹⁷² It further specifies that "surrender must not be feigned in order to take the enemy at a disadvantage when he advances to secure his prisoners".¹¹⁷³ It also stresses that "abuse of a flag of truce constitutes gross perfidy and entitles the injured party to take reprisals or to try the offenders if captured".¹¹⁷⁴

¹¹⁷⁰ Switzerland, *Basic Military Manual* (1987), Article 193(1)(f).

¹¹⁷¹ UK, *Military Manual* (1958), § 95.

¹¹⁷² UK, *Military Manual* (1958), § 115, footnote 2.

¹¹⁷³ UK, *Military Manual* (1958), § 318.

¹¹⁷⁴ UK, *Military Manual* (1958), § 417.

Moreover, the manual states that “in addition to the ‘grave breaches’ of the 1949 [Geneva] Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . treacherous request for quarter”.¹¹⁷⁵

1087. The UK LOAC Manual considers that “the feigning of an intent to surrender” is an example of treachery.¹¹⁷⁶ It also states that “abuse of the white flag is treachery”.¹¹⁷⁷

1088. The US Field Manual provides that “it is improper to feign surrender so as to secure an advantage over the opposing belligerent thereby”.¹¹⁷⁸ It also stresses that “an individual or a party acts treacherously in displaying a white flag indicative of surrender as a ruse to permit attack upon the forces of the other belligerent”.¹¹⁷⁹ The manual further states that “in addition to the ‘grave breaches’ of the Geneva Conventions of 1949, the following acts are representative of violations of the law of war (‘war crimes’): . . . treacherous request for quarter”.¹¹⁸⁰

1089. The US Air Force Pamphlet considers the feigning of surrender as a perfidious act.¹¹⁸¹ It adds that “the use of a . . . white flag in order to deceive or mislead the enemy, or for any other purpose other than to . . . surrender, has long been recognized as an act of treachery . . . [This] expresses the customary and conventional law in this area.”¹¹⁸² The Pamphlet further provides that “in addition to the grave breaches of the Geneva Conventions of 1949, the following acts are representative of situations involving individual criminal responsibility: . . . treacherous request for quarter”.¹¹⁸³

1090. The US Instructor’s Guide notes that an “example of a treacherous act would be pretending to surrender in order to facilitate an attack upon an unsuspecting enemy. Such tactics are prohibited because they destroy the basis for the restoration of peace short of the complete destruction of one side or the other.”¹¹⁸⁴ It further provides that “in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: . . . pretending to surrender”.¹¹⁸⁵

1091. The US Naval Handbook states that “feigning surrender in order to lure the enemy into a trap is an act of perfidy”.¹¹⁸⁶ It further provides that “it is a violation of the law of armed conflict to kill, injure, or capture the enemy by false indication of an intent to surrender . . . Such [act] of perfidy [is a] punishable war

[crime]."¹¹⁸⁷ In addition, the manual states that "the following acts are representative war crimes: . . . treacherous request for quarter (i.e., feigning surrender in order to gain a military advantage)".¹¹⁸⁸

1092. The YPA Military Manual of the SFRY (FRY) states that "feigning an intention to . . . surrender" is an act of perfidy.¹¹⁸⁹

National Legislation

1093. Argentina's Draft Code of Military Justice punishes any soldier who "uses . . . in a perfidious manner, the flag . . . of surrender".¹¹⁹⁰

1094. Australia's Geneva Conventions Act as amended provides that "a person who, in Australia or elsewhere, commits a grave breach . . . of [AP I] is guilty of an indictable offence".¹¹⁹¹

1095. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including "improper use of a flag of truce . . . in order to feign an intention to negotiate when there is no such intention on the part of the perpetrator . . . [and which] results in deaths or serious personal injury", in international armed conflicts.¹¹⁹²

1096. Azerbaijan's Criminal Code provides that "the misuse of the white flag, . . . which as a result caused death or serious injury to body of a victim," constitutes a war crime in international and non-international armed conflicts.¹¹⁹³

1097. Canada's Geneva Conventions Act as amended provides that "every person who, whether within or outside Canada, commits a grave breach [of AP I] . . . is guilty of an indictable offence".¹¹⁹⁴

1098. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.¹¹⁹⁵

1099. Colombia's Penal Code, in an article entitled "Perfidy", imposes a criminal sanction on "anyone who, during an armed conflict, with intent to harm or attack the adversary, . . . uses improperly . . . the white flag . . . of surrender".¹¹⁹⁶

1100. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.¹¹⁹⁷

1101. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes “any person who in the Cook Islands or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I]”.¹¹⁹⁸

1102. Cyprus’s AP I Act punishes “any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach”.¹¹⁹⁹

1103. The Draft Amendments to the Penal Code of El Salvador, in an article entitled “Perfidy”, provide for a prison sentence for “anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, . . . uses protective signs such as . . . the flag . . . of surrender”.¹²⁰⁰

1104. Ethiopia’s Penal Code punishes any abuse of the white flag, with intent to prepare or to commit hostile acts.¹²⁰¹

1105. Under Georgia’s Criminal Code, “the perfidious use of . . . protective signs and signals recognised by international humanitarian law” in an international or non-international armed conflict is a crime.¹²⁰²

1106. Ireland’s Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹²⁰³ It adds that any “minor breach” of AP I, including violations of Article 37(1) AP I, is also a punishable offence.¹²⁰⁴

1107. Under Jordan’s Draft Military Criminal Code, “the perfidious use of . . . any . . . protective emblem” in time of armed conflict is a war crime.¹²⁰⁵

1108. Under the Draft Amendments to the Code of Military Justice of Lebanon, “the perfidious use of . . . any . . . protective sign provided for by the [Geneva] Conventions and [AP I]” constitutes a war crime.¹²⁰⁶

1109. New Zealand’s Geneva Conventions Act as amended provides that “any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence”.¹²⁰⁷

1110. Under New Zealand’s International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹²⁰⁸

1111. Nicaragua’s Draft Penal Code, in an article entitled “Perfidy”, punishes “anyone who, during an international or internal armed conflict, with the

view to harm or attack the adversary, ... uses protective signs such as ... the flag ... of ... surrender".¹²⁰⁹

1112. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in ... the two additional protocols to [the Geneva] Conventions ... is liable to imprisonment".¹²¹⁰

1113. Spain's Royal Ordinance for the Armed Forces states that "a combatant ... shall not display treacherously the white flag".¹²¹¹

1114. Spain's Penal Code punishes "anyone who, during an armed conflict, ... uses ... in a perfidious manner the flag ... of surrender".¹²¹²

1115. Tajikistan's Criminal Code punishes "the perfidious use of ... protective signs and signals recognised by international humanitarian law" in an international or internal armed conflict.¹²¹³

1116. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹²¹⁴

1117. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of ... [AP I]".¹²¹⁵

1118. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹²¹⁶

1119. Under Yemen's Military Criminal Code, the "perfidious use of ... international protective emblems provided for in international conventions" is a war crime.¹²¹⁷

1120. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of ... [AP I]".¹²¹⁸

National Case-law

1121. No practice was found.

Other National Practice

1122. At the Battle of Goose Green during the War in the South Atlantic, Argentine soldiers raised a white flag. As UK soldiers moved forward to

accept the surrender, they were fired on and killed from a neighbouring position, probably in the confusion.¹²¹⁹

1123. In 1992, in its final report to Congress on the conduct of the Gulf War, the US Department of Defense stated that:

Perfidious acts include the feigning of an intent to surrender . . .

[I]ndividual acts of perfidy did occur. On one occasion, Iraqi soldiers waved a white flag and laid down their weapons. When a Saudi Arabian patrol advanced to accept their surrender, it was fired upon by Iraqi forces hidden in buildings on either side of the street. During the same battle, an Iraqi officer approached Coalition forces with his hands in the air, indicating his intention to surrender. When near his would-be-captors, he drew a concealed pistol from his boot, fired, and was killed during the combat that followed.¹²²⁰

III. Practice of International Organisations and Conferences

1124. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

1125. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1126. According to the ICRC Commentary on the Additional Protocols, “the perfidious use . . . of emblems, signs, signals or uniforms referred to in Article 37 . . . of the Protocol [including the flag of truce], for the purpose of killing, injuring or capturing an adversary, constitutes a grave breach under [Article 85(3)(f) AP I]”.¹²²¹

1127. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces the rule that “to pretend surrender” is an act of perfidy.¹²²² Delegates also teach that “the perfidious use of the . . . distinctive signs marking specifically protected persons and

objects...[and of] other protected signs recognized by the law of war" constitutes a grave breach of the law of war.¹²²³

1128. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included "the perfidious use of the... protective signs and signals recognized by international humanitarian law", when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹²²⁴

VI. Other Practice

1129. No practice was found.

Simulation of an intention to negotiate under the white flag of truce

Note: For practice concerning the improper use of the white flag of truce which does not amount to perfidy, see *supra* section B of this chapter.

I. Treaties and Other Instruments

Treaties

1130. Article 37(1)(a) AP I lists "the feigning of an intent to negotiate under a flag of truce" as an act of perfidy. Article 37 AP I was adopted by consensus.¹²²⁵

1131. Under Article 85(3) AP I, "the perfidious use, in violation of Article 37, ... of... protective signs recognized by the Conventions or this Protocol" is a grave breach of AP I. Article 85(5) adds that "without prejudice to the application of the [Geneva] Conventions and of this Protocol, grave breaches of these instruments shall be regarded as war crimes". Article 85 AP I was adopted by consensus.¹²²⁶

1132. Article 21(1) of draft AP II submitted by the ICRC to the CDDH provided that "when carried out in order to commit or resume hostilities, ... the feigning... of a humanitarian negotiation" was considered as perfidy.¹²²⁷ However, this proposal was deleted from draft Article 21 adopted in Committee III of the CDDH.¹²²⁸

1133. Under Article 8(2)(b)(vii) of the 1998 ICC Statute, "making improper use of a flag of truce, ... resulting in death or serious personal injury" is a war crime in international armed conflicts.

¹²²⁸ CDDH, *Official Records*, Vol. XV, CDDH/407/Rev.1, 17 March–10 June 1977, p. 502.

Other Instruments

1134. Article 114 of the 1863 Lieber Code states that:

If it be discovered, and fairly proved, that a flag of truce has been abused for surreptitiously obtaining military knowledge, the bearer of the flag thus abusing his sacred character is deemed a spy.

So sacred is the character of a flag of truce, and so necessary is its sacredness, that while its abuse is an especially heinous offense, great caution is requisite, on the other hand, in convicting the bearer of a flag of truce as a spy.

1135. Article 117 of the 1863 Lieber Code considers it “an act of bad faith, of infamy or fiendishness, to deceive the enemy by flags of protection”.

1136. Article 15 of the 1913 Oxford Manual of Naval War states that “methods . . . which involve treachery are forbidden. Thus it is forbidden . . . to make improper use of a flag of truce.”

1137. Pursuant to Article 20(b)(v) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “the perfidious use of . . . recognized protective signs” is a war crime.

1138. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(vii), “making improper use of a flag of truce, . . . resulting in death or serious personal injury” is a war crime in international armed conflicts.

*II. National Practice**Military Manuals*

1139. Argentina’s Law of War Manual (1969) provides especially for the prohibition of the improper use of the flag of truce, which is considered a breach of good faith. It states, however, that the use said to be “improper” applies only in combat operations.¹²²⁹

1140. Argentina’s Law of War Manual (1989) gives “simulating the intent to negotiate under a flag of parlementaires” as an example of perfidy.¹²³⁰ It also states that “the perfidious use . . . of . . . recognised protective signs” is a grave breach of AP I and a war crime.¹²³¹

1141. Australia’s Commanders’ Guide states that “acts which constitute perfidy include feigning of . . . an intent to negotiate under a flag of truce”.¹²³²

1142. Australia’s Defence Force Manual provides that “acts which constitute perfidy include feigning of . . . an intent to negotiate under a flag of truce”.¹²³³

¹²²⁹ Argentina, *Law of War Manual* (1969), § 1.017.

¹²³³ Australia, *Defence Force Manual* (1994), § 703(a), see also § 910.

1143. Belgium's Law of War Manual states that "using the white flag in order to approach and attack" is an act of perfidy.¹²³⁴

1144. Cameroon's Instructors' Manual emphasises that "feigning to negotiate under the flag of parlementaires" is a perfidious act.¹²³⁵ Furthermore, the manual states that "abuse of the flag of parlementaires to surprise the enemy" is also an act of perfidy.¹²³⁶

1145. Canada's LOAC Manual provides that "the following are examples of perfidy if a hostile act is committed while: . . . feigning an intent to negotiate under a flag of truce".¹²³⁷ It also considers that "it is an abuse of the white flag to make use of it solely for the purpose of moving troops without interference by the adverse party".¹²³⁸ The manual further states that "perfidious use of . . . protective signs recognized by the Geneva Conventions or AP I" is a grave breach of AP I and a war crime.¹²³⁹

1146. Colombia's Directive on IHL punishes "the perfidious use of . . . protective signs recognised under the law of war (the white flag of parlementaires, for example)".¹²⁴⁰

1147. Croatia's LOAC Compendium provides that the "perfidious use of distinctive protective signs" is a grave breach and a war crime.¹²⁴¹

1148. Croatia's Commanders' Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of . . . the flag of truce".¹²⁴²

1149. Ecuador's Naval Manual provides that it is unlawful to use the flag of truce to gain a military advantage over the enemy. It adds that the "misuse of protective signs, signals and symbols . . . in order to injure, kill, or capture the enemy constitutes an act of perfidy".¹²⁴³

1150. France's LOAC Summary Note prohibits perfidy and stresses that "it is forbidden to feign a protected status to invite the confidence of the enemy (abuse of . . . white flag)".¹²⁴⁴ It also states that the "perfidious use of protected signs and signals" is a grave breach of the law of war and a war crime.¹²⁴⁵

1151. France's LOAC Teaching Note provides that "the recourse to perfidy is prohibited, notably the abuse of the white flag".¹²⁴⁶

¹²³⁴ Belgium, *Law of War Manual* (1983), p. 32.

¹²⁴⁵ France, *LOAC Summary Note* (1992), § 3.4.

¹²⁴⁶ France, *LOAC Teaching Note* (2000), p. 3.

1152. France's LOAC Manual states that "using a protective sign in order to deceive the enemy and attain an operational goal constitutes an act of perfidy. In some cases, this may be a war crime. It is notably prohibited to feign an intention to negotiate under the cover of the flag of parlementaires."¹²⁴⁷ Moreover, the manual states that "the perfidious use of any protective sign provided for by international law constitutes a war crime".¹²⁴⁸

1153. Under Germany's Soldiers' Manual, "the feigning of the intention to negotiate under a flag of truce" constitutes a perfidious act.¹²⁴⁹

1154. Germany's Military Manual provides that "misusing the flag of truce constitutes perfidy and hence a violation of international law... The flag of truce is being misused, for instance, if soldiers approach an enemy position under the protection of the flag of truce in order to attack".¹²⁵⁰ The manual also states that "grave breaches of international humanitarian law are in particular: ... perfidious ... use of recognized protective signs".¹²⁵¹

1155. Hungary's Military Manual states that "to falsely claim protected status, thereby inviting the confidence of the enemy: e.g. misuse of: ... flag of truce" is an act of perfidy.¹²⁵² It further states that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹²⁵³

1156. Indonesia's Military Manual provides that "it is prohibited to kill or injure the enemy by perfidy, such as ... to misuse the flag of truce".¹²⁵⁴

1157. Referring to Israel's Law of War Booklet, the Report on the Practice of Israel states that the IDF "prohibits the resort to perfidy to kill, injure or capture an adversary. Therefore, the IDF does not feign intent to ... negotiate under a white flag."¹²⁵⁵

1158. Israel's Manual on the Laws of War gives the following example of perfidy: "It is forbidden to use a white flag for an inappropriate purpose (posing as persons ... seeking negotiations with a view to gaining a military advantage)."¹²⁵⁶

1159. Under Italy's IHL Manual, grave breaches of international conventions and protocols, including "the perfidious use... of international protective signs", constitute war crimes.¹²⁵⁷

1160. Italy's LOAC Elementary Rules Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of . . . the flag of truce".¹²⁵⁸

1161. Madagascar's Military Manual states that "it is prohibited to feign a protected status thereby inviting the confidence of the enemy", such as abuse of the white flag.¹²⁵⁹

1162. The Military Manual of the Netherlands states that API "gives a number of examples of treacherous behaviour: feigning intent to negotiate under the flag of parlementaires".¹²⁶⁰

1163. The Military Handbook of the Netherlands provides that "misuse of the white flag is treachery".¹²⁶¹

1164. New Zealand's Military Manual states that "the feigning of an intent to negotiate under a flag of truce" is an example of perfidy.¹²⁶² It also states that "perfidious use of . . . protective signs recognised by the [Geneva] Conventions or [AP I]" constitutes a grave breach of AP I and a war crime.¹²⁶³

1165. Nigeria's Military Manual gives the following example of "perjury" (perfidy): "Feigning an intent to negotiate under a flag of truce".¹²⁶⁴

1166. Nigeria's Manual on the Laws of War states that "it is forbidden to deceive the enemy by hoisting a white flag and have the enemy believe that a parlementaire is approaching them and thereby concealing an advance for attack".¹²⁶⁵

1167. Under Romania's Soldiers' Manual, "feigning an intent to negotiate under the cover of a flag" is an act of perfidy.¹²⁶⁶

1168. South Africa's LOAC Manual states that the misuse of any of the symbols of protection (including the white flag) constitutes an act of perfidy and a grave breach of the law of armed conflict.¹²⁶⁷ It also states that "perfidious use of . . . the white flag" is a grave breach of AP I and a war crime.¹²⁶⁸

1169. Spain's LOAC Manual states that "the improper use of the flag of parlementaires constitutes an act of perfidy. An abuse is committed when one takes advantage of the protection of the flag to approach the enemy and attack him by surprise."¹²⁶⁹ Likewise, "feigning the intent to negotiate under a flag of parlementaires" is regarded as an act of perfidy.¹²⁷⁰ The manual also provides that "it is prohibited to feign a protected status by inviting the confidence of the

enemy: misuse of . . . the flag of truce".¹²⁷¹ Moreover, the manual states that it is a grave breach and a war crime "to make a perfidious use . . . of . . . recognised protective signs".¹²⁷²

1170. Sweden's IHL Manual notes that "the feigning of an intent to negotiate under a flag of truce" is defined as perfidious conduct by Article 37 AP I.¹²⁷³

1171. Switzerland's Basic Military Manual forbids perfidy. Thus, "it is notably prohibited . . . to feign a desire to negotiate by misusing the flag of parlementaires".¹²⁷⁴ As an example of "murder by treason", the manual lists firing at the enemy while approaching them under the protection of a white flag.¹²⁷⁵ It also considers the "perfidious use of . . . distinctive signs recognised by the [Geneva] Conventions or [AP I], in violation of Article 37 [AP I]," as a grave breach of AP I.¹²⁷⁶

1172. The UK Military Manual, in connection with the requirements for being granted the status of combatant, notes in particular that irregular troops "should have been warned against the employment of treachery [and] improper conduct towards flags of truce".¹²⁷⁷ It considers it a legitimate ruse "to utilise an informal suspension of arms for the purpose of collecting wounded and dead . . . to execute movements unseen by the enemy". For instance, it notes an incident during the Russo-Japanese War of 1905, in which a group of Russians under the protection of the white flag and the red cross emblem advanced towards the Japanese army and asked for a suspension of arms to collect the wounded and the dead. It then used the occasion to withdraw completely.¹²⁷⁸ The manual condemns as unlawful the use of a "white flag for the purpose of making the enemy believe that a *parlementaire* is about to be sent when there is no such intention, and to carry out operations under the protection granted by the enemy to the pretended flag of truce".¹²⁷⁹ The manual emphasises that "abuse of a flag of truce constitutes gross perfidy and entitles the injured party to take reprisals or to try the offenders if captured".¹²⁸⁰

1173. The UK LOAC Manual provides that "abuse of the white flag is treachery".¹²⁸¹

1174. The US Field Manual states that "it is . . . an abuse of a flag of truce to carry out operations under the protection accorded by the enemy to it and those accompanying it".¹²⁸²

1175. The US Air Force Pamphlet states that:

The white flag has traditionally indicated a desire to communicate with the enemy . . . It raises expectations that the particular struggle is at an end or close to an

end since the only proper use of the flag of truce or white flag in international law is to communicate to the enemy a desire to negotiate. Thus, the use of a flag of truce or white flag in order to deceive or mislead the enemy, or for any other purpose other than to negotiate . . . has long been recognized as an act of treachery . . . [This] expresses the customary and conventional law in this area.¹²⁸³

The Pamphlet also states that “in addition to the grave breaches of the Geneva Conventions of 1949, the following acts are representative of situations involving individual criminal responsibility: . . . treacherous request for . . . truce”.¹²⁸⁴

1176. The US Naval Handbook provides that it is unlawful to use the flag of truce to gain a military advantage over the enemy. It adds that “misuse of protective signs, signals and symbols . . . in order to injure, kill, or capture the enemy constitutes an act of perfidy”.¹²⁸⁵

1177. The YPA Military Manual of the SFRY (FRY) states that “feigning an intention to negotiate under a flag of truce” is an act of perfidy.¹²⁸⁶

National Legislation

1178. Argentina’s Draft Code of Military Justice punishes any soldier who “uses . . . in a perfidious manner, the flag of parlementaires”.¹²⁸⁷

1179. Australia’s Geneva Conventions Act as amended provides that “a person who, in Australia or elsewhere, commits a grave breach . . . of [AP I] is guilty of an indictable offence”.¹²⁸⁸

1180. Australia’s ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including “improper use of a flag of truce . . . in order to feign an intention to negotiate when there is no such intention on the part of the perpetrator . . . [and which] results in deaths or serious personal injury”, in international armed conflicts.¹²⁸⁹

1181. Azerbaijan’s Criminal Code provides that “the misuse of the white flag, . . . which as a result caused death or serious injury to body of a victim,” constitutes a war crime in international and non-international armed conflicts.¹²⁹⁰

1182. Canada’s Geneva Conventions Act as amended provides that “every person who, whether within or outside Canada, commits a grave breach [of AP I] . . . is guilty of an indictable offence”.¹²⁹¹

1183. Canada’s Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are “crimes

according to customary international law" and, as such, indictable offences under the Act.¹²⁹²

1184. Colombia's Penal Code, in an article entitled "Perfidy", imposes a criminal sanction on "anyone who, during an armed conflict, with intent to harm or attack the adversary, . . . uses improperly . . . the white flag of parlementaires".¹²⁹³

1185. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.¹²⁹⁴

1186. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes "any person who in the Cook Islands or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I]".¹²⁹⁵

1187. Cyprus's AP I Act punishes "any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach".¹²⁹⁶

1188. The Draft Amendments to the Penal Code of El Salvador, in an article entitled "Perfidy", provide for a prison sentence for "anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, . . . uses protective signs such as . . . the flag of parlementaires or truce".¹²⁹⁷

1189. Ethiopia's Penal Code punishes any abuse of the white flag, with intent to prepare or to commit hostile acts.¹²⁹⁸

1190. Under Georgia's Criminal Code, "the perfidious use of . . . protective signs and signals recognised by international humanitarian law" in an international or non-international armed conflict is a crime.¹²⁹⁹

1191. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed conflict, "makes improper use . . . of the flag of truce, . . . thereby causing a person's death or serious injury".¹³⁰⁰

1192. Ireland's Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹³⁰¹ It adds that any "minor breach" of AP I, including violations of Article 37(1) AP I, is also a punishable offence.¹³⁰²

1193. Under Jordan's Draft Military Criminal Code, "the perfidious use of . . . any . . . protective emblem" in time of armed conflict is a war crime.¹³⁰³

1194. Under the Draft Amendments to the Code of Military Justice of Lebanon, "the perfidious use of . . . any . . . protective sign provided for by the [Geneva] Conventions and [AP I]" constitutes a war crime.¹³⁰⁴

1195. Under Mali's Penal Code, "using the flag of parlementaires . . . and thereby, causing loss of human lives or serious injuries" is a war crime in international armed conflicts.¹³⁰⁵

1196. Myanmar's Defence Services Act punishes any person who "treacherously . . . sends a flag of truce to the enemy".¹³⁰⁶

1197. New Zealand's Geneva Conventions Act as amended provides that "any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence".¹³⁰⁷

1198. Under New Zealand's International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹³⁰⁸

1199. Nicaragua's Draft Penal Code, in an article entitled "Perfidy", punishes "anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, . . . uses protective signs such as . . . the flag . . . of truce".¹³⁰⁹

1200. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹³¹⁰

1201. Spain's Royal Ordinance for the Armed Forces provides that "the combatant . . . shall not display treacherously the white flag".¹³¹¹

1202. Spain's Penal Code punishes "anyone who, during an armed conflict . . . uses . . . in a perfidious manner the flag of parlementaires".¹³¹²

1203. Under Sweden's Penal Code as amended, misuse of flags of parlementaires or "the killing or injuring of an opponent by means of some other form of treacherous behaviour" constitutes a crime against international law.¹³¹³

¹³⁰³ Jordan, *Draft Military Criminal Code* (2000), Article 41(A)(14).

1204. Tajikistan's Criminal Code punishes "the perfidious use of . . . protective signs and signals recognised by international humanitarian law" in an international or internal armed conflict.¹³¹⁴

1205. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹³¹⁵

1206. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of . . . [AP I]".¹³¹⁶

1207. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹³¹⁷

1208. Under Yemen's Military Criminal Code, the "perfidious use of . . . international protective emblems provided for in international conventions" is a war crime.¹³¹⁸

1209. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of . . . [AP I]".¹³¹⁹

National Case-law

1210. No practice was found.

Other National Practice

1211. A training video on IHL produced by the UK Ministry of Defence emphasises that it constitutes treachery to fire under the cover of protection of the flag of truce.¹³²⁰

1212. In 1992, in its final report to Congress on the conduct of the Gulf War, the US Department of Defense stated that "perfidious acts include the feigning of an intent . . . to negotiate under a flag of truce".¹³²¹

III. Practice of International Organisations and Conferences

1213. No practice was found.

¹³¹⁴ Tajikistan, *Criminal Code* (1998), Article 403(1).

IV. Practice of International Judicial and Quasi-judicial Bodies

1214. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1215. According to the ICRC Commentary on the Additional Protocols, “the perfidious use . . . of emblems, signs, signals or uniforms referred to in Article 37 . . . of the Protocol [among which the flag of truce], for the purpose of killing, injuring or capturing an adversary, constitutes a grave breach under [Article 85(3)(f) AP I]”.¹³²²

1216. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “to pretend an intent to negotiate under a flag of truce” is an act of perfidy.¹³²³ Delegates also teach that “the perfidious use of the . . . distinctive signs marking specifically protected persons and objects . . . [and of] other protected signs recognized by the law of war” constitutes a grave breach of the law of war.¹³²⁴

1217. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included “the perfidious use of the . . . protective signs and signals recognized by international humanitarian law”, when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹³²⁵

VI. Other Practice

1218. No practice was found.

Simulation of protected status by using the distinctive emblems of the Geneva Conventions

Note: For practice concerning the improper use of the distinctive emblems of the Geneva Conventions which does not amount to perfidy, see supra section C of this chapter.

¹³²² Yves Sandoz *et al.* (eds.), *Commentary on the Additional Protocols*, ICRC, Geneva, 1987, § 3499.

¹³²⁵ ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, § 1(b)(vi).

I. Treaties and Other Instruments

Treaties

1219. Article 85(3)(f) AP I makes “the perfidious use . . . of the distinctive emblem of the red cross, red crescent or red lion and sun” a grave breach of AP I. Article 85(5) adds that “without prejudice to the application of the [Geneva] Conventions and of this Protocol, grave breaches of these instruments shall be regarded as war crimes”. Article 85 AP I was adopted by consensus.¹³²⁶

1220. Article 21(1) of draft AP II submitted by the ICRC to the CDDH provided that “when carried out in order to commit or resume hostilities, . . . the feigning of a situation of distress, notably through the misuse of an internationally recognized protective sign” was considered perfidy.¹³²⁷ However, this proposal was deleted from draft Article 21 adopted in Committee III of the CDDH.¹³²⁸

1221. Under Article 8(2)(b)(vii) of the 1998 ICC Statute, “making improper use of . . . the distinctive emblems of the Geneva Conventions, resulting in death or serious personal injury” is a war crime in international armed conflicts.

Other Instruments

1222. Article 15 of the 1913 Oxford Manual of Naval War states that “methods . . . which involve treachery are forbidden. Thus it is forbidden . . . to make improper use . . . of distinctive badges of the medical corps.”

1223. Paragraph 110 of the 1994 San Remo Manual provides that:

Warships and auxiliary vessels . . . are prohibited . . . at all times from actively simulating the status of:

- (a) hospital ships, small coastal rescue craft or medical transports;
- (b) vessels on humanitarian missions;

...

- (f) vessels entitled to be identified by the emblem of the red cross or red crescent.

1224. Paragraph 111(a) of the 1994 San Remo Manual states that perfidious acts include the launching of an attack while feigning exempt status.

1225. Pursuant to Article 20(b)(v) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “the perfidious use of the distinctive emblem of the red cross, red crescent or red lion and sun” is a war crime.

1226. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(vii), “making improper use of . . . the distinctive emblems of the Geneva Conventions, resulting in death or serious personal injury” is a war crime in international armed conflicts.

¹³²⁶ CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 291.

¹³²⁸ CDDH, *Official Records*, Vol. XV, CDDH/407/Rev.1, 17 March–10 June 1977, p. 502.

II. National Practice

Note: Many national instruments ensure the protection of the emblems of the red cross, red crescent and red lion and sun at all times, while others specifically address and criminalise the perfidious use of the emblems in times of armed conflict. Only the latter materials have been included here. For legislation on the misuse, abuse or improper use of the emblems which does not amount to perfidy, see *supra* section C of this chapter.

Military Manuals

1227. Under Argentina's Law of War Manual, "the perfidious use of the sign of the Red Cross or Red Crescent" constitutes a grave breach of AP I and a war crime.¹³²⁹

1228. Australia's Commanders' Guide, in a section entitled "Perfidy", states that "protection is afforded to . . . medical personnel . . . by providing them with special identification symbols. It is unlawful for soldiers and other lawful combatants to fraudulently use protected symbols or facilities to obtain immunity from attack."¹³³⁰

1229. Australia's Defence Force Manual states that:

Warships and auxiliary vessels . . . are prohibited . . . at all times from actively simulating the status of:

- a. hospital ships, small coastal rescue craft or medical transports;
- b. vessels on humanitarian missions; . . .
- f. vessels entitled to be identified by the emblem of the Red Cross or Red Crescent.

Perfidious acts include the launching of an attack while feigning:

- a. exempt . . . status.¹³³¹

1230. Belgium's Law of War Manual states that "using the red cross emblem to cover hostile acts" is an act of perfidy.¹³³²

1231. Belgium's Teaching Manual for Soldiers provides that "the use of the sign of the Red Cross to cover military operations constitutes a perfidy which is considered as a war crime".¹³³³

1232. Cameroon's Instructors' Manual states that "using the emblems of the Red Cross or Red Crescent to transport personnel or material intended for the war effort" is considered a perfidious act.¹³³⁴ It is also the case of "abuse of the signs of the red cross or red crescent".¹³³⁵

¹³²⁹ Argentina, *Law of War Manual* (1989), § 8.03.

¹³³⁵ Cameroon, *Instructors' Manual* (1992), p. 149, § 531.1.

1233. Canada's LOAC Manual states that "feigning . . . non-combatant status" is a perfidious act and that medical personnel of the armed forces are non-combatants.¹³³⁶ It also provides that "using false markings on military aircraft such as the markings of . . . medical aircraft" is an act of perfidy in air warfare.¹³³⁷ The manual further provides that "perfidious use of the distinctive emblem of the Red Cross or Red Crescent" constitutes a grave breach of AP I and a war crime.¹³³⁸

1234. Canada's Code of Conduct provides that "the use of the Red Cross to shield the movement of troops or ammunitions is . . . prohibited . . . Committing a hostile act under the cover of the protection provided by the distinctive emblem would constitute perfidy."¹³³⁹

1235. Colombia's Directive on IHL punishes:

the perfidious use of signs and signals, such as the distinctive signs which designate persons or objects specifically protected (. . . delegates of the International Committee of the Red Cross or other recognised humanitarian organisations), . . . [or of] distinctive signs used for the identification of the medical service.¹³⁴⁰

1236. Colombia's Basic Military Manual states that the use of the red cross emblem to hide armaments or to deceive the adversary is "a grave breach of IHL called perfidy".¹³⁴¹

1237. Croatia's LOAC Compendium provides that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹³⁴²

1238. Croatia's Commanders' Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs and signals".¹³⁴³

1239. The Military Manual of the Dominican Republic states that "it is a serious breach of the laws of war when soldiers use these signs [red cross, red crescent, red lion and sun and red star of David] to protect or hide military activities".¹³⁴⁴

1240. Ecuador's Naval Manual states that:

Misuse of protective signs, signals, and symbols . . . in order to injure, kill, or capture the enemy constitutes an act of perfidy. Such acts are prohibited because they undermine the effectiveness of protective signs, signals, and symbols and thereby jeopardize the safety of non-combatants and the immunity of protected structures

¹³³⁶ Canada, *LOAC Manual* (1999), p. 3-3, § 20, p. 6-2, § 9(c) (land warfare), p. 7-2, § 17(c) (air warfare) and p. 8-11, § 81(d) (naval warfare), see also p. 8-10, § 79(f) (prohibition of actively simulating the status of vessels entitled to be identified by the emblem of the red cross and red crescent).

¹³³⁷ Canada, *LOAC Manual* (1999), p. 7-2, § 18(a).

and activities. For example, using an ambulance or medical aircraft marked with the red cross or red crescent to carry armed combatants, weapons, or ammunition with which to attack or elude enemy forces is prohibited.¹³⁴⁵

1241. France's LOAC Summary Note prohibits perfidy and provides that "it is forbidden to feign a protected status to invite the confidence of the enemy (abuse of distinctive signs and signals such as the Red Cross...)"¹³⁴⁶ It also states that the "perfidious use of protected signs and signals" is a grave breach of the law of war and a war crime.¹³⁴⁷

1242. France's LOAC Teaching Note states that the recourse to perfidy is prohibited, "notably the abuse... of distinctive signs, such as the Red Cross".¹³⁴⁸

1243. France's LOAC Manual states that "the use of these insignia [red cross and red crescent] to deceive the enemy with a fraudulent intent is an act of perfidy. It is prohibited and constitutes a war crime when resulting in death or serious injury".¹³⁴⁹ It further states that the camouflage of a military activity in a relief operation, such as using an ambulance to permit the passage of combatants through enemy lines or using the red cross to lure the enemy into an ambush, is to be regarded as a war crime.¹³⁵⁰ Generally, the manual considers that using a protective sign to deceive the enemy and reach an operational goal constitutes an act of perfidy, while "the perfidious use of any protective sign recognised by international law constitutes a war crime".¹³⁵¹

1244. Germany's Military Manual states that "the perfidious use of the distinctive emblem [red cross or red crescent] is explicitly prohibited and constitutes a grave breach of international law".¹³⁵²

1245. Under Hungary's Military Manual, the misuse of distinctive signs is an act of perfidy.¹³⁵³ It also states that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹³⁵⁴

1246. Referring to Israel's Law of War Booklet, the Report on the Practice of Israel states that the IDF "prohibits the resort to perfidy to kill, injure or capture an adversary. Therefore, the IDF does not... make unlawful use of protected emblems."¹³⁵⁵

1247. Israel's Manual on the Laws of War gives the following examples of perfidy: "it is forbidden to pose as... Red Cross personnel or use [this]

organization's uniform, flag and emblem . . . It is prohibited to misuse the emblems of medical personnel (a cross, crescent or red shield of David)."¹³⁵⁶

1248. Italy's IHL Manual states that grave breaches of international conventions and protocols, including "the perfidious use . . . of international protective signs", constitute war crimes.¹³⁵⁷

1249. Italy's LOAC Elementary Rules Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs".¹³⁵⁸

1250. Kenya's LOAC Manual states that "feigning non-combatant status" is an example of treachery.¹³⁵⁹ It specifies that medical and religious personnel of the armed forces are to be regarded as non-combatants.¹³⁶⁰

1251. Madagascar's Military Manual states that "it is prohibited to feign a protected status thereby inviting the confidence of the enemy", such as the abuse of distinctive signs.¹³⁶¹

1252. The Military Manual of the Netherlands states that "treachery means misusing the protection given by the law of war, for example misusing the Red Cross . . . [AP I] gives a number of examples of treacherous behaviour: . . . feigning to possess the status of civilian or non combatant (for example medical personnel or the personnel of the Red Cross)."¹³⁶²

1253. New Zealand's Military Manual states that "the use of false markings on military aircraft such as the markings of . . . medical aircraft . . . is the prime example of perfidious conduct in air warfare and is prohibited".¹³⁶³ It also states that "perfidious use of the distinctive emblem of the red cross, crescent or lion and sun" constitutes a grave breach of AP I and a war crime.¹³⁶⁴

1254. Nigeria's Military Manual gives the following example of "perjury" (perfidy): "Making improper use of the emblem of the Red Cross or red crescent."¹³⁶⁵

1255. Under Romania's Soldiers' Manual, "feigning the status of a protected person by abusing the signs and emblems of the International Red Cross" is an act of perfidy.¹³⁶⁶

1256. South Africa's LOAC Manual states that "it is forbidden . . . to fight while under the protection of the red cross or red crescent emblem". It is considered as perfidy and a grave breach of the law of armed conflict.¹³⁶⁷ The manual

¹³⁶⁷ South Africa, *LOAC Manual* (1996), § 34(c).

also states that “perfidious use of the red cross or red crescent emblem . . . in violation of Article 37 [AP I]” is a grave breach of AP I and a war crime.¹³⁶⁸

1257. Spain’s LOAC Manual states that “it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs and signals”.¹³⁶⁹ It also states that it is a grave breach of the law of war and a war crime “to make a perfidious use of the distinctive sign of the Red Cross”.¹³⁷⁰

1258. Sweden’s IHL Manual provides that “abuse of the distinctive emblem of the International Red Cross with perfidious intent is explicitly listed as perfidy and a gross infringement of international humanitarian law”.¹³⁷¹

1259. Switzerland’s Basic Military Manual states that the “perfidious use of the distinctive sign of the Red Cross, Red Crescent . . . in violation of Article 37 AP I” constitutes a grave breach of AP I.¹³⁷²

1260. The UK Military Manual states that “abuse of the distinctive sign for the purpose of offensive military action is a violation both of [GC I], and of the laws of war in general”.¹³⁷³

1261. The UK LOAC Manual states that the “feigning of non-combatant status” is an example of treachery.¹³⁷⁴ It specifies that “medical personnel, chaplains and civilians accompanying the armed forces are non-combatants”.¹³⁷⁵

1262. The US Field Manual gives the following examples of “improper use of the emblem”:

using a hospital or other building accorded such protection as an observation post or military office or depot; firing from a building or tent displaying the emblem of the Red Cross; using a hospital train or airplane to facilitate the escape of combatants; displaying the emblem on vehicles containing ammunition or other non-medical stores; and in general cloaking acts of hostility.¹³⁷⁶

1263. The US Air Force Pamphlet provides that:

Medical aircraft cannot retain status as protected medical aircraft during any flight in which they engage in any activity other than the transportation of patients and medical personnel or medical equipment and supplies. Use of the red cross during such a mission would be perfidious and unlawful.¹³⁷⁷

The Pamphlet also states that “the feigning by combatants of civilian, non-combatant status” is a perfidious act.¹³⁷⁸ It specifies that medical and religious personnel of the armed forces are non-combatants.¹³⁷⁹

¹³⁶⁸ South Africa, *LOAC Manual* (1996), §§ 37(d) and 41.

¹³⁷³ UK, *Military Manual* (1958), § 379.

¹³⁷⁴ UK, *LOAC Manual* (1981), Section 4, p. 12, § 2(a).

¹³⁷⁵ UK, *LOAC Manual* (1981), Section 3, p. 10, § 8(a).

¹³⁷⁶ US, *Field Manual* (1956), § 55.

¹³⁷⁷ US, *Air Force Pamphlet* (1976), § 2-6(e).

¹³⁷⁸ US, *Air Force Pamphlet* (1976), § 8-3(a).

¹³⁷⁹ US, *Air Force Pamphlet* (1976), § 3-4(c).

1264. The US Soldier's Manual states that "it is a serious breach of the laws of war when soldiers use these signs [red cross, red crescent and red shield of David] to protect or hide military activities".¹³⁸⁰

1265. The US Instructor's Guide states that:

The law of war prohibits treacherous acts. For example, there were occasions in World War II when the Nazis improperly identified buildings as hospitals and certain areas as protected areas. They really used the buildings or areas for direct military purposes such as observation posts, troop billets, defensive positions, or ammunition storage . . . Such tactics are prohibited because they destroy the basis for the restoration of peace short of the complete destruction of one side or the other.¹³⁸¹

The manual also states that "in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: . . . misusing the Red Cross emblem such as using a medical evacuation helicopter to transport combat troops".¹³⁸²

1266. The US Naval Handbook states that:

Misuse of protective signs, signals, and symbols . . . in order to injure, kill, or capture the enemy constitutes an act of perfidy. Such acts are prohibited because they undermine the effectiveness of protective signs, signals, and symbols and thereby jeopardize the safety of noncombatants and the immunity of protected structures and activities. For example, using an ambulance or medical aircraft marked with the red cross or red crescent to carry armed combatants, weapons, or ammunition with which to attack or elude enemy forces is prohibited.¹³⁸³

National Legislation

1267. Argentina's Draft Code of Military Justice punishes any soldier who "uses . . . in a perfidious manner, the protective or distinctive signs established and recognised in international treaties to which the Argentine Republic is a party, especially the distinctive signs of the red cross and red crescent".¹³⁸⁴

1268. Australia's Geneva Conventions Act as amended provides that "a person who, in Australia or elsewhere, commits a grave breach . . . of [AP I] is guilty of an indictable offence".¹³⁸⁵

1269. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including, when committed in international armed conflicts:

improper use of the distinctive emblems of the Geneva Conventions . . .

[when] the perpetrator uses the emblem for combatant purposes to invite the confidence of an adversary in order to lead him or her to believe that the perpetrator

¹³⁸⁵ Australia, *Geneva Conventions Act as amended* (1957), Section 7(1).

is entitled to protection, or that the adversary is obliged to accord protection to the perpetrator, with intent to betray that confidence . . .

[and when] the perpetrator's conduct results in death or serious personal injury.¹³⁸⁶

1270. Azerbaijan's Criminal Code provides that "the perfidious use in time of war of the flags and signs of the red cross and red crescent or of the colours of medical transport units" constitutes a war crime in international and non-international armed conflicts.¹³⁸⁷

1271. Belgium's Law concerning the Repression of Grave Breaches of the Geneva Conventions and their Additional Protocols as amended provides that "the perfidious use of the distinctive emblem of the red cross" constitutes a crime under international law.¹³⁸⁸

1272. Bolivia's Emblem Law states that:

Any person who has wilfully committed, or given the order to commit, acts which have caused the death or serious injury to the body or health of an adversary by making perfidious use of the Emblem of the Red Cross or of a distinctive signal, i.e., having invited the good faith of this adversary, with the intent to betray that good faith, to make him believe that he is entitled to receive or obliged to accord the protection provided by the rules of International Humanitarian Law, has committed a war crime.¹³⁸⁹

1273. Canada's Geneva Conventions Act as amended provides that "every person who, whether within or outside Canada, commits a grave breach [of AP I] . . . is guilty of an indictable offence".¹³⁹⁰

1274. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.¹³⁹¹

1275. Colombia's Penal Code, in an article entitled "Perfidy", imposes a criminal sanction on "anyone who, during an armed conflict, with intent to harm or attack the adversary, . . . uses improperly signs of protection such as the Red Cross or the Red Crescent".¹³⁹²

1276. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.¹³⁹³

1277. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes "any person who in the Cook Islands or elsewhere commits,

¹³⁸⁶ Australia, *ICC (Consequential Amendments) Act* (2002), Schedule 1, § 268.44.

¹³⁸⁷ Azerbaijan, *Criminal Code* (1999), Article 119(1).

¹³⁹³ Congo, *Genocide, War Crimes and Crimes against Humanity Act* (1998), Article 4.

or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I]" .¹³⁹⁴

1278. Costa Rica's Emblem Law punishes:

any person who, inviting the good faith of the adversary with intent to make him believe that he is entitled to protection of his physical integrity or his life or that he is obliged to accord protection in conformity with International Humanitarian Law, uses, or orders to be used, perfidiously the protective emblem.¹³⁹⁵

1279. Cyprus's AP I Act punishes "any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach".¹³⁹⁶

1280. The Draft Amendments to the Penal Code of El Salvador, in an article entitled "Perfidy", provide for a prison sentence for "anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, . . . uses protective signs such as the red cross or the red crescent".¹³⁹⁷

1281. El Salvador's Emblem Law punishes "anyone who uses the emblem for perfidious purposes, in accordance with Article 37 . . . of [the 1977] Additional Protocol I".¹³⁹⁸

1282. Ethiopia's Penal Code punishes the abuse of the emblems or insignia of the red cross, red crescent or red lion and sun, "with intent to prepare or to commit hostile acts".¹³⁹⁹

1283. Under Georgia's Criminal Code, "the perfidious use of the distinctive sign of the red cross and red crescent" in an international or non-international armed conflict is a crime.¹⁴⁰⁰

1284. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed conflict, "makes improper use of the distinctive emblems of the Geneva Conventions, . . . thereby causing a person's death or serious injury".¹⁴⁰¹

1285. Guatemala's Emblem Law punishes "anyone who, inviting the good faith of the adversary, with the intent to induce him to believe that he is entitled to the protection conferred by international humanitarian law, uses the protective emblem [of the red cross] in a perfidious manner".¹⁴⁰²

¹³⁹⁴ Cook Islands, *Geneva Conventions and Additional Protocols Act* (2002), Section 5(1).

¹⁴⁰¹ Germany, *Law Introducing the International Crimes Code* (2002), Article 1, § 10(2).

¹⁴⁰² Guatemala, *Emblem Law* (1997), Article 12.

1286. Ireland's Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹⁴⁰³

1287. Jordan's Draft Emblem Law states that:

Without prejudice to the penal provisions in force, any individual who, in time of war, intentionally uses, or orders to be used, in a perfidious manner, the emblem of the red crescent or red cross, or any other distinctive emblem so as to cause death or serious injury to body or health shall be considered a war criminal and shall be imprisoned. . . . Perfidious use means to induce the adversary to believe that he is entitled to, or obliged to accord, the protection provided for under international humanitarian law.¹⁴⁰⁴

1288. Under Jordan's Draft Military Criminal Code, "the perfidious use of the distinctive emblem of the red crescent and of the red cross" in time of armed conflict is a war crime.¹⁴⁰⁵

1289. Kyrgyzstan's Emblem Law provides that:

Anyone who intentionally has committed, or ordered to be committed, acts which cause death or serious injury to body or health of an adversary by using the emblem of the red crescent or red cross or a distinctive signal by having recourse to perfidy, has committed a war crime and shall be responsible in conformity with the legislation of the Kyrgyz Republic.¹⁴⁰⁶

1290. Under the Draft Amendments to the Code of Military Justice of Lebanon, "the perfidious use of the distinctive emblem of the red crescent or red cross" constitutes a war crime.¹⁴⁰⁷

1291. Liechtenstein's Emblem Law punishes "whoever misuses the sign or the protection of the red cross for the preparation or the execution of hostilities".¹⁴⁰⁸

1292. Under Mali's Penal Code, "using . . . the distinctive signs provided for by the Geneva Conventions, and thereby, causing loss of human lives or serious injuries" is a war crime in international armed conflicts.¹⁴⁰⁹

1293. Moldova's Emblem Law provides that "the perfidious use of the emblem of the red cross as a protective device in time of armed conflict is considered as a war crime and shall be punished in conformity with the criminal legislation".¹⁴¹⁰

1294. Moldova's Penal Code punishes the "perfidious use of the Red Cross emblem, as well as of the distinctive signs as protective elements during an armed conflict, provided that this has caused: a) a grave injury to body or health; b) death of a person".¹⁴¹¹

¹⁴⁰³ Ireland, *Geneva Conventions Act as amended* (1962), Section 3(1).

¹⁴⁰⁹ Mali, *Penal Code* (2001), Article 31(i)(7).

¹⁴¹⁰ Moldova, *Emblem Law* (1999), Article 17(1).

¹⁴¹¹ Moldova, *Penal Code* (2002), Article 392.

1295. Under the International Crimes Act of the Netherlands, it is a crime, during an international armed conflict, to commit “the following acts, when they are committed intentionally and in violation of the relevant provisions of Additional Protocol (I) and cause death or serious injury to body or health: . . . the perfidious use . . . of the distinctive emblem of the red cross or red crescent”.¹⁴¹²

1296. New Zealand’s Geneva Conventions Act as amended provides that “any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence”.¹⁴¹³

1297. Under New Zealand’s International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁴¹⁴

1298. Nicaragua’s Draft Penal Code, in an article entitled “Perfidy”, punishes “anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, . . . uses protective signs such as the red cross or red crescent”.¹⁴¹⁵

1299. Nicaragua’s Emblem Law provides that:

Any person who, intentionally and inviting the good faith of the adversary, leading him to believe that he has the right to, or the obligation to accord, the protection provided for under the rules of international humanitarian law by using the emblem of the Red Cross or of a distinctive signal in a perfidious manner, has committed, or given the order to commit, acts which cause the death or seriously injure the body or health of an adversary, shall be punished in accordance with the criminal legislation in force.¹⁴¹⁶

1300. According to Niger’s Penal Code as amended, “using perfidiously the distinctive sign of the red cross or of the red crescent”, protected under the 1949 Geneva Conventions and their Additional Protocols of 1977, is a war crime.¹⁴¹⁷

1301. Under Norway’s Military Penal Code as amended, “anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment”.¹⁴¹⁸

1302. Spain’s Penal Code punishes “anyone who, during an armed conflict . . . uses . . . in a perfidious manner the protective or distinctive signs, emblems or signals established and recognised under international treaties to which Spain is a party, in particular the distinctive signs of the Red Cross and Red Crescent”.¹⁴¹⁹

¹⁴¹² Netherlands, *International Crimes Act* (2003), Article 5(2)(c)(vi).

¹⁴¹³ New Zealand, *Geneva Conventions Act as amended* (1958), Section 3(1).

¹⁴¹⁴ New Zealand, *International Crimes and ICC Act* (2000), Section 11(2).

¹⁴¹⁵ Nicaragua, *Draft Penal Code* (1999), Article 452.

¹⁴¹⁶ Nicaragua, *Emblem Law* (2002), Article 12.

¹⁴¹⁷ Niger, *Penal Code as amended* (1961), Article 208.3(16).

¹⁴¹⁸ Norway, *Military Penal Code as amended* (1902), § 108(b).

¹⁴¹⁹ Spain, *Penal Code* (1995), Article 612(4).

1303. Under Sweden's Penal Code as amended, the misuse of emblems of medical aid (red cross) or "the killing or injuring of an opponent by means of some other form of treacherous behaviour" constitutes a crime against international law.¹⁴²⁰

1304. Switzerland's Military Criminal Code as amended punishes "anyone who abuses the emblem or the protection of the Red Cross, Red Crescent, Red Lion and Sun...to prepare or commit hostile acts" in time of armed conflict.¹⁴²¹

1305. Tajikistan's Criminal Code punishes "the perfidious use of the distinctive sign of the red cross and red crescent" in an international or internal armed conflict.¹⁴²²

1306. Togo's Emblem Law punishes "any person who, intentionally, shall have committed, or ordered to be committed, acts which have caused death or serious injury to body or health of an adversary by using in a perfidious way, the emblem of the Red Cross or Red Crescent or a distinctive signal". It adds that "the perfidious use of the emblem constitutes a grave breach of the Geneva Conventions and their Additional Protocols and is considered as a war crime".¹⁴²³

1307. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁴²⁴

1308. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of...[AP I]".¹⁴²⁵

1309. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁴²⁶

1310. Under Yemen's Military Criminal Code, the "perfidious use of the distinctive emblem of the Yemeni Red Crescent" is a war crime.¹⁴²⁷

1311. Under Yemen's Emblem Law, "any person who has used the emblem, with perfidious intent, in time of war, so as to cause death or serious injury to body or health of any person, or has ordered such use, shall be punished by the sanction defined in the laws in force".¹⁴²⁸

1312. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of...[AP I]".¹⁴²⁹

¹⁴²⁰ Sweden, *Penal Code as amended* (1962), Chapter 22, § 6(2).

¹⁴²⁷ Yemen, *Military Criminal Code* (1998), Article 21(5).

¹⁴²⁸ Yemen, *Emblem Law* (1999), Article 12.

¹⁴²⁹ Zimbabwe, *Geneva Conventions Act as amended* (1981), Section 3(1).

National Case-law

1313. In the *Hagendorf case* before the US Intermediate Military Government Court at Dachau in 1946, the accused, a German soldier, was charged with having “wrongfully used the Red Cross emblem in a combat zone by firing a weapon at American soldiers from an enemy ambulance displaying such emblem”. The accused was found guilty.¹⁴³⁰

Other National Practice

1314. On the basis of replies by army officers to a questionnaire, the Report on the Practice of Rwanda states that treachery is prohibited. According to the report, this may consist in the improper use of the signs of the red cross or red crescent. The report gives as examples of treachery the transportation of weapons and ammunition in an ambulance and the use of a hospital displaying the distinctive emblem as an ammunition dump.¹⁴³¹

1315. In 1992, in its final report to Congress on the conduct of the Gulf War, the US Department of Defense stated that “perfidious acts include . . . the feigning of protected status through improper use of the Red Cross or Red Crescent distinctive emblem”.¹⁴³²

*III. Practice of International Organisations and Conferences**United Nations*

1316. In 1994, in its final report on grave breaches of the Geneva Conventions and other violations of IHL committed in the former Yugoslavia, the UN Commission of Experts Established pursuant to Security Council Resolution 789 (1992) considered that “the *Hagendorf case* . . . in which a German soldier was convicted for abusing the Red Cross emblem by firing at American soldiers from an ambulance, might constitute a useful precedent. In that case, however, the accused was captured at the time of the incident.”¹⁴³³

Other International Organisations

1317. No practice was found.

International Conferences

1318. No practice was found.

¹⁴³⁰ US, Intermediate Military Government Court at Dachau, *Hagendorf case*, Judgement, 9 August 1946.

¹⁴³¹ Report on the Practice of Rwanda, 1997, Replies by army officers to a questionnaire, Chapter 2.6.

¹⁴³² US, Department of Defense, Final Report to Congress on the Conduct of the Persian Gulf War, Appendix O, The Role of the Law of War, 10 April 1992, *ILM*, Vol. 31, 1992, p. 632.

¹⁴³³ UN Commission of Experts Established pursuant to Security Council Resolution 780 (1992), Final report, Annex VI.B, UN Doc. S/1994/674/Add.2 (Vol. III), 28 December 1994, § 85.

IV. Practice of International Judicial and Quasi-judicial Bodies

1319. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1320. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “the perfidious use of the... distinctive signs marking specifically protected persons and objects... [and of] distinctive signals used for identification of medical service” constitutes a grave breach of the law of war.¹⁴³⁴

1321. In a press release issued in 1985, the ICRC reported that a car loaded with explosives was set off by its driver near a check-point in southern Lebanon. According to witnesses, the car was bearing the red cross emblem. The ICRC stated “the use of the protective emblem of the Red Cross for indiscriminate killing and wounding is a doubly detestable act which the International Committee of the Red Cross (ICRC) condemns”.¹⁴³⁵

1322. The 1996 ICRC Model Law concerning the Use and Protection of the Emblem of the Red Cross or Red Crescent provides that:

Anyone who has wilfully committed, or has given the order to commit, acts resulting in the death of, or causing serious injury to the body or health of, an adversary by making perfidious use of the red cross or red crescent emblem or a distinctive signal, has committed a war crime and shall be punished by imprisonment for a period of... years.

Perfidious use means appealing to the good faith of the adversary, with the intention to deceive him and make him believe that he was entitled to receive or was obliged to confer the protection provided for by the rules of international humanitarian law.¹⁴³⁶

1323. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included “the perfidious use of the distinctive emblem of the red cross or red crescent”, when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹⁴³⁷

VI. Other Practice

1324. In 1987, an article published in the French newspaper *Le Monde* discussed an incident in which the counterrevolutionary forces in Nicaragua had

¹⁴³⁴ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 779(a) and (c).

¹⁴³⁵ ICRC, Press Release No. 1509, South Lebanon: The red cross emblem used for a bombing attack, 16 July 1985.

¹⁴³⁶ ICRC, Model Law concerning the Use and Protection of the Emblem of the Red Cross or Red Crescent, Article 11, *IRRC*, No. 313, 1996, p. 486.

¹⁴³⁷ ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, § 1(b)(vi).

allegedly used a helicopter bearing the emblem of the red cross to carry military supplies. The ICRC was reported in the article as stating that the red cross emblem may only be used by the medical services of the belligerent forces to provide protection for the wounded and sick and for the persons providing care for them. The use of a vehicle marked with the red cross emblem to transport soldiers, weapons or other military equipment was described in the article as “a grave breach of the rules of international humanitarian law”.¹⁴³⁸

Simulation of protected status by using the United Nations emblem or uniform

Note: *For practice concerning the improper use of the United Nations emblem or uniform which does not amount to perfidy, see supra section D of this chapter.*

I. Treaties and Other Instruments

Treaties

1325. Article 37(1)(d) AP I lists “the feigning of protected status by the use of signs, emblems or uniforms of the United Nations” as an act of perfidy. Article 37 AP I was adopted by consensus.¹⁴³⁹

1326. Under Article 85(3) AP I, “the perfidious use, in violation of Article 37, of . . . protective signs recognized by the Geneva Conventions or this Protocol” is a grave breach of AP I. Article 85(5) adds that “without prejudice to the application of the [Geneva] Conventions and of this Protocol, grave breaches of these instruments shall be regarded as war crimes”. Article 85 AP I was adopted by consensus.¹⁴⁴⁰

1327. Under Article 8(2)(b)(vii) of the 1998 ICC Statute, “making improper use . . . of the flag or of the military insignia and uniform . . . of the United Nations, . . . resulting in death or serious personal injury” is a war crime in international armed conflicts.

Other Instruments

1328. Paragraph 110(d) of the 1994 San Remo Manual provides that “warships and auxiliary vessels . . . are prohibited . . . at all times from actively simulating the status of . . . vessels protected by the United Nations flag”. Paragraph 111(a) states that “perfidious acts include the launching of an attack while feigning . . . protected United Nations status”.

1329. Pursuant to Article 20(b)(v) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “the perfidious use of . . . recognized protective signs” is a war crime.

¹⁴³⁸ Isabelle Vichniac, Violation of the Rules of Humanitarian Law? Red Cross Warns Against Contras' use of its Emblem for Military Purposes, *Le Monde*, 19 June 1987.

¹⁴³⁹ CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 May 1977, p. 103.

¹⁴⁴⁰ CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 291.

1330. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(vii), “making improper use . . . of the flag or of the military insignia and uniform . . . of the United Nations, . . . resulting in death or serious personal injury” is a war crime in international armed conflicts.

II. National Practice

Military Manuals

1331. Argentina’s Law of War Manual provides that it is an example of perfidy “to make use of the signs, emblems or uniforms of the United Nations . . . so as to simulate a protected status”.¹⁴⁴¹ It adds that “the perfidious use of . . . recognised protective signs” is a grave breach of AP I and a war crime.¹⁴⁴²

1332. Australia’s Commanders’ Guide stresses that “acts which constitute perfidy include feigning of . . . protected status by the use of protective symbols, signs, emblems or uniforms of the United Nations”.¹⁴⁴³

1333. Australia’s Defence Force Manual provides that “acts which constitute perfidy include feigning of . . . protected status by the use of protective symbols, signs, emblems or uniforms of the United Nations”.¹⁴⁴⁴

1334. Cameroon’s Instructors’ Manual provides that “feigning having a protected status by using signs, emblems or uniforms of the United Nations” is an example of perfidy.¹⁴⁴⁵

1335. Canada’s LOAC Manual provides that “the following are examples of perfidy if a hostile act is committed while: . . . feigning protected status by the use of signs, emblems or uniforms of the United Nations”.¹⁴⁴⁶ It also considers it an act of perfidy in air warfare if a hostile act is committed while “using false markings on military aircraft such as the markings of . . . United Nations aircraft”.¹⁴⁴⁷ The manual further states that “perfidious use of . . . protective signs recognized by the Geneva Conventions or API” constitutes a grave breach of AP I and a war crime.¹⁴⁴⁸

1336. Colombia’s Directive on IHL considers “the perfidious use of . . . protective signs recognised under the law of war” as a punishable offence.¹⁴⁴⁹

1337. Croatia’s LOAC Compendium provides that the “perfidious use of distinctive protective signs” is a grave breach of the law of war and a war crime.¹⁴⁵⁰

¹⁴⁴⁶ Canada, *LOAC Manual* (1999), p. 6-2, § 9(d) (land warfare), see also p. 7-2, § 17(d) (air warfare) and p. 8-11, § 81(e) (naval warfare).

¹⁴⁴⁷ Canada, *LOAC Manual* (1999), p. 7-2, § 18(a).

¹⁴⁴⁸ Canada, *LOAC Manual* (1999), p. 16-2, § 8(a) and p. 16-3, § 16(f).

¹⁴⁴⁹ Colombia, *Directive on IHL* (1993), Section III(D).

¹⁴⁵⁰ Croatia, *LOAC Compendium* (1991), p. 56.

1338. Croatia's Commanders' Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs".¹⁴⁵¹

1339. France's LOAC Summary Note prohibits perfidy, and states that "it is forbidden to feign a protected status by inviting the confidence of the enemy (abuse of distinctive signs and signals . . .)".¹⁴⁵² It also states that the "perfidious use of protected signs and signals" is a grave breach of the law of war and a war crime.¹⁴⁵³

1340. France's LOAC Manual provides that "using a protective sign to deceive the enemy and reach an operational goal constitutes an act of perfidy".¹⁴⁵⁴ It specifies that the use of UN emblems and uniforms with the view to commit hostile acts is criminalised.¹⁴⁵⁵ Generally, it considers that "the perfidious use of any protective sign recognised by international law constitutes a war crime".¹⁴⁵⁶

1341. Germany's Military Manual provides that "grave breaches of international humanitarian law are in particular: . . . perfidious . . . use of recognized protective signs".¹⁴⁵⁷

1342. Hungary's Military Manual gives as an example of perfidy "to falsely claim protected status, thereby inviting the confidence of the enemy", *inter alia*, by using the UN flag.¹⁴⁵⁸ The manual also states that the "perfidious use of distinctive protective signs" is a grave breach of the law of war and a war crime.¹⁴⁵⁹

1343. Referring to Israel's Law of War Booklet, the Report on the Practice of Israel states that the IDF "prohibits the resort to perfidy to kill, injure or capture an adversary. Therefore, the IDF does not . . . make unlawful use of protected emblems or uniforms."¹⁴⁶⁰

1344. Israel's Manual on the Laws of War states, as an example of perfidious conduct, that "it is prohibited to pose as U.N. . . . personnel or use [UN] uniform, flag and emblems".¹⁴⁶¹

1345. Under Italy's IHL Manual, grave breaches of international conventions and protocols, including "the perfidious use . . . of international protective signs", constitute war crimes.¹⁴⁶²

1346. Italy's LOAC Elementary Rules Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs".¹⁴⁶³

¹⁴⁵¹ Croatia, *Commanders' Manual* (1992), § 46.

¹⁴⁶¹ Israel, *Manual on the Laws of War* (1998), p. 56.

¹⁴⁶² Italy, *IHL Manual* (1991), Vol. I, § 85.

¹⁴⁶³ Italy, *LOAC Elementary Rules Manual* (1991), § 46.

1347. The Military Manual of the Netherlands states that AP I “gives a number of examples of treacherous behaviour: feigning to possess a protected position by using signs, emblems or uniforms of the United Nations”.¹⁴⁶⁴

1348. New Zealand’s Military Manual provides that “the following acts are examples of perfidy: . . . the feigning of protected status by the use of signs, emblems or uniforms of the United Nations”.¹⁴⁶⁵ It also states that “the use of false markings on military aircraft such as the markings of . . . United Nations aircraft . . . is the prime example of perfidious conduct in air warfare and is prohibited”.¹⁴⁶⁶ It further states that “perfidious use of . . . protective signs recognised by the [Geneva] Conventions or [AP I]” constitutes a grave breach of AP I and a war crime.¹⁴⁶⁷

1349. Nigeria’s Military Manual gives the following example of “perjury” (perfidy): “feigning protection status by the use of signs, emblems or uniforms of the UN”.¹⁴⁶⁸

1350. Under Romania’s Soldiers’ Manual, “feigning the status of a protected person by abusing the signs and emblems of . . . the UN” is an act of perfidy.¹⁴⁶⁹

1351. South Africa’s LOAC Manual provides that “grave breaches of the law of war are regarded as war crimes”.¹⁴⁷⁰

1352. Spain’s LOAC Manual considers “feigning to possess a protected status by using the signs, emblems or uniforms of the United Nations” as an example of perfidy.¹⁴⁷¹ It also states that “it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs”.¹⁴⁷² It also states that it is a grave breach of the law of war and a war crime “to make a perfidious use . . . of . . . recognised protective signs”.¹⁴⁷³

1353. Sweden’s IHL Manual emphasises that, pursuant to Article 37 AP I, “the feigning of protected . . . status . . . of a member of the armed forces . . . of the United Nations” constitutes a perfidious conduct.¹⁴⁷⁴

1354. Switzerland’s Basic Military Manual considers the “perfidious use of . . . distinctive signs recognised by the [Geneva] Conventions or [AP I], in violation of Article 37 [AP I]”, as a grave breach of AP I.¹⁴⁷⁵

1355. The YPA Military Manual of the SFRY (FRY) states that feigning protected status by using UN symbols, emblems, signs or uniforms is an act of perfidy.¹⁴⁷⁶

National Legislation

1356. Argentina's Draft Code of Military Justice punishes any soldier who "uses . . . in a perfidious manner, the flag, uniform, insignia or distinctive emblem . . . of the United Nations".¹⁴⁷⁷

1357. Australia's Geneva Conventions Act as amended provides that "a person who, in Australia or elsewhere, commits a grave breach . . . of [AP I] is guilty of an indictable offence".¹⁴⁷⁸

1358. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including "improper use of a flag, insignia or uniform of the United Nations . . . [when] the perpetrator's conduct results in death or serious personal injury", in international armed conflicts.¹⁴⁷⁹

1359. Azerbaijan's Criminal Code provides that "the misuse of . . . the flag, the sign or clothes of the United Nations, . . . which as a result caused death or serious injury to body of a victim" constitutes a war crime in international and non-international armed conflicts.¹⁴⁸⁰

1360. Canada's Geneva Conventions Act as amended provides that "every person who, whether within or outside Canada, commits a grave breach [of AP I] . . . is guilty of an indictable offence".¹⁴⁸¹

1361. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.¹⁴⁸²

1362. Colombia's Penal Code, in an article entitled "Perfidy", imposes a criminal sanction on "anyone who, during an armed conflict, with intent to harm or attack the adversary, . . . uses improperly . . . the flag of the United Nations or of other intergovernmental organisations".¹⁴⁸³

1363. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.¹⁴⁸⁴

1364. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes "any person who in the Cook Islands or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I]".¹⁴⁸⁵

¹⁴⁷⁷ Argentina, *Draft Code of Military Justice* (1998), Article 292, introducing a new Article 876(6) in the *Code of Military Justice as amended* (1951).

¹⁴⁸² Canada, *Crimes against Humanity and War Crimes Act* (2000), Section 4(1) and (4).

¹⁴⁸³ Colombia, *Penal Code* (2000), Article 143.

¹⁴⁸⁴ Congo, *Genocide, War Crimes and Crimes against Humanity Act* (1998), Article 4.

¹⁴⁸⁵ Cook Islands, *Geneva Conventions and Additional Protocols Act* (2002), Section 5(1).

1365. Cyprus's AP I Act punishes "any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach".¹⁴⁸⁶

1366. The Draft Amendments to the Penal Code of El Salvador, in an article entitled "Perfidy", provide for a prison sentence for "anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, ... uses ... the flag of the United Nations or international organisations; the flags, uniforms or insignia ... of military or police detachments of the United Nations".¹⁴⁸⁷

1367. Under Ethiopia's Penal Code, it is a punishable offence to abuse any "protective device recognized in public international law, ... with intent to prepare or to commit hostile acts".¹⁴⁸⁸

1368. Under Georgia's Criminal Code, "the perfidious use of ... protective signs and signals recognised by international humanitarian law" in an international or non-international armed conflict is a crime.¹⁴⁸⁹

1369. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed conflict, "makes improper use ... of the flag ... or of the uniform ... of the United Nations, thereby causing a person's death or serious injury".¹⁴⁹⁰

1370. Ireland's Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹⁴⁹¹ It adds that any "minor breach" of AP I, including violations of Article 37(1) AP I, is also a punishable offence.¹⁴⁹²

1371. Under Jordan's Draft Military Criminal Code, "the perfidious use of ... any ... protective emblem" in time of armed conflict is a war crime.¹⁴⁹³

1372. Under the Draft Amendments to the Code of Military Justice of Lebanon, "the perfidious use of ... any ... protective sign provided for by the [Geneva] Conventions and [AP I]" constitutes a war crime.¹⁴⁹⁴

1373. Lithuania's Criminal Code as amended considers that the improper use of emblems of international organisations is a war crime.¹⁴⁹⁵

1374. Under Mali's Penal Code, "using ... the flag or military insignia or uniform ... of the United Nations Organisation, ... and thereby, causing loss of human lives or serious injuries" is a war crime in international armed conflicts.¹⁴⁹⁶

¹⁴⁹⁵ Lithuania, *Criminal Code as amended* (1961), Article 344.

¹⁴⁹⁶ Mali, *Penal Code* (2001), Article 31(i)(7).

1375. New Zealand's Geneva Conventions Act as amended provides that "any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence".¹⁴⁹⁷

1376. Under New Zealand's International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁴⁹⁸

1377. Nicaragua's Draft Penal Code, in an article entitled "Perfidy", punishes "anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, . . . uses . . . the flag of the United Nations or international organisations; . . . the flags, uniforms or insignia . . . of military or police detachments of the United Nations".¹⁴⁹⁹

1378. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹⁵⁰⁰

1379. Spain's Royal Ordinance for the Armed Forces states that "the combatant . . . shall not display treacherously the flag . . . of international organisations".¹⁵⁰¹

1380. Spain's Penal Code punishes "anyone who, during an armed conflict . . . uses . . . in a perfidious manner the flag, uniform, insignia or distinctive emblem . . . of the United Nations".¹⁵⁰²

1381. Under Sweden's Penal Code as amended, the misuse of the insignia of the UN or "the killing or injuring of an opponent by means of *some other form of treacherous behaviour*" constitutes a crime against international law.¹⁵⁰³ (emphasis added)

1382. Tajikistan's Criminal Code punishes "the perfidious use of . . . protective signs and signals recognised by international humanitarian law" in an international or internal armed conflict.¹⁵⁰⁴

1383. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁵⁰⁵

1384. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of . . . [AP I]".¹⁵⁰⁶

¹⁵⁰⁴ Tajikistan, *Criminal Code* (1998), Article 403(1).

¹⁵⁰⁵ Trinidad and Tobago, *Draft ICC Act* (1999), Section 5(1)(a).

¹⁵⁰⁶ UK, *Geneva Conventions Act as amended* (1957), Section 1(1).

1385. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(vii) of the 1998 ICC Statute.¹⁵⁰⁷

1386. Under Yemen's Military Criminal Code, the "perfidious use of... international protective emblems provided for in international conventions" is a war crime.¹⁵⁰⁸

1387. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of... [AP I]".¹⁵⁰⁹

National Case-law

1388. No practice was found.

Other National Practice

1389. No practice was found.

III. Practice of International Organisations and Conferences

United Nations

1390. In 1994, in its final report on grave breaches of the Geneva Conventions and other violations of IHL committed in the former Yugoslavia, the UN Commission of Experts Established pursuant to Security Council Resolution 780 (1992) considered that:

If it can be established that named individuals in the [Bosnian Serb army] used or authorized the use of vehicles which carried UN markings, this could be viewed as perfidious conduct and, if persons were killed or wounded as a result of this action, a grave breach of [AP I] could be established.¹⁵¹⁰

Other International Organisations

1391. No practice was found.

International Conferences

1392. At the CDDH, Committee III reported that "the misuse of United Nations signs, emblems or uniforms would be perfidious in cases where the United Nations and its personnel enjoyed a neutral protected status, but not, of course, in situations where the United Nations forces were involved as combatants in a conflict".¹⁵¹¹

¹⁵⁰⁷ UK, *ICC Act* (2001), Sections 50(1) and 51(1) (England and Wales) and Section 58(1) (Northern Ireland).

¹⁵⁰⁸ Yemen, *Military Criminal Code* (1998), Article 21(5).

¹⁵⁰⁹ Zimbabwe, *Geneva Conventions Act as amended* (1981), Section 3(1).

¹⁵¹⁰ UN Commission of Experts Established pursuant to Security Council Resolution 780 (1992), Final report, Annex VI.B, UN Doc. S/1994/674/Add.2 (Vol. III), 28 December 1994, § 85.

¹⁵¹¹ CDDH, *Official Records*, Vol. XV, CDDH/III/236/Rev.1, 21 April–11 June 1976, p. 382, § 18.

IV. Practice of International Judicial and Quasi-judicial Bodies

1393. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1394. According to the ICRC Commentary on the Additional Protocols, “the perfidious use... of emblems, signs, signals or uniforms referred to in Article 37... of the Protocol [among which the UN emblem], for the purpose of killing, wounding or capturing an adversary, constitutes a grave breach under [Article 85(3)(f) AP I]”.¹⁵¹²

1395. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “to pretend having protected status by the use of flags, emblems or uniforms of the United Nations” is an act of perfidy.¹⁵¹³ Delegates also teach that “the perfidious use of the... distinctive signs marking specifically protected persons and objects... [and of] other protected signs recognized by the law of war” constitutes a grave breach of the law of war.¹⁵¹⁴

1396. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included “the perfidious use of the... protective signs and signals recognized by international humanitarian law”, when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹⁵¹⁵

VI. Other Practice

1397. No practice was found.

Simulation of protected status by using other internationally recognised emblems

Note: *For practice concerning the improper use of other internationally recognised emblems which does not amount to perfidy, see supra section E of this chapter.*

¹⁵¹² Yves Sandoz *et al.* (eds.), *Commentary on the Additional Protocols*, ICRC, Geneva, 1987, § 3499.

¹⁵¹⁴ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 779(a) and (b).

¹⁵¹⁵ ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, § 1(b)(vi).

I. Treaties and Other Instruments

Treaties

1398. Under Article 85(3)(f) AP I, “the perfidious use, in violation of Article 37, of . . . protective signs recognized by the Conventions or this Protocol” is a grave breach of AP I. Article 85 AP I was adopted by consensus.¹⁵¹⁶

Other Instruments

1399. Pursuant to Article 20(b)(v) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “the perfidious use of . . . recognized protective signs” is a war crime.

II. National Practice

Military Manuals

1400. Argentina’s Law of War Manual provides that “the perfidious use of . . . recognised protective signs” is a grave breach of AP I and a war crime.¹⁵¹⁷

1401. Australia’s Commanders’ Guide, in a section entitled “Perfidy”, states that “protection is afforded to . . . civil defence workers . . . and PW by providing them with special identification symbols. It is unlawful for soldiers and other lawful combatants to fraudulently use protected symbols . . . in order to obtain immunity from attack.”¹⁵¹⁸

1402. Canada’s LOAC Manual provides that “the perfidious use of . . . protective signs recognized by the Geneva Conventions or AP I” constitutes a grave breach of AP I and a war crime.¹⁵¹⁹

1403. Colombia’s Directive on IHL punishes “the perfidious use of . . . protective signs recognised under the law of war . . . [or of] the distinctive signs used for the identification . . . of civil defence”.¹⁵²⁰

1404. Croatia’s LOAC Compendium provides that the “perfidious use of distinctive protective signs” is a grave breach of the law of war and a war crime.¹⁵²¹

1405. Croatia’s Commanders’ Manual states that “it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs”.¹⁵²²

1406. Ecuador’s Naval Manual states that “misuse of protective signs, signals and symbols in order to injure, kill, or capture the enemy constitutes an act of perfidy”.¹⁵²³

¹⁵¹⁶ CDDH, *Official Records*, Vol. VI, CCDH/SR.44, 30 May 1977, p. 291.

¹⁵¹⁷ Argentina, *Law of War Manual* (1989), § 8.03.

¹⁵¹⁸ Australia, *Commanders’ Guide* (1994), § 504.

¹⁵²² Croatia, *Commanders’ Manual* (1992), § 46.

¹⁵²³ Ecuador, *Naval Manual* (1989), § 12.2.

1407. France's LOAC Summary Note prohibits perfidy and states that "it is forbidden to feign a protected status by inviting the confidence of the enemy (abuse of distinctive signs and signals . . .)".¹⁵²⁴ It also states that the "perfidious use of protected signs and signals" is a grave breach of the law of war and a war crime.¹⁵²⁵

1408. France's LOAC Manual states that "using a protective sign to deceive the enemy and reach an operational goal constitutes an act of perfidy".¹⁵²⁶ It further provides that "the perfidious use of any protective sign recognised by international law constitutes a war crime".¹⁵²⁷

1409. Germany's Military Manual provides that "grave breaches of international humanitarian law are in particular: . . . the perfidious . . . use of recognized protective signs".¹⁵²⁸

1410. Hungary's Military Manual states that the "perfidious use of distinctive protective signs" is a grave breach and a war crime.¹⁵²⁹

1411. Referring to Israel's Law of War Booklet, the Report on the Practice of Israel states that the IDF "prohibits the resort to perfidy to kill, injure or capture an adversary. Therefore, the IDF does not . . . make unlawful use of protected emblems".¹⁵³⁰

1412. Italy's IHL Manual provides that grave breaches of international conventions and protocols, among which "the perfidious use . . . of symbols of international protection" constitute war crimes.¹⁵³¹

1413. Italy's LOAC Elementary Rules Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs".¹⁵³²

1414. New Zealand's Military Manual provides that "the perfidious use of . . . protective signs recognised by the [Geneva] Conventions or [AP I]" constitutes a grave breach of AP I and a war crime.¹⁵³³

1415. South Africa's LOAC Manual regards the misuse of symbols of protection (such as those of civil defence, cultural property and installations containing dangerous forces) as perfidious and as constituting a grave breach of the law of war and a war crime.¹⁵³⁴

1416. Spain's LOAC Manual states that "it is prohibited to feign a protected status by inviting the confidence of the enemy: misuse of distinctive signs".¹⁵³⁵

¹⁵²⁴ France, *LOAC Summary Note* (1992), § 4.4.

¹⁵²⁵ France, *LOAC Summary Note* (1992), § 3.4.

¹⁵²⁷ France, *LOAC Manual* (2001), p. 118.

¹⁵²⁸ Germany, *Military Manual* (1992), § 1209.

¹⁵²⁹ Hungary, *Military Manual* (1992), p. 90.

¹⁵³⁰ Report on the Practice of Israel, 1997, Chapter 2.4, referring to *Law of War Booklet* (1986), p. 8.

¹⁵³¹ Italy, *IHL Manual* (1991), Vol. I, § 85.

¹⁵³² Italy, *LOAC Elementary Rules Manual* (1991), § 46.

¹⁵³³ New Zealand, *Military Manual* (1992), §§ 1701(1) and 1703(3)(f).

¹⁵³⁴ South Africa, *LOAC Manual* (1996), §§ 34(c) and 41.

¹⁵³⁵ Spain, *LOAC Manual* (1996), Vol. I, § 10.8.e.(1).

It adds that it is a grave breach and a war crime “to make a perfidious use . . . of . . . recognised protective signs”.¹⁵³⁶

1417. Sweden’s IHL Manual states that “abuse of international emergency signals with perfidious intent may also be viewed as an example of perfidy”.¹⁵³⁷

1418. Switzerland’s Basic Military Manual considers the “perfidious use of . . . distinctive signs recognised by the [Geneva] Conventions or [AP I]”, as a grave breach of AP I.¹⁵³⁸

1419. The US Naval Handbook states that “misuse of protective signs, signals and symbols . . . in order to injure, kill, or capture the enemy constitutes an act of perfidy”.¹⁵³⁹

National Legislation

1420. Argentina’s Draft Code of Military Justice punishes any soldier who “uses . . . in a perfidious manner, the protective or distinctive signs established and recognised in international treaties to which the Argentine Republic is a party”.¹⁵⁴⁰

1421. Australia’s Geneva Conventions Act as amended provides that “a person who, in Australia or elsewhere, commits a grave breach . . . of [AP I] is guilty of an indictable offence”.¹⁵⁴¹

1422. Canada’s Geneva Conventions Act as amended provides that “every person who, whether within or outside Canada, commits a grave breach [of AP I] . . . is guilty of an indictable offence”.¹⁵⁴²

1423. Colombia’s Penal Code, in an article entitled “Perfidy”, imposes a criminal sanction on “anyone who, during an armed conflict, with intent to harm or attack the adversary, . . . uses improperly . . . signs of protection provided for in international treaties ratified by Colombia”.¹⁵⁴³

1424. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes “any person who in the Cook Islands or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I]”.¹⁵⁴⁴

1425. Cyprus’s AP I Act punishes “any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach”.¹⁵⁴⁵

1426. The Draft Amendments to the Penal Code of El Salvador, in an article entitled “Perfidy”, provide for a prison sentence for “anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, . . . uses . . . other protective signs provided for in international treaties ratified by the State of El Salvador”.¹⁵⁴⁶

1427. Ethiopia’s Penal Code punishes the abuse of any “protective device recognized in public international law, . . . with intent to prepare or to commit hostile acts”.¹⁵⁴⁷

1428. Under Georgia’s Criminal Code, “the perfidious use of . . . protective signs and signals recognised by international humanitarian law” in an international or non-international armed conflict is a crime.¹⁵⁴⁸

1429. Ireland’s Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹⁵⁴⁹

1430. Under Jordan’s Draft Military Criminal Code, “the perfidious use of . . . any . . . protective emblem” in time of armed conflict is a war crime.¹⁵⁵⁰

1431. Under the Draft Amendments to the Code of Military Justice of Lebanon, “the perfidious use of . . . any . . . protective sign provided for by the [Geneva] Conventions and [AP I]” constitutes a war crime.¹⁵⁵¹

1432. Under the International Crimes Act of the Netherlands, it is a crime, during an international armed conflict, to commit “the following acts, when they are committed intentionally and in violation of the relevant provisions of Additional Protocol (I) and cause death or serious injury to body or health: . . . the perfidious use . . . of . . . protective emblems recognised by the Geneva Conventions or Additional Protocol (I)”.¹⁵⁵²

1433. New Zealand’s Geneva Conventions Act as amended provides that “any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence”.¹⁵⁵³

1434. Nicaragua’s Draft Penal Code, in an article entitled “Perfidy”, punishes “anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, . . . uses . . . protective signs defined in international treaties ratified by the State of Nicaragua”.¹⁵⁵⁴

1435. Under Norway’s Military Penal Code as amended, “anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment”.¹⁵⁵⁵

¹⁵⁵⁴ Nicaragua, *Draft Penal Code* (1999), Article 452.

¹⁵⁵⁵ Norway, *Military Penal Code as amended* (1902), § 108(b).

1436. Spain's Penal Code punishes "anyone who, during an armed conflict . . . uses . . . in a perfidious manner the protective or distinctive signs, emblems or signals established and recognised under international treaties to which Spain is a party".¹⁵⁵⁶

1437. Under Sweden's Penal Code as amended, the misuse of the sign for civil defence and other internationally recognised emblems or "the killing or injuring of an opponent by means of *some other form of treacherous behaviour*" constitutes a crime against international law.¹⁵⁵⁷ (emphasis added)

1438. Switzerland's Military Criminal Code as amended punishes "anyone who abuses . . . the emblem of cultural property . . . to prepare or commit hostile acts" in time of armed conflict.¹⁵⁵⁸

1439. Tajikistan's Criminal Code punishes "the perfidious use of . . . protective signs and signals recognised by international humanitarian law" in an international or internal armed conflict.¹⁵⁵⁹

1440. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of . . . [AP I]".¹⁵⁶⁰

1441. Under Yemen's Military Criminal Code, the "perfidious use of . . . international protective emblems provided for in international conventions" is a war crime.¹⁵⁶¹

1442. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of . . . [AP I]".¹⁵⁶²

International Conferences

1447. According to the report of the Working Group to Committee III of the CDDH, Article 37 AP I “limit[s] itself to a brief list of particularly clear examples [of perfidious acts]. Examples that were debatable or involved borderline cases were avoided.”¹⁵⁶³

IV. Practice of International Judicial and Quasi-judicial Bodies

1448. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1449. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “the perfidious use of the . . . distinctive signs marking specifically protected persons and objects; . . . [of] other protected signs recognized by the law of war; . . . [and of] distinctive signals used for identification of medical service and civil defence” constitutes a grave breach of the law of war.¹⁵⁶⁴

1450. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included “the perfidious use of the . . . protective signs and signals recognized by international humanitarian law”, when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹⁵⁶⁵

VI. Other Practice

1451. No practice was found.

Simulation of civilian status*I. Treaties and Other Instruments**Treaties*

1452. Article 37(1)(c) AP I lists “the feigning of civilian, non-combatant status” as an act of perfidy. Article 37 AP I was adopted by consensus.¹⁵⁶⁶

1453. Article 21(1) of draft AP II submitted by the ICRC to the CDDH provided that “when carried out in order to commit or resume hostilities, . . . the

feigning, before an attack, of non-combatant status" was considered as perfidy.¹⁵⁶⁷ However, this proposal was deleted from draft Article 21 adopted in Committee III of the CDDH.¹⁵⁶⁸

Other Instruments

1454. Paragraph 110(c) of the 1994 San Remo Manual provides that "warships and auxiliary vessels... are prohibited... at all times from actively simulating the status of... vessels carrying civilian passengers". Paragraph 111(a) states that "perfidious acts include the launching of an attack while feigning... civilian... status".

II. National Practice

Military Manuals

1455. Argentina's Law of War Manual states that "feigning the condition of a civilian non-combatant person" is an example of perfidy.¹⁵⁶⁹

1456. Australia's Commanders' Guide, in a section entitled "Perfidy", states that "combatants wearing civilian clothing in battle... violate LOAC and diminish the enemy's ability to... distinguish civilians".¹⁵⁷⁰ The manual adds that "acts which constitute perfidy include feigning of... civilian, non-combatant status".¹⁵⁷¹

1457. Australia's Defence Force Manual states that "acts which constitute perfidy include feigning of... civilian or noncombatant status".¹⁵⁷²

1458. Belgium's Law of War Manual provides that "feigning having civilian or non-combatant status" is a perfidious act.¹⁵⁷³

1459. Cameroon's Instructors' Manual stresses that "feigning civilian or non-combatant status" is an example of perfidy.¹⁵⁷⁴

1460. Canada's LOAC Manual provides that "the following are examples of perfidy if a hostile act is committed while:... feigning civilian, non-combatant status".¹⁵⁷⁵ It also considers it an act of perfidy in air warfare if a hostile act is committed while "using false markings on military aircraft such as the markings of civil aircraft".¹⁵⁷⁶

1461. Ecuador's Naval Manual states that illegal combatants may be denied prisoner-of-war status, tried and punished. It also specifies that "it is a

violation of the law of armed conflict to kill, injure, or capture the enemy by false indication of . . . civilian status . . . Attacking enemy forces while posing as a civilian puts all civilians at hazard. Such acts of perfidy are punishable as war crimes."¹⁵⁷⁷

1462. France's LOAC Manual prohibits the simulation of non-combatant status.¹⁵⁷⁸

1463. Indonesia's Military Manual provides that "it is prohibited to kill or injure the enemy by perfidy, such as to pretend to be a non-combatant".¹⁵⁷⁹

1464. Israel's Manual on the Laws of War provides several examples of perfidious acts. Notably, it states that "it is forbidden to pose as non-combatant civilians. When the arena of warfare does not yield a clear picture as to who is a civilian and who is a disguised combatant, civilians will be ultimately harmed."¹⁵⁸⁰

1465. Under Italy's LOAC Elementary Rules Manual, "it is prohibited to feign to belong to a protected category to invite the confidence of the enemy".¹⁵⁸¹

1466. Kenya's LOAC Manual states that "feigning non-combatant status" is an example of treachery.¹⁵⁸²

1467. The Military Manual of the Netherlands states that API "gives a number of examples of treacherous behaviour: feigning to possess the status of civilian or noncombatant".¹⁵⁸³

1468. New Zealand's Military Manual provides that "the following acts are examples of perfidy: . . . the feigning of civilian, noncombatant status".¹⁵⁸⁴ It also states that "the use of civilian aircraft or vessels to transport military cargo would not be perfidious unless it involved an intent to betray the confidence of the enemy, in which case it would be a war crime".¹⁵⁸⁵ The manual adds that "the use of false markings on military aircraft such as the markings of civil aircraft . . . is the prime example of perfidious conduct in air warfare and is prohibited".¹⁵⁸⁶

1469. Nigeria's Military Manual gives the following example of "perjury" (perfidy): "feigning civilian or non-combatant status".¹⁵⁸⁷

1470. Nigeria's Manual on the Laws of War states that the "use of civilian clothing . . . by troops engaged in a battle" is a war crime.¹⁵⁸⁸

¹⁵⁷⁷ Ecuador, *Naval Manual* (1989), §§ 12.7 and 12.7.1.

¹⁵⁸⁸ Nigeria, *Manual on the Laws of War* (undated), § 6.

1471. Under Romania's Soldiers' Manual, "feigning civilian or non-combatant status" is an act of perfidy.¹⁵⁸⁹

1472. South Africa's LOAC Manual gives as an example of perfidy the prohibition "to feign civilian non-combatant status".¹⁵⁹⁰ The manual also considers the "use of civilian clothing by troops to conceal their military character during battle" to be a grave breach of the law of war and a war crime.¹⁵⁹¹

1473. Spain's LOAC Manual provides that simulating the status of a civilian person or non-combatant is an example of a perfidious act.¹⁵⁹²

1474. Sweden's IHL Manual mentions, as an example of perfidious conduct, "the feigning of protected civilian status".¹⁵⁹³

1475. The UK Military Manual describes as treacherous the use of false assurances followed by firing, noting that this "device is often accompanied by the use of enemy uniforms or civilian clothing".¹⁵⁹⁴ Furthermore, the manual states "in addition to the 'grave breaches' of the 1949 [Geneva] Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . use of civilian clothing . . . by troops engaged in battle".¹⁵⁹⁵

1476. The UK LOAC Manual states that the "feigning of non-combatant status" is an example of treachery.¹⁵⁹⁶

1477. According to the US Field Manual, the use of civilian clothing by troops to conceal their military character during battle is an act for which a combatant would lose his right to be treated as a prisoner of war.¹⁵⁹⁷ The manual also states that "in addition to the 'grave breaches' of the Geneva Conventions of 1949, the following acts are representative of violations of the law of war ('war crimes'): . . . use of civilian clothing by troops to conceal their military character during battle".¹⁵⁹⁸

1478. According to the US Air Force Pamphlet, the use of civilian clothing by troops to conceal their military character during battle is an act for which a combatant would lose his right to be treated as a prisoner of war.¹⁵⁹⁹ The Pamphlet further emphasises that "in addition to the grave breaches of the Geneva Conventions of 1949, the following acts are representative of situations involving individual criminal responsibility: . . . intentional use of civilian clothing to conceal military identity during battle".¹⁶⁰⁰ In respect of air warfare, it states that:

¹⁵⁸⁹ Romania, *Soldiers' Manual* (1991), p. 35.

¹⁶⁰⁰ US, *Air Force Pamphlet* (1976), § 15-3(c)(6).

Aircrew members do customarily wear uniforms because flight suits fully qualify as uniforms when they are so distinctive in character as to distinguish the wearer from the civilian population . . . In that connection, the prohibition of perfidy, such as disguising oneself as a civilian in order to engage hostilities, . . . is applicable.¹⁶⁰¹

It also provides that, generally speaking, “disguising combatants in civilian clothing in order to commit hostilities constitutes perfidy”.¹⁶⁰² This is also the case of the “feigning by combatants of civilian, noncombatant status”.¹⁶⁰³

1479. The US Instructor’s Guide notes that “in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: . . . using civilian clothing to conceal military identity during battle”.¹⁶⁰⁴

1480. The US Naval Handbook states that illegal combatants may be denied prisoner-of-war status, tried and punished. It also stipulates that “it is a violation of the law of armed conflict to kill, injure, or capture the enemy by false indication of . . . civilian status . . . Attacking enemy forces while posing as a civilian puts all civilians at hazard. Such acts of perfidy are punishable as war crimes.”¹⁶⁰⁵

National Legislation

1481. Colombia’s Penal Code, in an article entitled “Perfidy”, imposes a criminal sanction on “anyone who, during an armed conflict and with intent to harm or attack the adversary, simulates the condition of a protected person”, which includes civilians.¹⁶⁰⁶

1482. The Draft Amendments to the Penal Code of El Salvador, in an article entitled “Perfidy”, provide for a prison sentence for “anyone who, during an international or non-international armed conflict, with the view to harm or attack the adversary, simulates the status of a protected person”.¹⁶⁰⁷

1483. Under Ireland’s Geneva Conventions Act as amended, any “minor breach” of AP I, including violations of Article 37(1) AP I, is a punishable offence.¹⁶⁰⁸

1484. Nicaragua’s Draft Penal Code, in an article entitled “Perfidy”, punishes “anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, simulates the status of a protected person”.¹⁶⁰⁹

1485. Under Norway’s Military Penal Code as amended, “anyone who contravenes or is accessory to the contravention of provisions relating to the

protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹⁶¹⁰

National Case-law

1486. In 1995, in a decision concerning the constitutionality of AP II, Colombia's Constitutional Court stated that "the feigning of civilian status to injure, kill or capture an adversary constitutes an act of perfidy which is prohibited by the rules of international humanitarian law, as clearly stipulated in Article 37 of [AP I]". The Court held that, while AP II does not contain rules on perfidy in situations of non-international armed conflict:

that does not mean that it is authorized, since the treaty must be interpreted in the light of all the humanitarian principles. As stated in the Taormina Declaration, the prohibition of perfidy is one of the general rules governing the conduct of hostilities that applies in non-international armed conflicts.¹⁶¹¹

1487. In the *Swarka case* before an Israeli Military Court in 1974, the defendants had entered Israel from Egypt and launched rockets on a civilian settlement. When brought to trial, they claimed that they were entitled to POW status under Article 4 GC III, since they were soldiers in the Egyptian regular army and had committed the actions on the orders of their commander. The Prosecutor argued that they could not benefit from POW status since they wore civilian clothes when they carried out their operations. The Court observed that neither the 1907 HR nor the Geneva Conventions required that members of regular forces had to wear uniforms at the time of capture to be entitled to their protection. However, it considered that "it would be quite illogical to regard the duty of wearing uniform (in the sense of a distinctive sign) as imposed only on the quasi-military units referred to in Article 4(A)(2) [GC III] and not on soldiers of regular military forces". It concluded that the defendants were to be prosecuted as saboteurs.¹⁶¹²

1488. In 1968, the Judicial Committee of the Privy Council (UK) heard the appeals of two members of the Indonesian armed forces who had entered a non-military building in Singapore – which at the time formed part of Malaysia – wearing civilian clothes and had planted a bag containing explosives. The ensuing explosion had caused two deaths, and the accused had been convicted of murder and sentenced to death. The Privy Council held that members of armed forces who committed acts of sabotage in territory under the control of opposing forces, when dressed in civilian clothes both at the time of the acts of sabotage and when arrested, were not entitled to be treated on capture as prisoners of war under the Geneva Conventions but were subject to trial and punishment.¹⁶¹³

¹⁶¹⁰ Norway, *Military Penal Code as amended (1902)*, § 108(b).

¹⁶¹¹ Colombia, Constitutional Court, *Constitutional Case No. C-225/95*, Judgement, 18 May 1995.

¹⁶¹² Israel, Military Court, *Swarka case*, Judgement, 1974.

¹⁶¹³ Malaysia, Judicial Committee of the Privy Council (UK), *Ali case*, Judgement, 29 July 1968.

1489. In the *Nwaoga case* before the Supreme Court of Nigeria in 1972, the appellant and two officers of the rebel Biafran army disguised in civilian clothes went to a town under the control of federal troops and killed an unarmed person. The appellant was convicted for murder. The Court held that rebels must not feign civilian status while engaging in military operations and that, in these circumstances (operation in disguise, not in the rebel army uniform but in plain clothes, thus appearing to be members of the peaceful private population), the appellant was liable to punishment under the Criminal Code since the “deliberate and intentional killing of an unarmed person living peacefully inside the Federal territory . . . is a crime against humanity, and even if committed during a civil war is in violation of the domestic law of the country, and must be punished”.¹⁶¹⁴

1490. In 1942, in the *Quirin case* in which German saboteurs had entered the US in civilian clothing, the US Supreme Court held that:

Each petitioner, in circumstances which gave him the status of an enemy belligerent, passed our military and naval lines, in civilian dress and with hostile purpose. The offense [under the laws of war] was complete when with that purpose they entered – or, having so entered, they remained upon – our territory in time of war without uniform or other appropriate means of identification.¹⁶¹⁵

Other National Practice

1491. At the CDDH, the representative of Algeria stated that the inclusion of “the disguising of combatants in civilian clothing” as an example of perfidy “seemed to be difficult to accept, since it did not take into account certain situations, particularly guerrilla operations. His delegation would therefore be inclined to endorse the Indonesian amendment . . . proposing the deletion of that paragraph.”¹⁶¹⁶ However, Algeria finally agreed upon paragraph 1(c) of Article 35 of draft AP I (now Article 37) in supporting the view of Vietnam stated below.¹⁶¹⁷

1492. According to the Report on the Practice of Algeria, the policy followed by Algerian combatants during the war of independence was summarised in the maxim “Djellaba le jour, uniforme la nuit” (“Djellaba by day, uniform by night”).¹⁶¹⁸

1493. At the CDDH, Egypt, commenting on Article 44 AP I, stated that the right of the guerrilla fighter to be considered as a lawful combatant “did not release regular combatants from their obligation to wear their uniform

during military operations, failing which they would be committing an act of perfidy".¹⁶¹⁹

1494. At the CDDH, Indonesia proposed deleting paragraph 1(c) of Article 35 of draft AP I (now Article 37).¹⁶²⁰ This proposal was the expression of the fear that paragraph 1(c) could be misused to punish combatants who would otherwise be entitled to the status of prisoner of war. However, Indonesia finally agreed upon paragraph 1(c) of Article 35 of draft AP I (now Article 37) following the same reasoning as the one of Vietnam stated below.¹⁶²¹

1495. At the final plenary meeting of the CDDH, the Israeli delegation declared that "Israel regards [Article 37 AP I], and in particular its paragraph 1(c), as an essential and basic provision. It reaffirms the fundamental distinction made in customary law between combatants and non-combatants."¹⁶²²

1496. At the CDDH, the Philippines, having in mind guerrilla warfare, supported the amendments proposed by Indonesia and Vietnam to delete paragraph 1(c) of Article 35 of draft AP I (now Article 37) because "it would be basically unjust to brand the wearing of civilian clothing by a combatant as perfidy when such circumstances were brought about by the superior military strength of the aggressor".¹⁶²³ However, the Philippines finally agreed upon paragraph 1(c) following the same reasoning as the one of Vietnam stated below.¹⁶²⁴

1497. At the CDDH, Romania supported the amendments of Indonesia and Vietnam proposing the deletion of paragraph 1(c) of Article 35 of draft AP I (now Article 37), "since the act covered by the provision could not be regarded as a typical case of perfidy".¹⁶²⁵ However, Romania finally agreed upon paragraph 1(c) following the same reasoning as the one of Vietnam stated below.¹⁶²⁶

1498. US practice since the Second World War has refused prisoner-of-war treatment to enemy combatants captured in civilian clothing while not carrying their arms openly. During the Vietnam War, the US policy was to consider that all combatants captured during military operations were to be accorded prisoner-of-war status, while terrorists, spies and saboteurs were not.¹⁶²⁷

1499. In 1989, in a memorandum of law, the Judge Advocate General of the US Department of the Army stated that:

¹⁶¹⁹ Egypt, Statement at the CDDH, *Official Records*, Vol. XV, CDDH/III/SR.55, 22 April 1977, p. 160, § 28.

¹⁶²⁶ CDDH, *Official Records*, Vol. XV, CDDH/III/SR.47, 31 May 1976, pp. 85 and 86, § 4.

¹⁶²⁷ George S. Prugh, *Law at War: Vietnam 1964-1973*, Department of the Army, Vietnam Studies, Washington D.C., 1975, p. 66.

Traditionally, soldiers have an obligation to wear uniforms to distinguish themselves from the civilian population. Law-of-war sources prior to World War II suggested that the prohibition on killing or wounding “treacherously” referred to soldiers disguising themselves as civilians in order to approach an enemy force and carry out a surprise attack. That concept was thrown into disarray during World War II by the reliance on partisans by all parties to that conflict. While frequently characterized as an assassination, the 27 May 1942 ambush of SS General Reinhard Heydrich by British SOE [Special Operations Executive]-trained Czechoslovakian partisans is representative of the practice of each party to the conflict employing organized resistance units to carry out attacks against military units and personnel of an occupying power.

Reliance upon organized partisan forces changed state practice and, accordingly, the law of war. Coordinated British and U.S. revisions of their respective post-World War II law of war manuals reflected this change. For example, the following . . . italicized . . . sentence was added to paragraph 31 [of the US Field Manual]:

[Article 23(b) of the 1907 HR] is construed as prohibiting assassination . . . *It does not, however, preclude attacks on individual soldiers or officers of the enemy whether in the zone of hostilities, occupied territory, or elsewhere.*

The annotations to [the manual] state that the [italicised] sentence was inserted “so as not to foreclose activity by resistance movements, paratroops, and other belligerents who may attack individual persons”. The deliberate decision by many nations to employ surrogate guerrilla forces in lieu of or in connection with conventional military units to fight a succession of guerrilla wars since 1945 has served to raise further doubts regarding the traditional rule.

While state practice suggests that the employment of partisans is lawful, that is, would not constitute assassination, a question remains regarding the donning of civilian clothing by conventional forces personnel for the purpose of killing enemy combatants. However, in the one known case of such practice during World War II, a British officer who successfully entered a German headquarters dressed in civilian attire and killed the commanding general was decorated rather than punished for his efforts.¹⁶²⁸ [emphasis in original]

1500. According to the Report on US Practice, the *opinio juris* of the US is that:

Customary international law does not . . . prohibit belligerents from using saboteurs, secret agents or other irregular forces feigning civilian status to attack legitimate military targets. Wear of civilian clothing during an attack, or during a spying or sabotage mission behind enemy lines, may subject combatants to punishment if captured by the enemy.¹⁶²⁹

1501. At the CDDH, Vietnam proposed deleting paragraph 1(c) of Article 35 of draft AP I (now Article 37).¹⁶³⁰ It stated that ill-armed peoples of Asia, Africa and Latin America, fighting either to defend their independence or to exercise their right of self-determination,

¹⁶²⁸ US, Department of the Army, Office of the Judge Advocate General, Memorandum of Law: Executive Order 12333 and Assassination, 2 November 1989, *The Army Lawyer*, Pamphlet 27-50-204, December 1989, p. 6.

¹⁶²⁹ Report on US Practice, 1997, Chapter 2.4.

¹⁶³⁰ Vietnam, Proposal of amendment to Article 35 of draft AP I submitted to the CDDH, *Official Records*, Vol. III, CDDH/III/236, 25 February 1975, p. 165.

lacked the necessary means to provide uniforms for members of their national forces or their rural and urban militia. To regard that state of affairs as perfidy would be to legislate against nations defending their right to self-determination. Logically speaking, the question was not one of perfidy, since that implied the intention to betray an adversary's good faith.¹⁶³¹

Vietnam finally agreed upon Article 35 of draft AP I, after the introduction of the saving clause under Article 44(3) AP I, whereby the wearing of civilian clothes does not amount to perfidy when combatants fulfil the conditions to be recognised as legitimate combatants (in situations where the combatant cannot distinguish themselves from the civilian population, they retain their combatant status, provided that they carry their arms openly during each military engagement, and during such time as they are visible to the adversary while they are engaged in military deployment preceding the launching of an attack in which they are to participate).¹⁶³²

III. Practice of International Organisations and Conferences

1502. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

1503. In the interlocutory appeal in the *Tadić case* in 1995, the ICTY, referring to the *Nwaoga case*, stated that:

State practice shows that general principles of customary international law have evolved with regard to internal armed conflict also in areas relating to methods of warfare. In addition to what has been stated above, with regard to the ban on attacks on civilians in the theatre of hostilities, mention can be made of the prohibition of perfidy. Thus, for instance, in a case brought before Nigerian courts, the Supreme Court of Nigeria held that rebels must not feign civilian status while engaging in military operations.¹⁶³³

V. Practice of the International Red Cross and Red Crescent Movement

1504. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that "to pretend being a civilian or non-combatant" is an act of perfidy.¹⁶³⁴

¹⁶³¹ Vietnam, Statement at the CDDH, *Official Records*, Vol. XIV, CDDH/III/SR.28, 4 March 1975, p. 260, § 7.

¹⁶³² Vietnam, Statement at the CDDH, *Official Records*, Vol. XV, CDDH/III/SR.47, 31 May 1976, p. 86, § 5.

VI. Other Practice

1505. No practice was found.

Simulation of protected status by using flags or military emblems, insignia or uniforms of neutral or other States not party to the conflict

Note: For practice concerning the use of flags or military emblems, insignia or uniforms of neutral or other States not party to the conflict which does not amount to perfidy, see *supra* section G of this chapter.

I. Treaties and Other Instruments

Treaties

1506. Article 37(1)(d) AP I lists “the feigning of protected status by the use of signs, emblems or uniforms . . . of neutral or other States not Parties to the conflict” as an act of perfidy. Article 37 AP I was adopted by consensus.¹⁶³⁵

1507. Under Article 85(3)(f) AP I, “the perfidious use, in violation of Article 37, . . . of . . . protective signs recognized by the Conventions or this Protocol” is a grave breach of AP I. Article 85(5) adds that “without prejudice to the application of the [Geneva] Conventions and of this Protocol, grave breaches of these instruments shall be regarded as war crimes”. Article 85 AP I was adopted by consensus.¹⁶³⁶

Other Instruments

1508. Paragraph 111(a) of the 1994 San Remo Manual states that “perfidious acts include the launching of an attack while feigning . . . neutral . . . status”.

II. National Practice

Military Manuals

1509. Argentina’s Law of War Manual states that “making use of signs, emblems or uniforms . . . of neutral states or other states which are not parties to the conflict, so as to simulate a protected status” is an example of perfidy.¹⁶³⁷

1510. Australia’s Commander’s Guide stresses that “acts which constitute perfidy include feigning of . . . protected status by the use of protective symbols, signs, emblems or uniforms . . . of neutral or other States not involved in the conflict”.¹⁶³⁸ In a section entitled “Perfidy”, the manual also states that “it is illegal to use in battle emblems, markings or clothing of a neutral . . .

¹⁶³⁵ CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 May 1977, p. 103.

¹⁶³⁶ CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 291.

¹⁶³⁷ Argentina, *Law of War Manual* (1989), § 1.05(2)(4).

¹⁶³⁸ Australia, *Commanders’ Guide* (1994), § 826(d) (naval warfare) and § 902(d) (land warfare).

Combatants . . . pretending to be a member of a neutral nation violate LOAC and diminish the enemy's ability to identify neutrals."¹⁶³⁹

1511. Australia's Defence Force Manual provides that "acts which constitute perfidy include feigning of . . . protected status by the use of protective symbols, signs, emblems or uniforms . . . of neutral or other states not involved in the conflict".¹⁶⁴⁰

1512. Belgium's Law of War Manual states that "opening fire wearing the uniform . . . of neutral forces" is an act of perfidy.¹⁶⁴¹

1513. Cameroon's Instructors' Manual notes that "feigning to have a protected status by using signs, emblems or uniforms . . . of neutral States or States not parties to the conflict" is an example of perfidy.¹⁶⁴²

1514. Canada's LOAC Manual provides that "the following are examples of perfidy if a hostile act is committed while: . . . feigning protected status by the use of signs, emblems or uniforms . . . of neutral or other states not parties to the conflict".¹⁶⁴³

1515. France's LOAC Manual states that the use of the emblems or uniforms of third States for hostile purposes is criminalised.¹⁶⁴⁴

1516. The Military Manual of the Netherlands states that API "gives a number of examples of treacherous behaviour: feigning to possess a protected position by using signs, emblems or uniforms . . . of States which are not parties to the conflict".¹⁶⁴⁵

1517. New Zealand's Military Manual provides that "the following acts are examples of perfidy: . . . the feigning of protected status by the use of signs, emblems or uniforms . . . of neutral or other States not Parties to the conflict".¹⁶⁴⁶

1518. Nigeria's Military Manual gives the following example of "perjury" (perfidy): "feigning protection status by the use of signs, emblems or uniforms . . . of a neutral [state] or state not being a party to the conflict".¹⁶⁴⁷

1519. Under Romania's Soldiers' Manual, "feigning the status of a protected person by abusing the signs and emblems of . . . neutral States or States which are not party to the conflict" is an act of perfidy.¹⁶⁴⁸

1520. Spain's LOAC Manual provides that "simulating possession of a protected status by using signs, emblems or uniforms . . . of neutral States or other States which are not Parties to the conflict" is an example of perfidy.¹⁶⁴⁹

¹⁶⁴⁹ Spain, *LOAC Manual* (1996), Vol. I, § 3.3.b.(1), see also § 5.3.c.

1521. Sweden's IHL Manual considers as an example of perfidious conduct "the feigning of protected status... of a member of the armed forces of a neutral state".¹⁶⁵⁰

1522. Switzerland's Basic Military Manual prohibits perfidy. Thus, "it is notably forbidden... to abuse a protected status by using signs, emblems or uniforms... of nations not involved in the conflict".¹⁶⁵¹

1523. The YPA Military Manual of the SFRY (FRY) states that feigning a protected status by the use of symbols, signs, emblems or uniforms of neutral States or other States not parties to the conflict is an act of perfidy.¹⁶⁵²

National Legislation

1524. Argentina's Draft Code of Military Justice punishes any soldier who "uses... in a perfidious manner, the flag, uniform, insignia or distinctive emblem of neutral States... or of other States which are not parties to the conflict".¹⁶⁵³

1525. Australia's Geneva Conventions Act as amended provides that "a person who, in Australia or elsewhere, commits a grave breach... of [AP I] is guilty of an indictable offence".¹⁶⁵⁴

1526. Canada's Geneva Conventions Act as amended provides that "every person who, whether within or outside Canada, commits a grave breach [of AP I]... is guilty of an indictable offence".¹⁶⁵⁵

1527. Colombia's Penal Code, in an article entitled "Perfidy", imposes a criminal sanction on "anyone who, during an armed conflict, with intent to harm or attack the adversary... uses improperly... flags or uniforms of neutral States".¹⁶⁵⁶

1528. The Geneva Conventions and Additional Protocols Act of the Cook Islands punishes "any person who in the Cook Islands or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach... of [AP I]".¹⁶⁵⁷

1529. Cyprus's AP I Act punishes "any person who, whatever his nationality, commits in the Republic or outside the Republic any grave breach of the provisions of the Protocol, or takes part or assists or incites another person in the commission of such a breach".¹⁶⁵⁸

1530. The Draft Amendments to the Penal Code of El Salvador, in an article entitled "Perfidy", provide for a prison sentence for "anyone who, during

an international or non-international armed conflict, with the view to harm or attack the adversary, . . . uses . . . the flags, uniforms or insignia of neutral States".¹⁶⁵⁹

1531. Ireland's Geneva Conventions Act as amended provides that grave breaches of AP I are punishable offences.¹⁶⁶⁰ It adds that any "minor breach" of AP I, including violations of Article 37(1) AP I, is also a punishable offence.¹⁶⁶¹

1532. New Zealand's Geneva Conventions Act as amended provides that "any person who in New Zealand or elsewhere commits, or aids or abets or procures the commission by another person of, a grave breach . . . of [AP I] is guilty of an indictable offence".¹⁶⁶²

1533. Nicaragua's Draft Penal Code, in an article entitled "Perfidy", punishes "anyone who, during an international or internal armed conflict, with the view to harm or attack the adversary, . . . uses . . . flags, uniforms or insignia of neutral countries".¹⁶⁶³

1534. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹⁶⁶⁴

1535. Spain's Penal Code punishes "anyone who, during an armed conflict . . . uses . . . in a perfidious manner the flag, uniform, insignia or distinctive emblem of neutral States . . . or of other States which are not parties to the conflict".¹⁶⁶⁵

1536. The UK Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside the United Kingdom, commits, or aids, abets or procures the commission by any other person of, a grave breach of . . . [AP I]".¹⁶⁶⁶

1537. Zimbabwe's Geneva Conventions Act as amended punishes "any person, whatever his nationality, who, whether in or outside Zimbabwe, commits any such grave breach of . . . [AP I]".¹⁶⁶⁷

National Case-law

1538. No practice was found.

III. Practice of International Organisations and Conferences

1540. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

1541. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

1542. The ICRC Commentary on the Additional Protocols states that:

The perfidious use . . . of emblems, signs, signals or uniforms referred to in Article 37 . . . of the Protocol [among which the signs, emblems or uniforms of neutral States or other States not parties to the conflict], for the purpose of killing, injuring or capturing an adversary, constitutes a grave breach under [Article 85(3)(f) AP I].¹⁶⁶⁸

1543. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “to pretend having protected status by the use of flags, emblems or uniforms . . . of neutral States” is an act of perfidy.¹⁶⁶⁹ Delegates also teach that “the perfidious use of the . . . distinctive signs marking specifically protected persons and objects . . . [and of] other protected signs recognized by the law of war” constitutes a grave breach of the law of war.¹⁶⁷⁰

1544. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC included “the perfidious use of the . . . protective signs and signals recognized by international humanitarian law”, when committed in an international armed conflict, in its list of war crimes to be subject to the jurisdiction of the Court.¹⁶⁷¹

VI. Other Practice

1545. No practice was found.

COMMUNICATION WITH THE ENEMY

A. Non-Hostile Contacts between the Parties to the Conflict (practice relating to Rule 66)	§§ 1–153
General	§§ 1–48
Use of the white flag of truce	§§ 49–92
Definition of parlementaires	§§ 93–122
Refusal to receive parlementaires	§§ 123–153
B. Inviolability of Parlementaires (practice relating to Rule 67)	§§ 154–233
C. Precautions while Receiving Parlementaires (practice relating to Rule 68)	§§ 234–287
General	§§ 234–260
Detention of parlementaires	§§ 261–287
D. Loss of Inviolability of Parlementaires (practice relating to Rule 69)	§§ 288–314

Note: This chapter deals with practice concerning communication on the battlefield for humanitarian or military purposes. Practice regarding political negotiations to resolve a conflict is excluded from this study.

A. Non-Hostile Contacts between the Parties to the Conflict

General

Note: For practice concerning local arrangements concluded for the evacuation of the wounded, sick and shipwrecked, see Chapter 34, section A. For practice concerning the conclusion of an agreement to suspend combat with the intention of attacking by surprise the adversary relying on it, see Chapter 18, section H.

I. Treaties and Other Instruments

Treaties

1. No practice was found.

Other Instruments

2. Under Paragraph II(2) of the 1992 Agreement No. 3 on the ICRC Plan of Action between the Parties to the Conflict in Bosnia and Herzegovina, the ICRC requests that all parties accept their responsibilities and take essential measures, such as to “negotiate, organize and respect truces in areas where humanitarian activities are conducted and inform the population accordingly through the media”.

*II. National Practice**Military Manuals*

3. Argentina’s Law of War Manual provides that “the observation of the principle of good faith must be constant and unflinching in dealings with the enemy”.¹

4. Under Belgium’s Field Regulations, “it is prohibited to enter in contact with the enemy, except with deserters, the wounded and parlementaires”.²

5. Belgium’s Law of War Manual states that:

Relations between military commanders in the field of operations are necessary . . . for military or humanitarian purposes . . .

It is indispensable that, from both sides, these relations [intercourse between belligerents] be marked by the most scrupulous good faith and that no party takes any advantage from these relations that the other party does not intend to concede.³

6. Burkina Faso’s Disciplinary Regulations states that it is prohibited for a combatant “to enter in contact with the enemy”.⁴

7. Cameroon’s Disciplinary Regulations states that it is prohibited for a combatant “to enter in contact with the enemy”.⁵

8. Canada’s LOAC Manual provides that “negotiations between belligerent commanders may be conducted by intermediaries known as parlementaires. The wish to negotiate by parlementaires is frequently indicated by the raising of a white flag, but any other method of communication such as radios may be employed.”⁶

9. Congo’s Disciplinary Regulations states that it is prohibited for a combatant “to enter in contact with the enemy”.⁷

10. Croatia’s Commanders’ Manual states that:

Local interruptions of combat and other arrangements can be concluded between opposing forces. At lower levels, such arrangements can be very simple and concluded orally: voice, radio, bearer of a white flag (flag of truce). At higher levels

¹ Argentina, *Law of War Manual* (1969), § 1.017.

² Belgium, *Field Regulations* (1964), § 21.

³ Belgium, *Law of War Manual* (1983), p. 40.

⁶ Canada, *LOAC Manual* (1999), p. 14-1, § 3.

⁷ Congo, *Disciplinary Regulations* (1986), Article 30(3).

and for longer lasting interruptions of combat, written agreements shall be concluded.⁸

11. France's Disciplinary Regulations as amended states that it is prohibited for a combatant "to enter in contact with the enemy".⁹

12. Germany's Military Manual states that "a cessation of hostilities is regularly preceded by negotiations with the adversary. In the area of operations the parties to the conflict frequently use parlementaires for this purpose."¹⁰ The manual adds that:

Apart from detaching parlementaires, the parties to a conflict may also communicate with each other through the intermediary of Protecting Powers. Protecting Powers are neutral or other states not parties to the conflict which safeguard the rights and interests of a party to the conflict and those of its nationals vis-à-vis an adverse party to the conflict... Particularly the International Committee of the Red Cross may act as a so-called substitute... if the parties to the conflict cannot agree upon the designation of a Protecting Power...

A cease-fire is defined as a temporary interruption of military operations which is limited to a specific area and will normally be agreed upon between the local commanders. It shall regularly serve humanitarian purposes, in particular searching for and collecting the wounded and the shipwrecked, rendering first aid to these persons, and removing civilians.¹¹

13. Hungary's Military Manual stresses that non-hostile contacts with the enemy may be "direct or through an intermediary", for information, warning, summons, local arrangements or the creation of neutralised zones.¹²

14. Italy's IHL Manual notes that specific agreements to be executed on the battlefield may be concluded by parlementaires.¹³

15. Italy's LOAC Elementary Rules Manual provides that:

Local interruptions of combat and other arrangements can be concluded between opposing forces. At lower levels, such arrangements can be very simple and concluded orally: voice, radio, bearer of a white flag (flag of truce). At higher levels and for longer lasting interruptions of combat, written agreements shall be concluded.¹⁴

16. Kenya's LOAC Manual states that:

It is within the legal competence of an officer to arrange a temporary cease-fire for a specific and limited purpose, for example, to permit the collection or evacuation of the wounded. Any such action should be reported to the higher authority. Absolute good faith is required in all such dealings [the arrangement of a cease-fire] with the enemy.¹⁵

¹⁴ Italy, *LOAC Elementary Rules Manual* (1991), § 80.

¹⁵ Kenya, *LOAC Manual* (1997), Précis No. 4, p. 5.

17. South Korea's Operational Law Manual states that, instead of the white flag, radio communications or messages dropped from aircraft may be used to start negotiations.¹⁶

18. Lebanon's Army Regulations forbids communication by combatants with the enemy.¹⁷

19. Madagascar's Military Manual mentions non-belligerent contacts with the enemy through intermediaries such as protecting powers or the ICRC.¹⁸ It also states that:

Local cease-fires and other agreements may be concluded between the opposing forces. At inferior levels, such agreements may be very simple and concluded orally: voice, radio or bearer of a white flag (flag of parlementaires). At superior levels and for long term cease-fires, written agreements are to be concluded.¹⁹

20. The Military Handbook of the Netherlands emphasises that "only a commander may decide to negotiate with the adverse party".²⁰

21. New Zealand's Military Manual provides that:

Even between the belligerent armies direct contact may sometimes be necessary [for instance to arrange for the collection of the dead or exchange of the wounded] but relations between the belligerent forces are confined to mainly military matters. Occasionally, such relations, for example, the arrangement of a local truce or surrender, may involve political considerations but in view of radio and similar means of communication these matters tend nowadays to be taken up on an inter-government level, avoiding actual negotiations between belligerent commanders.

...

Negotiations between belligerent commanders are normally conducted, at least in the first instance, by intermediaries known as *parlementaires*. The wish to negotiate by *parlementaires* is frequently indicated by the raising of a white flag but any other method of communication, eg by radio, may be employed.

...

Any agreement made by belligerent commanders must be scrupulously adhered to... As between combatants, the most usual purpose of contact is to arrange for an armistice or truce, whether for a specific purpose or more generally. Whatever the nature of the arrangement it must be entered into and carried out in good faith.

...

Agreements between belligerents permitting activities between them which are inconsistent with belligerent status are known as cartels. Such an arrangement is voidable by either Party on proof of breach of its terms by the other.

... In addition to any other agreements that may be made between the belligerents or commanders in the field, the Geneva Conventions and AP I contain a number of

²⁰ Netherlands, *Military Handbook* (1995), p. 7-40.

provisions recognizing that in the special circumstances specified in these treaties agreements between belligerents may be desirable or necessary.²¹

22. Nigeria's Manual on the Laws of War states that "the conduct of war and the wish to restore peace sometimes require intercourse between the belligerents".²²

23. Spain's LOAC Manual notes that the belligerents may conclude special oral agreements on specific questions, such as agreements to allow the search for the wounded or for the flight of a medical aircraft over a small zone controlled by the enemy. Those simple low-level arrangements may be concluded by radio or by bearer of a white flag. Higher-level agreements must be concluded in writing (e.g. the establishment of demilitarised zones, or the flight of a medical aircraft over a large zone controlled by the enemy).²³ The manual adds that:

A truce is defined as a temporary interruption of military operations, limited to a specific area and usually concluded between local commanders. It shall regularly serve a humanitarian purpose, to facilitate the removal, the exchange and transport of wounded left on the battlefield, for the evacuation or exchange of wounded and sick from a besieged area, and for the passage of medical and religious personnel and medical equipment on their way to such areas.

...

In addition to parlementaires, the parties in conflict may communicate through the mediation of the Protecting Powers...

If the parties in conflict have not agreed upon the designation of a Protecting Power, the ICRC, or any other impartial and efficient organisation, may act as a "substitute"

...

One of the most usual missions of the military observers taking part in peacekeeping operations is to act as intermediaries between the parties to the conflict to facilitate the negotiation and implementation of local agreements.²⁴

24. Switzerland's Basic Military Manual provides that "military commanders of both sides may, within the bounds of their authority, contact each other directly in their respective operation zones".²⁵

25. The UK Military Manual states that:

It is on occasions unavoidable – and often convenient – for commanders to open direct communication with the enemy for military purposes. Furthermore, humanity and convenience may at times induce them for special reasons to relax the general prohibition of intercourse between belligerents.

...

It is essential that in such non-hostile relations the most scrupulous good faith should be observed by both parties, and that no advantage be taken which is not intended to be given by the enemy.²⁶

²¹ New Zealand, *Military Manual* (1992), §§ 405, including footnote 11, 406(1), 407(1) and (2) and 411.

²² Nigeria, *Manual on the Laws of War* (undated), § 24.

²³ Spain, *LOAC Manual* (1996), Vol. I, §§ 2.6.a and 10.8.f.(3).

²⁴ Spain, *LOAC Manual* (1996), Vol. I, §§ 2.6.b.(1) and 2.6.c.(2)–(4).

²⁵ Switzerland, *Basic Military Manual* (1987), Article 12(1).

²⁶ UK, *Military Manual* (1958), §§ 386 and 387.

The manual also provides that:

There is nothing in [Articles 32–34 of the 1907 HR] which indicates that a white flag is the only method whereby one belligerent may signify to the other its desire to open communications. In modern conditions of warfare wireless messages and loud-speakers are also used as a means of conveying the wish of one belligerent to communicate with the other.²⁷

The manual further emphasises that:

A suspension of arms is essentially a military convention of very short duration, concluded between commanders of armies, or detachments in order to arrange some local matter of urgency: most frequently to bury the dead, or to collect and succour the wounded, or, occasionally, to exchange prisoners, to permit conferences.

...

A cartel, in the wider sense of the term, is issued to signify a convention concluded between belligerents for the purpose of permitting certain kinds of non-hostile intercourse which would otherwise be prevented by the conditions of war. For instance, communication by post, trade in certain commodities, and the like, may be agreed upon by a cartel. In its strictly military sense, however, a cartel means an agreement for the exchange of prisoners of war.²⁸

26. The UK LOAC Manual states that:

It is within the legal competence of an officer to arrange for a temporary cease-fire for a specific and limited purpose, for example to permit the collection or evacuation of the wounded... Absolute good faith is required in all such dealings [the arrangement of a cease-fire] with the enemy.²⁹

27. The US Field Manual states that "absolute good faith with the enemy must be observed as a rule of conduct".³⁰ It also provides that:

One belligerent may communicate with another directly by radio, through parlementaires, or in a conference, and indirectly through a Protecting Power, a third State other than a Protecting Power, or the International Committee of the Red Cross

...

It is absolutely essential in all nonhostile relations that the most scrupulous good faith shall be observed by both parties, and that no advantage not intended to be given by the adversary shall be taken.

...

In current practice, radio messages to the enemy and messages dropped by aircraft are becoming increasingly important as a prelude to conversations between representatives of belligerent forces.

...

In its narrower sense, a cartel is an agreement entered into by belligerents for the exchange of prisoners of war. In its broader sense, it is any convention concluded between belligerents for the purpose of arranging or regulating certain kinds of

³⁰ US, *Field Manual* (1956), § 49.

nonhostile intercourse otherwise prohibited by reason of the existence of the war. Both parties to a cartel are in honor bound to observe its provisions with the most scrupulous care, but it is voidable by either party upon definite proof that it has been intentionally violated in an important particular by the other party.³¹

National Legislation

28. Under Lebanon's Code of Military Justice, communication with the enemy by combatants is a punishable offence.³²

29. The US Uniform Code of Military Justice punishes "any person . . . who communicates or corresponds with or holds any intercourse with the enemy, either directly or indirectly".³³

National Case-law

30. No practice was found.

Other National Practice

31. According to the Report on the Practice of Colombia, government practice has been to express publicly its willingness to enter into a dialogue with opposing armed groups for humanitarian reasons or to start negotiations.³⁴ During the takeover of the embassy of the Dominican Republic by the M-19 in 1980, direct contacts were established through the mediation of the Red Cross and of one of the detained ambassadors. The hostages were ultimately released and the guerrillas were allowed to leave the country.³⁵ Likewise, during the takeover of the Palacio de Justicia in 1985, direct communications were established by phone between the leader of the armed opposition group and an officer of the national police, although without success. In the meantime, military operations were not suspended.³⁶

32. The Report on the Practice of Egypt gives armistice and cease-fire agreements with Israel as examples of negotiation with the enemy.³⁷

33. According to the Report on the Practice of Russia, Georgia appealed to "the authority of the leader of the autonomous Republic of Adzharia, who negotiated directly with the Abkhaz authorities" to obtain the release of prisoners.³⁸

³¹ US, *Field Manual* (1956), §§ 452, 453, 458 and 469.

³⁷ Report on the Practice of Egypt, 1997, Chapter 2.2.

³⁸ Report on the Practice of Russia, 1997, Chapter 2.2.

34. Jordan has negotiated several temporary cease-fire agreements with the Palestinian resistance. The Report on the Practice of Jordan mentions two of them concluded in 1970.³⁹

35. According to the Report on the Practice of the Philippines, "government troops are directed to negotiate with the rebels in cases of armed confrontation".⁴⁰ The report also notes that, owing to the guerrilla nature of the conflict, negotiations between government troops and the armed opposition are usually carried out through third parties (local political and religious leaders). Cease-fires are, for example, negotiated to prevent economic disturbances or during Christian holiday celebrations.⁴¹

36. On the basis of replies by army officers to a questionnaire, the Report on the Practice of Rwanda mentions the use of the telephone and the sending of intermediaries, such as neutral civilian emissaries with a written authorisation (the ICRC, OAU, NGOs, religious leaders, journalists or members of peace-keeping forces), as means of communication between the parties in battlefield negotiations.⁴²

37. On the basis of a meeting with an army lawyer, the Report on UK Practice comments that negotiation with the enemy "is a tricky area now" owing to the practicalities of fast-paced modern warfare.⁴³

38. According to a memorandum of a legal adviser of the US Department of State in 1975, the President, as Commander-in-Chief of the armed forces, has the constitutional authority to conclude armistices and other agreements relating to the military security of the US.⁴⁴

39. The Report on US Practice states that:

The need to seek express authority to negotiate an agreement with the enemy . . . has been reinforced by the erosion, since the end of World War II, of distinctions between political agreements, such as peace treaties, and purely military agreements, such as truces and armistices . . . [The Air Force Pamphlet] noted that the practice of concluding peace treaties had become rare, and that armistices had often become

³⁹ Report on the Practice of Jordan, 1997, Chapter 2.2, referring to Cease-fire Agreement between the Jordanian Government and the Palestinian Resistance Movement, 7 July 1970; Cairo Agreement between the Jordanian Government and the Palestinian Resistance Movement, 27 September 1970.

⁴⁰ Report on the Practice of Philippines, 1997, Chapter 2.2.

Macabalang and Cena de Guzman, Gov't, MILF Reach Accord on Dam Dispute, *Manila Bulletin*, 30 January 1995; Farm Pact Forged with MILF Bared, *Manila Bulletin*, 10 June 1996; Aris R. Ilagan, AFP Optimistic on Truce with NPA: Holiday Ceasefire on, *Manila Bulletin*, 25 December 1993.

⁴² Report on the Practice of Rwanda, 1997, Replies by army officers to a questionnaire, Chapter 2.2.

⁴³ Report on UK Practice, 1997, Meeting with an army lawyer, 18 July 1997, Chapter 2.2.

⁴⁴ US, Legal Adviser to the Department of State, Memorandum of Law on the authority of the US President to enter into international agreements pursuant to his independent constitutional powers, 31 October 1975, reprinted in Eleanor C. McDowell, *Digest of United States Practice in International Law, 1975*, Department of State Publication 8865, Washington, D.C., 1976, pp. 314-315.

functional substitutes for peace treaties. The term "cease fire" was increasingly used for agreements that would once have been designated armistices.

...

Modern combat conditions may also make it more difficult to communicate directly with an enemy armed force.

...

US commanders have little inherent authority to negotiate with the enemy, and unauthorized communications with the enemy may be a military offense. The practice of the United States no longer recognizes any clear category of agreements as purely military without political overtones.⁴⁵

40. The Report on the Practice of the SFRY (FRY) notes that, during the conflicts in the former Yugoslavia, there were no large military operations in Slovenia that could have triggered negotiations with the enemy on the battlefield and that "it is hardly realistic that traditional requirements of the international law of warfare would have been respected" in the conflict in Croatia. The report concludes that the *opinio juris* of the SFRY (FRY) "is, beyond any doubt, that a legal possibility exists to contact the enemy on the battlefield".⁴⁶

41. According to the Report on the Practice of Zimbabwe, it is the opinion of the Judge Advocate General of the Defence Forces of Zimbabwe that, although there is no actual practice, "both the traditional and modern methods [of communication] are likely to be acceptable".⁴⁷

42. In 1987, an army officer of a State asked the ICRC to act as an intermediary in order that he might enter into communication with the leader of an armed opposition group to settle questions regarding the behaviour of troops.⁴⁸

43. In 1988, negotiations between a government and an armed opposition group through governmental militiamen paved the way for the orderly withdrawal of the governmental forces and the arrival of the armed opposition group.⁴⁹

44. In 1992, the authorities of a State responded positively to a request by a civil association close to an armed opposition group for a meeting on the protection of the civilian population. The ICRC was asked to organise the meeting.⁵⁰ In 1994, the Ministry of Foreign Affairs proposed that a communication line be established between the parties by satellite phone. The phone of the armed opposition group was to be located on the ICRC premises. The ICRC emphasised that its premises should then be respected and protected, even if combatants of the armed opposition group were present.⁵¹

III. Practice of International Organisations and Conferences

45. No practice was found.

⁴⁵ Report on US Practice, 1997, Chapter 2.2. (The report notes that general armistices often include political provisions, and therefore require high-level approval.)

⁵⁰ ICRC archive document. ⁵¹ ICRC archive document.

IV. Practice of International Judicial and Quasi-judicial Bodies

46. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

47. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that:

Contacts between opposing armed forces can be taken at any time by the commanders concerned. They can be established by all available technical means.

...

When direct contacts between commanders or contacts through bearers of flag of truce or similar persons are not possible, commanders may also ask for cooperation from the Protecting Power or from intermediaries such as the International Committee of the Red Cross.

Commanders of opposing armed forces may conclude agreements at any time. Such agreements shall not adversely affect the situation of war victims as defined by international treaties.

Very local, short term or urgent agreements can be concluded orally (e.g. local agreements for the search of wounded after combat action, isolated overflight of a small enemy controlled area by medical aircraft).

Long lasting and large scale agreements need to be concluded in writing (e.g. neutralized zones, non-defended localities, overflight of a large enemy controlled area by medical aircraft, agreement for the evacuation of a besieged area). For such agreements, inspiration can be taken from detailed provisions foreseen by the law of war (e.g. hospital zones, demilitarized and non-defended zones and localities).⁵²

VI. Other Practice

48. No practice was found.

Use of the white flag of truce

Note: *For practice concerning the carrying of the white flag of truce by a parlementaire, see the definition of a parlementaire in the following subsection. For practice concerning the use of the white flag of truce as an indication of a wish to surrender, see also Chapter 15, section B. For practice concerning the abuse, misuse or improper use of the white flag of truce, see Chapter 18, section B. For practice concerning the perfidious use of the white flag of truce, see Chapter 18, section I.*

I. Treaties and Other Instruments

49. No practice was found.

⁵² Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, §§ 539 and 541–544.

II. National Practice

Military Manuals

50. According to Australia's Commanders' Guide, "it is important to note that a white flag represents an expression of a desire to negotiate; it is not necessarily an indication of intent to surrender or enter into a cease-fire".⁵³

51. Australia's Defence Force Manual notes that "customary international law recognises the white flag as symbolising a request to cease-fire, negotiate, or surrender. An adversary displaying a white flag should be permitted the opportunity to surrender, or to communicate a request for cease-fire or negotiation."⁵⁴

52. Belgium's Law of War Manual expressly recognises the white flag as the flag of parlementaires.⁵⁵

53. Belgium's Teaching Manual for Soldiers recognises "the white flag of parlementaires (used for negotiation or surrender)".⁵⁶ It states that "this flag is actually recognised as the signal of a request for suspension of operations to enter into negotiations or to surrender".⁵⁷

54. Benin's Military Manual recognises the "white flag (flag of parlementaires used for negotiations and surrender)".⁵⁸

55. Cameroon's Instructors' Manual mentions "the flag of parlementaires or white flag for temporary suspension of combat".⁵⁹ The white flag is defined as the flag of parlementaires and the flag of surrendering combatants.⁶⁰

56. Canada's LOAC Manual notes that "personnel bearing a white flag are indicating a desire to negotiate or surrender".⁶¹

57. Canada's Code of Conduct stresses that "the showing of a white flag is not necessarily an expression of an intent to surrender. Furthermore, it is not necessarily applicable to all opposing forces in an area. The white flag can also mean that opposing forces wish to temporarily cease hostilities to talk or negotiate."⁶²

58. Colombia's Soldiers' Manual recognises "the white flag, which means surrender, parlementaire, negotiation and spirit of conciliation".⁶³

59. Under the Military Manual of the Dominican Republic, displaying a white flag is, *inter alia*, a manner of expressing a wish to surrender.⁶⁴

60. Ecuador's Naval Manual emphasises that "customary international law recognizes the white flag as symbolising a request to cease-fire, negotiate, or surrender".⁶⁵

61. France's LOAC Manual recognises the "white flag or flag of parlementaires".⁶⁶

62. Germany's Soldiers' Manual recognises the white flag as the flag of parlementaires and the flag of surrendering combatants.⁶⁷

63. Germany's Military Manual states that parlementaires "make themselves known by a white flag".⁶⁸

64. Germany's IHL Manual recognises the white flag as the flag of parlementaires.⁶⁹

65. Italy's LOAC Elementary Rules Manual recognises the "white flag (flag of parlementaires used for negotiations and surrender)".⁷⁰

66. Kenya's LOAC Manual provides that "the white flag or flag of truce indicates no more than an intention to enter into negotiations with the enemy. It does not necessarily mean a wish to surrender."⁷¹

67. South Korea's Operational Law Manual stresses that it is the expression of surrender for a soldier or a unit to display a white flag. It is also generally used for initiating negotiations.⁷²

68. Madagascar's Military Manual states that the white flag is a means of contacting the enemy.⁷³

69. The Military Manual of the Netherlands provides that the white flag "indicates that the party who displays the flag wants to negotiate... In addition, the white flag is also accepted as a usual indication of surrender."⁷⁴

70. The Military Handbook of the Netherlands states that "displaying the white flag means that one wants to negotiate with the adverse party (for example about a cease-fire) or that one wants to surrender".⁷⁵

71. New Zealand's Military Manual provides that "the wish to negotiate by *parlementaires* is frequently indicated by the raising of a white flag... *Parlementaires* normally operate under a flag of truce."⁷⁶ The manual adds that the white flag is deployed:

1. When a person is authorised by one Party to enter into communications with the adverse Party; if used, the white flag should be carried by the parlementaire or an accompanying individual so as to be clearly visible.

⁶⁵ Ecuador, *Naval Manual* (1989), § 11.10.4. ⁶⁶ France, *LOAC Manual* (2001), p. 61.

⁷⁶ New Zealand, *Military Manual* (1992), § 406(1) and (2).

2. If an element of the armed forces wishes to surrender to an adverse Party a white flag, when held so as to be clearly visible, may be utilized to facilitate a peaceful surrender.⁷⁷

72. Nigeria's Manual on the Laws of War notes that:

The hoisting of a white flag means that a belligerent wishes to communicate with the enemy, either for the purpose of surrender or for some other purposes. Hoisting the white flag by a small number of soldiers usually [expresses] the wish to surrender; in the case of a large unit it is usually the expression of a wish to conduct negotiations.⁷⁸

73. The Code of Ethics of the Philippines stresses that the white flag of truce is a "worldwide custom used to signal the temporary cessation of hostilities between warring parties".⁷⁹

74. South Africa's LOAC Manual provides that "a white flag designates a truce, a request to negotiate or an indication of surrender".⁸⁰

75. Togo's Military Manual recognises the "white flag (flag of parlementaires used for negotiations and surrender)".⁸¹

76. The UK Military Manual states that:

From time immemorial a white flag has been used as a signal by an armed force which wishes to open communications with the enemy. This is the only meaning which the flag possesses in international law. The hoisting of a white flag, therefore, means in itself nothing else than one party is asked whether it will receive a communication from the other. It may indicate merely that the party which hoists it wishes to make an arrangement for the suspension of arms for some purpose; but it may also mean that the party wishes to negotiate for surrender. Everything depends on the circumstances and conditions of the particular case. For instance, in practice, the white flag has come to indicate surrender if hoisted by individual soldiers or a small party in the course of an action. Great vigilance is always necessary, for the question in every case is whether the hoisting of the white flag was authorised by the commander.⁸²

77. The UK LOAC Manual provides that "the white flag, or flag of truce, indicates no more than an intention to enter into negotiations with the enemy. It does not necessarily mean a wish to surrender."⁸³

78. The US Field Manual notes that:

In the past, the normal means of initiating negotiations between belligerents has been the display of a white flag . . .

The white flag, when used by troops, indicates a desire to communicate with the enemy. The hoisting of a white flag has no other signification in international

⁷⁷ New Zealand, *Military Manual* (1992), Annex B, § B44.

⁷⁸ Nigeria, *Manual on the Laws of War* (undated), § 24.

⁷⁹ Philippines, *Code of Ethics* (1991), Article 5, Section 2(4.5).

⁸⁰ South Africa, *LOAC Manual* (1996), § 23, see also § 37(d).

⁸³ UK, *LOAC Manual* (1981), Section 4, p. 16, § 10.

law. It may indicate that the party hoisting it desires to open communication with a view to an armistice or a surrender. If hoisted in action by an individual soldier or a small party, it may signify merely the surrender of that soldier or party. It is essential, therefore, to determine with reasonable certainty that the flag is shown by actual authority of the enemy commander before basing important action upon that assumption.⁸⁴

79. The US Air Force Pamphlet states that:

The white flag has traditionally indicated a desire to communicate with the enemy and may indicate more particularly, depending upon the situation, a willingness to surrender. It raises expectations that the particular struggle is at an end or close to an end since the only proper use of the flag of truce or white flag is to communicate to the enemy a desire to negotiate.⁸⁵

80. The US Naval Handbook emphasises that “customary international law recognizes the white flag as symbolizing a request to cease-fire, negotiate, or surrender”.⁸⁶

81. The YPA Military Manual of the SFRY (FRY) provides that “the white flag is the sign of a parlementaire and indicates the wish of a party to the conflict to enter into contact with the other side through the intermediary of the person carrying such flag”.⁸⁷

92. No practice was found.

Definition of parlementaires

I. Treaties and Other Instruments

Treaties

93. Article 32 of the 1899 HR states that “an individual is considered as a parlementaire who is authorized by one of the belligerents to enter into communication with the other, and who carries a white flag”.

94. Article 32 of the 1907 HR states that “a person is regarded as a parlementaire who has been authorized by one of the belligerents to enter into communication with the other, and who advances bearing a white flag”.

⁹¹ Report on the Practice of Rwanda, 1997, Replies by army officers to a questionnaire, Chapter 2.2.

⁹² UK, Ministry of Defence, Training Video: The Geneva Conventions, 1986, Report on UK Practice, 1997, Chapter 2.2.

⁹³ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 963.

Other Instruments

95. Article 43 of the 1874 Brussels Declaration provides that “a person is regarded as a parlementaire who has been authorized by one of the belligerents to enter into communication with the other, and who advances bearing a white flag”.

96. Article 27 of the 1880 Oxford Manual states that “a person is regarded as a parlementaire who has been authorized by one of the belligerents to enter into communication with the other, and who advances bearing a white flag”.

97. Article 45 of the 1913 Oxford Manual of Naval War provides that “a ship authorized by one of the belligerents to enter into a parley with the other and carrying a white flag is considered a cartel ship”.

*II. National Practice**Military Manuals*

98. Argentina’s Law of War Manual defines a parlementaire as “an individual authorised by one of the belligerents to enter into communication with the other and who advances bearing a white flag”.⁹⁴

99. Belgium’s Field Regulations defines a parlementaire as a person “who has been authorised by one of the belligerents to enter into communication with the other, and who advances bearing a white flag”.⁹⁵

100. Belgium’s Law of War Manual defines a parlementaire as “the person authorised by a belligerent to enter into communication with the adversary and who advances bearing a white flag (at night a white light)”.⁹⁶

101. Belgium’s Teaching Manual for Officers states that “a parlementaire is a person who advances bearing a white flag, in order to negotiate”.⁹⁷

102. Cameroon’s Disciplinary Regulations provides that “any person who advances without weapons and displaying the white flag shall be considered as a parlementaire”.⁹⁸

103. Under Canada’s LOAC Manual, parlementaires are intermediaries by whom negotiations between belligerent commanders may be conducted.⁹⁹

104. Germany’s Military Manual states that:

A cessation of hostilities is regularly preceded by negotiations with the adversary. In the area of operations the parties to the conflict frequently use parlementaires for this purpose . . . Parlementaires are persons authorized by one party to the conflict to enter into negotiations with the adversary.¹⁰⁰

⁹⁴ Argentina, *Law of War Manual* (1969), § 6.001.

⁹⁵ Belgium, *Field Regulations* (1964), § 22.

⁹⁶ Belgium, *Law of War Manual* (1983), p. 40.

⁹⁷ Belgium, *Teaching Manual for Officers* (1994), Part I, Title II, p. 25.

⁹⁸ Cameroon, *Disciplinary Regulations* (1975), Article 30.

⁹⁹ Canada, *LOAC Manual* (1999), p. 14-1, § 3.

¹⁰⁰ Germany, *Military Manual* (1992), §§ 222 and 223.

The manual adds that “defectors or members of friendly forces taken prisoner by the adversary have no status as parlementaires nor as persons accompanying parlementaires”.¹⁰¹

105. Italy’s IHL Manual defines a parlementaire as:

a person authorised by a military belligerent authority to enter into direct communication with the enemy; the scope of his powers is usually to conclude specific agreements to be executed on the battlefield. The parlementaire . . . must advance bearing a visible distinctive sign consisting of a white flag.¹⁰²

The manual adds that the authorisation for a parlementaire to enter into negotiations must be in writing.¹⁰³ It further emphasises the importance of the use of parlementaires in the context of peacekeeping operations, not only for the safeguard of human life, but also to prevent or rapidly put an end to possible incidents, especially those involving the use of arms.¹⁰⁴

106. The Military Manual of the Netherlands defines a parlementaire as “a person who has been authorised by one of the belligerents to enter into negotiations with the other party and who advances bearing a white flag”.¹⁰⁵

107. New Zealand’s Military Manual notes that “negotiations between belligerent commanders are normally conducted, at least in the first instance, by intermediaries known as parlementaires . . . Parlementaires normally operate under a flag of truce.”¹⁰⁶

108. Nigeria’s Manual on the Laws of War states that “the usual agents in non-hostile intercourse between belligerents are known as parlementaires. The parlementaires must carry a white flag . . . [and] an authorisation in writing signed by the sending commander.”¹⁰⁷

109. Spain’s Field Regulations provides that a parlementaire is “the official sent to the enemy with formal orders and powers to negotiate agreements, capitulations; to request suspension of arms, truce or armistice; to present claims or observations about violations of agreements”.¹⁰⁸

110. Spain’s LOAC Manual defines parlementaires as “the persons authorised by one of the parties to enter into negotiations with the adversary, and who advances bearing a white flag”.¹⁰⁹

111. Switzerland’s Basic Military Manual defines a parlementaire as a person “who is authorised by one of the belligerents to enter into communication with the other and who advances bearing a white flag”.¹¹⁰

112. The UK Military Manual emphasises that “the usual agents in the non-hostile intercourse of belligerent armies are known as *parlementaires*”.¹¹¹ It also states that:

¹⁰¹ Germany, *Military Manual* (1992), § 225. ¹⁰² Italy, *IHL Manual* (1991), Vol. I, § 51.

¹⁰³ Italy, *IHL Manual* (1991), Vol. I, § 52. ¹⁰⁴ Italy, *IHL Manual* (1991), Vol. I, § 60.

¹⁰⁵ Netherlands, *Military Manual* (1993), p. IV-4.

¹⁰⁶ New Zealand, *Military Manual* (1992), § 406(1) and (2).

¹⁰⁷ Nigeria, *Manual on the Laws of War* (undated), § 24.

¹⁰⁸ Spain, *Field Regulations* (1882), § 901. ¹⁰⁹ Spain, *LOAC Manual* (1996), Vol. I, § 2.6.c.(1).

¹¹⁰ Switzerland, *Basic Military Manual* (1987), Article 13.

¹¹¹ UK, *Military Manual* (1958), § 389.

A person to be regarded as a *parlementaire* must be authorised by one of the belligerents to enter into communication with the other and must present himself under cover of a white flag. The authorisation [for a *parlementaire* to enter into negotiations] should be in writing and be signed by the sending commander.¹¹²

113. The US Field Manual provides that *parlementaires* are “agents employed by commanders to go in person within the enemy lines for the purpose of communicating or negotiating openly and directly with the enemy commander”.¹¹³ It states that “a person is regarded as a *parlementaire* who has been authorized by one of the belligerents to enter into communication with the other and who advances bearing a white flag”.¹¹⁴ Moreover, “*parlementaires* must be duly authorized in a written instrument signed by the commander of the forces”.¹¹⁵

114. The YPA Military Manual of the SFRY (FRY) defines a *parlementaire* as “a person who is authorised by one party to the conflict to enter into communication in its name with another party in order to negotiate a specific question or to deliver a message”.¹¹⁶ It provides that “a *parlementaire* can be escorted by other persons”, such as an interpreter.¹¹⁷ It also states that “a *parlementaire* or a person in his escort is required to carry the white flag of *parlementaires*”.¹¹⁸ In addition, “a *parlementaire* should have a written authorisation of the person in charge for making contact with the representative of the enemy side”.¹¹⁹

National Legislation

115. Italy’s Law of War Decree as amended defines a *parlementaire* as “a person authorised by military authority to enter into direct communication with the enemy. The *parlementaire* must be provided with a document proving his status and powers and must advance with a white flag.”¹²⁰

116. The commentary on the Penal Code as amended of the SFRY (FRY) states that “a *parlementaire* is a person who, under authorisation by one Party to the war or armed conflict, conveys a message to another Party”.¹²¹

Refusal to receive parlementaires*I. Treaties and Other Instruments**Treaties*

123. Article 33 of the 1899 HR stipulates that “the chief to whom a parlementaire is sent is not obliged to receive him in all circumstances”.

124. Article 33 of the 1907 HR stipulates that “the commander to whom a parlementaire is sent is not in all cases obliged to receive him”.

Other Instruments

125. According to Article 44 of the 1874 Brussels Declaration, “the commander to whom a parlementaire is sent is not in all cases and under all conditions obliged to receive him . . . He may likewise declare beforehand that he will not receive parlementaires during a certain period.”

126. Article 29 of the 1880 Oxford Manual states that “the commander to whom a parlementaire is sent is not in all cases obliged to receive him”.

127. Article 45 of the 1913 Oxford Manual of Naval War provides that “the commanding officer to whom a cartel ship is sent is not obliged to receive it under all circumstances”.

*II. National Practice**Military Manuals*

128. Argentina’s Law of War Manual provides that “the commander to whom a parlementaire is sent is not obliged to receive him at all times”.¹²²

¹²² Argentina, *Law of War Manual* (1969), § 6.002.

129. Belgium's Law of War Manual provides that "the chief to whom a parlementaire is sent is not obliged to receive him in all circumstances". It also states that it is prohibited for commanders to decide *a priori* that they will not receive parlementaires.¹²³

130. Belgium's Teaching Manual for Officers states that the parlementaire "does not necessarily have to be received by the adverse party".¹²⁴

131. Canada's LOAC Manual states that "there is no obligation upon the adverse party to receive a parlementaire".¹²⁵

132. Germany's Military Manual provides that "the commander to whom a parlementaire is sent is not in all cases obliged to receive him".¹²⁶

133. Italy's IHL Manual provides that it can be declared that no parlementaires will be received for a certain period of time. Such a policy may also be adopted as a reprisal measure.¹²⁷ However, a parlementaire must be received, unless particular circumstances do not permit it.¹²⁸

134. Kenya's LOAC Manual provides that "there is no obligation to receive a flag party and it may be sent back".¹²⁹

135. The Military Manual of the Netherlands provides that "a commander to whom a parlementaire is sent is not obliged to receive him".¹³⁰

136. New Zealand's Military Manual provides that "there is no obligation upon the adverse Party to receive a *parlementaire*".¹³¹

137. Nigeria's Manual on the Laws of War provides that "the force commander (of the other side) is not obliged to receive the parlementaire".¹³²

138. Spain's Field Regulations states that a commander may refuse to receive a parlementaire only if it would result in an immediate and manifest prejudice to operations or if it appears to be a dilatory manoeuvre.¹³³

139. Spain's LOAC Manual provides that "the commander to whom a parlementaire is sent is not obliged to receive him in every case".¹³⁴

140. Switzerland's Basic Military Manual states that "the commander to whom a parlementaire is sent is not obliged to receive him".¹³⁵

141. The UK Military Manual affirms that:

The commander to whom a *parlementaire* is sent is not obliged to receive him in every case. There may be a movement in progress the success of which depends on secrecy, or owing to the state of the defences, it may be considered undesirable to allow an envoy to approach a besieged locality. In direct contrast, however, to a

former rule, it is now no longer permissible – except in cases of reprisals for abuses of the flag of truce – for a belligerent to declare beforehand, even for a stated period, that he will not receive *parlementaires*.¹³⁶

142. The UK LOAC Manual provides that “there is no obligation to receive a flag party which may be sent back”.¹³⁷

143. The US Field Manual provides that “the commander to whom a parlementaire is sent is not in all cases obliged to receive him”.¹³⁸ It adds that “the present rule is that a belligerent may not declare beforehand, even for a specified period – except in case of reprisal for abuses of the flag of truce – that he will not receive parlementaires. An unnecessary repetition of visits need not be allowed.”¹³⁹

144. The YPA Military Manual of the SFRY (FRY) provides that:

The party to the conflict to which a parlementaire is sent is not obliged to receive him in any case.

It is forbidden for the parties to the conflict to announce [beforehand] that they will not receive a parlementaire . . .

It is allowed to refuse to receive a parlementaire in order for him not to see or find out something about movements or regrouping of troops or the like. It is also allowed to refuse to receive a parlementaire as a measure of reprisals, if the party that sends the parlementaire had previously abused the flag of parlementaires.¹⁴⁰

National Legislation

145. Italy’s Law of War Decree as amended stipulates that “the commander of the operating force is not obliged to receive a parlementaire in all circumstances”.¹⁴¹

National Case-law

International Conferences

150. The Report of the Second Commission of the 1899 Hague Peace Conference stated that Article 33 of the 1899 HR “deals with the right that every belligerent has . . . to refuse to receive a parlementaire . . . All these rules conform to the necessities and customs of war.” The Second Commission also took the position that “the principles of the law of nations do not permit a belligerent ever to declare, even for a limited time, that he will not receive flags of truce”.¹⁴² According to Levie, this would mean that, “while a commander may refuse, in a specific case, to receive a parlementaire, perhaps because he believes that it is merely an attempt to gain time, he may not state it as a general policy”.¹⁴³

IV. Practice of International Judicial and Quasi-judicial Bodies

151. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

152. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “the commander is not in all circumstances obliged to receive a bearer of flag of truce or similar persons”.¹⁴⁴

VI. Other Practice

153. No practice was found.

B. Inviolability of Parlementaires*I. Treaties and Other Instruments**Treaties*

154. Article 32 of the 1899 HR provides that a parlementaire “has a right to inviolability, as well as the trumpeter, bugler, or drummer, the flag-bearer and the interpreter who may accompany him”.

155. Article 32 of the 1907 HR provides that a parlementaire “has the right to inviolability, as well as the trumpeter, bugler or drummer, the flag-bearer and the interpreter who may accompany him”.

¹⁴² James B. Scott (ed.), *The Reports of the Hague Conferences of 1899 and 1907*, Clarendon Press, Oxford, 1917, p. 147.

¹⁴⁴ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 540.

Other Instruments

156. Article 43 of the 1874 Brussels Declaration provides that a parlementaire “shall have a right to inviolability, as well as the trumpeter (bugler or drummer) and the flag-bearer who accompany him”.

157. Articles 27 and 28 of the 1880 Oxford Manual provide that a parlementaire “has the right to inviolability . . . He may be accompanied by a bugler or a drummer, by a colour-bearer, and, if need be, by a guide and interpreter, who also are entitled to inviolability.”

158. Article 45 of the 1913 Oxford Manual of Naval War provides that “ships called cartel ships, which act as bearers of a flag of truce, may not be seized while fulfilling their mission, even if they belong to the navy”. Article 65 deals with parlementaires and states that “the personnel of cartel ships is inviolable”.

159. Paragraphs 47 and 48 of the 1994 San Remo Manual provide that cartel vessels “are exempt from attack”, but “only if they (a) are innocently employed in their normal role; (b) submit to identification and inspection when required; and (c) do not intentionally hamper the movement of combatants and obey orders to stop or move out of the way when required”. According to Paragraphs 136 and 137, cartel vessels are also “exempt from capture”, under the same conditions as for the exemption from attack, provided that, in addition, they “do not commit acts harmful to the enemy”.

*II. National Practice**Military Manuals*

160. Argentina’s Law of War Manual provides that a parlementaire “has the right to inviolability, like the bugler, trumpeter, drummer, colour bearer and the interpreter accompanying him”.¹⁴⁵

161. Australia’s Commanders’ Guide provides that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . firing upon flags of truce”.¹⁴⁶

162. Australia’s Defence Force Manual states that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . firing upon flags of truce”.¹⁴⁷ It also provides that “an adversary displaying a white flag should be permitted the opportunity . . . to communicate a request for cease-fire or negotiation”.¹⁴⁸

163. Belgium’s Law of War Manual states that “the parlementaire whose conduct is correct has the right to absolute inviolability. This applies also to those

¹⁴⁵ Argentina, *Law of War Manual* (1969), § 6.001.

¹⁴⁸ Australia, *Defence Force Manual* (1994), § 910.

accompanying him (trumpeter, bugler or drummer, colour bearer, interpreter, driver)."¹⁴⁹

164. Belgium's Teaching Manual for Officers emphasises that "the person of the parlementaire is inviolable".¹⁵⁰

165. Burkina Faso's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to attack or retain prisoner a parlementaire displaying the white flag".¹⁵¹

166. Cameroon's Disciplinary Regulations provides that, under the laws and customs of war, a "parlementaire enjoys an absolute immunity and it is prohibited to attack him or retain him prisoner".¹⁵²

167. Canada's LOAC Manual states that:

A parlementaire may be accompanied by other personnel agreed upon by the commanders involved . . .

The adverse party does not have to cease combat. The belligerent may not fire upon the parlementaire, white flag or party. The parlementaire and those who are in his or her party are entitled to complete inviolability, so long as they do nothing to abuse this protection, or to take advantage of their protected position.¹⁵³

Furthermore, the manual stresses that "during the withdrawal and return to the parlementaire's own lines, the parlementaire continues to enjoy inviolability and may not be attacked".¹⁵⁴ It also notes that "to fire intentionally upon the white flag carried by a parlementaire is a war crime".¹⁵⁵ Lastly, it states that "the following vessels of an adverse party shall not be attacked: . . . vessels granted safe conduct by agreement between parties to the conflict (e.g. vessels carrying PWs . . .)".¹⁵⁶

168. Congo's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to attack or retain prisoner a parlementaire displaying the white flag".¹⁵⁷

169. Ecuador's Naval Manual states that "enemy forces displaying a white flag should be permitted an opportunity . . . to communicate a request for cease-fire or negotiation".¹⁵⁸ It also states that "the following acts constitute war crimes: . . . firing on flags of truce".¹⁵⁹

170. France's Disciplinary Regulations as amended provides that, under international conventions, it is prohibited "to attack or retain prisoner a parlementaire displaying the white flag".¹⁶⁰

171. France's LOAC Manual emphasises that the law of armed conflict provides "special protection" for parlementaires.¹⁶¹

172. Germany's Military Manual provides that:

Parlementaires and the persons accompanying them, e.g. drivers and interpreters, have a right to inviolability . . .

When entering the territory of the adversary, parlementaires and the persons accompanying them shall not be taken prisoner or detained. The principle of inviolability shall apply until they have safely returned to friendly territory. It does not require the adverse party to completely cease fire in a sector where a parlementaire arrives.¹⁶²

173. Italy's IHL Manual provides that a person who "intends to receive a parlementaire must suspend fire locally, for the time necessary for communication and for the return of the parlementaire and the persons accompanying him to their own lines".¹⁶³ It further states that "the parlementaire recognised as such, the persons accompanying him and the related means of transportation (on land, in the air or at sea) are inviolable for the whole time necessary to the accomplishment of their mission".¹⁶⁴ The manual mentions the flag bearer, bugler, drummer and interpreter as the persons who may accompany a parlementaire.¹⁶⁵

174. Kenya's LOAC Manual states that "bearers of a white flag of truce must be respected".¹⁶⁶ It adds that "the flag may not be attacked and, on completion of [a flag party's] mission, must be allowed to return to its own lines".¹⁶⁷

175. South Korea's Military Regulation 187 provides that firing on the white flag is a war crime.¹⁶⁸

176. Mali's Army Regulations provides that, under the laws and customs of war, it is prohibited "to attack or retain prisoner a parlementaire displaying the white flag".¹⁶⁹

177. The Military Manual of the Netherlands states that:

A parlementaire has the right to inviolability . . . [The white flag] indicates that the party who displays the flag wants to negotiate. This party must cease fire. The other party has no obligation to cease fire. However, the parlementaire and any person who may accompany him (e.g. an interpreter) may not be fired upon.¹⁷⁰

¹⁶⁰ France, *Disciplinary Regulations as amended* (1975), Article 9 bis (2).

¹⁶¹ France, *LOAC Manual* (2001), p. 95.

¹⁶² Germany, *Military Manual* (1992), §§ 223 and 224, see also § 1034 (protection of cartel ships).

¹⁶³ Italy, *IHL Manual* (1991), Vol. I, § 56. ¹⁶⁴ Italy, *IHL Manual* (1991), Vol. I, § 53.

¹⁶⁵ Italy, *IHL Manual* (1991), Vol. I, § 51.

¹⁶⁶ Kenya, *LOAC Manual* (1997), Précis No. 2, p. 15.

¹⁶⁷ Kenya, *LOAC Manual* (1997), Précis No. 4, p. 4.

¹⁶⁹ Mali, *Army Regulations* (1979), Article 36.

¹⁷⁰ Netherlands, *Military Manual* (1993), p. IV-4.

178. The Military Handbook of the Netherlands emphasises that “the party which displays the [white] flag has to cease fire. The other party does not have to do so. But, the *parlementaire* and the soldiers who accompany him (for example an interpreter) may not be attacked.”¹⁷¹

179. New Zealand’s Military Manual provides that “a *parlementaire* and accompanying trumpeter, bugler, (or drummer), flag bearer and interpreter are all protected in the case of an authorized communication made under the protection of a white flag”.¹⁷² It specifies that:

The belligerent to whom a *parlementaire* is being despatched does not have to cease combat, although he may not fire upon the *parlementaire*, his flag or those with him. Since the adverse Party may continue combat, the *parlementaire* should cross during a lull in the fighting or should seek some other moment for making his journey, or travel by a route that reduces any risk to himself or those with him. The *parlementaire* and those with him are entitled to complete inviolability, so long as they do nothing to abuse this protection or to take advantage of their protected position . . .

To fire intentionally upon the white flag carried by a *parlementaire* is a war crime . . . No offence is committed if the *parlementaire* or those with him are injured accidentally, or even if the white flag he carries is fired upon inadvertently . . .

During the period that the *parlementaire* is conducting his negotiations the conflict continues and both sides are entitled to reinforce or take such other combat actions as they consider necessary . . . During his withdrawal and return to his own lines, the *parlementaire* continues to enjoy inviolability and may not be attacked.¹⁷³

180. Nigeria’s Manual on the Laws of War provides that:

The *parlementaire* must carry a white flag while advancing towards the enemy lines thus he and his party will have the privilege of immunity. Nevertheless, in order to prevent unnecessary dangers, the *parlementaire* should choose a safe and convenient route of approach to the enemy.¹⁷⁴

The manual also states that “firing on a white flag” is a war crime.¹⁷⁵

181. The Soldier’s Rules of the Philippines includes the following order: “Respect all persons and objects bearing . . . the white flag of truce.”¹⁷⁶

182. The Joint Circular on Adherence to IHL and Human Rights of the Philippines provides that “members of the AFP and PNP shall respect all persons and objects bearing . . . the White Flag of Truce”.¹⁷⁷

¹⁷¹ Netherlands, *Military Handbook* (1995), p. 7-40, see also p. 7-36.

¹⁷⁷ Philippines, *Joint Circular on Adherence to IHL and Human Rights* (1991), § 2a(5).

183. Under Russia's Military Manual, it is a prohibited method of warfare "to kill parlementaires and persons accompanying them".¹⁷⁸

184. Senegal's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to attack or retain prisoner a parlementaire displaying the white flag".¹⁷⁹

185. Under South Africa's LOAC Manual, "firing on . . . a flag of truce" is qualified as a "grave breach" and a war crime.¹⁸⁰

186. Spain's Field Regulations states that "the person of the parlementaire is inviolable".¹⁸¹ It adds that in a combat situation, fire must not be stopped when a parlementaire approaches, until superior orders have been given to do so.¹⁸²

187. Spain's LOAC Manual provides that:

Parlementaires and persons accompanying them are inviolable. When entering an area controlled by the adverse party, the parlementaires and those accompanying them must not be taken prisoner or detained . . . and they must adopt appropriate measures for their return to take place in secure conditions. The presence of parlementaires and the beginning of negotiations is not in itself a sufficient reason to alter the course of operations.¹⁸³

188. Switzerland's Military Manual provides that "the parlementaire (negotiator) and his escort with the white flag shall not be attacked".¹⁸⁴

189. Switzerland's Basic Military Manual stipulates that the parlementaire "has the right to inviolability, as well as the persons accompanying him (interpreter, driver, pilot)".¹⁸⁵ It further states that "mistreating, insulting or retaining unlawfully an enemy parlementaire" is a war crime.¹⁸⁶

190. The UK Military Manual provides that "whilst performing their duties, and provided that their conduct is correct, [parlementaires] are entitled to complete inviolability".¹⁸⁷ It stresses that:

When a white flag is hoisted the other side need not necessarily cease fire.

...

Fire must not be directed intentionally on the person carrying the white flag or on persons near him. If, however, the persons near a flag of truce which is exhibited during an engagement are unintentionally killed or wounded, no breach of the law of war is committed. It is for the *parlementaire* to wait until there is a propitious moment, or to make a detour to avoid a dangerous zone.¹⁸⁸

The manual further states that "in addition to the 'grave breaches' of the 1949 [Geneva] Conventions . . . the following are examples of punishable violations

¹⁷⁸ Russia, *Military Manual* (1990), § 5(d).

¹⁷⁹ Senegal, *Disciplinary Regulations* (1990), Article 34(2).

¹⁸⁰ South Africa, *LOAC Manual* (1996), §§ 39(e) and 41.

¹⁸¹ Spain, *Field Regulations* (1882), § 902.

¹⁸² Spain, *Field Regulations* (1882), § 904.

¹⁸³ Spain, *LOAC Manual* (1996), Vol. I, § 2.6.c.(1).

¹⁸⁴ Switzerland, *Military Manual* (1984), p. 18.

¹⁸⁵ Switzerland, *Basic Military Manual* (1987), Article 13.

¹⁸⁶ Switzerland, *Basic Military Manual* (1987), Article 200(2)(h).

¹⁸⁷ UK, *Military Manual* (1958), § 391, see also § 498 (protection of cartel ships).

¹⁸⁸ UK, *Military Manual* (1958), §§ 395 and 396.

of the laws of war, or war crimes: . . . firing on a flag of truce".¹⁸⁹ Furthermore, "the *parlementaire* should be permitted to retire and return with the same formalities and precautions as on his arrival".¹⁹⁰ The manual also states that:

The number of persons who may accompany the *parlementaire* to the enemy's line, unless special authorisation for additional ones is given, is limited to three; a trumpeter, bugler, or drummer, a flagbearer, and an interpreter. These are entitled to the same inviolability as the envoy himself.

...

In modern warfare the *parlementaire* will presumably be an officer in an armoured vehicle flying a white flag, accompanied by his driver, wireless and loudspeaker operator, and interpreter.¹⁹¹

191. The UK LOAC Manual states that:

The white flag, or flag of truce, indicates no more than an intention to enter into negotiations with the enemy . . . The party showing the white flag must stop firing and if so the other party must do likewise . . . The flag party may not be attacked and on completion of its mission must be allowed to return to its own lines. The [1907 HR] provide for the flag party to consist of the envoy, flag bearer, interpreter and trumpeter, bugler or drummer. In modern warfare the latter may be replaced by a radio operator and the flag party may well travel in a vehicle flying the white flag.¹⁹²

192. The US Field Manual states that:

[A parlementaire] has the right to inviolability, as well as the trumpeter, bugler or drummer, the flag-bearer and the interpreter who may accompany him.

...

Fire should not be intentionally directed on parlementaires or those accompanying them. If, however, the parlementaires or those near them present themselves during an engagement and are killed or wounded, it furnishes no ground for complaint. It is the duty of the parlementaire to select a propitious moment for displaying his flag, such as during the intervals of active operations, and to avoid the dangerous zones by making a detour.¹⁹³

The manual further states that "in addition to the 'grave breaches' of the Geneva Conventions of 1949, the following acts are representative of violations of the law of war ('war crimes'): . . . firing on the flag of truce".¹⁹⁴

193. The US Air Force Pamphlet provides that "in addition to the grave breaches of the Geneva Conventions of 1949, the following acts are representative of situations involving individual criminal responsibility: . . . deliberate firing on . . . the flag of truce".¹⁹⁵

¹⁸⁹ UK, *Military Manual* (1958), § 626(d).

¹⁹⁴ US, *Field Manual* (1956), § 504(e). ¹⁹⁵ US, *Air Force Pamphlet* (1976), § 15-3c(3).

194. The US Instructor's Guide states that "in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: . . . firing on the flag of truce".¹⁹⁶

195. The US Naval Handbook stipulates that "enemy forces displaying a white flag should be permitted an opportunity . . . to communicate a request for cease-fire or negotiation".¹⁹⁷ It adds that "the following acts are representative war crimes: . . . firing on flags of truce".¹⁹⁸

196. The YPA Military Manual of the SFRY (FRY) provides that "the party that receives a parlementaire does not need to cease fire in the direction of the parlementaire's arrival, but must not fire on the parlementaire and his escort".¹⁹⁹ It adds that "a parlementaire and the persons in his escort are entitled to total inviolability. During the execution of the duty of parlementaire, they cannot be kept as prisoners of war."²⁰⁰

National Legislation

197. Argentina's Code of Military Justice as amended punishes "anyone who offends a parlementaire in words or in deeds".²⁰¹

198. Argentina's Draft Code of Military Justice punishes any soldier who "infringes upon the inviolability of, or retains unlawfully, a parlementaire or any person who accompanies him".²⁰² The Draft Code only refers to parlementaires protected under the 1899 Hague Convention (II).²⁰³

199. Under the Criminal Code of the Federation of Bosnia and Herzegovina, whoever "insults, maltreats or detains the bearer of the flag of truce or his/her escort, or prevents them from returning, or in any other way violates their privilege of inviolability" commits a war crime.²⁰⁴ The Criminal Code of the Republika Srpska contains the same provision.²⁰⁵

200. Chile's Code of Military Justice punishes anyone "who, without any provocation, offends a parlementaire in words or in deeds".²⁰⁶

201. Under Croatia's Criminal Code, whoever "insults, maltreats or restrains an intermediary or his escort or prevents their return or in some other way infringes their inviolability" commits a war crime.²⁰⁷

²²⁶ Venezuela, *Code of Military Justice as amended* (1998), Article 474(13).

²²⁷ Venezuela, *Revised Penal Code* (2000), Article 156(1).

²²⁸ SFRY (FRY), *Penal Code as amended* (1976), Article 149.

²²⁹ Report on the Practice of China, 1997, Chapter 2.2.

223. According to the Report on the Practice of Colombia, it has been Colombia's usual practice to issue a presidential decree suspending orders for the capture of the persons designated as negotiators by armed opposition groups. For example, a decree was issued in May 1997 to suspend the orders of capture of the designated negotiators for the release of 60 soldiers captured by an armed opposition movement.²³⁰

224. According to the Report on the Practice of the Philippines, government forces are instructed to respect the white flag of truce at all times.²³¹

225. A training video produced by the UK Ministry of Defence emphasises that the white flag or flag of truce must be respected and must not be attacked.²³²

226. In 1951, in the 27th Report of the UN Command Operations in Korea to the UN Security Council, the US reported the following incidents:

On 9 August, General Nam Il, through his Liaison Officer, claimed that the United Nations Command had violated its guarantees by attacking a Communist vehicle plainly marked with white cloth and carrying a white flag. The sole guarantee ever given by United Nations Command Liaison Officer with regard to aircraft refraining from the attack of the Communists delegations' vehicles was contingent upon their being properly marked and upon prior notification being given of the time and route of their movement. The latter specification had not been complied with and United Nations aircraft did machine gun the truck. The United Nations Command cannot accept the risk of its forces entailed in refraining from attacks on any vehicles observed in rear of the battle zone except those reported by the Communist delegation as being in the service of the delegation. On 14 August, the Communists complained of a like incident. They have been informed again that the United Nations Command provides no immunity for vehicles unless the time and route of movement have been communicated to the United Nations Command.²³³

227. On the basis of the US position with regard to the incidents described in the 27th Report of the UN Command Operations in Korea to the UN Security Council in 1951, the Report on US Practice states that:

In principle, parlementaires advancing under a white flag should be respected, but in practice advance arrangements should be made to ensure respect for them. While within their own lines, they cannot rely solely on the white flag to protect them or their vehicles from air attack or other indirect fire.²³⁴

235. Article 33 of the 1907 HR provides that the commander who receives a parlementaire “may take all the necessary steps to prevent the parlementaire taking advantage of his mission to obtain information”.

Other Instruments

236. Article 44 of the 1874 Brussels Declaration provides that “it is lawful for [a commander] to take all the necessary steps to prevent the parlementaire taking advantage of his stay within the radius of the enemy’s position to the prejudice of the latter”.

237. Article 30 of the 1880 Oxford Manual provides that “the commander who receives a parlementaire has a right to take all the necessary steps to prevent the presence of the enemy within his lines from being prejudicial to him”.

238. Article 45 of the 1913 Oxford Manual of Naval War provides that the commanding officer to whom a cartel ship is sent “can take all measures necessary to prevent the cartel ship from profiting by its mission to obtain information”.

II. National Practice

Military Manuals

239. Argentina’s Law of War Manual provides that a commander “may adopt all necessary measures to prevent the parlementaire from taking advantage of his mission to collect information”.²³⁷

240. Belgium’s Field Regulations states that “all precautions must be taken to avoid parlementaires obtaining information”.²³⁸

241. Belgium’s Law of War Manual provides that the commander may “take measures (e.g. blindfolding) to prevent the parlementaire from taking advantage of his mission to collect information”.²³⁹

242. Canada’s LOAC Manual notes that:

The belligerent to whom a parlementaire is proceeding may take all steps necessary to protect the safety of the belligerent’s position, and prevent the parlementaire from taking advantage of the visit to secure information. The adverse party may therefore prescribe the route to be taken by the parlementaire, employ blindfolds, limit the size of the party, or take similar action.²⁴⁰

243. Germany’s Military Manual provides that “it is permissible to take all necessary precautions (e.g. blindfolding) to prevent the parlementaire from taking advantage of his mission to obtain information”.²⁴¹

244. Italy’s IHL Manual provides that “the commander who receives [a parlementaire] shall take all required precautions to prevent him from acquiring

²³⁷ Argentina, *Law of War Manual* (1969), § 6.002. ²³⁸ Belgium, *Field Regulations* (1964), § 22.

²⁴¹ Germany, *Military Manual* (1992), § 227.

information of military character". Measures to prevent the presence of a parlementaire from being prejudicial can include blindfolding.²⁴²

245. New Zealand's Military Manual states that:

The belligerent to whom a *parlementaire* is proceeding may take all steps necessary to protect the safety of his position or unit and to prevent the *parlementaire* from taking advantage of his visit to secure information. The adverse Party may prescribe the route to be taken by the *parlementaire* or may bind his eyes, may limit the size of the party or take similar action.²⁴³

246. Nigeria's Manual on the Laws of War provides that "the force commander (of the other side) . . . may take security measures to prevent the parlementaire from abusing his privileges for spying".²⁴⁴

247. Spain's LOAC Manual states that "the commander to whom a parlementaire is sent . . . may take, in all cases, the measures necessary to prevent the parlementaire from taking advantage of his mission to obtain information".²⁴⁵

248. Switzerland's Basic Military Manual provides that "the commander to whom a parlementaire is sent . . . may take all measures necessary to prevent the parlementaire from taking advantage of his mission to obtain information".²⁴⁶

249. The UK Military Manual states that:

All measures necessary to prevent the *parlementaire* from taking advantage of his mission to obtain information are allowable. Care should be taken to prevent him and his attendants from communication with anyone except the persons nominated to receive him. If permission is given for the *parlementaire* to enter the position for the purpose of negotiation, or if the officer in command of the position or post, or any superior officer, thinks it desirable for any special reason to send him to the rear, he should be blindfolded, and taken to the destination by a circuitous route.²⁴⁷

250. The US Field Manual provides that "the commander to whom a parlementaire is sent . . . may take all the necessary steps to prevent the parlementaire taking advantage of his mission to obtain information".²⁴⁸

251. The YPA Military Manual of the SFRY (FRY) provides that:

A party that receives a parlementaire must define the time and the place where he will be received. Those conditions must not be humiliating for the parlementaire

...

When the parlementaire is received, he is escorted to the commander in charge of receiving him. On this occasion, all measures should be taken so that the parlementaire does not make any contact with an unauthorised person or sees or finds out

Detention of parlementaires

I. Treaties and Other Instruments

Treaties

261. Article 33 of the 1899 HR provides that “in case of abuse [a chief to whom a parlementaire is sent] has the right to detain the parlementaire temporarily”.

262. Article 33 of the 1907 HR provides that, “in case of abuse [a commander to whom a parlementaire is sent] has the right to detain the parlementaire temporarily”.

Other Instruments

263. Article 44 of the 1874 Brussels Declaration states that “if the parlementaire has rendered himself guilty of . . . an abuse of confidence [taking advantage of his stay within the radius of the enemy’s position to the prejudice of the latter], [the commander] has the right to detain him temporarily”.

264. Article 31 of the 1880 Oxford Manual provides that “if a parlementaire abuses the trust reposed in him he may be temporarily detained”.

265. Article 45 of the 1913 Oxford Manual of Naval War provides that “in case it abuses its privileges, [the commanding officer to whom a cartel ship is sent] has the right to hold the cartel ship temporarily”.

II. National Practice

Military Manuals

266. Argentina’s Law of War Manual states that “in case of abuse [of his position] by the parlementaire, he may be temporarily detained”.²⁵³

267. Belgium’s Field Regulations provides that a parlementaire can be detained temporarily if he/she has collected information.²⁵⁴

268. Belgium’s Law of War Manual states that “the commander who receives a parlementaire . . . may retain him temporarily, if the parlementaire takes unfair advantage of his mission”.²⁵⁵

269. Canada’s LOAC Manual provides that:

If the parlementaire remains within enemy lines after being ordered to withdraw, he loses his inviolability and may be made a PW. Detention may occur if the parlementaire has abused the position of parlementaire, for example, by collecting

²⁵³ Argentina, *Law of War Manual* (1969), § 6.002.

²⁵⁴ Belgium, *Field Regulations* (1964), § 22.

²⁵⁵ Belgium, *Law of War Manual* (1983), p. 41.

information covertly. It is not an abuse of the position for the *parlementaire*, however, to report on observations made.²⁵⁶

270. Germany's Military Manual states that:

A *parlementaire* may be temporarily detained if he has accidentally acquired information the disclosure of which to the adversary would jeopardize the success of a current or impending operation of the friendly armed forces. In this case, the *parlementaire* may be detained until the operation has been completed.²⁵⁷

271. Italy's IHL Manual provides that, if information of a military character has unintentionally come to the knowledge of a *parlementaire*, he/she can be detained for the time the disclosure of information would be dangerous. Moreover, "the same measure applies to a *parlementaire* who, during his mission, has intentionally collected information".²⁵⁸ The manual also stresses that if *parlementaires* present themselves without an authorisation in writing, the military authority can retain them by adopting the necessary security measures and request instructions to commanding superiors. These superiors have the possibility of retaining accredited *parlementaires* if they have other "equivalent" elements on which to rely.²⁵⁹

272. New Zealand's Military Manual states that:

If the *parlementaire* stays within enemy lines after being ordered to withdraw he loses his inviolability and may be made a prisoner of war. He may similarly be detained and tried if there is prima facie evidence that he has abused his position as a *parlementaire*, for example by collecting information surreptitiously. It is not an abuse of his position for the *parlementaire* to report back anything he may have observed.²⁶⁰

273. Nigeria's Manual on the Laws of War states that the "*parlementaire* can be arrested if he abuses his privileges or succeeds unintentionally in gathering information that may be of benefit to the enemy".²⁶¹

274. Spain's LOAC Manual provides that a commander may temporarily detain a *parlementaire* if he/she abuses his/her condition.²⁶²

275. Switzerland's Basic Military Manual provides that "the commander to whom a *parlementaire* is sent . . . has the right, in case of abuse, to retain him temporarily".²⁶³

276. The UK Military Manual states that:

A commander has the right to detain a *parlementaire* temporarily if the latter abuses his position. In addition, a commander has, by a customary rule of international

law, the right to retain a *parlementaire* so long as circumstances require, if the latter has seen anything, knowledge of which might have adverse consequences for the receiving forces, or if his departure would coincide with movements of troops whose destination or employment he might guess.²⁶⁴

277. The US Field Manual states that:

In case of abuse, [the commander to whom a *parlementaire* is sent] has the right to detain the *parlementaire* temporarily.

...

In addition to the right of detention for abuse of his position, a *parlementaire* may be detained in case he has seen anything or obtained knowledge which may be detrimental to the enemy, or if his departure would reveal information on the movement of troops. He should be detained only so long as circumstances imperatively demand, and information should be sent at once to his commander as to such detention, as well as of any other action taken against him or against his party.²⁶⁵

278. The YPA Military Manual of the SFRY (FRY) provides that:

A *parlementaire* or the persons escorting him can be temporarily detained if they have seen, without abusing the mission of *parlementaire*, something or collected information that could cause damage to the party receiving the *parlementaire* or if they could discover the movement of troops during return.

The *parlementaire* and his escort will be detained only as long as that information could cause damage to the side that received them.²⁶⁶

National Legislation

279. Italy's Law of War Decree as amended states that a *parlementaire* may be temporarily detained if military information has unintentionally come to his/her knowledge.²⁶⁷

285. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

286. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that a commander “may retain . . . [the bearer of a white flag or similar persons] temporarily”.²⁶⁹

VI. Other Practice

287. No practice was found.

D. Loss of Inviolability of Parlementaires

I. Treaties and Other Instruments

Treaties

288. Article 34 of the 1899 HR provides that “the parlementaire loses his rights of inviolability if it is proved beyond doubt that he has taken advantage of his privileged position to provoke or commit an act of treason”.

289. Article 34 of the 1907 HR provides that “the parlementaire loses his rights of inviolability if it is proved in a clear and incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treason”.

Other Instruments

290. Article 45 of the 1874 Brussels Declaration states that “the parlementaire loses his rights of inviolability if it is proved in a clear and incontestable manner

²⁶⁸ James B. Scott (ed.), *The Reports of the Hague Conferences of 1899 and 1907*, Clarendon Press, Oxford, 1917, p. 147.

²⁶⁹ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 540.

that he has taken advantage of his privileged position to provoke or commit an act of treason".

291. Article 31 of the 1880 Oxford Manual states that "if it be proved that [a parlementaire] has taken advantage of his privileged position to abet a treasonable act, he forfeits his right to inviolability".

292. Article 45 of the 1913 Oxford Manual of Naval War provides that "a cartel ship loses its rights of inviolability if it is proved, positively and unexceptionably, that the commander has profited by the privileged position of his vessel to provoke or to commit a treacherous act".

293. Article 65 of the 1913 Oxford Manual of Naval War deals with parlementaires and states that the personnel of a cartel ship loses its rights of inviolability "if it is proved in a clear and incontestable manner that it has taken advantage of its privileged position to provoke or commit an act of treason".

II. National Practice

Military Manuals

294. Argentina's Law of War Manual provides that "the parlementaire loses his right to inviolability if there is concrete and decisive evidence that he has taken advantage of his privileged situation to commit or provoke an act of treason".²⁷⁰

295. Belgium's Teaching Manual for Officers states that "the search for information, the fact of provoking or committing an act of treason under the cover of [a parlementaire's] mission induces the loss of his rights".²⁷¹

296. Canada's LOAC Manual states that a "parlementaire and those who are in his or her party are entitled to complete inviolability, so long as they do nothing to abuse this protection, or to take advantage of their protected position [for example, by collecting information covertly]".²⁷²

297. Germany's Military Manual provides that:

The parlementaire loses his right of inviolability if it is proved in an incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treason . . . Such a case of misuse, which implies the right to detain the parlementaire . . . exists if the latter has committed acts contrary to international law and to the detriment of the adversary during his mission. This includes particularly the following activities:

- gathering intelligence beyond the observations he inevitably makes when accomplishing his mission;
- acts of sabotage;
- inducing soldiers of the adverse party to collaborate in collecting intelligence;
- instigating soldiers of the adverse party to refuse to do their duty;

²⁷⁰ Argentina, *Law of War Manual* (1969), § 6.003.

²⁷¹ Belgium, *Teaching Manual for Officers* (1994), Part I, Title II, p. 25.

²⁷² Canada, *LOAC Manual* (1999), p. 14-1, § 5.

- encouraging soldiers of the adverse party to desert; and
- organizing espionage in the territory of the adverse party.²⁷³

298. Italy's IHL Manual provides that the *parlementaire* who continues to advance, or does not withdraw after having been ordered to do so, loses the status of inviolability after sufficient time to withdraw has been given.²⁷⁴

The manual further states that if "the *parlementaire* takes advantage of his privileged position to accomplish or attempt to accomplish acts of treason, he loses the right to inviolability and can be punished according to wartime penal law".²⁷⁵

299. New Zealand's Military Manual states that:

The *parlementaire* and those with him are entitled to complete inviolability, so long as they do nothing to abuse this protection or to take advantage of their protected position . . .

When ordered to withdraw, the *parlementaire* must be given a reasonable time in which to do so. If he fails to withdraw, he loses his inviolability and may be fired upon.²⁷⁶

300. According to Spain's Field Regulations, *parlementaires* lose their inviolability and may be subject to severe punishment if they are "caught while collecting information or notes; violating in any manner the laws and customs of war . . . instigating prisoners to revolt; or inducing in any manner the populations to rise against the occupation army".²⁷⁷

301. Spain's LOAC Manual states that:

The *parlementaire* loses his inviolability if it is proved in an incontestable manner that he has taken advantage of his privileged situation to provoke or commit acts of treason, such as:

- Acts of sabotage.
- Inducing enemy soldiers to collect intelligence.
- Instigating enemy soldiers to refuse to do their duty.
- Encouraging soldiers to desert.
- Influencing negatively their morale.
- Organising espionage in enemy territory.²⁷⁸

302. Switzerland's Basic Military Manual states that "the *parlementaire* loses his right to inviolability if it is proven in a positive and incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treason".²⁷⁹

303. The UK Military Manual provides that, "if signalled or ordered to retire, [a *parlementaire*] must do so at once. If he does not do so within reasonable

²⁷³ Germany, *Military Manual* (1992), § 229.

time he loses his inviolability."²⁸⁰ The manual further states that "a *parlementaire* loses his right of inviolability if it is proved beyond any doubt that he has taken advantage of his privileged position to provoke or commit an act of treachery".²⁸¹

304. The US Field Manual states that "the *parlementaire* loses his right of inviolability if it is proved in a clear and incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treachery".²⁸²

305. The YPA Military Manual of the SFRY (FRY) provides that:

A *parlementaire* or the persons in his escort can be court-martialled if they do not respect the conditions determined by the commander who receives the *parlementaire* and that the *parlementaire* or the commander who sends him had accepted, if it is clear and incontestable that they used their privileged position to collect information of military nature, or if the other side sends them for perfidious purposes, with intent of its troops to do military actions under the protection of the white flag, and they know of that intent.²⁸³

National Legislation

306. Ecuador's National Civil Police Penal Code provides that "parlementaires shall lose their character [of inviolability] if they abuse their condition to commit acts in favour of the armed forces of the enemy nation".²⁸⁴

307. Italy's Law of War Decree as amended states that a *parlementaire* who continues to advance, or does not withdraw after having been ordered to do so, loses the status of inviolability after sufficient time to withdraw has been given.²⁸⁵ The Decree also states that a *parlementaire* who "takes advantage of his privileged position to commit acts of treason loses his right to inviolability".²⁸⁶

308. The commentary on the Penal Code as amended of the SFRY (FRY) provides that "if [a *parlementaire*] abuses [his] duty (in order to perform espionage, to try to film positions or to establish contact with other persons in order to recruit them, etc.), he is no longer entitled to immunity".²⁸⁷

PART IV

USE OF WEAPONS

GENERAL PRINCIPLES ON THE USE OF WEAPONS

- A. Weapons of a Nature to Cause Superfluous Injury or Unnecessary Suffering (practice relating to Rule 70) §§ 1–261
- B. Weapons That Are by Nature Indiscriminate (practice relating to Rule 71) §§ 262–404
- C. Use of Prohibited Weapons §§ 405–461

A. Weapons of a Nature to Cause Superfluous Injury or Unnecessary Suffering

I. Treaties and Other Instruments

Treaties

1. The 1868 St. Petersburg Declaration provides that:

Considering:

That the progress of civilization should have the effect of alleviating as much as possible the calamities of war;

That the only legitimate object which States should endeavour to accomplish during war is to weaken the military forces of the enemy;

That for this purpose it is sufficient to disable the greatest possible number of men;

That this object would be exceeded by the employment of arms which uselessly aggravate the sufferings of disabled men, or render their death inevitable;

That the employment of such arms would, therefore, be contrary to the laws of humanity;

...

The Contracting or Acceding Parties reserve to themselves to come hereafter to an understanding whenever a precise proposition shall be drawn up in view of future improvements which science may effect in the armament of troops, in order to maintain the principles which they have established, and to conciliate the necessities of war with the laws of humanity.

2. The 1899 Hague Declaration concerning Asphyxiating Gases specifies that the contracting States are “inspired by the sentiments which found expression in the [1868] Declaration of St. Petersburg”.

3. The 1899 Hague Declaration concerning Expanding Bullets specifies that the contracting States are “inspired by the sentiments which found expression in the [1868] Declaration of St. Petersburg”.

4. Article 23(e) of the 1899 HR provides that it is “especially prohibited . . . to employ arms, projectiles, or material of a nature to cause superfluous injury”.

5. Article 23(e) of the 1907 HR provides that “it is especially forbidden . . . to employ arms, projectiles, or material calculated to cause unnecessary suffering”.

6. Article 35(2) AP I provides that “it is prohibited to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”. Article 35 AP I was adopted by consensus.¹

7. Article 20(2) of draft AP II submitted by the ICRC to the CDDH provided that “it is forbidden to employ weapons, projectiles, and material and methods of combat of a nature to cause superfluous injury or unnecessary suffering”.² This proposal was adopted by consensus in Committee III of the CDDH.³ Eventually, however, it was deleted in the plenary, after having been rejected by 25 votes in favour, 19 against and 33 abstentions.⁴

8. The preamble to the 1980 CCW provides that the States parties have based themselves “on the principle that prohibits the employment in armed conflicts of weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”.

9. Upon ratification of the 1980 CCW, France stated that:

With reference to the scope of application defined in article 1 of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, . . . it will apply the provisions of the Convention and its three Protocols to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions of 12 August 1949.⁵

10. Upon accession to the 1980 CCW, Israel stated that:

With reference to the scope of application defined in article 1 of the Convention, the Government of the State of Israel will apply the provisions of the Convention and those annexed Protocols to which Israel has agreed to become bound to all armed conflicts involving regular forces of States referred to in article 2 common to the Geneva Conventions of 12 August 1949, as well as to all armed conflicts referred to in article 3 common to the Geneva Conventions of 12 August 1949.⁶

11. Upon signature of the 1980 CCW, Romania affirmed “once again its decision to act, together with other States, to ensure the prohibition or restriction of all conventional weapons which are excessively injurious”.⁷

¹ CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 May 1977, p. 101.

³ CDDH, *Official Records*, Vol. XV, CDDH/III/SR.49, 4 June 1976, p. 107, § 2.

⁴ CDDH, *Official Records*, Vol. VII, CDDH/SR.51, 3 June 1977, p. 114.

⁵ France, Reservations made upon ratification of the CCW, 4 March 1988.

⁶ Israel, Declarations and understandings made upon accession to the CCW, 22 March 1995, § (a).

⁷ Romania, Declaration made upon signature of the CCW, 8 April 1982, § 5.

12. Upon ratification of the 1980 CCW, the US declared that:

With reference to the scope of application defined in article 1 of the Convention, . . . the United States will apply the provisions of the Convention, Protocol I, and Protocol II to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions for the Protection of War Victims of August 12, 1949.⁸

13. Article 6(2) of the 1980 Protocol II to the CCW provides that “it is prohibited in all circumstances to use any booby-trap which is designed to cause superfluous injury or unnecessary suffering”.

14. Upon acceptance of the 1995 Protocol IV to the CCW, Sweden declared that:

Sweden has since long strived for explicit prohibition of the use of blinding laser which would risk causing permanent blindness to soldiers. Such an effect, in Sweden’s view is contrary to the principle of international law prohibiting means and methods of warfare which cause unnecessary suffering.⁹

15. Article 3(3) of the 1996 Amended Protocol II to the CCW provides that “it is prohibited in all circumstances to use any mine, booby-trap or other device which is designed or of a nature to cause superfluous injury or unnecessary suffering”.

16. According to the preamble to the 1997 Ottawa Convention, States parties based their agreement on various principles of IHL, including “the principle that prohibits the employment in armed conflicts of weapons, projectiles and materials and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”.

17. Pursuant to Article 8(2)(b)(xx) of the 1998 ICC Statute, the following constitutes a war crime in international armed conflicts:

employing weapons, projectiles and material and methods of warfare which are of a nature to cause superfluous injury or unnecessary suffering . . . provided that such weapons, projectiles and material and methods of warfare are the subject of a comprehensive prohibition and are included in an annex to this Statute.

18. Upon signature of the 1998 ICC Statute, Egypt stated that it understood Article 8 of the Statute as follows:

The provisions of the Statute with regard to the war crimes referred to in article 8 in general and article 8, paragraph 2(b) in particular shall apply irrespective of the means by which they were perpetrated or the type of weapon used, including nuclear weapons, which . . . cause unnecessary damage, in contravention of international humanitarian law.¹⁰

19. In 2001, States parties decided to amend Article 1 of the 1980 CCW governing its scope as follows:

⁸ US, Declaration made upon ratification of the CCW, 24 March 1995.

⁹ Sweden, Declaration made upon acceptance of Protocol IV to the CCW, 15 January 1997.

¹⁰ Egypt, Declarations made upon signature of the 1998 ICC Statute, 26 December 2000, § 4(a).

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions [international armed conflicts].
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949 [non-international armed conflicts]. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.

Other Instruments

20. Article 16 of the 1863 Lieber Code states that “military necessity does not admit of cruelty – that is, the infliction of suffering for the sake of suffering”.

21. Article 16(2) of the 1913 Oxford Manual of Naval War provides that “it is forbidden . . . to employ arms, projectiles, or materials calculated to cause unnecessary suffering”.

22. Based on several documents supplying evidence of outrages committed during the First World War, the 1919 Report of the Commission on Responsibility lists violations of the laws and customs of war which should be subject to criminal prosecution, including the “use of . . . inhuman appliances”.

23. Paragraph 2 of the 1990 Basic Principles on the Use of Force and Firearms by Law Enforcement Officials provides that:

Governments and law enforcement agencies should develop a range of means as broad as possible and equip law enforcement officials with various types of weapons and ammunition that would allow for a differentiated use of force and firearms. These should include the development of non-lethal incapacitating weapons for use in appropriate situations, with a view to increasingly restraining the application of means capable of causing death or injury to persons. For the same purpose, it should also be possible for law enforcement officials to be equipped with self-defensive equipment such as shields, helmets, bullet-proof vests and bullet-proof means of transportation, in order to decrease the need to use weapons of any kind.

24. Paragraph 11(c) of the 1990 Basic Principles on the Use of Force and Firearms by Law Enforcement Officials provides that “rules and regulations on the use of firearms by law enforcement officials should include guidelines that . . . prohibit the use of those firearms and ammunition that cause unwarranted injury or present an unwarranted risk”.

25. Paragraph 6 of the 1991 Memorandum of Understanding on the Application of IHL between Croatia and the SFRY requires that hostilities be conducted in accordance with Article 35(2) AP I and the 1980 Protocol II to the CCW.

26. Paragraph 2.5 of the 1992 Agreement on the Application of IHL between the Parties to the Conflict in Bosnia and Herzegovina requires that hostilities

be conducted in accordance with Article 35(2) AP I and the 1980 Protocol II to the CCW.

27. Article 3 of the 1993 ICTY Statute provides that:

The International Tribunal shall have the power to prosecute persons violating the laws or customs of war. Such violations shall include, but not be limited to:

- (a) employment of poisonous weapons or other weapons calculated to cause unnecessary suffering.

28. Paragraph 42(a) of the 1994 San Remo Manual states that “it is forbidden to employ methods or means of warfare which are of a nature to cause superfluous injury or unnecessary suffering”.

29. Pursuant to Article 20(e)(i) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “employment of . . . weapons calculated to cause unnecessary suffering” is a war crime.

30. Section 6.4 of the 1999 UN Secretary-General’s Bulletin provides that “the United Nations force is prohibited from using weapons or methods of combat of a nature to cause unnecessary suffering”.

31. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(xx), “employing weapons, projectiles and material and methods of warfare which are of a nature to cause superfluous injury or unnecessary suffering” constitutes a war crime in international armed conflicts.

II. National Practice

Military Manuals

32. Argentina’s Law of War Manual (1969) states that “the use of weapons, projectiles or material which can cause unnecessary suffering” is especially prohibited. It adds that “the projectiles and weapons covered by this prohibition shall be determined solely by the common practice of States to refrain from using certain means of warfare in recognition that they cause such suffering”.¹¹

33. Argentina’s Law of War Manual (1989) provides that “the use of weapons, projectiles, materials and methods of warfare of a nature to cause superfluous injury or unnecessary suffering is prohibited”.¹²

34. Australia’s Commanders’ Guide states that “some weapons and weapons systems are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law, are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering.”¹³ It adds that “both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population

¹¹ Argentina, *Law of War Manual* (1969), § 1.008(1).

¹² Argentina, *Law of War Manual* (1989), § 1.04(2).

¹³ Australia, *Commanders’ Guide* (1994), § 304.

in an indiscriminate fashion".¹⁴ Likewise, munitions which produce fragments undetectable by X-ray machines and hollow point weapons are prohibited based upon the principle of unnecessary suffering.¹⁵ The Guide also provides that "it is prohibited to employ weapons, projectiles, materiel and methods of warfare of a nature to cause superfluous injury or unnecessary suffering... Use of the following types of weapons is prohibited: a. weapons calculated to cause unnecessary suffering."¹⁶ With respect to weapons which are deemed as legal, the Guide states that "all legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used... in such a way as to cause unnecessary suffering."¹⁷

35. Australia's Defence Force Manual provides that:

The principle of unnecessary suffering forbids the use of means and methods of warfare which are calculated to cause suffering which is excessive in the circumstances. It has also been expressed as the infliction of suffering, injury or destruction not actually necessary for the accomplishment of legitimate military objectives.¹⁸

The manual adds that:

Weapons, projectiles, materials and means of warfare which cause unnecessary suffering are not permissible, that is, when the practical effect is to cause injury or suffering which is out of proportion to the military effectiveness of the weapon, projectile, material or means. Limitations on the use of weapons fall into two broad categories, namely:

- a. prohibited weapons, and
- b. the illegal use of lawful weapons.

...

Weapon use will be unlawful under LOAC when it breaches the principle of proportionality by causing unnecessary injury or suffering.¹⁹

The manual further states that "some weapons and weapons systems are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering."²⁰ In this respect, the manual prohibits the use of "weapons calculated or modified to cause unnecessary suffering".²¹ Likewise, "both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion".²² With

respect to weapons which are deemed as legal, the manual states that “all legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used . . . in such a way as to cause unnecessary injury or suffering.”²³ With respect to booby-traps, the manual states that “those that are used must not be designed to cause unnecessary injury or suffering.”²⁴

36. Belgium’s Law of War Manual provides that the use of weapons or means and methods of warfare which render death inevitable or cause unnecessary suffering is illegal.²⁵

37. Belgium’s Teaching Manual for Officers defines the concept of unnecessary suffering as “suffering . . . that needlessly adds to that already inflicted on the enemy to render him *hors de combat*”. It provides that “it is prohibited to use weapons for the purpose of causing superfluous injury rather than for their military effectiveness”.²⁶

38. Belgium’s Teaching Manual for Soldiers states that “combatants must refrain from causing superfluous injury or unnecessary suffering to persons and unnecessary damage to property”.²⁷

39. Benin’s Military Manual states that “it is prohibited to resort to weapons or methods of warfare of a nature to cause unnecessary losses or superfluous injury”.²⁸

40. Bosnia and Herzegovina’s Military Instructions states that “it is prohibited to use weapons which cause excessive suffering”.²⁹

41. Burkina Faso’s Disciplinary Regulations states that, under the laws and customs of war, it is prohibited “to use any means [of warfare] that causes unnecessary suffering and damage”.³⁰

42. Cameroon’s Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited “to use any means [of warfare] that causes unnecessary suffering and damage”.³¹

43. Cameroon’s Instructors’ Manual provides that “it is prohibited to employ weapons of a nature to cause . . . superfluous injury”.³²

44. Canada’s LOAC Manual states that “weapons, projectiles, materials and means of warfare that cause superfluous injury or unnecessary suffering are prohibited”.³³ It adds that “weapons, projectiles, material or means of warfare

must not cause injury or suffering which is out of proportion to its military effectiveness".³⁴ As regards lawful weapons, it states that "legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used . . . in such a way as to cause superfluous injury or unnecessary suffering."³⁵ The manual further provides that "employing arms or other weapons that are calculated to cause unnecessary suffering" constitutes a war crime.³⁶

45. Canada's Code of Conduct instructs CF personnel: "Do not alter your weapons or ammunition to increase suffering."³⁷ It goes on to say that:

The use of weapons or ammunition that cause unnecessary suffering is unlawful . . .

...

When force is used, suffering is likely to result. However, the infliction of unnecessary suffering is prohibited. "Unnecessary suffering" refers to infliction of injuries or suffering beyond what is required to achieve the military aim.

...

Remember that even lawful weapons cannot be used in a manner that causes unnecessary suffering.³⁸

46. Colombia's Circular on Fundamental Rules of IHL provides that "using weapons or methods of warfare which can cause superfluous injury or unnecessary suffering is prohibited".³⁹

47. Colombia's Basic Military Manual states that employing weapons which "cause unnecessary and indiscriminate, extensive, lasting and serious damage to people" is prohibited.⁴⁰

48. Congo's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to use any means [of warfare] that causes unnecessary suffering and damage".⁴¹

49. Croatia's LOAC Compendium considers as a prohibited method of warfare the "use of means and methods of combat resulting in unnecessary suffering".⁴²

50. Croatia's Commanders' Manual states that "weapons causing unnecessary suffering may not be used".⁴³

51. The Military Manual of the Dominican Republic instructs troops: "Remember that any method of warfare which causes unnecessary injury or suffering is prohibited." It adds that "the law of war does not allow you to alter your weapons in order to cause unnecessary injury or suffering to the enemy".⁴⁴

52. Ecuador's Naval Manual provides that:

It is a fundamental tenet of the law of armed conflict that the right of nations engaged in armed conflict to choose methods or means of warfare is not unlimited. This rule of law is expressed in the prohibition of the employment of weapons, material, and methods of warfare that are designed to cause superfluous injury or unnecessary suffering.

...

Antipersonnel weapons are designed to kill or disable enemy combatants and are lawful notwithstanding the death, pain, and suffering they inflict. Weapons which cause superfluous injury or unnecessary suffering are, however, prohibited because the degree of pain, the severity of the injuries and the certainty of death they entail are clearly out of all proportion to the military advantage sought. Poisoned projectiles and dum-dum bullets belong in this category since the small military advantage that may be derived from their use guarantees death due to poisoning or to the expanding effect of soft-nosed or unjacketed lead bullets.

Similarly, using materials that are difficult to detect or undetectable by field X-ray equipment, such as glass or clear plastic, as the injuring mechanism in military ammunition is prohibited, since they unnecessarily inhibit the treatment of wounds.⁴⁵

53. France's Disciplinary Regulations as amended provides that it is prohibited "to use any means [of warfare] that causes unnecessary suffering and damage".⁴⁶

54. France's LOAC Summary Note states that "it is prohibited to use... weapons... of a nature to cause unnecessary losses or excessive suffering".⁴⁷

55. France's LOAC Teaching Note states that, "owing to their inhumane nature or to their excessive traumatic effect", the use of poison, chemical weapons, biological and bacteriological weapons, dum-dum bullets or other projectiles with expanding heads, anti-personnel mines, weapons that injure by non-detectable fragments, blinding laser weapons, and torpedoes without self-destruction mechanisms "is totally prohibited by the law of armed conflicts".⁴⁸

56. France's LOAC Manual states that, "owing to their inhuman nature or to their excessive traumatic effect", the use of poison, chemical weapons, biological and bacteriological weapons, dum-dum bullets or other projectiles with expanding heads, anti-personnel mines, weapons that injure by non-detectable fragments, blinding laser weapons, and torpedoes without self-destruction mechanisms "is totally prohibited by the law of armed conflicts".⁴⁹

57. Germany's Soldiers' Manual provides that "it is prohibited to use means or methods of warfare which are intended or of a nature to cause superfluous injuries or unnecessary suffering (e.g. dum-dum bullets)".⁵⁰

⁴⁵ Ecuador, *Naval Manual* (1989), §§ 9.1 and 9.1.1.

⁴⁹ France, *LOAC Manual* (2001), p. 54, see also p. 97.

⁵⁰ Germany, *Soldiers' Manual* (1991), p. 5.

58. Germany's Military Manual states that:

It is particularly prohibited to employ means or methods which are intended or of a nature:

- to cause superfluous injury or unnecessary suffering...

...

"Superfluous injury" or "unnecessary suffering" is caused by the use of means... of combat whose presumable harm would definitely be excessive in relation to the lawful military advantage intended.

...

In the 1868 St. Petersburg Declaration the use of explosive and incendiary projectiles under 400 grammes was prohibited, since these projectiles were deemed to cause disproportionately severe injuries to soldiers, which is not necessary for putting them out of action...

...

It is prohibited to use bullets which expand or flatten easily in the human body (e.g. dum-dum bullets)... This applies also to the use of shotguns, since shot causes similar suffering unjustified from the military point of view.⁵¹

59. Germany's IHL Manual states that "it is prohibited, in particular, to employ means or methods of warfare, which are intended to or of a nature to cause superfluous injury or unnecessary suffering".⁵² The manual further states that:

International humanitarian law prohibits the use of a number of means of warfare which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g.

- bullets which easily expand or flatten in the human body, so-called dum-dum bullets,
- weapons whose primary effect is to injure by fragments which in the human body escape detection by X-rays, e.g. plastic or glass ammunition,
- explosive traps, when used in the form of an apparently harmless portable object, e.g. disguised as children's toys,
- bacteriological means of warfare, e.g. substances which cause disease,
- chemical means of warfare, e.g. poisonous gases.⁵³

60. Hungary's Military Manual includes, as a "basic rule", the obligation to "avoid unnecessary suffering, excessive damage and the use of more force than required to overpower the enemy". It also considers as a prohibited method of warfare the "use of means and methods of combat resulting in unnecessary suffering".⁵⁴**61.** According to Indonesia's Air Force Manual, it is prohibited to employ weapons which cause unnecessary suffering.⁵⁵**62.** With reference to Israel's Law of War Booklet, the Report on the Practice of Israel states that "Israel and the IDF accept and comply with the provisions

⁵¹ Germany, *Military Manual* (1992), §§ 401, 402 and 406–407, see also § 415.

⁵⁵ Indonesia, *Air Force Manual* (1990), § 15(b)(5).

of customary international law in relation to the prohibitions and restrictions on the use of weapons" which cause superfluous and unnecessary suffering.⁵⁶

63. Israel's Manual on the Laws of War states that "since St. Petersburg, there have been several universally accepted rules regarding weapons: . . . Weapons causing needless suffering are prohibited."⁵⁷

64. Italy's IHL Manual provides that "the use of means and methods of warfare of a nature to cause . . . superfluous injuries and unnecessary suffering is prohibited".⁵⁸

65. Italy's LOAC Elementary Rules Manual states that "weapons causing unnecessary suffering may not be used".⁵⁹

66. Kenya's LOAC Manual provides that "it is prohibited to employ weapons, projectiles and methods and materials of warfare of a nature to cause superfluous injury".⁶⁰

67. South Korea's Operational Law Manual states that weapons which cause unnecessary suffering are prohibited.⁶¹

68. Madagascar's Military Manual states that "weapons causing unnecessary suffering shall not be used".⁶²

69. Mali's Army Regulations provides that, under the laws and customs of war, it is prohibited "to use any means [of warfare] that causes unnecessary suffering and damage".⁶³

70. Morocco's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to use any means [of warfare] that causes unnecessary suffering and damage".⁶⁴

71. The Military Manual of the Netherlands states that parties to an armed conflict "may not use means (weapons, projectiles and substances) and methods which cause unnecessary suffering or superfluous injury". The manual gives dum-dum bullets, serrated-edged bayonets or weapons injuring by non-detectable fragments are examples of such means of warfare.⁶⁵

72. The Military Handbook of the Netherlands states that "means which cause unnecessary suffering with respect to the objective (elimination of the enemy) may not be used". It gives as examples of such means of warfare: "poison and poisoned weapons, dum-dum bullets, serrated-edged bayonets, weapons whose primary effect is to injure by fragments which cannot be detectable by X-ray, booby-traps attached to the Red Cross Emblem, wounded or dead person, [and] medical objects or toys".⁶⁶

⁵⁶ Report on the Practice of Israel, 1997, Chapter 3.1, referring to *Law of War Booklet* (1986), p. 11.

⁶⁶ Netherlands, *Military Handbook* (1995), pp. 7-36 and 7-39.

73. New Zealand's Military Manual provides that:

It is prohibited to employ weapons, projectiles and material of a nature to cause superfluous injury or unnecessary suffering. A weapon causes unnecessary suffering when in practice it inevitably causes injury or suffering disproportionate to its military effectiveness. In determining the military effectiveness of a weapon one looks at the primary purpose for which it was designed.⁶⁷

The manual further states that:

Examples of such weapons include such weapons as lances with a barbed head, irregularly-shaped bullets, projectiles filled with broken glass, and the like. The scoring of the surface of bullets, the filing off of the end of their hard case, and the smearing on them of any substance likely to inflame a wound, are also prohibited. Generally speaking, weapons which are agreed to cause unnecessary suffering are home-made weapons or unofficial modifications of weapons issued through normal channels.⁶⁸

Lastly, the manual states that "employing arms or other weapons which are calculated to cause unnecessary suffering" constitutes a war crime.⁶⁹

74. Nigeria's Military Manual states that it is prohibited "to employ arms, projectiles or material aimed at causing unnecessary suffering".⁷⁰ It further states that:

The basic principles are that every commander has the right to choose the means and methods of the type of warfare to be executed, to avoid unnecessary suffering and damage to men and material... The principle of avoiding unnecessary suffering and damage prohibits all forms of violence that are not required for the over-powering of the enemy.⁷¹

75. Nigeria's Manual on the Laws of Wars states that "it is expressly forbidden to use arms, projectiles or materials calculated to cause unnecessary suffering".⁷²

76. Nigeria's Soldier's Code of Conduct provides that it is prohibited "to employ arms, projectiles or material aimed at causing unnecessary suffering".⁷³

77. Romania's Soldier's Manual states that "the rules of humanitarian law prohibit causing unnecessary losses and excessive suffering to the adversary".⁷⁴

78. Russia's Military Manual provides that:

Prohibited means of warfare are the various weapons of an indiscriminate character and/or those that cause unnecessary suffering:

⁶⁷ New Zealand, *Military Manual* (1992), § 509(2) (land warfare) and § 616(2) (air warfare), see also §§ 510(1)(a) and 707(2) (naval warfare).

⁷³ Nigeria, *Soldiers' Code of Conduct* (undated), § 12(e).

⁷⁴ Romania, *Soldier's Manual* (1991), p. 34.

- a) bullets that expand or flatten easily in the human body;
- b) projectiles used with the only purpose to spread asphyxiating or poisonous gases;
- c) projectiles weighing less than 400 grammes, which are either explosive or charged with fulminating or inflammable substances;
- d) poisons or poisoned weapons;
- e) asphyxiating, poisonous or other similar gases and bacteriological means;
- f) bacteriological (biological) and toxin weapons;
- g) environmental modification techniques having widespread, long-term or serious effects as means of destruction, damage or injury;
- h) all types of weapons of an indiscriminate character or that cause excessive injury or suffering.⁷⁵

79. Senegal's Disciplinary Regulations provides that, under the laws and customs of war, it is prohibited "to use any means [of warfare] that causes unnecessary suffering and damage".⁷⁶

80. South Africa's LOAC Manual states that:

A basic principle of the LOAC is the prevention of unnecessary suffering. The test in relation to a particular weapon is whether the suffering occasioned by its use is needless, superfluous, or grossly disproportionate to the advantage gained.

- i. Weapons which are calculated to cause unnecessary suffering are illegal per se. Such weapons include barbed spears, dum-dum bullets, weapons filled with glass and weapons that inflame wounds.
- ii. Legal weapons may not be used in a manner which cause unnecessary suffering.⁷⁷

81. Spain's LOAC Manual states that "the right to choose means and methods of warfare is limited by the principle according to which unnecessary suffering and superfluous injury shall be avoided".⁷⁸ It further states that "weapons causing unnecessary suffering may not be used".⁷⁹

82. Sweden's IHL Manual considers the "prohibition of methods or means of warfare which cause superfluous injury or unnecessary suffering", as contained in Article 35(2) AP I, as a customary rule of international law.⁸⁰ It further states that, according to the criteria given in the St. Petersburg Declaration and in the 1907 Hague Convention (IV),

Weapons shall be considered particularly inhuman if they:

- cause unnecessary suffering or superfluous damage, or
- have indiscriminate effects, meaning that the weapon effects strike military objectives and civilian persons without any distinction.

⁷⁵ Russia, *Military Manual* (1990), § 6.

⁷⁶ Senegal, *Disciplinary Regulations* (1990), Article 34(2).

⁷⁷ South Africa, *LOAC Manual* (1996), § 34(f).

⁷⁸ Spain, *LOAC Manual* (1996), Vol. I, § 2.3.b.(3).

⁷⁹ Spain, *LOAC Manual* (1996), Vol. I, § 10.8.e.(1).

⁸⁰ Sweden, *IHL Manual* (1991), Section 2.2.3, p. 18.

These criteria have been used in all arms limitation negotiations in recent years.⁸¹

83. Switzerland's Basic Military Manual states that belligerents "must not use weapons, projectiles, toxic gases or means of combat that cause unnecessary suffering".⁸²

84. Togo's Military Manual states that "it is prohibited to resort to weapons or methods of warfare of a nature to cause unnecessary losses or superfluous injury".⁸³

85. The UK Military Manual stresses that:

It is expressly forbidden to employ arms, projectiles or material calculated to cause unnecessary suffering. Under this heading may be included such weapons as lances with a barbed head, irregularly-shaped bullets, projectiles filled with broken glass, and the like. The scoring of the surface of bullets, the filing off of the end of their hard case, and the smearing on them of any substance likely to inflame a wound, are also prohibited.

...

The prohibition is not, however, intended to apply to the use of explosives contained in mines, aerial torpedoes and hand-grenades. The use of flame throwers and napalm bombs when directed against military targets is lawful. However, their use against personnel is contrary to the law of war in so far as it is calculated to cause unnecessary suffering.⁸⁴

86. The UK LOAC Manual states that "the following are prohibited in *international* armed conflict: . . . d. arms, projectiles or material intended to cause excessive injury or suffering".⁸⁵ (emphasis in original)

87. The US Field Manual states that:

It is especially forbidden to employ arms, projectiles, or material calculated to cause unnecessary suffering.

What weapons cause "unnecessary injury" can only be determined in light of the practice of States in refraining from the use of a given weapon because it is believed to have that effect . . . Usage, has, however, established the illegality of the use of lances with barbed heads, irregular-shaped bullets, and projectiles filled with glass, the use of any substance on bullets that would tend unnecessarily to inflame a wound inflicted by them, and the scoring of the surface or the filing off of the ends of the hard cases of bullets.⁸⁶

88. The US Air Force Pamphlet provides that:

It is forbidden to employ weapons, projectiles, and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering. This rule is a matter of customary international law . . .

The rule prohibiting the use of weapons causing unnecessary suffering or superfluous injury is firmly established in international law . . . This prohibition against

⁸¹ Sweden, *IHL Manual* (1991), Section 3.3.1, pp. 78–79.

⁸² Switzerland, *Basic Military Manual* (1987), Article 17.

⁸³ Togo, *Military Manual* (1996), Fascicule II, p. 5.

⁸⁴ UK, *Military Manual* (1958), § 110 and footnote 1.

⁸⁵ UK, *LOAC Manual* (1981), Section 5, p. 20, § 1(d).

⁸⁶ US, *Field Manual* (1956), § 34.

unnecessary suffering is a concrete expression of the general principles of proportionality and humanity. The rule reflects interests of combatants in avoiding needless suffering. Weapons are lawful, within the meaning of the prohibition against unnecessary suffering, so long as the foreseeable injury and suffering associated with wounds caused by such weapons are not disproportionate to the necessary military use of the weapon in terms of factors such as effectiveness against particular targets and available alternative weapons. What weapons or methods of warfare cause *unnecessary suffering*, and hence are unlawful *per se*, is best determined in the light of the practice of states. All weapons cause suffering. The critical factor in the prohibition against unnecessary suffering is whether the suffering is needless or disproportionate to the military advantages secured by the weapon, not the degree of suffering itself. International agreements may give specific content to the principle in the form of specific agreements to refrain from the use of particular weapons or methods of warfare. Thus, international law has condemned dum dum or exploding bullets because of types of injuries and inevitability of death.⁸⁷ [emphasis in original]

The Pamphlet also states that “the long-standing customary prohibition against poison is based on their uncontrolled character and the inevitability of death or permanent disability”.⁸⁸ It further adds that “a new weapon or method of warfare may be illegal, *per se*, if it is restricted by international law including treaty or international custom . . . [T]he legality of new weapons . . . is determined by whether the weapon’s effects violate the rule against unnecessary suffering.”⁸⁹

89. The US Air Force Commander’s Handbook states that:

Weapons that cause unnecessary suffering or superfluous injury are prohibited. Note that the degree of suffering is not the principal issue; the true test is whether the suffering is needless or disproportionate to the military advantage expected from the use of the weapon.

- (1) Thus, poisoned bullets are felt to cause unnecessary suffering since a person injured by modern military ammunition will ordinarily be placed out of the fighting by that alone; there is very little military advantage to be gained [by] making sure of the death of wounded persons through poison since they will be out of the battle when the poison takes effect.
- (2) Similarly, using clear glass as the injuring mechanism in an explosive projectile or bomb is prohibited, since glass is difficult for surgeons to detect in a wound and impedes treatment.⁹⁰

90. The US Soldier’s Manual stresses that “the law of war does not allow you to alter your weapons in order to cause unnecessary injury or suffering to the enemy”.⁹¹

91. The US Instructor’s Guide states that:

The customary law of war and the [1907] Hague Regulations . . . limit the weapons the armed force can use. Under the Hague Regulations, the employment of arms, material, or projectiles designed to cause unnecessary suffering is prohibited. These

⁸⁷ US, *Air Force Pamphlet* (1976), § 6-3(b)(1) and (2). ⁸⁸ US, *Air Force Pamphlet* (1976), § 6-4f.

⁸⁹ US, *Air Force Pamphlet* (1976), 6-7(a).

⁹⁰ US, *Air Force Commander’s Handbook* (1980), § 6-2a.

⁹¹ US, *Soldier’s Manual* (1984), p. 11, see also p. 10.

principles have outlawed irregular-shaped bullets such as dum-dum bullets, projectiles filled with glass, and any substances or projectiles that would tend to inflame a wound. [The US] Field Manual 27-10 states, in paragraph 34, that whether weapons cause unnecessary injury "... can only be determined in the light of the practice of the States in refraining from the use of a given weapon because it is believed to have that effect" ...

It is possible... for a soldier to violate the law of war by misusing an issued weapon or using it at the wrong time or in the wrong place. An example of misusing a legitimate weapon would be cutting off the tip of a bullet. When the bullet hits someone, it expands and leaves a gaping wound. Such bullets cause unnecessary suffering and are forbidden. This misuse of a legitimate weapon is a crime for which you can be prosecuted.⁹²

92. The US Operational Law Handbook states that "using weapons which cause unnecessary suffering" is "expressly prohibited by the law of war and [is] not excusable on the basis of military necessity".⁹³

93. The US Naval Handbook provides that:

It is a fundamental tenet of the law of armed conflict that the right of nations engaged in armed conflict to choose methods or means of warfare is not unlimited. This rule of law is expressed in the concept that the employment of weapons, material, and methods of warfare that are designed to cause superfluous injury or unnecessary suffering is prohibited.

...

Antipersonnel weapons are designed to kill or disable enemy combatants and are lawful notwithstanding the death, pain, and suffering they inflict. Weapons that are designed to cause unnecessary suffering or superfluous injury are, however, prohibited because the degree of pain or injury, or the certainty of death they produce is needlessly or clearly disproportionate to the military advantage to be gained by their use. Poisoned projectiles and small arms ammunition intended to cause superfluous injury or unnecessary suffering fall into this category. Similarly, using materials that are difficult to detect or undetectable by field x-ray equipment, such as glass or clear plastic, as the injuring mechanism in military ammunition is prohibited, since they unnecessarily inhibit the treatment of wounds.⁹⁴

94. The YPA Military Manual of the SFRY (FRY) prohibits the use of weapons and material that cause unnecessary suffering. A commentary on this prohibition states that it concerns weapons causing "suffering disproportionate to the military objective achieved" and gives the example of dum-dum bullets.⁹⁵

National Legislation

95. Argentina's Draft Code of Military Justice punishes "any soldier who, on the occasion of an armed conflict, uses or orders to be used methods or means of combat ... designed to cause unnecessary suffering or superfluous injury".⁹⁶

⁹² US, *Instructor's Guide* (1985), p. 7.

106. Italy's Law of War Decree as amended provides that "superfluous suffering shall not be inflicted on the enemy".¹⁰⁷

107. Under Mali's Penal Code, "employing weapons, projectiles, materials and methods of warfare which are of a nature to cause superfluous injury or unnecessary suffering . . . provided that such means are the subject of a comprehensive prohibition" is a war crime in international armed conflicts.¹⁰⁸

108. The Definition of War Crimes Decree of the Netherlands includes the "use of . . . inhuman appliances" in its list of war crimes.¹⁰⁹

109. Under New Zealand's International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.¹¹⁰

110. Nicaragua's Military Penal Code punishes any soldier "who employs or orders the employment of weapons or means and methods of warfare . . . designed to cause unnecessary suffering or superfluous injury".¹¹¹

111. Under Norway's Military Penal Code as amended, "anyone who contravenes or is accessory to the contravention of provisions relating to the protection of persons or property laid down in . . . the two additional protocols to [the Geneva] Conventions . . . is liable to imprisonment".¹¹²

112. Spain's Military Criminal Code punishes "any soldier who uses, or orders the use of, means or methods of combat which are prohibited or destined to cause unnecessary suffering or superfluous injury".¹¹³

113. Spain's Penal Code punishes "anyone who, during an armed conflict, uses, or orders to be used, methods or means of combat which are prohibited or destined to cause unnecessary suffering or superfluous injury".¹¹⁴

114. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.¹¹⁵

115. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.¹¹⁶

116. Under the US War Crimes Act as amended, violations of Article 23(e) of the 1907 HR are war crimes.¹¹⁷

117. Venezuela's Code of Military Justice as amended punishes "those who make use of weapons or means that unnecessarily increase the suffering of the persons attacked".¹¹⁸

¹⁰⁷ Italy, *Law of War Decree as amended* (1938), Article 35.

¹⁰⁸ Mali, *Penal Code* (2001), Article 31(i)(20).

¹⁰⁹ Netherlands, *Definition of War Crimes Decree* (1946), Article 1.

¹¹⁰ New Zealand, *International Crimes and ICC Act* (2000), Section 11(2).

¹¹¹ Nicaragua, *Military Penal Code* (1996), Article 51.

¹¹² Norway, *Military Penal Code as amended* (1902), § 108(b).

¹¹³ Spain, *Military Criminal Code* (1985), Article 70.

¹¹⁴ Spain, *Penal Code* (1995), Article 610.

¹¹⁵ Trinidad and Tobago, *Draft ICC Act* (1999), Section 5(1)(a).

¹¹⁶ UK, *ICC Act* (2001), Sections 50(1) and 51(1) (England and Wales) and Section 58(1) (Northern Ireland).

¹¹⁷ US, *War Crimes Act as amended* (1996), Section 2441(c)(2).

¹¹⁸ Venezuela, *Code of Military Justice as amended* (1998), Article 474(5).

118. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime. The commentary on this provision states that "the following weapons and means of combat are considered to be prohibited: . . . weapons, ammunition and materials that cause unnecessary suffering".¹¹⁹

National Case-law

119. In the *Military Junta case* in 1985, Argentina's National Court of Appeals, with reference to Articles 22 and 23 of the 1907 HR, mentioned the prohibition on the use of weapons, projectiles or material which cause "unnecessary damage" to enemies. It also referred to the opinion of some writers, according to whom unnecessary harm to the enemy or to the civilian population is prohibited.¹²⁰

120. In the *Shimoda case* in 1963, Japan's District Court of Tokyo quoted the 1868 St. Petersburg Declaration and Article 23(e) of the 1907 HR, and also referred to the 1899 Hague Declaration concerning Asphyxiating Gases. The Court held, however, that "the use of a certain weapon, great as its inhuman result may be, need not be prohibited by international law if it has a great military effect".¹²¹

Other National Practice

121. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Australia stated that:

41. On the question of weapons that might cause unnecessary suffering, humanitarian principles in weapons design, which Australia wished to see universally accepted, should not be selectively disadvantageous to any country. One factor that should be kept in mind was the differing capacity of countries to maintain high technology or capital-intensive defensive weapons systems, as opposed to manpower-intensive defensive weapons systems at a relatively lower level of technology. It must not be assumed that high-technology sophisticated weapons, if correctly used, were necessarily more inhumane than simpler weapons . . .
42. His delegation felt that there might have been a tendency in recent studies to place undue emphasis on unnecessary suffering as manifested in wounds of a complex or serious nature, and perhaps in that way to lose sight of the initial and basic St. Petersburg principle that it was better to wound than to kill an enemy combatant. The Committee should consider whether, from the point of view of the soldier involved, it was doing him a service if it fell into the error of giving preference to weapons that tended to kill cleanly, rather than to weapons that wounded, but did not kill.¹²²

¹¹⁹ SFRY (FRY), *Penal Code as amended* (1976), Article 148(1) and commentary.

¹²⁰ Argentina, National Court of Appeals, *Military Junta case*, Judgement, 9 December 1985.

¹²² Australia, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, pp. 15-16, §§ 41-42.

122. In a memorandum in 1991, Australia's Department of Foreign Affairs and Trade stated that:

The wide ban on weapons which cause superfluous injury (Article 35(2)) has to be read in conjunction with the Convention on the Prohibition on the Use of Certain Conventional Weapons Which May be Deemed to be Excessively Injurious or to have Indiscriminate Effects. This Convention specifically lists such weapons which are prohibited. Australia became a party to this Convention in 1984. In the light of the Convention a reservation on this ground is unnecessary.¹²³

123. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Australia stated that:

One of the most fundamental and longest-standing humanitarian principles is the prohibition on employing weapons or methods of warfare of a nature to cause unnecessary losses or suffering. Yet while this principle has remained constant, its practical application has not and will not. The suffering inflicted by a particular type of weapon may be accepted as "necessary" in one age, but condemned as unnecessary in another. Such changes in the dictates of public conscience may have a number of causes. Advances in technology or changes in methods of warfare may provide alternatives to the use of weapons of that type. Or it may be that in a later age the level of suffering in warfare which the international community is prepared to tolerate is lower than the level which it tolerated previously.¹²⁴

124. In 1997, during a debate in the First Committee of the UN General Assembly, Austria stated that excessively injurious weapons must be banned, since humanitarian aspects must override others.¹²⁵

125. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Brazil stated that:

In principle, all available weapons could cause unnecessary suffering . . . depending on how they were used. There were good humanitarian reasons for the international community to agree at least on restricting the use of incendiary weapons against targets which were not exclusively military.¹²⁶

126. In 1973, in its comment on the UN Secretary-General's report on napalm and other incendiary weapons and all aspects of their possible use, Canada stated that:

Broadly, there should be concern with the use of all types of weapons in ways which could cause unnecessary suffering . . . [F]or this reason, the protocols additional to the Geneva Conventions of 1949 which are currently being prepared under the

¹²³ Australia, Department of Foreign Affairs and Trade, File: 1710/10/3/1, 13 February 1991, § 6.

¹²⁶ Brazil, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.2, 14 March 1974, p. 18, § 7.

auspices of the International Committee of the Red Cross in close co-operation with the United Nations General Assembly, should reaffirm the existing principles and rules of conventional and customary international law of armed conflicts which apply generally to the choice and use of weapons by States in armed conflict and are contained, *inter alia*, in the Hague Declaration [concerning Asphyxiating Gases] of 1899, the Hague Conventions of 1907 and the Geneva [Gas] Protocol of 1925.¹²⁷

127. In 1991, in a legal report concerning the withdrawal of its reservation to the 1925 Geneva Gas Protocol, Chile stated that “the prohibition of the use of arms, projectiles or material calculated to cause unnecessary suffering . . . is considered to be a norm of international customary law and hence to be binding on all States, whether or not they are party to the relevant Convention”.¹²⁸

128. The Report on the Practice of China, referring to a declaration by the delegation of China at the CCW Conference in 1980, notes that China often calls weapons of a nature to cause unnecessary suffering or superfluous injury “inhumane weapons”. It adds that China has always been in favour of a total ban on these weapons and of further restrictions on their use, and that it has always made efforts to achieve the prohibition or restrictions on the use of certain inhumane conventional weapons.¹²⁹

129. At the Second Review Conference of States Parties to the CCW in 2001, China declared that “the impermissibility of using means of warfare that caused excessive injuries . . . had become a universally accepted principle”.¹³⁰

130. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Colombia stated that:

8. . . . His government . . . supported all measures for the prohibition or limitation of the use of conventional weapons likely to cause unnecessary injury . . .
9. . . . His Government was opposed to the use of napalm and incendiary weapons. In view of the suffering inflicted on the victims, nothing could justify their use. Similarly, the use of high velocity small-calibre projectiles designed to cause excessive injury should be absolutely forbidden. Such weapons were indeed comparable to explosive bullets or dum-dum bullets.¹³¹

¹²⁷ Canada, Comments on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207/Add.1, 17 December 1973, p. 3.

¹²⁸ Chile, Ministry of Foreign Affairs, Memorandum Reservado No. 430/91, Santiago, 17 June 1991, §§ 3 and 6.

¹²⁹ Report on the Practice of China, 1997, Chapter 3.1, referring to Address to the Plenary Session of the UN Meeting on the Prohibition or Restrictions on Certain Conventional Weapons, 10 October 1980, *Selected Documents of the Chinese Delegation to the United Nations*, World Knowledge Press, Beijing, 1980, p. 265.

¹³⁰ China, Statement at the Second Review Conference of States Parties to the CCW, Geneva, 11–21 December 2001, UN Doc. CCW/CONF.II/SR.2, 16 January 2002, § 41.

¹³¹ Colombia, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.14, 5 March 1975, p. 132, §§ 8–9.

131. In 1977, during a debate in the First Committee of the UN General Assembly, Colombia advocated the elimination of “weapons of mass destruction, chemical and bacteriological weapons, incendiary weapons and all those weapons that are capable of bringing about the most horrifying suffering”.¹³²

132. In 1977, during a debate in the First Committee of the UN General Assembly, Cyprus stated that napalm caused unnecessary suffering.¹³³

133. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Ecuador stated that “the use of nuclear weapons contradicts the humanitarian dispositions against the use of warlike artifacts that provoke cruel and unnecessary sufferings to its victims”.¹³⁴

134. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Egypt stressed that it was “still in favour of complete prohibition of the use of all weapons that might cause unnecessary suffering . . . The main object was to humanize war as far as possible by imposing a certain discipline on belligerents.”¹³⁵

135. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Egypt stated that:

19. The prohibition against the use of weapons which render death inevitable or cause unnecessary suffering: “The right of belligerents to the conflict to adopt means of injuring the enemy is not unlimited.” [reference is made to Article 22 of the 1907 HR] This rule imposes on the belligerents the obligation to refrain from cruel and treacherous behaviour. As far as weapons are concerned, since the nineteenth century this humanitarian principle has been embodied in two rules: one forbids the use of poisons, while the other prohibits the use of weapons capable of causing superfluous injuries . . .

20. 20. The laws of the Hague [reference is made to Article 23(e) of the 1907 HR] and Geneva [reference is made to Article 35(2) AP I] provide that it is especially forbidden to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering. It goes without saying that the enormous blast waves, air blasts, fires, residual nuclear radiation or radioactive fallout, electromagnetic impulses and thermal radiation, which are primary effects of the use of nuclear weapons, cause extensive “unnecessary suffering”.¹³⁶

136. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, France stated that:

¹³² Colombia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.21, 5 October 1977, p. 11.

¹³³ Cyprus, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.44, 24 October 1977, p. 17.

¹³⁴ Ecuador, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 2, § D.

¹³⁵ Egypt, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.6, 22 March 1974, p. 49, § 12.

¹³⁶ Egypt, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, pp. 12–13, §§ 19 and 20.

The supporters of that theory [according to which the law of armed conflicts would contain legal rules from which a prohibition of the use of nuclear weapons could be deduced] base themselves . . . on various rules or principles enunciated in [AP I], and specifically “the prohibition to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering” (art. 35, para.2) . . .

The French Government formally rejects this reasoning . . . Besides the fact that it is not according to this procedure that the prohibitions concerning the use of arms are traditionally established, this method is random, and cannot in any case lead to the result aimed at by its authors.

The theory put forward supposes that it is established . . . that all the rules mentioned . . . correspond with customary principles recognized as such and . . . that the exact content of these principles is defined.

However, this content . . . has been the object, and still is the object, of doctrinal discussions.

With regard to this, the French government must again underline that the principles of international customary law applicable in armed conflict cannot be searched in [AP I] . . . If one cannot deny that certain provisions of the protocol find their inspiration in the principles of international customary law, it is obvious that others constitute a development.

...

The general practice in the field of the prohibition or the regulation of armament is to proceed by conventions . . .

Indeed, the regulation of the use of a weapon supposes precise rules which cannot be established other than by specific conventions.¹³⁷

137. Following the adoption by consensus of Article 33 of Draft AP I (now Article 35 AP I), France stated that it “went beyond the strict confines of humanitarian law and in fact regulated the law of war” and had “direct implications for the defence and security of States”. Therefore, it stated that it would have abstained if the article had not been adopted by consensus.¹³⁸

138. The instructions given to the French armed forces for the conduct of Opération Mistral, simulating a military operation under the right of self-defence or a mandate of the UN Security Council, state that “it is prohibited to employ methods or weapons which are of a nature to cause unnecessary losses or excessive suffering”.¹³⁹

139. According to the Report on the Practice of France, the French Minister of Foreign Affairs stated in an interview in 1999 that France considered Article 35 AP I to have become customary.¹⁴⁰

140. At the CDDH, in an explanation of vote concerning Article 33 draft AP I, the FRG stated that it had joined in the consensus on Article 33 of draft AP I

¹³⁷ France, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, pp. 40–45, §§ 28–30; see also Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, June 1994, pp. 29–31, § 26.

¹³⁸ France, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 March 1977, p. 101, § 55.

¹³⁹ France, *Etat-major de la Force d’Action Rapide, Ordres pour l’Opération Mistral*, 1995, Section 6, § 65.

¹⁴⁰ Report on the Practice of France, 1999, Chapter 3.1.

(now Article 35 AP I) “with the understanding that paragraphs 1 and 2 reaffirm customary international law”.¹⁴¹

141. In 1970, during a debate in the Third Committee of the UN General Assembly on Resolution 2677 (XXIV) which emphasised the need to “secure the full observance of human rights applicable in all armed conflicts” and called upon “all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907, the Geneva [Gas] Protocol of 1925 . . . and other humanitarian rules applicable in armed conflicts”, India sought to change “all armed conflicts” in the second preambular paragraph to “armed conflicts”. Being unsuccessful, it then stated that it construed the expression “all armed conflicts” to denote all international armed conflicts.¹⁴²

142. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, India stated that it was

happy to note that all the delegations agreed in recognizing the need to avoid unnecessary suffering and that the differences of opinion concerned solely the extent to which countries were prepared to restrict their choice of that type of weapon for their defense, in order to avoid unnecessary suffering to civilians and combatants.¹⁴³

143. At the CDDH, India stated that it had agreed to join in the consensus on Article 33 of draft AP I (now Article 35),

with the understanding that the basic rules contained in this article will apply to all categories of weapons, namely nuclear, bacteriological, chemical, or conventional weapons or any other category of weapons. Secondly, the term “superfluous injury or unnecessary suffering” means those physical injuries which are more severe than would be necessary to render an adversary *hors de combat* or to make the enemy surrender and which are not justified by considerations of military necessity.¹⁴⁴

144. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, India stated that “the use of nuclear weapons in an armed conflict is unlawful, being contrary to the conventional as well as customary international law because such a use . . . could cause excessive injuries to the combatants making their death inevitable”.¹⁴⁵

145. The Report on the Practice of India states that India considers that the prohibition of weapons causing unnecessary suffering also applies in non-international armed conflicts.¹⁴⁶

146. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Indonesia stated that:

¹⁴¹ FRG, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 May 1977, p. 115.

¹⁴² India, Statement before the Third Committee of the UN General Assembly, UN Doc. A/C.3/SR.1801, 27 November 1970, p. 379.

¹⁴³ India, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.28, 20 May 1976, p. 284, § 5.

¹⁴⁴ India, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 March 1977, p. 115.

¹⁴⁵ India, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 4.

¹⁴⁶ Report on the Practice of India, 1997, Chapter 3.1.

All international customary law and all treaties regulating the conduct of armed conflict among States are based on two fundamental principles, namely necessity and humanity . . . Actions which cause needless losses or suffering are prohibited. Furthermore, the employment of arms causing unnecessary suffering . . . is prohibited under the 1907 Hague Convention IV on Laws and Customs of Land Warfare.¹⁴⁷

147. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Iran stated that “some of the principles of humanitarian international law from which one can deduce the illegitimacy of the use of nuclear weapons are: . . . Prohibition of means and methods of war that cause unnecessary suffering to human societies and environment.”¹⁴⁸

148. Article 20 of draft AP II, prohibiting the use of weapons of a nature to cause superfluous injury or unnecessary suffering, was deleted at the last moment by the CDDH, without any plenary debate, as part of a general revision of AP II. During the amendment voting at this stage, Ireland voted in favour of the article because it believed that “the principles enunciated in the article are of a purely humanitarian nature”.¹⁴⁹

149. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Italy stated that “the exercise of armed violence should be carried out so as not to bring about unnecessary, and thus superfluous or useless, sufferings”.¹⁵⁰

150. At the CDDH, the Italian delegation stated that it had joined in the consensus on Articles 33 and 34 draft AP I (now Articles 35 and 36) “bearing in mind above all the principles which inspired them” but that “it could not, however, conceal its perplexity about the wording of those provisions which could not be interpreted as introducing a specific prohibition operative in all circumstances attendant on the study, development, acquisition or adoption of particular weapons or methods of warfare”.¹⁵¹

151. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Japan stated that it was of the understanding that “the free and unlimited selection of weapons is unacceptable in terms of international law concerning warfare, and that . . . the infliction of unnecessary suffering . . . is prohibited, even with regard to weapons that are not expressly banned”.¹⁵²

152. According to the Report on the Practice of Kuwait, Kuwait does not import weapons which cause superfluous injury because it is of the opinion that such weapons are unacceptable.¹⁵³

¹⁴⁷ Indonesia, Oral pleadings before the ICJ, *Nuclear Weapons case*, 3 November 1995, Verbatim Record CR 95/25, p. 27.

¹⁴⁸ Iran, Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, undated, p. 1.

¹⁴⁹ Ireland, Statement at the CDDH, *Official Records*, Vol. VII, CDDH/SR.51, 3 June 1977, p. 120.

¹⁵⁰ Italy, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, p. 5.

¹⁵¹ Italy, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.39, 25 March 1977, p. 102, § 59.

¹⁵² Japan, Oral pleadings before the ICJ, *Nuclear Weapons case*, 7 November 1995, Verbatim Record CR 95/27, p. 37.

¹⁵³ Report on the Practice of Kuwait, 1997, Chapter 3.3.

153. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Lesotho stated that “any use of nuclear weapons, even in self-defense, would violate international humanitarian law, including the Hague and Geneva Conventions, which prohibit as practices of war . . . causing unnecessary or aggravated suffering”.¹⁵⁴

154. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Madagascar stated in relation to the report of the Conference of Government Experts on the Use of Certain Conventional Weapons that Might Cause Unnecessary Suffering or Have Indiscriminate Effects that “those provisions . . . were inadequate, for they reaffirmed rules that were already to be found in other international instruments”.¹⁵⁵

155. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Marshall Islands stated that “any use of nuclear weapons violate the laws of war including the Geneva and Hague Conventions . . . Such laws prohibit . . . the causing of unnecessary or aggravated suffering.”¹⁵⁶

156. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Mauritania stated that:

7. He strongly supported the general prohibition of all weapons that might cause unnecessary suffering.
8. For humanitarian reasons, a ban should be placed on the use of incendiary weapons, anti-personnel fragmentation weapons, fléchettes, small calibre projectiles causing serious wounds and anti-personnel land mines which . . . caused unnecessary suffering through serious, terrifying and painful wounds that were difficult to treat.
9. His delegation considered that the provisions of Articles 22 and 23(e) of the [1907 HR], which were also to be found in the Preamble to the Declaration of St. Petersburg of 1868 to the Effect of Prohibiting the Use of Certain Projectiles in Wartime, as well as in the report of the United Nations Secretary-General on Napalm and other incendiary weapons and all aspects of their possible use . . . showed that the use of certain categories of weapons should be generally prohibited for the well-being of all mankind.¹⁵⁷

157. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Mexico stated that:

The debates in the United Nations General Assembly which culminated in the approval by an overwhelming majority of resolution 3076 (XXVIII) relating to napalm and other incendiary weapons were eloquent proof that humanity was anxious for

¹⁵⁴ Lesotho, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 2.

¹⁵⁵ Madagascar, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.10, 19 February 1975, p. 102, §§ 52–53.

¹⁵⁶ Marshall Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 22 June 1995, § 5.

¹⁵⁷ Mauritania, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.11, 21 February 1975, p. 106, §§ 7–9.

the prohibition of the use of those weapons as well as other conventional weapons which could be considered as causing unnecessary suffering.¹⁵⁸

158. In 1976, during discussions on napalm and other incendiary weapons in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Mexico stated that “incendiary weapons . . . were cruel weapons which caused unnecessary suffering, especially to those with least protection, namely, innocent victims not participating in military operations”.¹⁵⁹

159. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Mexico affirmed that:

The [1868] Declaration of Saint Petersburg was followed by a series of international instruments in which the idea of preventing unnecessary suffering and superfluous damage to the enemy led to a prohibition on the use of certain weapons. Such instruments included The Hague Conventions of 1899 and 1907, which prohibited the use of poisoned or poisonous weapons and or arms, projectiles or materials causing unnecessary suffering; the [1925] . . . Geneva Gas Protocol . . . and the [1972 BWC] . . . etc.

. . . All the above-mentioned instruments have made it clear that the right of the parties in an armed conflict to choose the means of harming the enemy is not unlimited and is, in fact, subject to restrictions. In this regard, it is worth highlighting Article 35 [AP I] . . . which reaffirms that the right of the Parties to an armed conflict to choose methods or means of warfare is not unlimited and that it is prohibited to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering.

. . .

The international community considers that certain types of armaments should be prohibited on account of their inhumane effects on individuals.¹⁶⁰

160. At the CDDH, Mozambique stated that “while this Conference is meeting here, the people of Mozambique are being bombed by the illegal and racist régime of Ian Smith, which is using napalm and other materials causing superfluous injury”.¹⁶¹

161. In its response to submissions from other States submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Nauru stated that “it is also a violation of customary international law to use weapons that cause unnecessary suffering”.¹⁶²

162. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Netherlands stated that:

¹⁵⁸ Mexico, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 8, § 6.

¹⁵⁹ Mexico, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.28, 20 May 1976, p. 283, § 1.

¹⁶⁰ Mexico, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, §§ 72, 73 and 75.

¹⁶¹ Mozambique, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 303.

¹⁶² Nauru, Response to submissions of other States submitted to the ICJ, *Nuclear Weapons (WHO) case*, 15 June 1995, Part 1, p. 11.

Suffering may be called “unnecessary” when its infliction is not necessary to attain a lawful military advantage or greatly exceeds what could reasonably have been considered necessary to attain that military advantage.

... The availability of considerably less harmful means to attain the military advantage or the causing of suffering out of proportion to the military advantage to be gained therefore appears to be the essential yardstick for determining whether the use of certain weapons must be deemed to cause “unnecessary” suffering. This approach has governed the development of rules with regard to means and methods of warfare since 1868.¹⁶³

163. In 1969, during a debate in the Third Committee of the UN General Assembly, the Netherlands stated that it was:

essential to update and broaden the Hague Conventions and the 1925 Geneva [Gas] Protocol, primarily in so far as related to international security and the protection of human rights, and to extend their application to cover armed conflicts which were not international in character.¹⁶⁴

164. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, New Zealand stated that “it was difficult to determine criteria for unnecessary suffering, except in the case of the indiscriminate use of weapons. One should not fall into the error of giving preference to weapons that killed cleanly rather than to weapons that wounded but did not kill.”¹⁶⁵

165. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, New Zealand stated, with reference to customary international law, that “it is prohibited to use weapons or tactics that cause unnecessary or aggravated devastation and suffering”.¹⁶⁶

166. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Norway stated that:

7. It was the task of the Conference to protect the civilian population and also to protect the combatants from suffering more than the strict minimum required to put them *hors de combat*. He suggested that the Committee should agree on the general prohibition of the use of incendiary weapons . . .
9. . . . It was also important to define inadmissible ways of using weapons, so as to avoid falling back on such criteria as “unnecessary suffering” which were far from specific.¹⁶⁷

¹⁶³ Netherlands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 16 June 1995, §§ 19–21.

¹⁶⁴ Netherlands, Statement before the Third Committee of the UN General Assembly, UN Doc. A/C.3/SR.1733, 11 December 1969, p. 1.

¹⁶⁵ New Zealand, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.2, 14 March 1974, p. 18, § 5.

¹⁶⁶ New Zealand, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, § 69.

¹⁶⁷ Norway, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.5, 20 March 1974, p. 42, §§ 8–9.

167. In a statement at the First CCW Review Conference in 1995, Peru declared that it “shared the international community’s concern at the increasing use of certain conventional weapons, including anti-personnel landmines, whose devastating effects on the civilian population had been well documented”. It added that “the Review Conference was duty bound to bring an end to the humanitarian crisis caused by such weapons”.¹⁶⁸

168. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Poland stated that:

He feared that the idea of “unnecessary suffering” might tend to restrict the future work of the Committee to weapons and methods of combat which caused physical and moral suffering, but there were weapons which could inflict extremely serious wounds which were not necessarily accompanied by unbearable suffering, such as certain chemical substances which caused death or disablement. An example was laser, which could blind anyone coming in their range of action. It was his delegation’s opinion that it was not from the point of view of those who inflicted unnecessary suffering that weapons whose use should be restricted or forbidden should be defined, but from the point of view of the victims.¹⁶⁹

169. Article 20 of draft AP II, prohibiting the use of weapons of a nature to cause superfluous injury or unnecessary suffering, was deleted at the last moment by the CDDH, without any plenary debate, as part of a general revision of AP II. During the amendment voting at this stage, Portugal stated that it voted in favour of the inclusion of Article 20 in draft AP II “because it regards the article as a fundamental humanitarian provision the adoption of which will not imperil the authority of States”.¹⁷⁰

170. In 1972, during a debate in the Sixth Committee of the UN General Assembly, Romania stated that “the prohibition of weapons that caused unnecessary suffering . . . was of primordial importance”.¹⁷¹

171. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Russia stated that:

As to the attempts to justify the illegitimacy of the use of nuclear weapons by references that they cause “unnecessary sufferings while injuring, uselessly aggravate the sufferings of disabled men, or render their death inevitable”, they are . . . hardly reasonable . . . The reasonable comments of the ICRC confirm two considerations . . . The principle of not causing “unnecessary suffering” is not in itself a general ban on the use of nuclear weapons as such . . .

...

¹⁶⁸ Peru, Statement at the First Review Conference of the States Parties to the CCW, Vienna, 25 September–13 October 1995, UN Doc. CCW/CONF.I/SR.5, 3 October 1995, §§ 67–69.

¹⁶⁹ Poland, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 13, § 27.

¹⁷⁰ Portugal, Statement at the CDDH, *Official Records*, Vol. VII, CDDH/SR.51, 3 June 1977, p. 123.

¹⁷¹ Romania, Statement before the Sixth Committee of the UN General Assembly, UN Doc. A/C.6/SR.1393, 12 December 1972, p. 501.

[AP I] reproduces, with slight changes (Art. 35), the above-mentioned provisions of the [1907 Hague Convention IV and the 1907 HR], but they, being treaty norms, are not applied to nuclear weapons . . .

The view that the said blanket formulas are not considered by the international community as a whole as a general ban on the use of specific types of weapons, including nuclear weapons as such, is supported by the fact that international law did not choose the option of a special ban of particular types of weapons and their use. That is how . . . the 1980 Convention on the Prohibition or Restrictions on the Use of Certain Conventional Weapons, which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, together with the Protocols thereto . . . appeared.¹⁷²

172. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Russia stated that:

References to the effect that nuclear weapons cause “unnecessary sufferings while injuring, uselessly aggravate the sufferings of disabled men, or render their death inevitable”, and, thus, to Article 23 (a) of the Regulation on the Laws and Customs of War on Land annexed to the 1907 Hague Convention with the aim to justify the illegality of their use can hardly be considered as appropriate . . . These reasonable comments of the ICRC experts [contained in the report entitled “Weapons that May Cause Unnecessary Suffering or Have Indiscriminate Effects”] confirm that the principle of not causing “unnecessary suffering” is not in itself a general ban on the use of nuclear weapons *per se*. This is also confirmed by the fact that international law did embark on the road of a special ban of particular types of weapons and their use. That is how appeared the . . . 1980 Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, together with the Protocols thereto.¹⁷³

173. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1993, Rwanda noted that “the use of nuclear weapons by a State during a war or an armed conflict constitutes a violation of the agreements relating to international humanitarian law in general and of the [1980 CCW] in particular”.¹⁷⁴

174. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1994, Samoa stated that:

The use of nuclear weapons by a state in war or other armed conflict would be a violation of international customary law and conventions, including the Hague Conventions and the Geneva Conventions. Such law and conventions prohibit the use of weapons . . . which cause unnecessary suffering.¹⁷⁵

¹⁷² Russia, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, pp. 12–14.

¹⁷³ Russia, Oral pleadings before the ICJ, *Nuclear Weapons case*, 10 November 1995, Verbatim Record CR 95/29, pp. 45–46.

¹⁷⁴ Rwanda, Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, 8 December 1993, p. 1, § 3.

¹⁷⁵ Samoa, Written statement submitted to the ICJ, *Nuclear Weapons case*, 16 September 1994, p. 3.

175. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Samoa stressed that it “believes that the prohibition of the use or threat of use of nuclear weapons has been achieved under general international law. It has occurred by the cumulative effect of a series of multilateral treaties and of a series of resolutions of the General Assembly” including the 1868 St. Petersburg Declaration, the 1907 Hague Convention (IV) and AP I.¹⁷⁶

176. Article 20 of draft AP II, prohibiting the use of weapons of a nature to cause superfluous injury or unnecessary suffering, was deleted at the last moment by the CDDH, without any plenary debate, as part of a general revision of AP II. During the amendment voting at this stage, Saudi Arabia stated that “Article 20 (Basic rules) was rejected in a vote . . . since the legitimate party to an internal conflict is the *de jure* State. Obviously it will never try to exterminate its nationals or to damage its environment.”¹⁷⁷

177. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1994, the Solomon Islands stated that “since [their qualitative] effects may affect people outside the scope of conflict, both in time and geographically, the use of nuclear weapons violates the prohibition on the use of weapons which cause unnecessary suffering”.¹⁷⁸

178. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Solomon Islands observed that:

According to the 1868 Declaration of St. Petersburg, the “legitimate objective” of war “would be exceeded by the employment of arms which uselessly aggravate the suffering of disabled men, or render their death inevitable.”

...

The obligation reflected in the preamble of the St. Petersburg Declaration remains in force and applicable today. It has been neither abolished nor superseded.

...

The prohibition on the use of weapons which render death inevitable reflects an even more fundamental principle of the law of armed conflict: the obligation to minimise harm to combatants. Accordingly in its use of force a State must not injure its enemy when it can capture him, nor cause serious injury when it can cause only slight injury, and not kill the enemy if he can be injured.¹⁷⁹

The Solomon Islands further stated that:

International law prohibits the use of weapons which:

...

- render death inevitable;
- cause unnecessary suffering.¹⁸⁰

¹⁷⁶ Samoa, Written statement submitted to the ICJ, *Nuclear Weapons case*, 15 June 1995, p. 3.

¹⁷⁸ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, 10 June 1994, p. 75, § 3.94.

¹⁷⁹ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, p. 49, §§ 3.51–3.53.

¹⁸⁰ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, p. 62, § 3.77.

179. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case*, Sri Lanka stated that “customary law principles which have evolved in the field of armed conflict prohibit the use of weapons and the methods of warfare of a nature to cause superfluous injury or unnecessary suffering”.¹⁸¹

180. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Sweden stated that:

While it was difficult to discuss the degrees of suffering and injury caused by different weapons, it was not much easier to measure “military advantage” of weapons. Perhaps the gist of the concept was the effectiveness with which a weapon achieved its legitimate task of placing combatants *hors de combat*. It was not, on the other hand, legitimate military advantage that a weapon caused more or more severe injuries than were needed to disable a combatant...

With regard to weapons which might be deemed to cause unnecessary suffering or superfluous injury, it was hard to see why only civilians should be spared such suffering or injury. The dum-dum bullet had been banned because it caused excessive injury to soldiers. The same ban should apply... to high-velocity small arms projectiles, fléchettes and incendiaries.¹⁸²

181. In 1977, during a debate in the First Committee of the UN General Assembly, Sweden stated that high-velocity ammunition caused unnecessary suffering and should be banned.¹⁸³

182. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Sweden stated that:

The use of weapons which cause unnecessary suffering must be considered to be prohibited. The codification of the prohibition of dum-dum bullets was undertaken in accordance with this view, for example. The effect of radioactive radiation as a result of the use of nuclear weapons cause unnecessary suffering, not merely for third parties who are directly affected, but also future generations, for example as a result of genetic damage.¹⁸⁴

183. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Switzerland stated that the principle prohibiting unnecessary suffering “belongs to customary law” and was “already in force”.¹⁸⁵

184. In 1970, during a debate in the Third Committee of the UN General Assembly on Resolution 2677 (XXIV), which emphasised the need to “secure the full observance of human rights applicable in all armed conflicts” and called

upon "all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907, the Geneva [Gas] Protocol of 1925 . . . and other humanitarian rules applicable in armed conflicts", Syria emphasised that the principles laid down in the resolution applied in all armed conflicts, even though the relevant humanitarian treaties only applied in international wars.¹⁸⁶

185. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Togo stated that:

His delegation could not accept the concept of "unnecessary suffering". It considered that suffering could not be divided into categories. The Committee's report should state solemnly that the infliction of suffering was immoral and incompatible with human dignity.¹⁸⁷

186. In 1977, during a debate in the First Committee of the UN General Assembly, Turkey stated that it supported prohibitions or restrictions on incendiary and other excessively injurious weapons, but held that a ban would only be effective if this view reflected a consensus in the world community.¹⁸⁸

187. At the CDDH, the USSR considered that Article 20 of draft AP II "met the demands of humanitarian law and could give rise to no objections".¹⁸⁹

188. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the USSR stated that "the question of prohibition or restriction of the use of certain types of conventional weapons liable to cause unnecessary suffering . . . was one of great importance".¹⁹⁰

189. In 1970, during a debate in the Third Committee of the UN General Assembly on Resolution 2677 (XXIV), which emphasised the need to "secure the full observance of human rights applicable in all armed conflicts" and called upon "all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907, the Geneva [Gas] Protocol of 1925 . . . and other humanitarian rules applicable in armed conflicts", the UK, as one of the sponsors of the resolution (the others were Australia, Belgium, Ceylon, Greece, Ireland, Japan, Luxembourg, Netherlands, New Zealand, Philippines, Singapore and Spain)¹⁹¹ defended the broader expression "all armed conflicts",

¹⁹¹ Australia, Belgium, Ceylon, Greece, Ireland, Japan, Luxembourg, Netherlands, New Zealand, Philippines, Singapore, Spain and UK, Revised draft resolution on respect for human rights in armed conflict submitted to the Third Committee of the UN General Assembly, UN Doc. A/C.3/L.1809/Rev.2, 26 November 1970.

instead of India's proposal "armed conflicts". The UK stated that "the fact was that in any armed conflict, whether international or not, certain minimal standards had to be respected, and for that reason the sponsors wished to retain the phrase 'all armed conflicts'"'.¹⁹²

190. A training video on IHL produced by the UK Ministry of Defence emphasises that the 1907 HR prohibits weapons that cause unnecessary suffering. It adds that weapons must not be altered with a view to causing unnecessary suffering.¹⁹³

191. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the UK stated that:

3.63 It has also been argued that the use of nuclear weapons would violate the prohibition on weapons which cause unnecessary suffering. The most recent statement of this principle is contained in Article 35(2) of Additional Protocol I, 1977, . . . The principle is, however, a long established one.

3.64 The principle prohibits only the use of weapons which cause *unnecessary* suffering or *superfluous* injury. It thus requires that a balance be struck between the military advantage which may be derived from the use of a particular weapon and the degree of suffering which the use of that weapon may cause. The more effective the weapon is from the military point of view, the less likely that the suffering which its use causes will be characterized as unnecessary. In particular, it has to be asked whether the same military advantage can be gained by using alternative means of warfare which will cause a lesser degree of suffering.¹⁹⁴ [emphasis in original]

192. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, the UK stated that:

The principle that a belligerent must not use methods or means of warfare which cause unnecessary suffering and superfluous injury does not prohibit the use of a weapon which causes extensive suffering unless that suffering is truly *unnecessary*. What is required, therefore, is a balancing of military necessity and humanity. . . . Consideration of military necessity is an integral part of the *unnecessary* suffering principle. It is not a case of necessity being invoked to justify the use of an unlawful weapon; the use of that weapon is not unlawful if the injury it causes is necessary to the achievement of a legitimate military goal.¹⁹⁵ [emphasis in original]

193. In 1974, in reply to a letter from a member of the US House of Representatives, the Acting General Counsel of the US Department of Defense stated that:

¹⁹² UK, Statement before the Third Committee of the UN General Assembly, UN Doc. A/C.3/SR.1799, 26 November 1970, §§ 6 and 9.

¹⁹³ UK, Ministry of Defence, Training Video: The Geneva Conventions, 1986, Report on UK Practice, 1997, Chapter 3.1.

¹⁹⁴ UK, Written statement submitted to the ICJ, *Nuclear Weapons case*, 16 June 1995, p. 50, §§ 3.63 and 3.64.

¹⁹⁵ UK, Oral pleadings before the ICJ, *Nuclear Weapons case*, 15 November 1995, Verbatim Record CR 95/34, p. 39.

The distinguishing feature in Article 23 of the [1907 HR] is that it applies to all weapons, and qualifies the use of all weapons in armed conflict making unlawful uses which cause suffering intentionally superfluous to a valid military purpose. The term “unnecessary suffering” conveys this interpretation. The terms “calculated to cause” convey the element of intent such that members of the Armed Forces cannot justify the use of weapons inconsistent with attaining a legitimate military objective. This criterion must be distinguished from prohibitions agreed to by states for outlawing weapons regardless of how they are used or intended to be used. As noted in the Field Manual . . . one must refer to the practices of states in order to determine the present meaning of these principles.¹⁹⁶

194. At the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects, held in Lucerne in 1974, the US stated that:

The prohibition against weapons that cause unnecessary suffering is a criterion to which we are currently bound under the Fourth Hague Convention of 1907, but interpretations of its scope and implications today vary significantly. It is the U.S. view that the “necessity” of the suffering must be judged in relation to the military utility of the weapons. The test is whether the suffering is needless, superfluous, or disproportionate to the military advantage reasonably expected from the use of the weapon.¹⁹⁷

195. In 1979, during the Preparatory Conference to the UN Conference that led to the adoption of the 1980 CCW, the US stated, in a discussion on incendiary weapons, that “some delegations had based themselves on the premise that incendiary weapons caused unnecessary suffering and were, by definition, inhumane, but if that premise was correct, they would already have been outlawed”.¹⁹⁸

196. In 1987, the Deputy Legal Adviser of the US Department of State affirmed that “we support the principle that the permissible means of injuring the enemy are not unlimited and that parties to a conflict not use weapons, projectiles, and materials and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”.¹⁹⁹

¹⁹⁶ US, Reply of 18 January 1974 of the Acting General Counsel of the Department of Defense to a letter of a member of the House of Representatives, reprinted in Arthur W. Rovine, *Digest of United States Practice in International Law, 1974*, Department of State Publication 8809, Washington, D.C., 1975, pp. 705–706.

Rovine, *Digest of United States Practice in International Law, 1974*, US Department of State Publication 8809, Washington, D.C., 1975, p. 707.

¹⁹⁸ US, Statement at the Preparatory Conference to the UN Conference on prohibitions or restrictions of certain conventional weapons which may be deemed to be excessively injurious or to have indiscriminate effects, 12 April 1979, UN Doc. A/CONF.95/PREP.CONF./II/SR.28, 18 April 1979, pp. 2–3.

¹⁹⁹ US, Remarks of Michael J. Matheson, Deputy Legal Adviser, US Department of State, The Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law: A Workshop on Customary International Law and the 1977 Protocols Additional to the 1949 Geneva Conventions, *American University Journal of International Law and Policy*, Vol. 2, 1987, p. 424.

197. In 1988, in a memorandum on laser weapons, the US Department of the Army affirmed that:

Article 23(e) [of the 1907 HR] prohibits the employment of “arms, projectiles, or material calculated to cause unnecessary suffering.” There is no internationally accepted definition of “unnecessary suffering.” In fact, an anomaly exists in that while it is legally permissible to kill an enemy soldier, in theory any wounding should not be calculated or intended to cause unnecessary suffering. In endeavoring to reconcile the two, in considering the customary practice of nations during this century, and in acknowledging the lethality of the battlefield for more than a century, certain factors emerge that are germane to this opinion:

- (a) No legal obligation exists or can exist to limit wounding mechanisms in a way that permits lawful killing while requiring that wounds merely temporarily disable, that is, that the effects of wounds do not extend beyond the period of hostilities; and
- (b) In considering whether a weapon may cause unnecessary suffering, it must be viewed in light of comparable wounding mechanisms extant on the modern battlefield rather than viewing the weapon in isolation.
- (c) The term “unnecessary suffering” implies that there is such a thing as “necessary suffering,” *i.e.*, that ordinary use of any military effective weapon will result in suffering on the part of those against whom it is employed.
- (d) The rule does prohibit deliberate design or alteration of a weapon solely for the purpose of increasing the suffering of those against whom it is used, including acts that will make their wounds more difficult to treat. This is the basis for rules against poisoned weapons and certain small caliber hollow point ammunition.²⁰⁰

198. Course material from the US Army War College, in discussing the balance between military necessity and unnecessary suffering, states that the “existence of a weapon generally indicates a legitimate military requirement” and maintains that no effective weapon has ever been outlawed. The example used to prove this statement is the 1907 Hague Convention (VIII), which bans anchored automatic contact mines which do not become harmless when they break loose from their mooring and torpedoes that do not become harmless after they have missed their target. In contrast to this, the course material points to the 1899 Hague Declaration concerning Asphyxiating Gases, which the UK and US did not ratify, and to the fact that poison gas was used during the First World War.²⁰¹

199. In 1990, in a memorandum of law on sniper use of open-tip ammunition, the US Department of the Army stated that:

²⁰⁰ US, Department of the Army, Office of the Judge Advocate General, Memorandum of law concerning the legality of the use of lasers as antipersonnel weapons, 29 September 1988, § 4, reprinted in Marian Nash, *Cumulative Digest of United States Practice in International Law, 1981–1988*, Department of State Publication 10120, Washington, D.C., 1993–1995, p. 3424.

²⁰¹ US, Marine Corps Reference Material for Marine Corps Law of Warfare Course, *Army War College Selected Readings, Advanced Course Law for the Joint Warfighter*, Vol. II, 2nd edition, 1989, p. 254, § b.

Although the United States has made the formal decision that for military, political, and humanitarian reasons it will not become a party to [AP I], U.S. officials have taken the position that the language of article 35(2) of Protocol I... is a codification of customary international law, and therefore binding upon all nations.²⁰²

200. In 1992, in a review of the legality of extended range anti-armour munition, the US Department of the Air Force stated that "international law prohibits the use, even against military objectives, of weapons which cause unnecessary suffering or superfluous injury".²⁰³

201. In 1993, in a legal review of the USSOCOM Special Operations Offensive Handgun, the Judge Advocate General of the US Department of the Army stated that:

Although President Ronald Reagan declined to submit [AP I] to the Senate for its advice and consent to ratification, the U.S. Government considers the language quoted from article 35(2) of Protocol I to be a codification of customary international law to the extent that it prohibits superfluous injury, as prohibited by Article 23e of the ... [1907 HR], and therefore binding upon all nations.²⁰⁴

202. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the US stated that it "has long taken the position that various principles of the international law of armed conflict would apply to the use of nuclear weapons as well as to other means and methods of warfare". It added that the prohibition on the use of weapons of a nature to cause superfluous injury or unnecessary suffering "was intended to preclude weapons designed to increase the injury or suffering of the persons attacked beyond that necessary to accomplish the military objective. It does not prohibit weapons that may cause great injury or suffering if the use of the weapon is necessary to accomplish the military mission."²⁰⁵

203. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, the US stressed that:

Returning to the claims that have been made regarding specific principles of the law of armed conflict, it has also been argued that nuclear weapons categorically cause unnecessary suffering or superfluous injury and therefore violate the law of armed conflict. This line of argument cannot be sustained. The unnecessary suffering principle prohibits the use of weapons designed specifically to increase the suffering of persons attacked beyond that necessary to accomplish a particular military objective. As a general matter, however, it does not prohibit the use of weapons that cause great injury and pain, as such. Under this principle, whether use of a

²⁰² US, Department of the Army, Office of the Judge Advocate General, Memorandum of Law on Sniper Use of Open-Tip Ammunition, 12 October 1990, § 3.

²⁰³ US, Department of the Air Force, Office of the Judge Advocate General, Legal Review: Extended Range Antiarmor Munition (ERAM), 16 April 1992, § 3.

²⁰⁵ US, Written statement before the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 21.

particular weapon causes unnecessary suffering depends, therefore, on whether its use and resultant effects are required to accomplish a legitimate military objective, a question which again cannot be answered in the abstract.²⁰⁶

204. In 1997, in a message to the US Senate analysing Article 3(3) of the 1996 Amended Protocol II to the CCW, the US President noted that “this rule is derived from Article 23 of [the 1907 HR]... It thus reiterates a proscription already in place as a matter of customary international law applicable to all weapons.”²⁰⁷

205. In a memorandum of law issued in 1997, the Judge Advocate General of the US Department of the Army stated, with reference to Article 23(e) 1907 HR, that “the law of war prohibits weapons calculated to cause unnecessary suffering”.²⁰⁸

206. In 1998, in a legal review of Oleoresin Capsicum (OC) pepper spray, the Deputy Assistant Judge Advocate General of the US Department of the Navy stated that:

The touchstone for legality of a weapon under traditional concepts in the law of war is whether that weapon’s intended use or method of employment is calculated to cause unnecessary suffering...

The Regulations to the Hague Convention on Land Warfare of 1907 codify the prohibition on the employment of arms, projectiles, or material “calculated to cause unnecessary suffering”. This customary prohibition requires a balancing of the military necessity in employing a weapon and the likely suffering occasioned by that employment. Any injury, collateral damage, or general suffering wrought by a weapon’s use should be justified by a military need. Historically, this analysis has involved comparisons to other existing technologies and comparable wounding mechanisms as well as a survey of the practice of other States regarding use of a particular weapon.

...

Oleoresin Capsicum is not calculated (i.e., designed), nor does it in fact cause unnecessary suffering. It is designed specifically to temporarily incapacitate violent or threatening subjects while reducing human suffering and is in consonance with the DoD [Non-Lethal Weapon] program. Its physiological effects, while relatively painful, are temporary and do not rise to the level of unnecessary suffering contemplated in the prohibition... Provided a military necessity justifies its employment, the principle of unnecessary suffering would not preclude employment of OC in appropriate circumstances.²⁰⁹

²⁰⁹ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, § 4.

207. According to the Report on US Practice, it is the *opinio juris* of the US that international law forbids weapons or methods of warfare calculated to cause unnecessary suffering or superfluous injury.²¹⁰

208. In the plenary session of the CDDH, the representative of the SFRY deplored the fact that the Ad Hoc Committee on Conventional Weapons established by the CDDH had not been able to “specify which were the weapons which caused superfluous injury”. He further stated that his delegation “was convinced that the question of prohibition and restriction of such weapons and methods or means of warfare came under humanitarian law and not under disarmament negotiations”.²¹¹

209. In 1991, in a document entitled “Examples of violations of the rules of international law committed by the so-called armed forces of Slovenia”, the Ministry of Defence of the SFRY (FRY) stated that:

The nature of the injuries of some of the members of the Yugoslav People’s Army show that forbidden means have been used in the armed conflict, before all ammunition suitable to inflict disproportionate and needless injuries, that reduce the chances of the injured to survive.

In that respect, the injuries of [a] soldier . . . are characteristic. He was hit in the tip of his right forearm and the round had crumbled and split the forearm bone, the tissue and thus blew the fist of the injured to bits. In the riddled channel and the surrounding tissue, pieces of a fragmented round were found. All that implies for the use of the so-called soft-nosed bullet.²¹²

210. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Zimbabwe stated that it fully shared the analysis by other States that “the threat or use of nuclear weapons violates the principles of humanitarian law prohibiting the use of weapons or methods of warfare that create unnecessary suffering”.²¹³

211. According to the Report on the Practice of Zimbabwe, Zimbabwe “does not employ any weapons meant to cause unnecessary suffering or superfluous injury, e.g. exploding bullets, incendiary weapons, booby-traps, etc.”.²¹⁴

III. Practice of International Organisations and Conferences

United Nations

212. In Resolution 2677 (XXV) adopted in 1970, the UN General Assembly advocated the need to “secure the full observance of human rights applicable

²¹⁰ Report on US Practice, 1997, Chapter 3.1.

in all armed conflicts". It called upon "all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907, the Geneva [Gas] Protocol of 1925 . . . and other humanitarian rules applicable in armed conflicts".²¹⁵

213. In two resolutions adopted in 1971 on respect for human rights in armed conflicts, the UN General Assembly called upon "all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907".²¹⁶

214. In a resolution adopted in 1973, the UN General Assembly requested that the CDDH promote an agreement concerning incendiary weapons. It called for urgent efforts by States "to seek, through possible legal means, the prohibition or restriction of the use of weapons that may cause unnecessary suffering". It welcomed ICRC proposals at the Conference aimed at "a reaffirmation of the fundamental general principles of international law prohibiting the use of weapons which are likely to cause unnecessary suffering". The General Assembly invited the Conference to "seek agreement on rules prohibiting or restricting" the use of "incendiary weapons, as well as other specific conventional weapons which may be deemed to cause unnecessary suffering".²¹⁷

215. In a resolution adopted in 1973, the UN General Assembly called for "full and effective application by all parties to armed conflicts of existing legal rules to such conflicts" and for acknowledgement of and compliance with the "obligations under the humanitarian instruments and [observance of] the international humanitarian rules that are applicable", e.g., the Hague Conventions of 1899 and 1907. The General Assembly invited the CDDH to consider a prohibition of "specific conventional weapons which may cause unnecessary suffering".²¹⁸ The US explained its abstention in the vote on this resolution because it felt that "an inappropriate form of participation in the conference of entities that are not States would raise the question as to whether the [CDDH] would continue to be a useful forum for negotiation of international conventions".²¹⁹

216. In a number of resolutions adopted between 1973 and 1977, the UN General Assembly called upon "all parties to armed conflicts to acknowledge and to comply with their obligations under the humanitarian instruments and to observe the international humanitarian rules which are applicable, in

²¹⁶ UN General Assembly, Res. 2852 (XXVI), 20 December 1971, § 1; Res. 2853 (XXVI), 20 December 1971, § 1.

²¹⁷ UN General Assembly, Res. 3076 (XXVIII), 6 December 1973, preamble and § 1. The resolution was adopted by 103 votes in favour, none against and 18 abstentions (Belarus, Belgium, Bulgaria, Central African Republic, Czechoslovakia, France, GDR, Greece, Hungary, Israel, Italy, Mongolia, Poland, Saudi Arabia, Ukraine, USSR, UK and US).

²¹⁸ UN General Assembly, Res. 3102 (XXVIII), 12 December 1973, preamble and § 4. The resolution was adopted by 107 votes in favour, none against and 6 abstentions (Costa Rica, Israel, Paraguay, Portugal, Spain and US).

²¹⁹ UN General Assembly, UN Doc. A/PV.2197, 12 December 1973, p. 8.

particular the Hague Conventions of 1899 and 1907".²²⁰ These resolutions dropped the word "any" or "all" before "armed conflict" without an explanation.

217. In numerous resolutions adopted between 1973 and 1982, the UN General Assembly stated that the suffering of civilians and combatants would be reduced if all States could agree on restricting or prohibiting weapons causing unnecessary suffering.²²¹

218. In a resolution adopted in 1974, the UN General Assembly invited the CDDH to consider the prohibition of weapons that cause unnecessary suffering and a prohibition or restriction of napalm and other incendiary weapons. It called urgently "for renewed efforts by Governments to seek, through legal means, the prohibition of weapons that cause unnecessary suffering".²²²

219. In a resolution adopted in 1976, the UN General Assembly invited the CDDH:

to accelerate its consideration of the use of specific conventional weapons, including any which may be deemed to be excessively injurious or to have indiscriminate effects, and to do its utmost to agree for humanitarian reasons on possible rules prohibiting or restricting the use of such weapons.²²³

220. In a resolution adopted in 1977, the UN General Assembly decided to convene a UN conference to seek agreement on the prohibition or restriction of conventional weapons. It stated that it was convinced that:

The suffering of civilian populations and combatants could be significantly reduced if general agreement can be attained on the prohibition or restriction for humanitarian reasons of the use of specific conventional weapons, including any which may be deemed to be excessively injurious or to have indiscriminate effects.²²⁴

The 21 States which abstained in the vote on this resolution did not oppose humanitarian principles *per se* or the convening of the conference, but had reservations on procedural arrangements, details of the organisation and the directions the resolution gave the conference, for example.²²⁵

²²⁰ UN General Assembly, Res. 3102 (XXVIII), 12 December 1973, § 4; Res. 3319 (XXIX), 14 December 1974, § 3; Res. 3500 (XXX), 15 December 1975, § 1; Res. 31/19, 24 November 1976, § 1; Res. 32/44, 8 December 1977, § 6.

²²² UN General Assembly, Res. 3255 (XXIX), 9 December 1974, preamble and §§ 1 and 3. The resolution was adopted by 108 votes in favour, none against and 13 abstentions (Belarus, Bulgaria, Czechoslovakia, France, GDR, Hungary, Israel, Mongolia, Poland, Ukraine, USSR, UK and US).

²²³ UN General Assembly, Res. 31/64, 10 December 1976, § 2.

²²⁴ UN General Assembly, Res. 32/152, 19 December 1977, preamble and § 2. The resolution was adopted by 115 votes in favour, none against and 21 abstentions (Belarus, Belgium, Bulgaria, Canada, Cuba, Czechoslovakia, France, GDR, FRG, Hungary, Israel, Italy, Japan, Luxembourg, Mongolia, Poland, Turkey, Ukraine, USSR, UK and US).

²²⁵ UN General Assembly, UN Doc. A/PV.106, 19 December 1977, pp. 1735–1736.

221. The Final Document of the Special Session on Disarmament (SSODI) was adopted without a vote in 1978 to lay the foundation for an international disarmament strategy. In it, the UN General Assembly stated that “further international action should be taken to prohibit or restrict for humanitarian reasons the use of specific conventional weapons, including those which may be excessively injurious, cause unnecessary suffering or have indiscriminate effects”.²²⁶ It further stated that:

The United Nations Conference on Prohibition or Restrictions of the Use of Certain Conventional Weapons which may be Deemed to be Excessively Injurious or to have Indiscriminate Effects should seek agreement, in the light of humanitarian and military considerations, on the prohibition or restriction of use of certain conventional weapons including those which may cause unnecessary suffering or have indiscriminate effects.²²⁷

222. In a resolution adopted in 1979, the UN General Assembly took note of the developments of the CCW Conference. It reaffirmed that the General Assembly’s objective was a general agreement to prohibit or restrict conventional weapons “which might be deemed to be excessively injurious or to have indiscriminate effects”.²²⁸

223. In a resolution adopted in 1980, the UN General Assembly commended the 1980 CCW agreed upon, “with a view to achieving the widest possible adherence to these instruments”. It reaffirmed that the General Assembly’s objective was a general agreement to prohibit or restrict conventional weapons “which might be deemed to be excessively injurious”.²²⁹

224. In a resolution adopted in 1981, the UN General Assembly urged all States to accede to the 1980 CCW and its Protocols. It also reaffirmed the General Assembly’s

conviction that the suffering of civilian populations and of combatants would be further significantly reduced if general agreement could be attained on the prohibition or restriction for humanitarian reasons of the use of specific conventional weapons, including any which may be deemed to be excessively injurious or to have indiscriminate effects.²³⁰

These statements were repeated in numerous other General Assembly resolutions.²³¹

²²⁶ UN General Assembly, Final Document of the Special Session of the General Assembly on Disarmament, 23 May–1 June 1978, UN Doc. A/S-10/2, 1978, § 23.

²³⁰ UN General Assembly, Res. 36/93, 9 December 1981, preamble.

²³¹ UN General Assembly, Res. 37/79, 9 December 1982, preamble and § 1; Res. 38/66, 15 December 1983, preamble and § 3; Res. 39/56, 12 December 1984, preamble and § 3; Res. 40/84, 12 December 1985, preamble and § 3; Res. 41/50, 3 December 1986, preamble and § 3; Res. 42/30, 30 November 1987, preamble and § 3; Res. 43/67, 7 December 1988, preamble and § 3; Res. 45/64, 4 December 1990, preamble and § 3; Res. 46/40, 6 December 1991, preamble and § 3; Res. 47/56, 9 December 1992, preamble and § 3; Res. 48/79, 16 December 1993, preamble

225. In a resolution adopted in 1997, the UN General Assembly explicitly mentioned that it based its recommendations on the “IHL principle that the right of parties to an armed conflict to choose means or weapons of warfare is not unlimited”.²³²

226. In 1969, in a report on respect for human rights in armed conflicts, the UN Secretary-General stated that the reference to “all armed conflicts” in Resolution 2444 (XXIII) was made to avoid “certain traditional distinctions as between international wars, internal conflicts, or conflicts which although internal in nature are characterized by a degree of direct or indirect involvement of foreign Powers or foreign nationals”. The Secretary-General discussed the effects of weapons of mass destruction, which were deemed to be both indiscriminate and of a nature to cause unnecessary suffering. He also identified precision-weapons that caused unnecessary suffering, e.g. expanding bullets.²³³

227. A survey prepared by the UN Secretariat in 1973 on existing rules of international law concerning the prohibition or restriction of the use of specific weapons listed the following examples of weapons that are deemed to cause unnecessary suffering according to military manuals: shotgun pellets, explosive and incendiary projectiles under 400 grams, projectiles treated with a substance designed to cause inflammation of wounds, dum-dum bullets, certain types of tracer ammunition, bayonets or lances with barbs, poison weapons, irregular shaped bullets, projectiles filled with glass.²³⁴

228. In 1995, in a report concerning the conflict in Guatemala, the Director of MINUGUA stated that “the Mission recommends that URNG issue precise instructions to its combatants to refrain from causing unnecessary harm to individuals and property, to take due care not to create additional risks to life in attacking military targets”.²³⁵

Other International Organisations

229. In a resolution adopted in 1994 on respect for international humanitarian law, the OAS General Assembly stated that it was “deeply disturbed by the testing, production, sale, transfer, and use of certain conventional weapons which may be deemed to be excessively injurious”. It urged all member States to accede to AP I and AP II and to the 1980 CCW.²³⁶

230. In a resolution adopted in 1998 on promotion of and respect for international humanitarian law, the OAS General Assembly stated that “international

and § 3; Res. 49/79, 15 December 1994, preamble and § 3; Res. 50/74, 12 December 1995, preamble and § 3; Res. 51/49, 10 December 1996, preamble and § 3; Res. 52/42, 9 December 1997, § 2; Res. 53/81, 4 December 1998, § 5; Res. 54/58, 1 December 1999, § III (3).

humanitarian law prohibits the use of weapons, projectiles, material, and methods of warfare that . . . cause excessive injury or unnecessary suffering".²³⁷

International Conferences

231. The 22nd International Conference of the Red Cross in 1973 adopted a resolution on the prohibition or restriction of the use of certain weapons in which it endorsed the view of the UN General Assembly in Resolution 2932 (XXVII) A that:

the widespread use of many weapons and the emergence of new methods of warfare that cause unnecessary suffering or are indiscriminate call urgently for renewed efforts by governments to seek, through legal means, the prohibition or restriction of the use of such weapons and of indiscriminate and cruel methods of warfare and, if possible, through measures of disarmament, the elimination of specific, especially cruel or indiscriminate, weapons.

The resolution urged the CDDH to "begin consideration at its 1974 session of the question of the prohibition or restriction of the use of conventional weapons which may cause unnecessary suffering or have indiscriminate effects" and invited the ICRC to convene in 1974 a conference of government experts to study the issue in depth.²³⁸

232. At the CCW Conference in 1979, the concept of unnecessary suffering was not discussed as such but the term was mentioned repeatedly.²³⁹

233. The 24th International Conference of the Red Cross in 1981 adopted a resolution on conventional weapons in which it noted with satisfaction the adoption of the 1980 CCW and its Protocols and invited States to become parties to them "as soon as possible, to apply them and examine the possibility of strengthening or developing them further".²⁴⁰

234. The 26th International Conference of the Red Cross and Red Crescent in 1995 adopted a resolution on protection of the civilian population in period of armed conflict in which it stressed that "proper attention should be given to other existing conventional weapons or future weapons which may cause unnecessary suffering or have indiscriminate effects".²⁴¹

235. The Plan of Action for the years 2000–2003 adopted in 1999 by the 27th International Conference of the Red Cross and Red Crescent stated that:

States which have not done so are encouraged to establish mechanisms and procedures to determine whether the use of weapons, whether held in their inventories or being procured or developed, would conform to the obligations binding

on them under international humanitarian law... States and the ICRC may engage in consultations to promote these mechanisms, and in this regard analyse the extent to which the ICRC *SIRUS (Superfluous Injury or Unnecessary Suffering) Project Report* to the 27th Conference and other available information may assist States.²⁴²

236. In the Final Declaration of the Second Review Conference of States Parties to the CCW in 2001, the High Contracting Parties solemnly declared:

their reaffirmation of the principles of international humanitarian law, as mentioned in the Convention, [including] the principle that prohibits the employment in armed conflicts of weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering.²⁴³

237. In the Final Declaration of the African Parliamentary Conference on International Humanitarian Law for the Protection of Civilians during Armed Conflict in 2002, the participants stated that they were “worried in the face of the rapid expansion of arms trade and the uncontrolled proliferation of weapons, notably those which can... cause unnecessary suffering”.²⁴⁴

IV. Practice of International Judicial and Quasi-judicial Bodies

238. In its advisory opinion in the *Nuclear Weapons case* in 1996, the ICJ stated that:

The cardinal principles contained in the texts constituting the fabric of humanitarian law are the following... According to the second principle, it is prohibited to cause unnecessary suffering to combatants: it is accordingly prohibited to use weapons causing them such harm or uselessly aggravating their suffering. In application of that second principle, States do not have unlimited freedom of choice of means in the weapons they use... In conformity with the aforementioned principles, humanitarian law, at a very early stage, prohibited certain types of weapons either because of their indiscriminate effect on combatants and civilians or because of the unnecessary suffering caused to combatants, that is to say, a harm greater than that unavoidable to achieve legitimate military objectives... Further these fundamental rules are to be observed by all States whether or not they have ratified the conventions that contain them, because they constitute intransgressible principles of international customary law.²⁴⁵

239. In her dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Higgins stated that “it is not permitted in the choice of weapons

²⁴² 27th International Conference of the Red Cross and Red Crescent, Geneva, 31 October–6 November 1999, Res. I, Annex 2, Plan of Action for the years 2000–2003, Actions proposed for final goal 1.5, § 21.

²⁴³ Second Review Conference of States Parties to the CCW, Geneva, 11–21 December 2001, Final Declaration, UN Doc. CCW/CONF.II/2, 2001, p. 10.

²⁴⁴ African Parliamentary Conference on International Humanitarian Law for the Protection of Civilians during Armed Conflict, Final Declaration, Niamey, 18–20 February 2002, preamble.

²⁴⁵ ICJ, *Nuclear Weapons case*, Advisory Opinion, 8 July 1996, §§ 78–79.

to cause unnecessary suffering to enemy combatants, nor to render their death inevitable". In her discussion on the balancing of necessity and humanity, she stated that "a military target may not be attacked if collateral civilian casualties would be excessive in relation to the military advantage".²⁴⁶

240. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Guillaume stated that "the harm caused to combatants must not be 'greater than that unavoidable to achieve legitimate military objectives'". He added that "therefore the nuclear weapon cannot be considered as unlawful due to the only fact of sufferings that it is likely to cause. It would be advisable to compare these sufferings to the 'military advantages' offered or to 'the military objectives' followed."²⁴⁷

241. In his declaration in the *Nuclear Weapons case* before the ICJ in 1996, President Bedjaoui stated that the effect of nuclear weapons was such that they caused unnecessary suffering.²⁴⁸

242. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Fleischhauer stated that "such immeasurable suffering" amounted to "the negation of the humanitarian considerations underlying the law of armed conflict".²⁴⁹

243. In his dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Weeramantry stated that "the facts . . . are more than sufficient to establish that the nuclear weapon causes unnecessary suffering going far beyond the purposes of war".²⁵⁰

244. In his dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Shahabudeen stated that the balance between military advantage and suffering "has to be struck by States". An important factor affecting this balance was public conscience which could consider that no conceivable military advantage could justify the suffering. It was "not possible to ascertain the humanitarian character of [international humanitarian] principles without taking account of the public conscience". Even though the use of chemical weapons was arguably "a more efficient way of deactivating the enemy in certain circumstances than other means in use during the First World War, [it] did not suffice to legitimize its use".²⁵¹

245. In his dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Koroma, after describing the effects of atomic weapons in Hiroshima, Nagasaki and the Marshall Islands, stated that the radioactive effects were "more harmful" than those caused by poison gas and added "the

²⁵¹ ICJ, *Nuclear Weapons case*, Dissenting Opinion of Judge Shahabudeen, 8 July 1996, pp. 180–181, Part III, § 2.

above findings by the court should have led it inexorably to conclude that any use of nuclear weapons is unlawful under international law".²⁵²

246. In its decision on the defence motion for interlocutory appeal on jurisdiction in the *Tadić* case in 1995, the ICTY Appeals Chamber supported the view that UN General Assembly Resolution 2444 (XXIII) dealt with both international and internal conflicts. It stated that "the application of certain rules of war in both internal and international armed conflicts is corroborated by resolutions 2444 and 2675".²⁵³

V. Practice of the International Red Cross and Red Crescent Movement

247. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that "it is prohibited to use weapons of a nature to cause: a) superfluous injury or unnecessary suffering".²⁵⁴

248. In a background paper submitted to the Conference of Government Experts in 1971, the ICRC stated that the term "unnecessary suffering" was defined as "a question of sparing even combatants from injuries to no purpose or from suffering which exceeds what is necessary to put the adversary *hors de combat*".²⁵⁵

249. The ICRC Commentary on the Additional Protocols states that:

1419. The specific applications of the prohibition formulated in Article 23, paragraph 1(e), of the Hague Regulations, or resulting from the Declarations of St. Petersburg and The Hague, are not very numerous. They include:

1. explosive bullets and projectiles filled with glass, but not explosives contained in artillery missiles, mines, rockets and hand grenades;
2. "dum-dum" bullets, i.e., bullets which easily expand or flatten in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions or bullets of irregular shape or with a hollowed out nose;
3. poison and poisoned weapons, as well as any substance intended to aggravate a wound;
4. asphyxiating or deleterious gases;
5. bayonets with a serrated edge, and lances with barbed heads;
6. hunting shotguns are the object of some controversy, depending on the nature of the ammunition and its effects on a soft target.

1420. The weapons which are prohibited under the provisions of the Hague Law are, *a fortiori*, prohibited under [Article 35(2) AP I].²⁵⁶

²⁵⁶ Yves Sandoz *et al.* (eds.), *Commentary on the Additional Protocols*, ICRC, Geneva, 1987, §§ 1419–1420.

250. In a press release issued in 1991 in the context of the Gulf War, the ICRC reminded the belligerents that “the right to choose methods or means of warfare is not unlimited. Weapons... likely to cause disproportionate suffering... are prohibited.”²⁵⁷

251. In 1992, the ICRC reminded a separatist entity that the use of chemical weapons caused superfluous injury and that it considered the prohibition of weapons causing superfluous injury to be customary and therefore applicable even in internal conflicts.²⁵⁸

252. In a declaration issued in 1994 in the context of the conflict between the Mexican government and the EZLN, the Mexican Red Cross stated that “under international law, the use of arms... which may cause undue loss of life or excessive suffering is prohibited”.²⁵⁹

253. In 1994, in a Memorandum on Respect for International Humanitarian Law in Angola, the ICRC stated that “it is prohibited to employ weapons, munitions or methods of warfare of a nature to cause unnecessary suffering to persons *hors de combat* or which render their death inevitable”.²⁶⁰

254. In 1994, in a Memorandum on Compliance with International Humanitarian Law by the Forces Participating in Opération Turquoise in the Great Lakes region, the ICRC stated that “the use of arms or methods of combat which needlessly increase the suffering of persons placed *hors de combat* or which make their death inevitable is prohibited”.²⁶¹

255. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC proposed that the employment of “weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”, when committed in international or non-international armed conflicts, be subject to the jurisdiction of the Court.²⁶²

256. The ICRC’s SIrUS Project initiated in 1998 aimed to contribute to the evaluation of the lawfulness of weapons by indicating the health effects actually caused by commonly used weapons in the armed conflicts that have taken place over the last few decades. This material provided for some objectivity in the evaluation, in particular, of the expected health effects of a weapon that had to be weighed against the foreseen military utility. The findings of the SIrUS

²⁶¹ ICRC, Memorandum on Compliance with International Humanitarian Law by the Forces Participating in Opération Turquoise, 23 June 1994, § II, reprinted in Marco Sassòli and Antoine A. Bouvier, *How Does Law Protect in War?*, ICRC, Geneva, 1999, pp. 1308–1309.

²⁶² ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, §§ 2(i) and 3(vii).

Project illustrated in particular the effects not normally seen on the battlefield, namely:

- disease other than that resulting from physical trauma from explosions or projectiles;
- abnormal physiological state or abnormal psychological state (other than the expected response to trauma from explosions or projectiles);
- permanent disability specific to the kind of weapon (with the exception of the effects of point-detonated anti-personnel mines – now widely prohibited);
- disfigurement specific to the kind of weapon;
- inevitable or virtually inevitable death in the field or a high hospital mortality level;
- grade 3 wounds among those who survive to hospital;
- effects for which there is no well-recognised and proven treatment which can be applied in a well-equipped field hospital.

The SIrUS Project suggested that:

States, when reviewing the legality of a weapon, take the above facts into account by:

- establishing whether the weapon in question would cause any of the above effects as a function of its design, and if so:
- weigh the military utility of the weapon against these effects; and
- determine whether the same purpose could reasonably be achieved by other lawful means that do not have such effects.

The project also proposed that “States make new efforts a) to build a common understanding of the norms to be applied in the review of new weapons and b) to promote transparency in the conduct and results of such reviews”.²⁶³

VI. Other Practice

257. In 1980, an armed opposition group expressed its acceptance of the fundamental principles of IHL as formulated by the ICRC, including the principle that “it is prohibited to employ weapons . . . of a nature to cause unnecessary losses or excessive suffering”.²⁶⁴

258. Rule A3 of the Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-International Armed Conflicts, adopted in 1990 by the Council of the IIHL, states that “the prohibition of superfluous injury or unnecessary suffering is a general rule applicable in non-international armed conflicts. It prohibits, in particular, the use of means of warfare which uselessly aggravate the sufferings of disabled men or render their death inevitable.”²⁶⁵

²⁶³ Robin M. Coupland and Peter Herby, “Review of the legality of weapons: a new approach. The SIrUS Project”, *IRRC*, No. 835, 1999, pp. 583–592.

²⁶⁴ ICRC archive document.

²⁶⁵ IIHL, Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, Rule A3, *IRRC*, No. 278, 1990, pp. 389–390.

259. In 1993, the permanent representative of Brazil to the UN and other international organisations in Geneva wrote an article in which he declared that “since the time when chemical weapons were first used, the Brazilian Government has consistently argued against the use of these and all other inhumane means of warfare”. He added that “the word ‘inhumane’ is employed here, in accordance with common usage, to mean weapons that cause unnecessary devastation and suffering”.²⁶⁶

260. In 1995, the IIHL stated that any declaration on minimum humanitarian standards should be based on “principles . . . of jus cogens, expressing basic humanitarian consideration[s] which are recognized to be universally binding”. According to the IIHL, this included the principle that “in hostilities, it is prohibited to cause superfluous injury or unnecessary suffering”.²⁶⁷

261. At its 50th General Assembly in 1998, the World Medical Association (WMA) adopted a resolution in which it stated that it warmly welcomed and supported the ICRC’s SIrUS Project and called upon National Medical Associations to endorse the Project.²⁶⁸

B. Weapons That Are by Nature Indiscriminate

Note: For practice concerning the use of means and methods of combat which cannot be directed at a specific military objective or the effects of which cannot be limited as required by international humanitarian law, see Chapter 3, section B.

I. Treaties and Other Instruments

Treaties

262. The preamble to the 1980 CCW recalls “the general principle of the protection of the civilian population against the effects of hostilities”.

263. Upon signature of the 1980 CCW, Romania affirmed “once again its decision to act, together with other States, to ensure the prohibition or restriction of all conventional weapons which . . . have indiscriminate effects”.²⁶⁹

264. The preamble to the 1997 Ottawa Convention provides that the States parties are “basing themselves . . . on the principle that a distinction must be made between civilians and combatants”.

265. Pursuant to Article 8(2)(b)(xx) of the 1998 ICC Statute, the following constitutes a war crime in international armed conflicts:

²⁶⁶ Celso L. N. Amorim, “The Chemical Weapons Convention and the Security and the Developments Needs of Brazil”, *Disarmament*, Vol. 16, 1993, No. 1, p. 111.

²⁶⁷ IIHL, Comments on the Declaration of Minimum Humanitarian Standards submitted to the UN Secretary-General, §§ 1 and 14, reprinted in Report of the Secretary-General prepared pursuant to UN Commission on Human Rights resolution 1995/29, UN Doc. E/CN.4/1996/80, 28 November 1995, pp. 8 and 10.

²⁶⁸ WMA, 50th General Assembly, Resolution on the SIrUS Project, Ottawa, October 1998.

²⁶⁹ Romania, Declaration made upon signature of the CCW, 8 April 1982, § 5.

employing weapons, projectiles and material and methods of warfare . . . which are inherently indiscriminate in violation of the international law of armed conflict, provided that such weapons, projectiles and material and methods of warfare are the subject of a comprehensive prohibition and are included in an annex to this Statute.

266. Upon signature of the 1998 ICC Statute, Egypt stated that its understanding of Article 8 of the Statute was as follows:

- (a) The provisions of the Statute with regard to the war crimes referred to in article 8 in general and article 8, paragraph 2(b) in particular shall apply irrespective of the means by which they were perpetrated or the type of weapon used, including nuclear weapons, which are indiscriminate in nature . . . in contravention of international humanitarian law.
...
- (d) Article 8, paragraph 2(b)(xvii) and (xviii) of the Statute shall be applicable to all types of emissions which are indiscriminate in their effects and the weapons used to deliver them, including emissions resulting from the use of nuclear weapons.²⁷⁰

Other Instruments

267. Article 14 of the 1956 New Delhi Draft Rules provides that:

Without prejudice to the present or future prohibition of certain specific weapons, the use is prohibited of weapons whose harmful effects – resulting in particular from the dissemination of incendiary, chemical, bacteriological, radioactive or other agents – could spread to an unforeseen degree or escape, either in space or in time, from the control of those who employ them, thus endangering the civilian population.

268. Paragraph 42(b) of the 1994 San Remo Manual states that:

In addition to any specific prohibitions binding upon the parties to a conflict, it is forbidden to employ methods or means of warfare which:

- ...
(b) are indiscriminate, in that:
 - (i) they are not, or cannot be, directed against a specific military objective;
or
 - (ii) their effects cannot be limited as required by international law as reflected in this document.

269. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(xx), “employing weapons, projectiles and material and methods of warfare . . . which are inherently indiscriminate in violation of the international law of armed conflict” constitutes a war crime in international armed conflicts.

²⁷⁰ Egypt, Declarations made upon signature of the 1998 ICC Statute, 26 December 2000, § 4(a) and (d).

II. National Practice

Military Manuals

270. Australia's Commanders' Guide states that "some weapons and weapons systems are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law, are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering."²⁷¹ It also states that "both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion".²⁷² It also states poison or poisoned weapons are prohibited "because of their potential to be indiscriminate in application".²⁷³ With respect to weapons deemed to be legal, the Guide notes that "all legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used indiscriminately."²⁷⁴ In addition, it underlines that "weapons which cannot be directed at military objectives or the effect of which cannot be limited are prohibited".²⁷⁵ The Guide also states that:

Indiscriminate use is placement of such weapons [i.e. mines, booby traps and other devices] which:

- a. is not on, or directed at, a military objective; or
- b. employs a method or means of delivery which cannot be directed at a specific military objective; or
- c. may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.²⁷⁶

271. Australia's Defence Force Manual states that "some weapons and weapons systems are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law, are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering."²⁷⁷ It also states that poison or poisoned weapons are prohibited "because of their potential to be indiscriminate".²⁷⁸ Likewise, according to the manual, "both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion".²⁷⁹ With respect to weapons deemed to be legal, the manual notes that "all legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used indiscriminately."²⁸⁰

²⁷¹ Australia, *Commanders' Guide* (1994), § 304.

²⁷² Australia, *Commanders' Guide* (1994), § 306.

²⁷³ Australia, *Commanders' Guide* (1994), § 307.

²⁷⁴ Australia, *Commanders' Guide* (1994), § 311.

²⁷⁵ Australia, *Commanders' Guide* (1994), § 931.

²⁷⁶ Australia, *Commanders' Guide* (1994), § 937.

²⁷⁷ Australia, *Defence Force Manual* (1994), § 304.

²⁷⁸ Australia, *Defence Force Manual* (1994), § 406.

²⁷⁹ Australia, *Defence Force Manual* (1994), § 414.

²⁸⁰ Australia, *Defence Force Manual* (1994), § 415.

272. According to Belgium's Teaching Manual for Officers, it is especially forbidden to use indiscriminate weapons.²⁸¹

273. Canada's LOAC Manual states that some weapons are "totally prohibited by the LOAC" because they are indiscriminate. It further states that:

Weapons that are indiscriminate in their effect are prohibited. A weapon is indiscriminate if it might strike or affect legitimate targets and civilians or civilian objects without distinction. Therefore, a weapon that cannot be directed at a specific legitimate target or the effects of which cannot be limited as required by the law of armed conflict is prohibited. For example, it may be argued that the Scud missile used in the Gulf War falls in that category.²⁸²

The manual adds that the use of poison or poisoned weapons is

illegal because of their potential to be indiscriminate. For example, the poisoning or contamination of any source of drinking water is prohibited. Posting a notice that the water has been contaminated or poisoned does not make this practice legal, as both civilians and combatants might drink from that water source and be equally affected.²⁸³

As regards lawful weapons, the manual states that "legal weapons are limited in the way in which they may be used. Specifically, no weapons may be used indiscriminately."²⁸⁴

274. Colombia's Basic Military Manual states that the use of weapons which "cause unnecessary and indiscriminate, extensive, lasting and serious damage to people and the environment" is prohibited.²⁸⁵

275. Ecuador's Naval Manual states that "the use of weapons which by their nature are incapable of being directed specifically against military objectives, and therefore that put noncombatants at equivalent risk, are forbidden due to their indiscriminate effect".²⁸⁶ The manual further specifies that:

Weapons that are incapable of being controlled in the sense that they can be directed at a military target are forbidden as being indiscriminate in their effect. Drifting armed contact mines and long-range unguided missiles (such as the German V-1 and V-2 rockets of World War II) fall into this category. A weapon is not indiscriminate simply because it may cause incidental or collateral civilian casualties, provided such casualties are not foreseeably excessive in light of the expected military advantage to be gained. An artillery round that is capable of being directed with a reasonable degree of accuracy at a military target is not an indiscriminate weapon simply because it may miss its mark or inflict collateral damage. Conversely, uncontrolled balloon-borne bombs, such as those released by the Japanese against the west coast of the United States and Canada in World War II, lack that capability of direction and are, therefore, unlawful.²⁸⁷

²⁸¹ Belgium, *Teaching Manual for Officers* (1994), p. 36, § 17.

²⁸² Canada, *LOAC Manual* (1999), p. 5-2, §§ 10 and 11.

²⁸³ Canada, *LOAC Manual* (1999), p. 5-2, § 20.

²⁸⁴ Canada, *LOAC Manual* (1999), p. 5-3, § 32.

²⁸⁵ Colombia, *Basic Military Manual* (1995), pp. 49-50, see also p. 30.

²⁸⁶ Ecuador, *Naval Manual* (1989), § 9.1. ²⁸⁷ Ecuador, *Naval Manual* (1989), § 9.1.2.

276. France's LOAC Teaching Note states that, "because of their indiscriminate effects", the use of poison, chemical weapons, biological and bacteriological weapons, dum-dum bullets or other projectiles with expanding heads, anti-personnel mines, weapons that injure by non-detectable fragments, blinding laser weapons, and torpedoes without self-destruction mechanisms "is totally prohibited by the law of armed conflicts".²⁸⁸

277. France's LOAC Manual states that weapons that have "indiscriminate effects" are prohibited.²⁸⁹ It adds that, "because of their indiscriminate effects", the use of poison, chemical weapons, biological and bacteriological weapons, dum-dum bullets or other projectiles with expanding heads, anti-personnel mines, weapons that injure by non-detectable fragments, blinding laser weapons, and torpedoes without self-destruction mechanisms "is totally prohibited by the law of armed conflicts".²⁹⁰

278. Germany's Soldiers' Manual provides that "it is prohibited to use means or methods of warfare which are intended or of a nature . . . to strike military targets and civilian persons or civilian objects indiscriminately".²⁹¹

279. Germany's IHL Manual states that "it is prohibited, in particular, to employ means or methods of warfare, which are intended to or of a nature . . . to strike military targets and civilian persons or civilian objects indiscriminately".²⁹²

280. Israel's Manual on the Laws of War states that:

Since St. Petersburg, there have been several universally accepted rules regarding weapons:

...

Another important goal to attain is control over the weapons to ensure that the harm they inflict is limited only to the battlefield and the combatants thereon, and does not spread out of control to innocent parties such as civilians. Weapons that do not distinguish between targets are prohibited.²⁹³

281. South Korea's Operational Law Manual provides that "weapons that are by nature indiscriminate shall be prohibited".²⁹⁴

282. New Zealand's Military Manual states that "weapons which cannot be directed at military objectives or the effects of which cannot be limited are prohibited".²⁹⁵

283. Nigeria's Military Manual states that "the basic principles are that every commander has the right to choose the means and methods of type of warfare" but has to "distinguish between military and civilian objects".²⁹⁶

284. Russia's Military Manual provides that:

²⁸⁸ France, *LOAC Teaching Note* (2000), p. 6. ²⁸⁹ France, *LOAC Manual* (2001), p. 53.

²⁹⁰ France, *LOAC Manual* (2001), p. 54. ²⁹¹ Germany, *Soldiers' Manual* (1991), p. 5.

²⁹² Germany, *IHL Manual* (1996), § 302.

²⁹³ Israel, *Manual on the Laws of War* (1998), pp. 11–12, see also p. 37.

²⁹⁴ South Korea, *Operational Law Manual* (1996), p. 129.

²⁹⁵ New Zealand, *Military Manual* (1992), § 509(4).

²⁹⁶ Nigeria, *Military Manual* (1994), p. 42, § 11.

Prohibited means of warfare are the various weapons of an indiscriminate character and/or those that cause unnecessary suffering:

- a) bullets that expand or flatten easily in the human body;
- b) projectiles used with the only purpose to spread asphyxiating or poisonous gases;
- c) projectiles weighing less than 400 grammes, which are either explosive or charged with fulminating or inflammable substances;
- d) poisons or poisoned weapons;
- e) asphyxiating, poisonous or other similar gases and bacteriological means;
- f) bacteriological (biological) and toxin weapons;
- g) environmental modification techniques having widespread, long-term or serious effects as means of destruction, damage or injury;
- h) all types of weapons of an indiscriminate character or that cause excessive injury or suffering.²⁹⁷

285. Sweden's IHL Manual states that, according to the criteria given in the 1868 St. Petersburg Declaration and in the 1907 Hague Convention (IV),

Weapons shall be considered particularly inhuman if they:

- cause unnecessary suffering or superfluous damage, or
- have indiscriminate effects, meaning that the weapon effects strike military objectives and civilian persons without any distinction.

These criteria have been used in all arms limitation negotiations in recent years.²⁹⁸

286. Switzerland's Basic Military Manual, with respect to nuclear weapons, refers to Article 51 AP I and states that "it is prohibited to use weapons the effects of which can harm civilian or military objectives without discrimination".²⁹⁹

287. The US Air Force Pamphlet states that:

The existing law of armed conflict does not prohibit the use of weapons whose destructive force cannot strictly be confined to the specific military objective. Weapons are not unlawful simply because their use may cause incidental casualties to civilians and destruction of civilian objects. Nevertheless, particular weapons or methods of warfare may be prohibited because of their indiscriminate effects . . . Indiscriminate weapons are those incapable of being controlled, through design or function, and thus they can not, with any degree of certainty, be directed at military objectives. For example, in World War II German V-1 rockets, with extremely primitive guidance systems yet generally directed toward civilian populations, and Japanese incendiary balloons without any guidance systems were regarded as unlawful. Both weapons were, as deployed, incapable of being aimed specifically at military objectives. Use of such essentially unguided weapons could be expected to cause unlawful excessive injury to civilians and damage to civilian objects . . . Some weapons, though capable of being directed only at military objectives, may have otherwise uncontrollable effects so as to cause disproportionate civilian injuries or damage. Biological warfare is a universally agreed illustration

²⁹⁷ Russia, *Military Manual* (1990), Article 6.

²⁹⁸ Sweden, *IHL Manual* (1991), Section 3.3.1, pp. 78–79.

²⁹⁹ Switzerland, *Basic Military Manual* (1987), Article 24.

of such an indiscriminate weapon. Uncontrollable effects, in this context, may include injury to the civilian population of other states as well as injury to an enemy's civilian population. Uncontrollable refers to effects which escape in time or space from the control of the user as to necessarily create risks to civilian persons or objects excessive in relation to the military advantage anticipated. International law does not require that a weapon's effects be strictly confined to the military objectives against which it is directed, but it does restrict weapons whose foreseeable effects result in unlawful disproportionate injury to civilians or damage to civilian objects.³⁰⁰

As regards new weapons, the Pamphlet states that:

A new weapon or method of warfare may be illegal, per se, if it is restricted by international law including treaty or international custom . . . [T]he legality of new weapons . . . is determined by whether the weapon's . . . effects are indiscriminate as to cause disproportionate civilian injury or damage to civilian objects.³⁰¹

288. The US Air Force Commander's Handbook states that:

Weapons that are incapable of being controlled enough to direct them against a military objective . . . are forbidden. A weapon is not unlawful simply because its use may cause incidental or collateral casualties to civilians, as long as those casualties are not foreseeably excessive in light of the expected military advantage. Using unpowered and uncontrolled balloons to carry bombs is thus forbidden, since these weapons would be incapable of being directed against a military objective.³⁰²

289. The US Naval Handbook states that "weapons which by their nature are incapable of being directed specifically against military objectives, and therefore that put noncombatants at equivalent risk, are forbidden due to their indiscriminate effect".³⁰³ The Handbook further specifies that:

Weapons that are incapable of being controlled (i.e., directed at a military target) are forbidden as being indiscriminate in their effect. Drifting armed contact mines and long-range unguided missiles (such as the German V-1 and V-2 rockets of World War II) fall into this category. A weapon is not indiscriminate simply because it may cause incidental or collateral civilian casualties, provided such casualties are not foreseeably excessive in light of the expected military advantage to be gained. An artillery round that is capable of being directed with a reasonable degree of accuracy at a military target is not an indiscriminate weapon simply because it may miss its mark or inflict collateral damage. Conversely, uncontrolled balloon-borne bombs, such as those released by the Japanese against the west coast of the United States and Canada in World War II, lack that capability of direction and are, therefore, unlawful.³⁰⁴

290. The YPA Military Manual of the SFRY (FRY) prohibits "blind weapons" the effects of which "cannot be controlled during their use".³⁰⁵

³⁰⁰ US, *Air Force Pamphlet* (1976), § 6-3(c). ³⁰¹ US, *Air Force Pamphlet* (1976), § 6-7(a).

National Legislation

291. Under Burundi's Draft Law on Genocide, Crimes against Humanity and War Crimes, the following constitutes a war crime in international armed conflicts:

employing weapons, projectiles, materials and methods of combat... which are inherently indiscriminate in violation of the international law of armed conflict, provided that such weapons, projectiles, material and methods of combat are the subject of a comprehensive prohibition.³⁰⁶

292. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.³⁰⁷

293. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.³⁰⁸

294. Under Georgia's Criminal Code, any war crime provided for by the 1998 ICC Statute, which is not explicitly mentioned in the Code, such as "employing weapons, projectiles and material... which are inherently indiscriminate" in international armed conflicts, is a crime.³⁰⁹

295. Under Mali's Penal Code, "employing weapons, projectiles, materials and methods of warfare... which are inherently indiscriminate in violation of the international law of armed conflicts, provided that such means are the subject of a comprehensive prohibition" is a war crime in international armed conflicts.³¹⁰

296. Under New Zealand's International Crimes and ICC Act, war crimes include the crimes defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.³¹¹

297. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.³¹²

298. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xx) of the 1998 ICC Statute.³¹³

National Case-law

299. No practice was found.

³¹³ UK, *ICC Act* (2001), Sections 50(1) and 51(1) (England and Wales) and Section 58(1) (Northern Ireland).

Other National Practice

300. In 1995, in a statement at the First Review Conference of States Parties to the CCW, the Australian delegation stated that:

Our presence at this conference reflects a shared belief that even the harsh reality of armed conflict should be tempered by humanitarian constraints. Participants in the diplomatic conferences on humanitarian law in the late 1970s concluded that the international community should develop a framework for specific regulations on the use of those conventional weapons which are indiscriminate or disproportionate in their effects. Those weapons have come to include landmines and booby traps, incendiary devices and weapons which injure by means of non-detectable fragments.³¹⁴

301. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Australia, admitting that “to date, international efforts have not culminated in an international convention banning the threat or use of nuclear weapons in all circumstances”, quoted UN General Assembly Resolution 1653 (XVI) according to which “the use of nuclear and thermo-nuclear weapons would . . . cause indiscriminate suffering” to conclude that “the use of nuclear weapons would be contrary to international law”.³¹⁵

302. In 1973, in its comments on the UN Secretary-General’s report on napalm and other incendiary weapons and all aspects of their possible use, Canada stated that:

Broadly, there should be concern with the use of all types of weapons in ways which could . . . be indiscriminate in effect; for this reason, the protocols additional to the Geneva Conventions of 1949 which are currently being prepared under the auspices of the International Committee of the Red Cross in close co-operation with the United Nations General Assembly, should reaffirm the existing principles and rules of conventional and customary international law of armed conflicts which apply generally to the choice and use of weapons by States in armed conflict and are contained, *inter alia*, in the Hague Declaration [concerning Asphyxiating Gases] of 1899, the Hague Conventions of 1907 and the Geneva [Gas] Protocol of 1925.³¹⁶

303. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Canada stated that “agreement was lacking on standards by which . . . ‘indiscriminate effects’ could be measured”.³¹⁷

304. At the CDDH, Canada stated that:

The definition of indiscriminate attack contained in paragraph 4 of Article 46 [now Article 51] is not intended to mean that there are means of combat the use of which

³¹⁴ Australia, Statement of 26 September 1995 at the First Review Conference of States Parties to the CCW, Vienna, 25 September–13 October 1995, reprinted in *Australian Year Book of International Law*, Vol. 16, 1995, p. 732.

³¹⁵ Australia, Oral pleadings before the ICJ, *Nuclear Weapons case*, 30 October 1995, Verbatim Record CR 95/22, pp. 43–44.

³¹⁶ Canada, Comments on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207/Add.1, 17 December 1973, p. 2.

³¹⁷ Canada, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 14, § 31.

would constitute an indiscriminate attack in all circumstances. It is our view that this definition takes account of the circumstances, as evidenced by the examples listed in paragraph 5 to determine the legitimacy of the use of means of combat.³¹⁸

305. At the Second Review Conference of States Parties to the CCW in 2001, China declared that “the impermissibility of using means of warfare that . . . had indiscriminate effects had become a universally accepted principle”.³¹⁹

306. In 1977, during a debate in the First Committee of the UN General Assembly, Cyprus referred to the Stockholm International Peace Research Institute (SIPRI), which had stated in its report on the law of war and dubious weapons that indiscriminate weapons were prohibited by international law.³²⁰

307. In 1988, during a debate at the Fifteenth Special Session of the UN General Assembly, Ecuador stated that “weapons, . . . which threaten equally belligerents and the helpless civilian population, must be the subject of a ban without reservations or limitations”.³²¹

308. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Ecuador stated that:

The use of nuclear weapons does not discriminate by general norm the military objectives from civil objectives. This factor equally attends against a fundamental principle of the International Humanitarian Law: which takes care of the protection of innocent people during war times.

...

. . . The uncontrollable effects that a nuclear device has can easily go against the laws and the uses of the war.³²²

309. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Egypt stated that “time-delay[ed] weapons . . . were . . . indiscriminate”.³²³ In a later statement in 1976, Egypt also advocated a “total prohibition” of weapons that had indiscriminate effects.³²⁴

310. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Egypt stated that the use of nuclear weapons “cannot at all be legal” because:

by their inherent qualitative and quantitative characteristics of their effect, nuclear weapons necessarily have cataclysmic and indiscriminate effects and

³²² Ecuador, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 2, §§ D and E.

³²³ Egypt, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.6, 22 March 1974, p. 49, § 14.

³²⁴ Egypt, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.26, 18 May 1976, p. 272, § 61.

cannot distinguish between combatants and non-combatants and between protected and unprotected objects, and are expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.³²⁵

311. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Egypt stated that:

The use of nuclear weapons is prohibited not because they are or they are called nuclear weapons. They fall under the prohibitions of the fundamental and mandatory rules of humanitarian law which long predate them, by their effects; not because they are nuclear, but because they are indiscriminate weapons of mass destruction.³²⁶

312. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, France stated that:

29. ... Each weapon, with its characteristics, its effects and its method of use, had to be considered separately, if specific conclusions have to be reached.
30. ... The more important concept of indiscriminate effects might perhaps be applicable to some weapons, but related more often to their method of use. For instance, the mine became indiscriminate only when used as a drifting mine. Indiscriminateness lay much more in the use made of a weapon and in the brain of the commanding officer than in the weapon itself.³²⁷

313. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, France stated that:

The fact that the [CDDH] took into consideration only conventional weapons also follows from the creation therein of an *ad hoc* commission on "conventional weapons". Moreover, by its resolution 22, it [the CDDH] recommended the convocation of a conference "with a view to reaching a) agreements on prohibitions or restrictions on the use of specific conventional weapons including those which may be deemed to... have indiscriminate effects, taking into account humanitarian and military considerations; and b) agreement on a mechanism for the review of any such agreements and for the consideration of proposals for further such agreement".

...

It furthermore appears that the States which participated in the conference considered that the rules figuring in the protocol cannot in themselves suffice to establish the illegality of the use of specific weapons, to whatever type they might belong.

...

³²⁵ Egypt, Written statement submitted to the ICJ, *Nuclear Weapons case*, June 1995, § 18; see also Written comments of Egypt on other written statements submitted to the ICJ, *Nuclear Weapons case*, September 1995, §§ 53–55.

³²⁶ Egypt, Oral pleadings before the ICJ, *Nuclear Weapons case*, 1 November 1995, Verbatim Record CR 95/23, p. 34.

³²⁷ France, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.15, 7 March 1975, p. 146, §§ 29–30.

Also, one cannot but ascertain the absence of a customary rule prohibiting the use of nuclear weapons.

...

It is true that a certain trend of opinion tries to prove the existence of a legal principle of the prohibition of nuclear weapons not by relying on positive norms specifically dealing with such weapons, but by constructing a reasoning on the basis of other rules of international law. Without directly mentioning the weapons in question, it is said that these rules could be applied to them [i.e. the weapons], by way of implication or by way of extension. For instance, the idea is sometimes put forward that certain rules in force of humanitarian law and the law of war would involve the prohibition of nuclear weapons. The supporters of that theory base themselves especially on diverse rules or principles enunciated in [AP I] – without questioning which [of these rules] are of customary nature and which are of conventional nature – and especially ... the prohibition of indiscriminate attacks in the terms of article 51 of the protocol ...

The government of France does not deem it necessary ... to discuss in detail such reasoning, which it formally rejects ... Indeed, if one cannot contest that protocol I of 1977 expresses, in some respects, general basic principles of existing law, it is obvious that ... with respect to others, it constitutes a development ...

Moreover, to follow the reasoning recalled above, once the basic customary principles applicable to nuclear weapons were drawn out and defined, one would have to establish that a rule prohibiting the use of these weapons follows from it.³²⁸

314. At the CDDH, the FRG stated that:

The definition of indiscriminate attacks contained in paragraph 4 of Article 46 [now Article 51 AP I] is not intended to mean that there are means of combat the use of which would constitute an indiscriminate attack in all circumstances. Rather, the definition is intended to take account of the fact that the legality of the use of means of combat depends upon circumstances, as shown by the examples listed in paragraph 5. Consequently the definition does not prohibit as indiscriminate any specific weapon.³²⁹

315. In 1977, during a debate in the First Committee of the UN General Assembly, the Holy See condemned the use of indiscriminate weapons.³³⁰

316. The Report on the Practice of India states that:

The Geneva Convention norms regarding use of indiscriminate weapons are applicable by virtue of the Geneva Conventions Act. Although it is not specifically made applicable to internal conflicts, yet it is possible to suggest on the basis of the practice of not using such weapons that in India such weapons are prohibited in times of internal conflict.³³¹

³³¹ Report on the Practice of India, 1997, Chapter 3.3.

317. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Iran stated that:

Some of the principles of humanitarian international law from which one can deduce the illegitimacy of the use of nuclear weapons are: . . . Prohibition of the use of instruments that cause indiscriminate effects, including means and methods that are used suddenly and equally against both civilian and military targets.³³²

318. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Iran stated that “the prohibition of weapons or tactics that cause indiscriminate harm between combatants and non combatants is another argument against the legality of the use of nuclear weapons”.³³³

319. According to the Report on the Practice of Iran, Iran’s “*opinio juris* is supportive of not using indiscriminate weapons (because in Iran’s view civilians must be protected against war effects)”.³³⁴

320. In 1991, during a debate in the First Committee of the UN General Assembly, Israel advocated that all weapons that can kill civilians indiscriminately be considered weapons of mass destruction. It gave Scud missiles as an example of this class of weapon.³³⁵

321. According to the Report on the Practice of Israel, Israel “does not make use of inaccurate weapon systems which are liable, by their very nature, to strike at locations far removed from their original targets” and considers Scud missiles and Katyusha rockets to be indiscriminate.³³⁶

322. At the CDDH, Italy stated that:

There was nothing in paragraph 4 [of Article 46, now Article 51 AP I] to show that certain methods or means of combat were prohibited in all circumstances by the Protocol except where an explicit prohibition was established by international rules in force for the State concerned with regard to certain weapons or methods.³³⁷

323. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Japan stated that “the radiation released by [nuclear] weapons cannot be confined to specific military targets”.³³⁸

324. The Report on the Practice of Jordan states that, while Jordan has no official specific interpretation of the concept of indiscriminate weapons, it does

not “use, manufacture or export landmines, V-2 bombs or missiles that cannot be accurately guided”.³³⁹

325. According to the Report on the Practice of South Korea, South Korea considers the prohibition of the use of indiscriminate weapons to be part of customary international law.³⁴⁰ It refers to a presidential declaration in 1991 which stated that South Korea would not obtain these weapons.³⁴¹

326. According to the Report on the Practice of Kuwait, Kuwait is of the opinion that indiscriminate weapons must be prohibited.³⁴²

327. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Lesotho stated that “any use of nuclear weapons, even in self-defense, would violate international humanitarian law, including the Hague and Geneva Conventions, which prohibit as practices of war, indiscriminate killing”.³⁴³

328. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Malaysia stated that “nuclear weapons are not just another weapon. Their nature and effect are such that they are inherently incapable of being limited with any degree of certainty to a specific military target.”³⁴⁴

329. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Marshall Islands stated that “any use of nuclear weapons violates the laws of war including the Geneva and Hague Conventions and the United Nations Charter. Such laws prohibit . . . the use of indiscriminate weapons.”³⁴⁵

330. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, the Marshall Islands stated that “nuclear weapons, by their nature, are indiscriminate in their effects – and very seriously so”.³⁴⁶

331. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1994, Mexico stated that “the principle of discrimination prohibits the use of weapons that fail to discriminate between civilian and military personnel”.³⁴⁷

332. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Nauru stated that “the nuclear weapons for which the status of legality

is claimed should be capable of distinguishing between military objectives and civilian objects".³⁴⁸

333. In 1969, during a debate in the Third Committee of the UN General Assembly, the Netherlands stated that it was:

essential to update and broaden the Hague Conventions and the 1925 Geneva [Gas] Protocol, primarily in so far as related to international security and the protection of human rights, and to extend their application to cover armed conflicts which were not international in character.³⁴⁹

334. In 1992, during a debate in the First Committee of the UN General Assembly, the Netherlands appealed to States to adhere to the 1980 CCW, arguing that "universal adherence would compel States not to use such weapons any more in a military conflict and it would at the same time make it more difficult for such weapons to be used in internal conflicts against civilians".³⁵⁰

335. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Netherlands stated that:

the general principles of international humanitarian law in armed conflict also apply to the use of nuclear weapons. Two principles, in particular, which form part of that law are the prohibition on making the civilian population as such the target of an attack and the prohibition on attacking military targets if this would cause disproportionate harm to the civilian population. The applicability of general principles of international humanitarian law in armed conflict – among which must also be counted the principle laid down in Article 22 of the 1907 Hague Regulations that the right of a belligerent to adopt means of injuring the enemy is not unlimited – to the use of nuclear weapons was also confirmed as long ago as 1965 in Resolution XXVIII of the 20th International Conference of the Red Cross (Vienna) which was passed unanimously. Consensus on this point was also reached at the diplomatic conference on Additional Protocol I to the 1949 Geneva Conventions.³⁵¹

336. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, New Zealand stated that "in general, international humanitarian law bears on the threat or use of nuclear weapons as it does of other weapons. . . . The general application of international humanitarian law to the use of nuclear weapons has also been specifically acknowledged by nuclear-weapon States."³⁵² Among the customary law rules applicable to the use of nuclear weapons, New Zealand further mentioned the fact that "it is prohibited to use indiscriminate

methods and means of warfare which do not distinguish between combatants and civilians and other non-combatants".³⁵³

337. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Nigeria stated that "the wars of liberation... were being fought with conventional weapons, with the weaker side, particularly the freedom fighters, as the exclusive targets of... indiscriminate weapons" and that "his country was therefore anxious for restrictions to be imposed on such weapons".³⁵⁴

338. The Report on the Practice of Pakistan states that Pakistan "disapproves" of weapons of an indiscriminate nature.³⁵⁵

339. The Report on the Practice of Peru, referring to a statement by the head of the Peruvian delegation at the international meeting on the reduction of mines in 1995, states that anti-personnel landmines are considered by Peru as weapons indiscriminate by nature. In addition, the Peruvian State supports the prohibition of anti-personnel mines that are not equipped with self-destruct mechanisms.³⁵⁶

340. In 1973, during a debate in the Sixth Committee of the UN General Assembly on the UN Secretary-General's report on respect for human rights in armed conflicts, Poland advocated that special emphasis be placed on the prohibition of the use of weapons indiscriminately affecting civilians and combatants.³⁵⁷

341. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Romania stated that "the use of weapons with indiscriminate effects, including weapons of mass destruction... [and] biological and chemical weapons, was prohibited by international law and by legal conscience of peoples".³⁵⁸

342. In 1991, in a statement at the International Conference on the Protection of Victims of War, the Russian Minister of Foreign Affairs declared with reference to the conflict in Chechnya that in order to protect the civilian population against indiscriminate weapons, bombers, missiles, rockets, artillery shells, incendiary weapons and booby-traps should be completely banned in internal conflicts.³⁵⁹

³⁵³ New Zealand, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, § 71.

³⁵⁷ Poland, Statement before the Sixth Committee of the UN General Assembly, UN Doc. A/C.6/SR.1450, 29 November 1973, pp. 287-288.

³⁵⁸ Romania, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.3, 15 March 1974, p. 28, § 16.

³⁵⁹ Russia, Statement by the Minister of Foreign Affairs, Andrey Kozyrev, at the International Conference on the Protection of Victims of War, Geneva, 30 August-1 September 1991.

343. In 1993, during a debate in the First Committee of the UN General Assembly, Russia stated that “in view of the sharp increase in the scale of internal ethnic conflicts and in the bloodshed resulting therefrom,” it had put forward “an initiative to establish restrictions under international law on the use of the most destructive and indiscriminate weapons systems in those conflicts”.³⁶⁰

344. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Russia stated that:

As Hans Blix said, “it is certainly correct to say the legality of the use of most weapons depends upon the manner in which they are employed. A rifle may be lawfully aimed at the enemy or it may be employed indiscriminately against civilians and soldiers alike. Bombs may be aimed at specific military targets or thrown at random. The indiscriminate use of a weapon will be prohibited, not the weapon as such.” We should add that it is a duly qualified use rather than the use of weapons as such at large that will be regarded as illegal.³⁶¹

345. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1993, Rwanda stated that “the use of nuclear weapons by a State during a war or an armed conflict constitutes a contravention of the rules of IHL in general and of the [1980 CCW] in particular”.³⁶²

346. According to the Report on the Practice of Rwanda, “landmines and bombs” are considered to be weapons with indiscriminate effects.³⁶³

347. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1994, the Solomon Islands stated that “since [their qualitative] effects may affect people outside the scope of conflict, both in time and geographically, the use of nuclear weapons violates the prohibition on the use of weapons which . . . cause harm to civilians and have indiscriminate effects”.³⁶⁴

348. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Solomon Islands referred to:

The customary rule which states that belligerents must always distinguish between combatants and non-combatants and limit their attack only to the former. This is an old and well-established rule which has achieved universal acceptance. The first multilateral instrument to state it was the St. Petersburg Declaration of 1868 . . . This obligation is repeated and further elaborated in different forms in many instruments.³⁶⁵

³⁶⁰ Russia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/48/SR.7, 21 October 1993, p. 8.

³⁶³ Report on the Practice of Rwanda, 1997, Chapter 3.3.

³⁶⁴ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, 10 June 1994, p. 75, § 3.94.

³⁶⁵ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, p. 46, § 3.47.

The Solomon Islands further referred to:

Those rules of the international law of armed conflict which prohibit:

- the use of weapons that render death inevitable;
- the use of weapons which have indiscriminate effects;
- any behaviour which might violate this law.³⁶⁶

349. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case*, Sri Lanka stated that:

The unacceptability of the use of weapons that fail to discriminate between military and civilian personnel is firmly established as a fundamental principle of international humanitarian law. These principles which prohibit indiscriminate killing and make the fundamental distinction between combatants and non-combatants have also found expression in the body of treaty law which have been incorporated in a series of international conventions, from about the time of the 1899 Hague Peace Conference and culminating with the Geneva Conventions of 1949 and [their] Additional Protocols of 1977.³⁶⁷

350. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Sweden stated that:

20. A general prohibition of the use of "indiscriminate weapons" could be deduced from the general duty of belligerents to distinguish between combatants and civilians, and between military and civilian objectives. . . Since, however, article 46, paragraph 3, [of draft AP I] prohibited "the employment of means of combat, and any methods which strike or affect indiscriminately the civilian population and combatants or civilian objects, and military objectives", a special rule on weapons was perhaps redundant. What were not redundant were rules on specific categories of weapons which governments might agree to ban or restrict the use of on grounds of their indiscriminate effects.
21. All weapons could be used indiscriminately but some were incapable of being directed at military objectives alone. One example was bacteriological weapons: germs could not distinguish between soldiers and civilians. . . Some of the incendiary weapons had turned out to be quite indiscriminate.³⁶⁸

351. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Switzerland stated that:

24. He entirely agreed with the Swedish representative. Two basic principles provided the starting point for the Committee's discussions: the prohibition of arms which caused unnecessary sufferings, and the distinction between the

³⁶⁶ Solomon Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 19 June 1995, p. 55, § 3.63.

³⁶⁷ Sri Lanka, Written statement submitted to the ICJ, *Nuclear Weapons (WHO) case*, undated, p. 2.

³⁶⁸ Sweden, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 12, §§ 20–21.

civilian population and armed forces. Those principles belonged to customary law. They were already in force, and were to be found in the Declaration of St. Petersburg and the Hague Conventions. The ICRC had taken over those principles in articles 33 and 43(3) of draft Protocol I. The proposals put forward by a number of delegations... were merely executing rules: they were not aimed at creating new law, but at clarifying and illustrating the rules already in force.

25. ... The problems of banning or restricting the use of certain categories of weapons [introduced by draft Article 33 of AP I submitted to the CDDH by the ICRC]... was a question of a codification of existing law rather than the creation of new legal norms...
26. ... The weapons in question – incendiary or fragmentation weapons, high-velocity projectiles, fléchettes, etc. – were small weapons and could have no decisive impact on the outcome of a conflict; but there was a grave disparity between the suffering they caused and the military advantage they might confer. Even if they were used in defiance of a ban, the advantage of surprise thus gained would be ephemeral.³⁶⁹

352. In its report on “gross violations of human rights” committed between 1960 and 1993, the South African Truth and Reconciliation Commission noted that the killing of more than 600 people in an attack on the SWAPO base/refugee camp at Kassinga in Angola in 1978 constituted a violation of IHL, stating that:

International humanitarian law stipulates that the right of parties in a conflict to adopt means of injuring the enemy is not unlimited and that a distinction must at all times be made between persons taking part in hostilities and civilians, with the latter being spared as much as possible.³⁷⁰

353. In 1977, during a debate in the First Committee of the UN General Assembly, Turkey stated that it supported a prohibition or restrictions on incendiary weapons and other indiscriminate weapons, but held that such rules would only be effective if they reflected a consensus in the world community.³⁷¹

354. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the USSR stated that “the question of prohibition or restriction of the use of certain types of conventional weapons... of an indiscriminate nature was one of great importance”.³⁷²

355. At the CDDH, the UK stated that:

The definition of indiscriminate attacks given in [Article 51(4) AP I] was not intended to mean that there were means of combat the use of which would constitute an indiscriminate attack in all circumstances. The paragraph did not in itself

³⁶⁹ Switzerland, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, pp. 12–13, §§ 24–26.

³⁷² USSR, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.19, 21 March 1975, pp. 186–187, § 13.

prohibit the use of any specific weapon, but it took account of the fact that the lawful use of means of combat depended on the circumstances.³⁷³

356. In 1991, in a briefing note on the Gulf crisis, the UK Foreign and Commonwealth Office criticised Iraq's policy of launching Scud missiles against Israel and Saudi Arabia, "since these missiles are not precision weapons and are clearly intended to hit civilian targets".³⁷⁴

357. In 1995, in a letter to the UK House of Lords, the government spokesman deplored the use of weapons by the Israeli artillery in southern Lebanon that "may be deemed . . . to have indiscriminate effects".³⁷⁵

358. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the UK stated that:

3.67 A further argument which has been raised is that the use of any nuclear weapon would necessarily have such terrible effects upon civilians that it would violate those rules of the law of armed conflict which exist for their protection. There are two principles of particular relevance in this respect. First, it is a well established principle of customary international law that the civilian population and individual civilians are not a legitimate target in their own right. The parties to an armed conflict are required to discriminate between civilians and civilian objects on the one hand and combatants and military objectives on the other hand and to direct their attacks only against the latter . . .

3.68 . . . Modern nuclear weapons are capable of far more precise targeting and can therefore be directed against specific military objectives without the indiscriminate effect on the civilian population which the older literature assumed to be inevitable.³⁷⁶

359. In 1972, the General Counsel of the US Department of Defense stated that:

Existing laws of armed conflict do not prohibit the use of weapons whose destructive force cannot be limited to a specific military objective. The use of such weapons is not proscribed when their use is necessarily required against a military target of sufficient importance to outweigh inevitable, but regrettable, incidental casualties to civilians and destruction of civilian objects . . . I would like to reiterate that it is recognized by all states that they may not lawfully use their weapons against civilian population[s] or civilians as such, but there is no rule of international law that restrains them from using weapons against enemy armed forces or military targets. The correct rule of international law which has applied in the past and continued to apply to the conduct of our military operations in Southeast Asia is that "the loss of life and damage to property must not be out of proportion to the military advantage to be gained".³⁷⁷

³⁷³ UK, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.41, 26 May 1977, p. 164, § 119.

³⁷⁵ UK, House of Lords, Letter from the government spokesman, 6 February 1995, *BYIL*, Vol. 66, 1995, p. 713.

³⁷⁶ UK, Written statement submitted to the ICJ, *Nuclear Weapons case*, 16 June 1995, p. 52, §§ 3.67–3.68.

³⁷⁷ US, Letter from J. Fred Buzhardt, General Counsel of the Department of Defense, to Senator Edward Kennedy, Chairman of the Subcommittee on Refugees of the Committee on the Judiciary, 22 September 1972, *AJIL*, Vol. 67, 1973, p. 124.

360. In 1987, during the debate on Security Council Resolution 598 concerning the use of chemical weapons in the Iran–Iraq war, the US stated that chemical weapons “honored no distinction between combatants and non-combatants”.³⁷⁸

361. In 1992, in its final report to Congress on the conduct of the Gulf War, the US Department of Defense accused Iraq of “indiscriminate Scud missile attacks”.³⁷⁹

362. In 1992, in a review of the legality of extended range anti-armour munition, the US Department of the Air Force stated that:

International law also forbids the use of weapons or means of warfare which are “indiscriminate.” A weapon is indiscriminate if it cannot be directed at a military objective or if, under the circumstances, it produces excessive civilian casualties in relation to the concrete and direct military advantage anticipated. The ERAM [extended range antiarmor munition] is clearly capable of being directed at a military objective, i.e., enemy armor formations.³⁸⁰

363. In 1993, in its report to Congress on the protection of natural and cultural resources during times of war, the US Department of Defense stated that:

Finally, with the poor track record of compliance with the law of war by some nations, the United States has a responsibility to protect against threats that may inflict serious collateral damage to our own interests and allies. These threats can arise from any nation that does not have the capability or desire to respect the law of war. One example is Iraq’s indiscriminate use of SCUDs during the Iran–Iraq War and the Gulf War. These highly inaccurate theater ballistic missiles can cause extensive collateral damage well out of proportion to military results.³⁸¹

364. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the US stated that:

It has been argued that nuclear weapons are unlawful because they cannot be directed at a military objective. This argument ignores the ability of modern delivery systems to target specific military objectives with nuclear weapons, and the ability of modern weapon designers to tailor the effects of a nuclear weapon to deal with various types of military objectives. Since nuclear weapons can be directed at a military objective, they can be used in a discriminate manner and are not inherently indiscriminate.³⁸²

³⁷⁹ US, Department of Defense, Final Report to Congress on the Conduct of the Persian Gulf War, 10 April 1992, Appendix O, The Role of the Law of War, *ILM*, Vol. 31, 1992, p. 635.

³⁸⁰ US, Department of the Air Force, Judge Advocate General, Legal Review: Extended Range Antiarmor Munition (ERAM), 16 April 1992, § 4.

³⁸¹ US, Department of Defense, Report to Congress on International Policies and Procedures Regarding the Protection of Natural and Cultural Resources During Times of War, 19 January 1993, p. 203.

³⁸² US, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 23; see also Oral pleadings before the ICJ, *Nuclear Weapons case*, 15 November 1995, Verbatim Record CR 95/34, p. 70.

365. In 1998, in a legal review of Oleoresin Capsicum (OC) pepper spray, the Deputy Assistant Judge Advocate General of the US Department of the Navy stated that:

A weapon must be discriminating, or capable of being controlled (i.e., it can be directed against intended targets). Those weapons which cannot be employed in a manner which distinguishes between lawful combatants and noncombatants violate these principles. Indiscriminate weapons are prohibited by customary international law and treaty law.

The OC system contemplated for acquisition and employment by the Marine Corps is specifically designed to limit its effects only to intended targets. The contemplated OC dispersers utilize a target specific stream of ballistic droplets for controlled delivery and minimal cross contamination (i.e., point target delivery), rather than an aerosolized spray which increases the likelihood of unintended subject impact. Provided the weapon is employed in a discriminating manner, the principle of distinction/discrimination presents no prohibition to acquisition and employment of OC in appropriate circumstances.³⁸³

366. According to the Report on US Practice, "it is the *opinio juris* of the United States that customary international law prohibits the use of indiscriminate weapons. Indiscriminate weapons are those that cannot be directed at a military objective."³⁸⁴

367. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Vietnam stated that "no purpose would be served by suggesting the prohibition or the restriction of specific categories of weapons, since such suggestions amounted only to the classical criteria of the Declaration of St. Petersburg and the Hague Conventions".³⁸⁵

368. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Zimbabwe stated that:

Nuclear weapons create a vastly greater threat than any other weapon because of their indiscriminate nature. The radiation from nuclear weapons knows no boundaries . . . The threat or use of nuclear weapons violates the principles of humanitarian law prohibiting the use of weapons or methods of warfare that . . . are indiscriminate . . . Zimbabwe would like to emphasize that radiation from nuclear weapons cannot be contained either in space or in time.³⁸⁶

III. Practice of International Organisations and Conferences

United Nations

369. In a resolution adopted in 1961, the UN General Assembly stated that "the use of nuclear and thermo-nuclear weapons would exceed even the scope of war

³⁸³ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, § 5.

³⁸⁴ Report on US Practice, 1997, Chapter 3.3.

³⁸⁶ Zimbabwe, Oral pleadings before the ICJ, *Nuclear Weapons case*, 15 November 1995, Verbatim Record CR 95/35, pp. 25–28.

and cause indiscriminate suffering and destruction to mankind and civilization and, as such, is contrary to the rules of international law and to the laws of humanity".³⁸⁷

370. In a resolution adopted after the Conference of Government Experts in 1972, the UN General Assembly expressed its concern that no agreement was reached concerning weapons which indiscriminately affected civilians and combatants.³⁸⁸

371. In numerous resolutions adopted between 1973 and 1982, the UN General Assembly emphasised the need to eliminate indiscriminate weapons by treaty in order to alleviate the suffering of civilians and combatants.³⁸⁹

372. In two resolutions adopted in 1973 and 1974, the UN General Assembly stressed the need for States to effect "if possible through measures of disarmament, the elimination of specific, especially cruel or indiscriminate weapons".³⁹⁰

373. In a resolution adopted in 1973, the UN General Assembly welcomed the proposal from the ICRC to aim "at a reaffirmation of the fundamental general principles of international law prohibiting the use of weapons which may... have indiscriminate effects".³⁹¹

374. In a resolution adopted in 1976, the UN General Assembly invited the CDDH

to accelerate its consideration of the use of specific conventional weapons, including any which may be deemed to be excessively injurious or to have indiscriminate effects, and to do its utmost to agree for humanitarian reasons on possible rules prohibiting or restricting the use of such weapons.³⁹²

375. In a resolution adopted in 1979, the UN General Assembly reaffirmed that an agreement prohibiting or restricting conventional weapons "which might be deemed to be excessively injurious or to have indiscriminate effects" would mitigate the suffering of civilians and combatants in armed conflicts.³⁹³

³⁸⁷ UN General Assembly, Res. 1653 (XVI), 24 November 1961, § 1(b). (The resolution was adopted by 55 votes in favour, 20 against and 26 abstentions. Three of the abstaining States, Ecuador, Iran and Sweden, nevertheless indicated in their written statements submitted to the ICJ in the *Nuclear Weapons case* in 1995 that they did consider such weapons to be indiscriminate (see *supra*).

³⁸⁸ UN General Assembly, Res. 3032 (XXVII), 18 December 1972, preamble.

³⁸⁹ UN General Assembly, Res. 3076 (XXVIII), 6 December 1973, preamble; Res. 3255 A (XXIX), 9 December 1974, preamble; Res. 31/64, 10 December 1976, preamble; Res. 32/152, 19 December 1977, preamble; Res. 33/70, 14 December 1978, preamble; Res. 34/82, 11 December 1979, preamble; Res. 35/153, 12 December 1980, preamble; Res. 36/93, 9 December 1981, preamble; Res. 37/79, 9 December 1982, preamble.

³⁹⁰ UN General Assembly, Res. 3076 (XXVIII), 6 December 1973, preamble (adopted by 103 votes in favour, none against and 18 abstentions. GDR, Netherlands, UK, US and USSR explained their abstentions as being based on their opposition to the CDDH being considered the appropriate forum to discuss incendiary weapons); Res. 3255 (XXIX), 9 December 1974, preamble.

³⁹¹ UN General Assembly, Res. 3076 (XXVIII), 6 December 1973, preamble.

³⁹² UN General Assembly, Res. 31/64, 10 December 1976, § 2.

³⁹³ UN General Assembly, Res. 34/82, 11 December 1979, adopted without a vote.

376. In numerous resolutions adopted between 1980 and 1999, the UN General Assembly called for the accession of all States to the 1980 CCW.³⁹⁴

377. In a resolution adopted in 1980, the UN General Assembly commended the 1980 CCW agreed upon “with a view to achieving the widest possible adherence to these instruments”. It reaffirmed that it believed that an agreement prohibiting or restricting conventional weapons “which might be deemed to be excessively injurious or to have indiscriminate effects” would mitigate the suffering of civilians and combatants in armed conflicts.³⁹⁵ A further resolution adopted in 1981 reiterated this view and urged all States that had not done so to accede to the 1980 CCW and its Protocols.³⁹⁶ Numerous resolutions have repeated this appeal.³⁹⁷

378. In a resolution adopted in 1989, the UN Sub-Commission on Human Rights stated that chemical weapons were indiscriminate.³⁹⁸

379. In a resolution adopted in 1996, the UN Sub-Commission on Human Rights urged all States “to be guided in their national policies by the need to curb the production and the spread of weapons of mass destruction or with indiscriminate effects”. It then listed the following as falling within this category: nuclear, chemical and biological weapons, fuel-air and cluster bombs, and napalm and weaponry containing depleted uranium. It also stated that the use of these weapons was incompatible with human rights law and IHL.³⁹⁹

380. A survey carried out by the UN Secretariat in 1973 analysed practice and doctrine in relation to different humanitarian rules and enumerated the weapons that had been discussed from the point of view of their indiscriminate effects. These were: chemical and bacteriological weapons, incendiary weapons, nuclear weapons, conventional aerial bombardment, fragmentation

³⁹⁴ UN General Assembly, Res. 35/153, 12 December 1980, preamble; Res. 36/93, 9 December 1981, § 1; Res. 37/79, 9 December 1982, § 1; Res. 38/66, 15 December 1983, § 3; Res. 39/56, 12 December 1984, § 3; Res. 40/84, 12 December 1985, § 3; Res. 41/50, 3 December 1986, § 3; Res. 42/30, 30 November 1987, § 3; Res. 43/67, 8 December 1989, § 3; Res. 45/64, 4 December 1990, § 3; Res. 46/40, 6 December 1991, § 3; Res. 47/56, 9 December 1992, § 3; Res. 48/79, 16 December 1993, § 3; Res. 49/79, 15 December 1994, § 3; Res. 50/74, 12 December 1995, § 3; Res. 51/49, 10 December 1996, § 3; Res. 52/42, 9 December 1997, § 2; Res. 53/81, 4 December 1998, § 5; Res. 54/58, 1 December 1999, § III (3).

³⁹⁵ UN General Assembly, Res. 35/153, 12 December 1980, § 4, adopted without a vote.

³⁹⁶ UN General Assembly, Res. 36/93, 9 December 1981, § 1, adopted without a vote.

³⁹⁷ UN General Assembly, Res. 37/79, 9 December 1982, preamble and § 1; Res. 38/66, 15 December 1983, preamble and § 3; Res. 39/56, 12 December 1984, preamble and § 3; Res. 40/84, 12 December 1985, preamble and § 3; Res. 41/50, 3 December 1986, preamble and § 3; Res. 42/30, 30 November 1987, preamble and § 3; Res. 43/67, 7 December 1988, preamble and § 3; Res. 45/64, 4 December 1990, preamble and § 3; Res. 46/40, 6 December 1991, preamble and § 3; Res. 47/56, 9 December 1992, preamble and § 3; Res. 48/79, 16 December 1993, preamble and § 3; Res. 49/79, 15 December 1994, preamble and § 3; Res. 50/74, 12 December 1995, preamble and § 3; Res. 51/49, 10 December 1996, preamble and § 3; Res. 52/42, 9 December 1997, § 2; Res. 53/81, 4 December 1998, § 5; Res. 54/58, 1 December 1999, § III (3).

³⁹⁹ UN Sub-Commission on Human Rights, Res. 1996/16, 29 August 1996, preamble and § 1.

bombs, landmines and booby-traps, missiles, delayed action weapons and naval weapons.⁴⁰⁰

Other International Organisations

381. In a resolution adopted in 1994 on respect for international humanitarian law, the OAS General Assembly stated that it was “deeply disturbed by the testing, production, sale, transfer, and use of certain conventional weapons which may be deemed . . . to have indiscriminate effects”. It urged all member States to accede to API and AP II and to the 1980 CCW.⁴⁰¹ This call was repeated in 1995.⁴⁰²

382. In a resolution adopted in 1998 on respect for international humanitarian law, the OAS General Assembly stated that “international humanitarian law prohibits the use of weapons, projectiles, material, and methods of warfare that have indiscriminate effects or cause excessive injury or unnecessary suffering”.⁴⁰³

International Conferences

383. The 22nd International Conference of the Red Cross in 1973 adopted a resolution on the prohibition or restriction of the use of certain weapons in which it endorsed the view of the UN General Assembly in Resolution 2932 (XXVII) A that:

The widespread use of many weapons and the emergence of new methods of warfare that cause unnecessary suffering or are indiscriminate call urgently for renewed efforts by governments to seek, through legal means, the prohibition or restriction of the use of such weapons and of indiscriminate and cruel methods of warfare and, if possible, through measures of disarmament, the elimination of specific, especially cruel or indiscriminate, weapons.

The resolution urged the CDDH to “begin consideration at its 1974 session of the question of the prohibition or restriction of the use of conventional weapons which may cause unnecessary suffering or have indiscriminate effects” and invited the ICRC to convene in 1974 a conference of government experts to study in depth the issue.⁴⁰⁴

384. The 24th International Conference of the Red Cross in 1981 adopted a resolution on conventional weapons in which it noted with satisfaction the adoption of the 1980 CCW and its Protocols and invited States to become parties

⁴⁰⁰ UN Secretariat, *Respect for human rights in armed conflicts, Existing rules of international law concerning the prohibition or restriction of use of specific weapons*, Survey, UN Doc. A/9215, 21 November 1973, p. 209.

⁴⁰¹ OAS, General Assembly, Res. 1270 (XXIV-O/94), 10 June 1994, preamble.

⁴⁰² OAS, General Assembly, Res. 1335 (XXV-O/95), 9 June 1995, § 1.

to them “as soon as possible, to apply them and examine the possibility of strengthening or developing them further”.⁴⁰⁵

385. The 24th International Conference of the Red Cross in 1981 adopted a resolution on disarmament, weapons of mass destruction and respect for non-combatants in which it urged parties to armed conflicts “not to use methods and means of warfare that cannot be directed against specific military targets and whose effects cannot be limited”.⁴⁰⁶

386. The 26th International Conference of the Red Cross and Red Crescent in 1995 stressed that “proper attention should be given to other existing conventional weapons or future weapons which may cause unnecessary suffering or have indiscriminate effects”.⁴⁰⁷

387. In the Final Declaration of the Second Review Conference of States Parties to the CCW in 2001, the High Contracting Parties expressed their grave concern about the fact that “the indiscriminate effects . . . of certain conventional weapons often fall on civilians, including in non-international armed conflicts”.⁴⁰⁸

388. In the Final Declaration of the African Parliamentary Conference on International Humanitarian Law for the Protection of Civilians during Armed Conflict in 2002, the participants stated that they were “worried in the face of the rapid expansion of arms trade and the uncontrolled proliferation of weapons, notably those which can have indiscriminate effects”.⁴⁰⁹

IV. Practice of International Judicial and Quasi-judicial Bodies

389. In its advisory opinion in the *Nuclear Weapons case* in 1996, the ICJ stated that:

The cardinal principles contained in the texts constituting the fabric of humanitarian law are the following. The first is aimed at the protection of the civilian population and civilian objects and establishes the distinction between combatants and non-combatants; States must never make civilians the object of attack and must consequently never use weapons that are incapable of distinguishing between civilian and military targets . . . In conformity with the aforementioned principles, humanitarian law, at a very early stage, prohibited certain types of weapons either because of their indiscriminate effect on combatants and civilians . . . Further these fundamental rules are to be observed by all States whether or not they have ratified the conventions that contain them, because they constitute intransgressible principles of international customary law.⁴¹⁰

⁴⁰⁵ 24th International Conference of the Red Cross, Manila, 7–14 November 1981, Res. IX, § 2.

⁴⁰⁶ 24th International Conference of the Red Cross, Manila, 7–14 November 1981, Res. XIII, § 1.

⁴⁰⁸ Second Review Conference of States Parties to the CCW, Geneva, 11–21 December 2001, Final Declaration, UN Doc. CCW/CONF.II/2, 25 January 2002, p. 8.

⁴⁰⁹ African Parliamentary Conference on International Humanitarian Law for the Protection of Civilians during Armed Conflict, Final Declaration, Niamey, 18–20 February 2002, preamble.

⁴¹⁰ ICJ, *Nuclear Weapons case*, Advisory Opinion, 8 July 1996, §§ 78–79.

390. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Guillaume stated that “customary law contains one single absolute prohibition: the one on so-called ‘blind’ weapons which are incapable to distinguish between civilian and military objectives”.⁴¹¹

391. In his dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Weeramantry stated that “the rule of discrimination between civilian populations and military personnel is, like some of the other rules of *ius in bello*, of ancient vintage and shared by many cultures”.⁴¹²

392. In her dissenting opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Higgins stated that:

Very important also . . . is the requirement of humanitarian law that weapons may not be used which are incapable of discriminating between civilian and military targets.

The requirement that a weapon be capable of differentiating between military and civilian targets is not a general principle of humanitarian law specified in the 1899, 1907 or 1949 law, but flows from the basic rule that civilians may not be the target of attack . . . It may be concluded that a weapon will be unlawful *per se* if it is incapable of being targeted at a military objective only, even if collateral damage occurs.⁴¹³

Judge Higgins was the only judge that offered a concrete definition of “indiscriminate weapons”, stating that:

It may be concluded that a weapon will be unlawful *per se* if it is incapable of being targeted at a military objective only, even if collateral harm occurs. Notwithstanding the unique and profoundly destructive characteristics of all nuclear weapons, that very term covers a variety of weapons which are not monolithic in all their effects. To the extent that a specific nuclear weapon would be incapable of this distinction, its use would be unlawful.⁴¹⁴

393. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Guillaume stated that “customary humanitarian law contains one single absolute prohibition: the one of so-called ‘blind’ weapons which are incapable of distinguishing between civilian targets and military targets. Obviously, nuclear weapons do not necessarily fall into this category” and that “the collateral damage caused to the civilian population must not be ‘excessive’ as compared to the ‘military advantage’ offered”.⁴¹⁵

394. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Fleischhauer arrived at the opposite conclusion, namely that “the nuclear weapon cannot distinguish between civilian and military targets”.⁴¹⁶

⁴¹¹ ICJ, *Nuclear Weapons case*, Separate Opinion of Judge Guillaume, 8 July 1996, § 5.

⁴¹² ICJ, *Nuclear Weapons case*, Dissenting Opinion of Judge Weeramantry, 8 July 1996, p. 277.

⁴¹³ ICJ, *Nuclear Weapons case*, Dissenting Opinion of Judge Higgins, 8 July 1996, §§ 23–24.

⁴¹⁴ ICJ, *Nuclear Weapons case*, Dissenting Opinion of Judge Higgins, 8 July 1996, § 24.

⁴¹⁵ ICJ, *Nuclear Weapons case*, Separate Opinion of Judge Guillaume, 8 July 1996, § 5.

⁴¹⁶ ICJ, *Nuclear Weapons case*, Separate Opinion of Judge Fleischhauer, 8 July 1996, § 2.

395. In his separate opinion in the *Nuclear Weapons case* before the ICJ in 1996, Judge Herczegh judged nuclear weapons illegal because they were “weapons of mass destruction”.⁴¹⁷

396. In a declaration in the *Nuclear Weapons case* before the ICJ in 1996, President Bedjaoui considered the weapons to be “of a nature to hit victims indiscriminately, confusing combatants and non-combatants”.⁴¹⁸

397. In its review of the indictment in the *Martić case* in 1996, the ICTY Trial Chamber had to determine whether the use of cluster bombs was prohibited in an armed conflict. Noting that no formal provision forbade the use of such bombs, the Trial Chamber recalled that the choice of weapons and their use were clearly delimited by IHL. Among the relevant norms of customary law, the Court referred to Article 51(4)(b) API, which forbade indiscriminate attacks involving the use of a means or method of combat that could not be directed against a specific military objective.⁴¹⁹

V. Practice of the International Red Cross and Red Crescent Movement

398. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that it is prohibited to use weapons “which, because of their lack of precision or their effects, affect civilian persons and combatants without distinction”. Delegates also teach that “belligerent Parties and their armed forces shall abstain from using weapons whose harmful effects go beyond the control, in time or place, of those employing them”.⁴²⁰

399. In a press release issued in 1991 in the context of the Gulf War, the ICRC reminded the belligerents that “weapons having indiscriminate effects... are prohibited”.⁴²¹

400. In 1996, in a statement before the First Committee of the UN General Assembly, the ICRC commented on the advisory opinion of the ICJ in the *Nuclear Weapons case* and stated that:

Turning now to the nature of nuclear weapons, we note that, on the basis of the scientific evidence submitted, the Court found that “...The destructive power of nuclear weapons cannot be contained in either space or time... the radiation released by a nuclear explosion would affect health, agriculture, natural resources and demography over a very wide area. Further, the use of nuclear weapons would be a serious danger to future generations...” In the light of this, ... the ICRC finds

⁴¹⁷ ICJ, *Nuclear Weapons case*, Declaration of Judge Herczegh, 8 July 1996, § 2.

⁴¹⁸ ICJ, *Nuclear Weapons case*, Declaration of President Bedjaoui, President of the ICJ, 8 July 1996, § 20.

⁴¹⁹ ICTY, *Martić case*, Review of the Indictment, 8 March 1996, § 18.

⁴²⁰ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 912(b) and (c).

⁴²¹ ICRC, Press Release No. 1659, Middle East conflict: ICRC appeals to belligerents, 1 February 1991, *IRRC*, No. 280, 1991, p. 27.

it difficult to envisage how a use of nuclear weapons could be compatible with the rules of international humanitarian law.⁴²²

401. In a working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC proposed that the employment of “weapons, projectiles and material and methods of warfare . . . inherently indiscriminate”, when committed in international or non-international armed conflicts, be subject to the jurisdiction of the Court.⁴²³

VI. *Other Practice*

402. In a resolution adopted during its Edinburgh Session in 1969, the Institute of International Law stated that:

Existing international law prohibits the use of all weapons which, by their very nature, affect indiscriminately both military objectives and non-military objects, or both armed forces and civilian populations. In particular, it prohibits the use of weapons the destructive effect of which is so great that it cannot be limited to specific military objectives or is otherwise uncontrollable (self-generating weapons) as well as of “blind” weapons.⁴²⁴

403. In 1985, in a report on violations of the laws of war in Nicaragua, Americas Watch listed the “use of ‘blind’ weapons that cannot be directed with any reasonable assurance against a specific military objective” among actions which were “prohibited by applicable international law rules”.⁴²⁵

404. In 1989, in a report on violations of the laws of war in Angola, Africa Watch listed the “use of ‘blind’ weapons that cannot be directed with any reasonable assurance against a specific military objective” among prohibited practices.⁴²⁶

C. Use of Prohibited Weapons

I. *Treaties and Other Instruments*

Treaties

405. Article 8 of the 1998 ICC Statute provides that:

⁴²² ICRC, Statement before the First Committee of the UN General Assembly, 18 October 1996.

⁴²³ ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, §§ 2(i) and 3(vii).

⁴²⁴ Institute of International Law, Edinburgh Session, Resolution on the Distinction between Military Objectives and Non-military Objects in General and Particularly the Problems Associated with Weapons of Mass Destruction, 9 September 1969, § 7.

⁴²⁵ Americas Watch, *Violations of the Laws of War by Both Sides in Nicaragua: 1981–1985*, New York, March 1985, p. 34.

⁴²⁶ Africa Watch, *Angola: Violations of the Laws of War by Both Sides*, New York, April 1989, p. 141.

1. The Court shall have jurisdiction in respect of war crimes in particular when committed as part of a plan or policy or as part of a large-scale commission of such crimes.
2. For the purpose of this Statute, "war crimes" means:
 - ...
 - (b) Other serious violations of the laws and customs applicable in international armed conflict, within the established framework of international law, namely, any of the following acts:
 - ...
 - (xx) Employing weapons, projectiles and material and methods of warfare which are of a nature to cause superfluous injury or unnecessary suffering or which are inherently indiscriminate in violation of the international law of armed conflict, provided that such weapons, projectiles and material and methods of warfare are the subject of a comprehensive prohibition and are included in an annex to this Statute, by an amendment in accordance with the relevant provisions set forth in articles 121 and 123.

Other Instruments

406. Article 22(2)(c) of the 1991 ILC Draft Code of Crimes against the Peace and Security of Mankind provides that the "use of unlawful weapons" constitutes an "exceptionally serious war crime".

407. Section 6(2) of the 1999 UN Secretary-General's Bulletin provides that "the United Nations force shall respect the rules prohibiting or restricting the use of certain weapons . . . under the relevant instruments of international humanitarian law".

II. National Practice

Military Manuals

408. Australia's Commanders' Guide provides that "some weapons and weapons systems are totally prohibited".⁴²⁷ It further states that "the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as poison".⁴²⁸

409. Australia's Defence Force Manual provides that "prohibited weapons" is one of the categories into which the limitations on the use of weapons fall.⁴²⁹ It further states that "the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as poison".⁴³⁰

⁴²⁷ Australia, *Commanders' Guide* (1994), § 304.

⁴²⁸ Australia, *Commanders' Guide* (1994), § 1305(p).

⁴²⁹ Australia, *Defence Force Manual* (1994), § 401.

⁴³⁰ Australia, *Defence Force Manual* (1994), § 1315(p).

410. Bosnia and Herzegovina's Military Instructions states that "all means and methods of warfare are allowed, except for the ones which are prohibited or restricted by the international law of war".⁴³¹

411. Ecuador's Naval Manual provides that "the following acts constitute war crimes: . . . use of prohibited weapons or ammunition".⁴³²

412. Germany's Military Manual states that "grave breaches of international humanitarian law are in particular: . . . use of prohibited weapons".⁴³³

413. Under South Korea's Military Regulation 187, using prohibited weapons and ammunitions constitutes a war crime.⁴³⁴

414. Nigeria's Manual on the Laws of War includes "using . . . forbidden arms or ammunition" in its list of war crimes.⁴³⁵

415. South Africa's LOAC Manual provides that "making use of . . . forbidden arms or ammunition" is a grave breach of the law of war and a war crime.⁴³⁶

416. Switzerland's Basic Military Manual states that "employing methods and means of combat expressly prohibited in the Swiss army" constitutes a war crime.⁴³⁷

417. The UK Military Manual provides that "in addition to the 'grave breaches' of the 1949 Geneva Conventions . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . using . . . forbidden arms or ammunition".⁴³⁸

418. The US Field Manual provides that "in addition to the 'grave breaches' of the Geneva Conventions of 1949, the following acts are representative of violations of the law of war ('war crimes'): . . . making use of . . . forbidden arms or ammunition".⁴³⁹

419. The US Instructor's Guide provides that "in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: using . . . forbidden arms or ammunition".⁴⁴⁰

420. The US Naval Handbook states that "the following acts are representative war crimes: . . . employing forbidden arms or ammunition".⁴⁴¹

National Legislation

421. Argentina's Draft Code of Military Justice punishes "any soldier who, on the occasion of an armed conflict, uses or orders to be used prohibited methods or means of combat".⁴⁴²

⁴³¹ Bosnia and Herzegovina, *Military Instructions* (1992), Item 5, § 1.

⁴³² Ecuador, *Naval Manual* (1989), § 6.2.5(10). ⁴³³ Germany, *Military Manual* (1992), § 1209.

⁴³⁴ South Korea, *Military Regulation 187* (1991), Article 4.2.

⁴³⁵ Nigeria, *Manual on the Laws of War* (undated), § 6(7).

⁴³⁶ South Africa, *LOAC Manual* (1996), §§ 39(a) and 41.

⁴³⁷ Switzerland, *Basic Military Manual* (1987), Article 200(2)(a).

⁴³⁸ UK, *Military Manual* (1958), § 626(g). ⁴³⁹ US, *Field Manual* (1956), § 504(a).

⁴⁴⁰ US, *Instructor's Guide* (1985), p. 13. ⁴⁴¹ US, *Naval Handbook* (1995), § 6.2.5(10).

⁴⁴² Argentina, *Draft Code of Military Justice* (1998), Article 290, introducing a new Article 874 in the *Code of Military Justice as amended* (1951).

422. The Criminal Code of Belarus provides that “the use in an armed conflict of . . . means and methods of warfare prohibited by international treaties binding upon the Republic of Belarus” is a war crime.⁴⁴³

423. Under the Criminal Code of the Federation of Bosnia and Herzegovina, the use of, or order to use, “means or practices of warfare prohibited by the rules of international law” in time of war or armed conflict is a war crime.⁴⁴⁴ The Criminal Code of the Republika Srpska contains the same provision.⁴⁴⁵

424. Bulgaria’s Penal Code as amended provides that “a person who, in violation of the rules of international law for waging war, uses or orders the use of . . . impermissible means or methods for waging war” commits a war crime.⁴⁴⁶

425. Colombia’s Penal Code imposes a criminal sanction on “anyone who, during an armed conflict, uses prohibited means and methods of warfare”.⁴⁴⁷

426. Congo’s Genocide, War Crimes and Crimes against Humanity Act defines as war crimes grave breaches of the Geneva Conventions, as well as all other grave breaches of the law and customs of war applied in international or non-international armed conflicts within the scope of international law.⁴⁴⁸

427. Under Croatia’s Criminal Code, the manufacture, improvement, production, stockpiling, offering for sale, purchase, interceding in purchasing or selling, possession, transfer, transport, use of, and order to use, “means or methods of combat prohibited by the rules of international law” are war crimes.⁴⁴⁹

428. The Czech Republic’s Criminal Code as amended punishes “any person who develops, produces, imports, possesses or stockpiles weapons, combat equipment or explosives prohibited by law or by an international treaty approved by the Parliament or otherwise disposes of them”.⁴⁵⁰ It also punishes “whoever in time of war or in combat . . . orders the use of a forbidden means of combat or material, or who uses such means or material”.⁴⁵¹

429. Denmark’s Military Criminal Code as amended punishes “any person who uses war instruments or procedures the application of which violates an international agreement entered into by Denmark or the general rules of international law”.⁴⁵²

430. El Salvador’s Law on the Control of Firearms, Ammunition and Explosives states that the armed forces “may use all types of weapons as long as they are not

⁴⁴³ Belarus, *Criminal Code* (1999), Article 136(16).

prohibited by international conventions or treaties subscribed to and ratified by El Salvador".⁴⁵³

431. Under Estonia's Penal Code, "use of ... internationally prohibited weapons" is a war crime.⁴⁵⁴

432. Under Ethiopia's Penal Code, it is a punishable offence to use, or order to be used, against the enemy "any means or method of combat expressly forbidden by international conventions to which Ethiopia is a party".⁴⁵⁵

433. Under Finland's Revised Penal Code, any person who, in time of war, "uses a prohibited means of warfare or weapon [or] otherwise violates the provisions of an international agreement on warfare binding on Finland or the generally acknowledged and established rules and customs of war under public international law" shall be punished for war crime.⁴⁵⁶

434. Under Hungary's Criminal Code as amended, "any person who uses or orders the use of a weapon or instrument of war prohibited by international treaty in a theatre of military operation or in an occupied territory against the enemy" is guilty, upon conviction, of a war crime.⁴⁵⁷

435. Italy's Wartime Military Penal Code punishes any "commander of a military force who, to harm the enemy, orders or authorises the use of any of the methods or means of warfare that are prohibited by the law or by international conventions, or are in any way contrary to military honour". It also punishes "anyone who, to harm the enemy, adopts means or uses methods that are prohibited by the law or by international conventions, or are in any way contrary to military honour".⁴⁵⁸

436. Under Kazakhstan's Penal Code, "the use in an armed conflict of means and methods ... prohibited by an international treaty to which the Republic of Kazakhstan is a party" is a criminal offence.⁴⁵⁹

437. Under Lithuania's Criminal Code as amended, "an order to employ prohibited means of warfare or methods of combat and the employment of such [means or methods] in violation of the provisions of international agreements or universally accepted international customs regarding the means and methods of combat" are war crimes.⁴⁶⁰

438. Moldova's Penal Code punishes "the use during an armed conflict of means and methods of warfare prohibited by international treaties to which the Republic of Moldova is a party".⁴⁶¹

439. Under Mozambique's Military Criminal Law, it is a crime against humanitarian rules "to employ unlawful means of combat".⁴⁶²

⁴⁵³ El Salvador, *Law on the Control of Firearms, Ammunition and Explosives* (1999), Article 9.

⁴⁷¹ Spain, *Military Criminal Code* (1985), Article 70.

⁴⁷² Spain, *Penal Code* (1995), Article 610.

450. Under Sweden's Penal Code as amended, "use of any weapon prohibited by international law" constitutes a crime against international law.⁴⁷³

451. Tajikistan's Criminal Code punishes the "use during the hostilities or in armed conflict of means and materials prohibited under an international treaty".⁴⁷⁴

452. Uzbekistan's Criminal Code punishes "the employment of means of warfare forbidden by international law".⁴⁷⁵

453. Vietnam's Penal Code punishes "anyone who, in time of war, ... uses prohibited means or methods of warfare".⁴⁷⁶

454. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime.⁴⁷⁷

National Case-law

455. No practice was found.

Other National Practice

456. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Ecuador stated that "the use of nuclear weapons has the consequences that fit perfectly with the legal figure of war crimes against humankind: the assassination and extermination of entire populations and other inhuman acts committed against the civil population".⁴⁷⁸

457. At the CDDH, the SFRY voted in favour of the Philippine proposal concerning an amendment to include "the use of weapons prohibited by international Convention, namely: ... asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices" in the list of grave breaches in Article 74 of draft API (now Article 85).⁴⁷⁹ However because that amendment had been rejected it stated that it:

deeply regrets that the use of unlawful methods or means of combat was not included in the grave breaches, particularly since to have done so would merely have been to have codified an already existing rule of customary law, because there can be no doubt that to use prohibited weapons or unlawful methods of making war is already to act unlawfully, that is, it is a war crime punishable by existing international law.⁴⁸⁰

POISON

Poison (practice relating to Rule 72)

§§ 1–115

Poison*I. Treaties and Other Instruments**Treaties*

1. Article 23(a) of the 1899 HR provides that “it is especially prohibited . . . to employ poison or poisoned arms”.
2. Article 23(a) of the 1907 HR provides that “it is especially forbidden . . . to employ poison or poisoned weapons”.
3. Pursuant to Article 8(2)(b)(xvii) of the 1998 ICC Statute, “employing poison or poisoned weapons” is a war crime in international armed conflicts.

Other Instruments

4. Article 70 of the 1863 Lieber Code provides that “the use of poison in any manner, be it to poison wells, or food, or arms, is wholly excluded from modern warfare. He that uses it puts himself out of the pale of the law and usages of war.”
5. Article 13(a) of the 1874 Brussels Declaration states that “employment of poison or poisoned weapons” is especially forbidden.
6. Article 8(a) of the 1880 Oxford Manual provides that “it is forbidden . . . to make use of poison, in any form whatever”.
7. Article 16(1) of the 1913 Oxford Manual of Naval War provides that “it is forbidden . . . to employ poison or poisoned weapons”.
8. Based on several documents supplying evidence of outrages committed during the First World War, the 1919 Report of the Commission on Responsibility lists violations of the laws and customs of war which should be subject to criminal prosecution, including the “poisoning of wells”.
9. Article 3(a) of the 1993 ICTY Statute lists “employment of poisonous weapons” as a violation of the laws or customs of war to be subject to the jurisdiction of the Court.
10. Pursuant to Article 20(e)(i) of the 1996 ILC Draft Code of Crimes against the Peace and Security of Mankind, “employment of poisonous weapons” is a war crime.

11. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(xvii), “employing poison or poisoned weapons” is a war crime in international armed conflicts.

II. National Practice

Military Manuals

12. Argentina’s Law of War Manual states that the use of “poison or poisoned weapons” is especially prohibited.¹

13. Australia’s Commanders’ Guide states that the use of poison or poisoned weapons is prohibited.² It also provides that “because of their potential to be indiscriminate in application, poison and poisoned weapons are prohibited”.³ It further states that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as poison”.⁴

14. Australia’s Defence Force Manual states that:

Poison or poisoned weapons are illegal because of their potential to be indiscriminate. So, for example, the poisoning or contamination of any source of drinking water is prohibited and the illegality is not cured by posting a notice that the water has been contaminated or poisoned.⁵

The manual further states that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as poison”.⁶

15. Belgium’s Law of War Manual proscribes “the use of poison or poisoned arms”. The prohibition includes the poisoning of water sources, even with a warning.⁷

16. Bosnia and Herzegovina’s Military Instructions states that “it is prohibited to use . . . poisonous gas”.⁸

17. Canada’s LOAC Manual states that:

Poison or poisoned weapons are illegal because of their potential to be indiscriminate. For example, the poisoning or contamination of any source of drinking water is prohibited. Posting a notice that the water has been contaminated or poisoned does not make this practice legal.⁹

¹ Argentina, *Law of War Manual* (1969), § 1.008(2).

² Australia, *Commanders’ Guide* (1994), § 932(b).

³ Australia, *Commanders’ Guide* (1994), § 307, see also § 304.

⁵ Australia, *Defence Force Manual* (1994), § 406.

⁶ Australia, *Defence Force Manual* (1994), § 1315(p).

⁷ Belgium, *Law of War Manual* (1983), p. 37.

⁸ Bosnia and Herzegovina, *Military Instructions* (1992), Item 11, § 1.

⁹ Canada, *LOAC Manual* (1999), pp. 5-2 and 5-3, § 20.

The manual also prohibits the use of “bullets that have been dipped in poison”.¹⁰ It further states that “using poison or poisoned weapons” constitutes a war crime.¹¹

18. Canada’s Code of Conduct provides that the use of “poison or poison weapons” is forbidden.¹²

19. Colombia’s Basic Military Manual prohibits the poisoning of water.¹³

20. The Military Manual of the Dominican Republic prohibits the use of poison and poisonous weapons. It tells soldiers that “you may not use poison or poisoning agents such as dead animals, bodies, or defecation to poison any water and food. Of course, you may use non-poisonous methods to destroy military food and water supplies in order to deprive the enemy combatants of their use.”¹⁴

21. Ecuador’s Naval Manual states that “poisoned projectiles are considered illegal, owing to their alteration, as are any other munitions covered with poison”.¹⁵

22. France’s LOAC Summary Note states that it is prohibited to use poisoned weapons.¹⁶

23. France’s LOAC Teaching Note includes poison in the list of weapons that “are totally prohibited by the law of armed conflict” “owing to their inhuman nature or to their excessive traumatic effect”.¹⁷

24. France’s LOAC Manual incorporates the content of Article 23(a) of the 1907 HR.¹⁸ It also includes poison in the list of weapons that “are totally prohibited by the law of armed conflicts” “owing to their inhuman nature or to their excessive traumatic effect”.¹⁹

25. Germany’s Military Manual states that “it is prohibited to employ poison and poisoned weapons”.²⁰ It adds that “the prohibition also applies to the toxic contamination of water supply installations and foodstuffs . . . for military purposes”.²¹

26. Indonesia’s Air Force Manual states that “it is prohibited to use poison or poisonous weapons in warfare”.²²

27. Referring to Israel’s Law of War Booklet, the Report on the Practice of Israel provides that the IDF “does not condone the use of poison in warfare, irrespective of the method or means of its employment”.²³

28. Israel’s Manual on the Laws of War provides that:

¹⁰ Canada, *LOAC Manual* (1999), p. 5-2, § 12(c).

¹¹ Canada, *LOAC Manual* (1999), pp. 16-3 and 16-4, §§ 20(a) and 21(h).

¹⁴ Dominican Republic, *Military Manual* (1980), p. 5.

¹⁵ Ecuador, *Naval Manual* (1989), § 9.1, see also § 9.1.1.

¹⁶ France, *LOAC Summary Note* (1992), § 4.6.

¹⁷ France, *LOAC Teaching Note* (2000), p. 6.

¹⁸ France, *LOAC Manual* (2001), p. 97.

¹⁹ France, *LOAC Manual* (2001), p. 54.

²⁰ Germany, *Military Manual* (1992), § 426.

²¹ Germany, *Military Manual* (1992), § 434.

²² Indonesia, *Air Force Manual* (1990), § 15(b)(1).

²³ Report on the Practice Israel, 1997, Chapter 3.2, referring to *Law of War Booklet* (1986), p. 11.

It is forbidden to poison water sources, arrows or bullets. This is one of the most ancient prohibitions in the laws of war. Already back in ancient Greece and Rome, it was forbidden to use poison which was perceived as “a dishonorable weapon” that disgraces the user. This prohibition has been carefully upheld also into the twentieth century. Another reason for this prohibition is the difficulty in controlling the outcome of the poisoning, with the possibility that it could also spread to an innocent civilian population (for example, the poisoning of water sources that cannot be restricted to military use only).²⁴

29. Italy’s IHL Manual states that “it is specifically prohibited . . . to use poison or poisoned weapons”.²⁵

30. Kenya’s LOAC Manual states that “the use of poison or poisoned weapons is prohibited”.²⁶

31. Under South Korea’s Military Regulation 187, “poisoning ponds and streams” constitutes a war crime.²⁷

32. The Military Manual of the Netherlands states that “it is prohibited to use poison or poisoned weapons. This includes a prohibition to poison or contaminate water supplies.”²⁸

33. The Military Handbook of the Netherlands states that “it is prohibited to use poison and poisoned weapons”.²⁹

34. New Zealand’s Military Manual prohibits the use of “poison or poisoned weapons”.³⁰ It further notes that “the use of poison or poisoned weapons” is “an old-established rule of customary law” which constitutes a war crime.³¹

35. Under Nigeria’s Military Manual, it is prohibited “to employ poison or poisoned weapons”.³²

36. Nigeria’s Manual on the Laws of War states that “the use of poison or poisonous weapons is prohibited”. It adds that “smearing any substance [on bullets] likely to inflame a wound is also prohibited”.³³ The manual includes “using . . . poisoned . . . arms or ammunition [and] poisoning of wells, streams and other sources of water supply” in its list of war crimes.³⁴

37. Nigeria’s Soldiers’ Code of Conduct provides that it is prohibited “to employ poison or poisoned weapons”.³⁵

38. Russia’s Military Manual prohibits “poison and poisoned weapons”.³⁶

²⁴ Israel, *Manual on the Laws of War* (1998), p. 12.

²⁵ Italy, *IHL Manual* (1991), Vol. I, § 8(1).

³⁵ Nigeria, *Soldiers’ Code of Conduct* (undated), § 12(a).

³⁶ Russia, *Military Manual* (1990), Article 6(d).

39. South Africa's LOAC Manual expressly prohibits the use of poison. It lists poison among "certain weapons . . . expressly prohibited by international agreement, treaty or custom".³⁷ The manual further provides that "making use of poisoned . . . arms or ammunition", as well as the "poisoning of wells or streams", are grave breaches of the law of war and war crimes.³⁸

40. Spain's LOAC Manual states that the use of "poison and poisoned weapons" is strictly forbidden in any circumstances.³⁹ It adds that "there also exists an absolute prohibition to poison food and water supplies".⁴⁰

41. Switzerland's Military Manual states that "the employment of poison . . . is prohibited".⁴¹

42. Switzerland's Teaching Manual states that the "law of armed conflict prohibits the use of poison".⁴²

43. Switzerland's Basic Military Manual states that "the employment of poison . . . is prohibited".⁴³ It also states that "poisoning springs" constitutes a war crime.⁴⁴

44. The UK Military Manual states that:

Poison and poisoned weapons . . . are forbidden.

Water in wells, pumps, pipes, reservoirs, lakes, rivers and the like, from which the enemy may draw drinking water, must not be poisoned or contaminated. The poisoning or contamination of water is not made lawful by posting up a notice informing the enemy that the water has been thus polluted.⁴⁵

The manual also provides that:

In addition to the "grave breaches" of the 1949 Geneva Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . using . . . poisoned . . . arms or ammunition; . . . poisoning of wells, streams, and other sources of water supply; . . . using . . . poisonous . . . gases.⁴⁶

45. The UK LOAC Manual states that "the following are prohibited in *international* armed conflict: . . . c. poison and poisoned weapons".⁴⁷ (emphasis in original)

46. The US Field Manual emphasises that "it is especially forbidden . . . to employ poison or poisoned weapons".⁴⁸ It further provides that "in addition to the 'grave breaches' of the Geneva Conventions of 1949, the following acts are representative of violations of the law of war ('war crimes'): . . . making use of poisoned . . . arms or ammunition . . . [and] poisoning of wells or streams".⁴⁹

⁴³ Switzerland, *Basic Military Manual* (1987), Article 22.

⁴⁴ Switzerland, *Basic Military Manual* (1987), Article 200(2)(k).

⁴⁵ UK, *Military Manual* (1958), §§ 111 and 112.

⁴⁶ UK, *Military Manual* (1958), § 626(g), (i) and (r).

⁴⁷ UK, *LOAC Manual* (1981), Section 5, p. 20, § 1(c), see also Section 4, p. 12, § 2(e).

⁴⁸ US, *Field Manual* (1956), § 37(a). ⁴⁹ US, *Field Manual* (1956), § 504(a) and (i).

47. The US Air Force Pamphlet states that “a weapon may be illegal *per se* if either international custom or treaty has forbidden its use under all circumstances. An example is poison to kill or injure a person.”⁵⁰ It further states that “usage and practice has also determined that it is *per se* illegal . . . to use any substance on projectiles that tend unnecessarily to inflame the wound they cause”.⁵¹ The manual defines poison as a “biological or chemical substance” and adds that “the long-standing customary prohibition against poison is based on their uncontrolled character and the inevitability of death or permanent disability”.⁵²

48. The US Soldier’s Manual instructs soldiers that “using poison or poisoned weapons is against the law of war. You may not use poison or poisoning agents such as dead animals, bodies, or defecation to poison any water or food supply.”⁵³

49. The US Instructor’s Guide provides that “in addition to the grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: using poisoned . . . arms or ammunition [and] poisoning wells or streams”.⁵⁴

50. The US Operational Law Handbook states that “using . . . poison weapons” is “expressly prohibited by the law of war” and is “not excusable on the basis of military necessity”.⁵⁵

51. The US Naval Handbook states that “a few weapons, such as poisoned projectiles, are unlawful, no matter how employed”.⁵⁶

52. The YPA Military Manual of the SFRY (FRY) provides that “it is forbidden to use poison or poisoned weapons. This includes, for example, the use of poisonous bullets. Poisoning of drinking water, food, etc., is not forbidden but it must be announced or marked.”⁵⁷

National Legislation

53. Use of poison is a criminal offence under countless pieces of domestic legislation, in particular penal codes.⁵⁸

54. Australia’s War Crimes Act considers “any war crime within the meaning of the instrument of appointment of the Board of Inquiry [set up to investigate war crimes committed by enemy subjects]” as a war crime, including poisoning of wells.⁵⁹

⁵⁰ US, *Air Force Pamphlet* (1976), § 6-2. ⁵¹ US, *Air Force Pamphlet* (1976), § 6-3b(2).

⁵² US, *Air Force Pamphlet* (1976), § 6-4f. ⁵³ US, *Soldier’s Manual* (1984), p. 10.

⁵⁹ Australia, *War Crimes Act* (1945), Section 3.

55. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including "employing poison or poisoned weapons" in international armed conflicts.⁶⁰
56. Brazil's Military Penal Code punishes "the poisoning of drinking water or foodstuffs".⁶¹
57. Under Burundi's Draft Law on Genocide, Crimes against Humanity and War Crimes, "employing poison or poisoned weapons" constitutes a war crime in international armed conflicts.⁶²
58. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.⁶³
59. China's Law Governing the Trial of War Criminals provides that "putting poison on food or drinking water" constitutes a war crime.⁶⁴
60. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.⁶⁵
61. The DRC Code of Military Justice as amended punishes "in time of war . . . poisoning of water or foodstuffs, as well as deposits, spraying or using harmful substances intended to cause death".⁶⁶
62. Under Estonia's Penal Code, "use of . . . toxic weapons" is a war crime.⁶⁷
63. Under Georgia's Criminal Code, any war crime provided for by the 1998 ICC Statute, which is not explicitly mentioned in the Code, such as "employing poison or poisoned weapons" in international armed conflicts, is a crime.⁶⁸
64. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or a non-international armed conflict, "employs poison or poisoned weapons".⁶⁹
65. Italy's Law of War Decree as amended provides that "it is prohibited . . . to use poison or poisoned weapons".⁷⁰
66. Under Mali's Penal Code, "using poison or poisoned weapons" is a war crime in international armed conflicts.⁷¹
67. The Definition of War Crimes Decree of the Netherlands includes the "poisoning of wells" in its list of war crimes.⁷²

⁷⁰ Italy, *Law of War Decree as amended* (1938), Article 35(1).

⁷¹ Mali, *Penal Code* (2001), Article 31(i)(17).

⁷² Netherlands, *Definition of War Crimes Decree* (1946), Article 1.

68. Under the International Crimes Act of the Netherlands, “employing poison or poisoned weapons” is a crime, when committed in an international armed conflict.⁷³
69. Under New Zealand’s International Crimes and ICC Act, war crimes include the crime defined in Article 8(2)(b)(xvii) of the 1998 ICC Statute.⁷⁴
70. Switzerland’s Military Criminal Code as amended punishes “anyone who wilfully pollutes drinking water used for persons or cattle with substances harmful to health”.⁷⁵
71. Under Trinidad and Tobago’s Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xvii) of the 1998 ICC Statute.⁷⁶
72. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xvii) of the 1998 ICC Statute.⁷⁷
73. Under the US War Crimes Act as amended, violations of Article 23(a) of the 1907 HR are war crimes.⁷⁸
74. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, “means or methods of combat prohibited under the rules of international law, during a war or an armed conflict” is a war crime.⁷⁹ The commentary on this provision states that “the following weapons and means of combat are considered to be prohibited: . . . different kinds of poison and poisonous weapons”.⁸⁰

National Case-law

75. In its judgement in the *Shimoda case* in 1963, Japan’s District Court of Tokyo stated that “poison [and] poisonous gases” were part of “prohibited materials under international law”.⁸¹

Other National Practice

76. According to the Report on the Practice of Australia, the *opinio juris* of Australia supports the prohibition of poison or poisoned weapons.⁸²
77. According to the Report on the Practice of the Republika Srpska, the Instruction on Implementation of International Law of War in the Armed Forces of Republika Srpska states that “it is prohibited to use . . . poison”.⁸³

⁷³ Netherlands, *International Crimes Act* (2003), Article 5(5)(g).

⁸³ Report on the Practice of Republika Srpska, 1997, Chapter 3.2, referring to Instruction on Implementation of International Law of War in the Armed Forces of Republika Srpska, *Official Gazette of ARBiH*, 5 December 1992, § 11.

78. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Egypt, referring to Article 22 of the 1907 HR, noted the “prohibition against the use of weapons which render death inevitable or cause unnecessary suffering” and, in this context, stated that “as far as weapons are concerned, since the nineteenth century this humanitarian principle has been embodied in two rules: one forbids the use of poisons”.⁸⁴

79. The Report on the Practice of India states that senior members of the Indian armed forces confirm that poison is not to be used in either international or non-international armed conflicts.⁸⁵

80. In 1991, during a debate in the UN Security Council concerning the aftermath of the Gulf War, Iraq implied that the use of shells made of depleted uranium was against international law, since they had poisonous effects.⁸⁶

81. The Report on the Practice of Iraq states that “the banning is absolute in using poisonous materials in itself due to its harmful effects to the individuals and the environment”.⁸⁷

82. The Report on the Practice of Jordan states that Jordan has never used poison or poisoned weapons.⁸⁸

83. In an article published in a military review, a member of the Kuwaiti armed forces stated that, during war, belligerents must:

respect restrictions and limits provided for in international conventions, such as restriction of the use of some weapons, and prohibition of using others, e.g. . . . the use of poisons. This is in application of well-established principles in wars, such as considerations of military honour and humanitarian considerations.⁸⁹

84. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Malaysia, in a part entitled “Principle of Non-Toxicity”, referred, *inter alia*, to the 1925 Geneva Gas Protocol and the 1956 New Delhi Draft Rules.⁹⁰ It made the same references in its oral pleadings in the *Nuclear Weapons case* in 1995.⁹¹

85. According to the Report on the Practice of Malaysia, the armed forces of Malaysia do not use poison in warfare.⁹²

86. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Marshall Islands stated that the “laws of war including the Geneva

and Hague Conventions and the United Nations Charter . . . prohibit the use of poisonous substances".⁹³

87. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Mexico mentioned "a series of international instruments . . . [which] led to a prohibition on the use of certain weapons. Such instruments included the Hague Conventions of 1899 and 1907, which prohibited the use of poisoned or poisonous weapons."⁹⁴

88. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Nauru stated that:

Clearly it is a violation of customary international law to use poisons or other analogous substances. Thus even where a State is not a party to the Geneva Gas Protocol it is nonetheless bound under customary law to refrain from using poisonous weapons.⁹⁵

89. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, New Zealand stated that "the use of poison and poisoned weapons has long been prohibited. The prohibition is set out in the 1925 Geneva [Gas] Protocol but also forms part of customary law."⁹⁶

90. The Norwegian National Group, in response to a questionnaire from the International Society for Military Law and the Law of War on the "Investigation and Prosecution of Violations of the Law of Armed Conflict", stated that the use of poisonous weapons was mentioned in the 1902 Military Penal Act.⁹⁷

91. In 1996, at the Fourth Review Conference of States Parties to the BWC, Pakistan stated that:

The 1925 protocol and the BWC is a manifestation of a moral and cultural ethos that is over 1400 years old. Violations of the prohibitions against the production or use of poisonous weapons should be treated with equal determination in all cases, without selectivity or discrimination.⁹⁸

92. On the basis of an interview with a high-ranking officer of the AFP, the Report on the Practice of the Philippines notes that poison is prohibited.⁹⁹

⁹³ Marshall Islands, Written statement submitted to the ICJ, *Nuclear Weapons case*, 22 June 1995, § 5.

⁹⁹ Report on the Practice of the Philippines, 1997, Interview with Navy Lt. Office of the Deputy Chief of Staff for Intelligence, 5 March 1997, Chapter 3.2.

93. On the basis of replies by army officers to a questionnaire, the Report on the Practice of Rwanda notes that the prohibition of the use of poison in armed conflicts is customary.¹⁰⁰

94. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Solomon Islands stated that “international law prohibits the use of weapons which: . . . are poisonous”.¹⁰¹

95. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, the Solomon Islands stated that the use of poisonous weapons was formally prohibited by Article 23(a) of the Hague Regulations of 1899 and 1907.¹⁰²

96. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Sweden stated that “as far back as the 17th century, Hugo Grotius stressed that poisoning was not allowed under international law. In certain respects, the principle of the prohibition of toxic weapons has also been codified (chiefly as a result of the 1925 Geneva Convention).”¹⁰³

97. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the UK referred to the “long established prohibition on the use of poison and poisoned weapons”, but it also stated that the prohibition was “intended to apply to weapons whose primary effect was poisonous and not to those where poison was a secondary or incidental effect”.¹⁰⁴

98. In 1974, in a memorandum on the depleted uranium tank round, the US Department of the Army stated that “the law of war prohibits the employment of poison or poisoned weapons”.¹⁰⁵

99. In 1975, in a legal review of 30MM ammunition, the US Department of the Air Force stated that “existing international law, both customary and treaty, prohibits the use of poison or poisoned weapons”.¹⁰⁶

100. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the US accepted the prohibition of poison as such. However, it considered the prohibition to be applicable only to “weapons that carry poison into the body of the victim” or “that are designed to kill or injure by the inhalation or other absorption into the body of poisonous gases or analogous substances”.¹⁰⁷

¹⁰⁰ Report on the Practice of Rwanda, 1997, Replies by army officers to a questionnaire, Chapter 3.2.

¹⁰³ Sweden, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 5.

¹⁰⁴ UK, Written statement submitted to the ICJ, *Nuclear Weapons case*, 16 June 1995, § 3.59 and § 3.60.

¹⁰⁵ US, Department of the Army, Memorandum for US Army Research, Development and Engineering Center, M829A2 Cartridge, 120MM, APFSDS-T (Depleted Uranium Tank Round), *Law of War Review*, 27 December 1994, § 6(b).

¹⁰⁶ US, Department of the Air Force, Legal Review of 30MM Ammunition, 14 March 1975, § II(1).

¹⁰⁷ US, Written statement submitted to the ICJ, *Nuclear Weapons case*, 20 June 1995, p. 24.

101. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Zimbabwe fully shared the analysis by other States that “the threat or use of nuclear weapons violates the principles of humanitarian law prohibiting the use of weapons or methods of warfare that . . . utilize poisonous or analogous substances”.¹⁰⁸

102. The Report on the Practice of Zimbabwe states that the prohibition of the use of poison is part of customary international law.¹⁰⁹

III. Practice of International Organisations and Conferences

United Nations

103. In a resolution adopted in 1970 on respect for human rights in armed conflicts, the UN General Assembly underlined “the continuing value of existing humanitarian rules relating to armed conflict, in particular the Hague Conventions of 1899 and 1907” and called upon “all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907”, including Article 23(a) which prohibits the use of poison or poisoned weapons.¹¹⁰

104. In two resolutions adopted in 1971 on respect for human rights in armed conflicts, the UN General Assembly repeated its call upon “all parties to any armed conflicts” to respect the Hague Conventions of 1899 and 1907.¹¹¹

105. In a resolution adopted in 1972 on respect for human rights in armed conflicts, the UN General Assembly called upon “all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular the Hague Conventions of 1899 and 1907”.¹¹²

106. In several resolutions adopted between 1973 and 1977 on respect for human rights in armed conflicts, the UN General Assembly called upon “all parties to armed conflicts to acknowledge and to comply with their obligations under the humanitarian instruments and to observe the international humanitarian rules which are applicable, in particular the Hague Conventions of 1899 and 1907”.¹¹³

107. In 1969, in a report on respect for human rights in armed conflicts, the UN Secretary-General stated that “the use of poisons and poisoned bullets has been prohibited by the international law of war for a long time”.¹¹⁴

¹⁰⁸ Zimbabwe, Oral pleadings before the ICJ, *Nuclear Weapons case*, 15 November 1995, Verbatim Record CR 95/35, p. 27.

¹⁰⁹ Report on the Practice of Zimbabwe, 1998, Chapter 3.2.

¹¹⁰ UN General Assembly, Res. 2677 (XXV), 9 December 1970, preamble and § 1.

¹¹¹ UN General Assembly, Res. 2852 (XXVII), 20 December 1971, § 1; Res. 2853 (XXVII), 20 December 1971, § 1.

¹¹² UN General Assembly, Res. 3032 (XXVIII), 18 December 1972, § 2.

¹¹³ UN General Assembly, Res. 3102 (XXVIII), 12 December 1973, § 4; Res. 3319 (XXIX), 14 December 1974, § 3; Res. 3500 (XXX), 15 December 1975, § 1; Res. 31/19, 24 November 1976, § 1; Res. 32/44, 8 December 1977, § 6.

¹¹⁴ UN Secretary-General, Report on respect for human rights in armed conflicts, UN Doc. A/7720, 20 December 1969, § 190.

108. In 1973, in a survey on respect for human rights in armed conflicts, the UN Secretariat made a thorough study of different legal sources (practice, doctrine and treaties) to establish whether poison was prohibited. It concluded that most sources supported the view that there was a customary prohibition on the use of poison.¹¹⁵

Other International Organisations

109. In 1985, in a report on the deteriorating situation in Afghanistan, the Rapporteur of the Parliamentary Assembly of the Council of Europe stated that "according to several concordant accounts, water, cereals and livestock have been poisoned [and] chemical substances and incendiary bombs producing gases of various colours have been discharged". In this respect, he added that the report of the Special Rapporteur of the UN Commission on Human Rights deserved mention.¹¹⁶ In that report, the UN Special Rapporteur had recommended that "the parties to the conflict, namely government and opposition forces, should be reminded that it is their duty to apply fully the rules of international humanitarian law without discrimination, particularly those concerning the protection of women and children".¹¹⁷

International Conferences

110. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

111. In its advisory opinion in the *Nuclear Weapons case* in 1996, the ICJ discussed whether "nuclear weapons should be treated in the same way as poisoned weapons" and stated that, in that case, they would be prohibited under:

- (a) the Second Hague Declaration of 29 July 1899, which prohibits "the use of projectiles the object of which is the diffusion of asphyxiating or deleterious gases";
- (b) Article 23 (a) of the Regulations respecting the laws and customs of war on land annexed to the Hague Convention IV of 18 October 1907, whereby "it is especially forbidden: . . . to employ poison or poisoned weapons"; and
- (c) the Geneva Protocol of 17 June 1925 which prohibits "the use in war of asphyxiating, poisonous or other gases, and of all analogous liquids, materials or devices".

¹¹⁵ UN Secretariat, *Respect for human rights in armed conflicts, Existing rules of international law concerning the prohibition or restriction of use of specific weapons, Survey*, UN Doc. A/9215, 7 November 1973, pp. 115-119.

¹¹⁶ Council of Europe, Parliamentary Assembly, Rapporteur, *Report on the deteriorating situation in Afghanistan*, Doc. 5495, 15 November 1985, pp. 7-8, § 16(e).

¹¹⁷ UN Commission on Human Rights, Special Rapporteur on the Situation of Human Rights in Afghanistan, *Report, Recommendations*, reprinted in Council of Europe, Parliamentary Assembly, Doc. 5495, Appendix 1, 15 November 1985, p. 11, § 190.

According to the Court, the terms “poison” and “poisoned weapons” “have been understood, in the practice of States, in their ordinary sense as covering weapons whose prime, or even exclusive, effect is to poison or asphyxiate. This practice is clear.”¹¹⁸

V. Practice of the International Red Cross and Red Crescent Movement

112. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “the use of poison or poisoned weapons is prohibited”.¹¹⁹

113. In 1994, in a Memorandum on Respect for International Humanitarian Law in Angola, the ICRC stated that “in particular, the use of...poison is prohibited”.¹²⁰

VI. Other Practice

114. Rule B3 of the Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IIHL, states that “the customary rule prohibiting the use of poison as a means or method of warfare is applicable in non-international armed conflicts”.¹²¹

115. In 1992, the Ecumenical Council for Justice and Peace of the Philippines denounced the use of poison by the Philippine military.¹²²

NUCLEAR WEAPONS

Nuclear Weapons

§§ 1–4

Nuclear Weapons

1. As explained in Volume I, an assessment of the legality of the use of nuclear weapons was not undertaken in the framework of this study because such an assessment was ongoing by the ICJ in the *Nuclear Weapons case* at the time the scope of the study was decided on. As a result, no specific practice was collected in this study. However, States' positions on the legality of the use of nuclear weapons can be found in their written statements and oral pleadings before the ICJ in this case.¹

¹ See the *Nuclear Weapons case*: written statements of Bosnia and Herzegovina, Burundi, Ecuador, Egypt, Finland, France, Germany, India, Iran, Ireland, Italy, Japan, North Korea, Lesotho, Malaysia, Marshall Islands, Mexico, Nauru, Netherlands, New Zealand, Qatar, Russia, Samoa, San Marino, Solomon Islands, Sweden, UK and US; oral pleadings of Australia (Verbatim Record CR 95/22, 30 October 1995, pp. 29–65), Costa Rica, annexing ICRC communication (Verbatim Record CR 95/33, 14 November 1995, pp. 18–33), Egypt (Verbatim Record CR 95/23, 1 November 1995, pp. 17–37), France (Verbatim Record CR 95/23, 1 November 1995, pp. 38–67 and Verbatim Record CR 95/24, 2 November 1995, pp. 17–28), Germany (Verbatim Record CR 95/24, 2 November 1995, pp. 28–38), Indonesia (Verbatim Record CR 95/25, 3 November 1995, pp. 16–39), Iran (Verbatim Record CR 95/26, 6 November 1995, pp. 16–42), Italy (Verbatim Record CR 95/26, 6 November 1995, pp. 42–49), Japan (Verbatim Record CR 95/27, 7 November 1995, pp. 18–40), Malaysia (Verbatim Record CR 95/27, 7 November 1995, pp. 40–66), Marshall Islands (Verbatim Record CR 95/32, 14 November 1995, pp. 18–28), Mexico (Verbatim Record CR 95/25, 3 November 1995, pp. 29–57), New Zealand (Verbatim Record CR 95/28, 9 November 1995, pp. 19–49), Philippines (Verbatim Record CR 95/28, 9 November 1995, pp. 49–65), Qatar (Verbatim Record CR 95/29, 10 November 1995, pp. 19–39), Russia (Verbatim Record CR 95/29, 10 November 1995, pp. 39–51), Samoa (Verbatim Record CR 95/31, 13 November 1995, pp. 23–54), San Marino (Verbatim Record CR 95/31, 13 November 1995, pp. 19–23), Solomon Islands (Verbatim Record CR 95/32, 14 November 1995, pp. 28–73), UK (Verbatim Record CR 95/34, 15 November 1995, pp. 20–54), US (Verbatim Record CR 95/34, 15 November 1995, pp. 55–81), Zimbabwe (Verbatim Record CR 95/35, 15 November 1995, pp. 20–36) and WHO (Verbatim Record CR 95/22, 30 October 1995, pp. 19–29), available at <http://212.153.43.18/icjwww/icases/iunan/iunanframe.htm>. On the same issue, see also the *Nuclear Weapons (WHO) case*: written statements of Australia, Colombia, Costa Rica, Finland, France, Germany, India, Iran, Ireland, Italy, Japan, Kazakhstan, North Korea, Lithuania, Malaysia, Mexico, Moldova, Nauru, Netherlands, New Zealand, Norway, Papua New Guinea, Philippines, Russia, Rwanda, Samoa, Saudi Arabia, Solomon Islands, Sri Lanka, Sweden, Uganda, Ukraine, UK and US, available at <http://212.153.43.18/icjwww/icases/ianw/ianwframe.htm>.

2. The ICJ delivered its advisory opinion in the *Nuclear Weapons case* on 8 July 1996.²
3. In a subsequent debate in the First Committee of the UN General Assembly, several States expressed themselves on the implications of the advisory opinion.³

² ICJ, *Nuclear Weapons case*, 8 July 1996.

A/C.1/51/PV.19, 11 November 1996, p. 1), Papua New Guinea (UN Doc. A/C.1/51/PV.11, 22 October 1996, p. 21), Paraguay (UN Doc. A/C.1/51/PV.5, 16 October 1996, p. 5), Peru (UN Doc. A/C.1/51/PV.10, 21 October 1996, p. 12), Philippines (UN Doc. A/C.1/51/PV.11, 22 October 1996, pp. 8–9), Poland (UN Doc. A/C.1/51/PV.17, 7 November 1996, p. 15), Portugal (UN Doc. A/C.1/51/PV.22, 14 November 1996, p. 9), Russia (UN Doc. A/C.1/51/PV.6, 17 October 1996, p. 3 and UN Doc. A/C.1/51/PV.22, 14 November 1996, p. 10), Samoa (UN Doc. A/C.1/51/PV.6, 17 October 1996, p. 22), Saudi Arabia (UN Doc. A/C.1/51/PV.10, 21 October 1996, p. 5), South Africa (UN Doc. A/C.1/51/PV.9, 21 October 1996, p. 2), Sri Lanka (UN Doc. A/C.1/51/PV.5, 17 October 1996, p. 2 and UN Doc. A/C.1/51/PV.18, 11 November 1996, p. 6), Sudan (UN Doc. A/C.1/51/PV.12, 24 October 1996, p. 19), Sweden (UN Doc. A/C.1/51/PV.22, 14 November 1996, p. 11), Switzerland (UN Doc. A/C.1/51/PV.4, 15 October 1996, p. 19),

4. During this debate, the ICRC also expressed its opinion on the issue.⁴

Tanzania (UN Doc. A/C.1/51/PV.11, 22 October 1996, p. 3), Thailand (UN Doc. A/C.1/51/PV.10, 21 October 1996, p. 11), Togo (UN Doc. A/C.1/51/PV.13, 24 October 1996, p. 7), UAE (UN Doc. A/C.1/51/PV.8, 18 October 1996, p. 2), UK (UN Doc. A/C.1/51/PV.22, 14 November 1996, p. 5), US (UN Doc. A/C.1/51/PV.22, 14 November 1996, p. 3), Uruguay (UN Doc. A/C.1/51/PV.10, 21 October 1996, pp. 1–2), Venezuela (UN Doc. A/C.1/51/PV.7, 18 October 1996, p. 6), Yemen (UN Doc. A/C.1/51/PV.12, 24 October 1996, p. 13), Zambia (UN Doc. A/C.1/51/PV.12, 24 October 1996, p. 11); see also Rio Group, Statement by Bolivia on behalf of the Rio Group before the Sixth Committee of the UN General Assembly, UN Doc. A/C.6/51/SR.4, 19 November 1996, § 26.

⁴ See the statement of the ICRC before the First Committee of the UN General Assembly, UN Doc. A/C.1/51/PV.8, 18 October 1996, p. 10, also reproduced in *IRRC*, No. 316, 1997, pp. 118–119.

BIOLOGICAL WEAPONS

Biological Weapons (practice relating to Rule 73)

§§ 1–283

Biological Weapons*I. Treaties and Other Instruments**Treaties*

1. According to the 1925 Geneva Gas Protocol, the States parties accept the prohibition on the use of asphyxiating, poisonous or other gases and “agree to extend this prohibition to the use of bacteriological methods of warfare”. There are 20 reservations to the Protocol related to biological weapons.¹ These generally indicate that if an adverse party does not respect the Protocol, the ratifying State will no longer consider itself bound by the Protocol vis-à-vis that party.² There were an additional 17 reservations to this effect, but they have been withdrawn.³

2. The three protocols to the 1948 Brussels Treaty deal with biological weapons. Article 1 Part I (Armaments not to be manufactured) of Protocol III states that:

The High Contracting Parties, members of the Western European Union,⁴ take note of and record their agreement with the Declarations of the Chancellor of the Federal Republic of Germany (made in London on 3rd October, 1954, and annexed hereto as Annex I) in which the Federal Republic of Germany undertook not to manufacture in its territory . . . biological . . . weapons.

3. Article 13(1) of the 1955 Austrian State Treaty provides that:

¹ Algeria, Angola, Bahrain, Bangladesh, China, Fiji, India, Iraq, Israel, Jordan, North Korea, Kuwait, Libya, Nigeria, Pakistan, Papua New Guinea, Portugal, Solomon Islands, Vietnam and SFRY.

² A number of reservations include non-respect by allies also as a reason for no longer being obliged to respect the Protocol.

³ By Ireland in 1972; by Australia in 1986; by New Zealand in 1989; by Slovakia in 1990; by Bulgaria, Canada (in relation to bacteriological weapons), Chile, Romania and UK (in relation to bacteriological weapons) in 1991; by Spain in 1992; by the Netherlands in 1995; by France and South Africa in 1996; by Belgium in 1997; and by Estonia in 1999; by Russia in 2001; by South Korea in 2002.

⁴ Belgium, France, Germany, Greece, Italy, Luxembourg, Netherlands, Portugal, Spain and UK.

Austria shall not possess, construct or experiment with –

- ...
- (j) ... biological substances in quantities greater than, or of types other than, are required for legitimate civil purposes, or any apparatus designed to produce, project or spread such materials or substances for war purposes.

4. The preamble to the 1972 BWC provides that:

The States Parties to this Convention,

Determined to act with a view to achieving effective progress towards general and complete disarmament, including the prohibition and elimination of all types of weapons of mass destruction, and convinced that the prohibition of the development, production and stockpiling of chemical and bacteriological (biological) weapons and their elimination, through effective measures, will facilitate the achievement of general and complete disarmament under strict and effective international control.

Recognising the important significance of the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases and of Bacteriological Methods of Warfare, signed at Geneva on 17 June 1925, and conscious also of the contribution which the said Protocol has already made, and continues to make, to mitigating the horrors of war,

Reaffirming their adherence to the principles and objectives of that Protocol and calling upon all States to comply strictly with them,

Recalling that the General Assembly of the United Nations has repeatedly condemned all actions contrary to the principles and objectives of the Geneva Protocol of 17 June 1925, ...

Convinced of the importance and urgency of eliminating from the arsenals of States, through effective measures, such dangerous weapons of mass destruction as those using chemical or bacteriological (biological) agents,

Recognising that an agreement on the prohibition of bacteriological (biological) and toxin weapons represents a first possible step towards the achievement of agreement on effective measures also for the prohibition of the development, production and stockpiling of chemical weapons, and determined to continue negotiations to that end,

Determined, for the sake of all mankind, to exclude completely the possibility of bacteriological (biological) agents and toxins being used as weapons,

Convinced that such use would be repugnant to the conscience of mankind and that no effort should be spared to minimise this risk.

5. Article 1 of the 1972 BWC provides that:

Each State Party to this Convention undertakes never in any circumstances to develop, produce, stockpile or otherwise acquire or retain:

1. microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes;
2. weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict.

6. In September 1991, Argentina, Brazil and Chile signed the Mendoza Declaration on Chemical and Biological Weapons. Bolivia, Paraguay and Uruguay later acceded to the Declaration. In it, the parties state that they are “convinced that a complete ban on biological weapons will contribute to strengthening the security of all States”. In the first paragraph, they declare their “full commitment not to develop, produce, acquire in any way, stockpile or retain, transfer directly or indirectly, or use biological weapons”.

7. In December 1991, Bolivia, Colombia, Ecuador, Peru and Venezuela adopted the Cartagena Declaration on Weapons of Mass Destruction. The Declaration expresses the commitment of these governments to:

renounce the possession, production, development, use, testing and transfer of all weapons of mass destruction whether . . . bacteriological (biological), toxin . . . weapons, and to refrain from storing, acquiring or holding such categories of weapons, in any circumstances.

Other Instruments

8. Articles 6 and 9 of the 1938 ILA Draft Convention for the Protection of Civilian Populations against New Engines of War provide that:

Art. 6. The use of . . . bacterial weapons as against any State, whether or not a party to the present convention, and in any war, whatever its character, is prohibited.

...

Art. 9. The prohibition of the use of bacterial weapons shall apply to the use for the purpose of injuring an adversary of all methods for the dissemination of pathogenic microbes or of filter-passing viruses, or of infected substances, whether for the purpose of bringing them into immediate contact with human beings, animals or plants, or for the purpose of affecting any of the latter in any manner whatsoever, as, for example, by polluting the atmosphere, water, foodstuffs or any other objects of human use or consumption.

9. Article 14 of the 1956 New Delhi Draft Rules prohibits the use of weapons

whose harmful effects – resulting in particular from the dissemination of . . . bacteriological . . . agents – could spread to an unforeseen degree or escape, either in space or in time, from the control of those who employ them, thus endangering the civilian population.

10. Under Article 4(4) of Part IV of the 1998 Comprehensive Agreement on Respect for Human Rights and IHL in the Philippines, “civilian population and civilians . . . shall be protected . . . from . . . the stockpiling near or in their midst, and the use of . . . biological weapons”.

11. Section 6.2 of the 1999 UN Secretary-General’s Bulletin states that “the United Nations force shall respect the rules prohibiting or restricting the use of certain weapons and methods of combat under the relevant instruments of

international humanitarian law. These include, in particular, the prohibition on the use of . . . biological methods of warfare.”

II. National Practice

Military Manuals

12. Australia’s *Commanders’ Guide* provides that States are prohibited “from manufacturing, storing and using biological weapons. Both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion.”⁵ It defines the use of “certain unlawful weapons and ammunition” as “grave breaches or serious war crimes”.⁶

13. Australia’s *Defence Force Manual* states that “bacteriological methods of warfare are prohibited”. It further provides that States are prohibited “from manufacturing, storing and using biological weapons. Both chemical and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion.”⁷ The manual defines the use of “certain unlawful weapons and ammunition” as “grave breaches or serious war crimes”.⁸

14. Belgium’s *Law of War Manual* proscribes the use of biological weapons with reference to the 1925 Geneva Gas Protocol and the 1972 BWC.⁹

15. Bosnia and Herzegovina’s *Military Instructions* states that “it is prohibited to use . . . bacteriological agents”.¹⁰

16. Cameroon’s *Instructors’ Manual* states, on the issue of biological and bacteriological weapons, that “the restrictions here are clear. It is prohibited to use such weapons against enemy combatants as well as against civilian populations.” It also calls for the “total destruction of the existing stockpile”.¹¹

17. Canada’s *LOAC Manual* states that “nations are prohibited from manufacturing, storing and using biological weapons. Both bacteriological and biological weapons are prohibited because they cause unnecessary suffering and may affect the civilian population in an indiscriminate fashion.”¹² It further states that “using bacteriological methods of warfare” constitutes a war crime.¹³

18. Colombia’s *Basic Military Manual* states that the use, production, possession and importation of biological weapons are banned.¹⁴

⁵ Australia, *Commanders’ Guide* (1994), § 306.

⁶ Australia, *Commanders’ Guide* (1994), § 1305(p).

⁷ Australia, *Defence Force Manual* (1994), §§ 411 and 414.

⁸ Australia, *Defence Force Manual* (1994), § 1315(p).

⁹ Belgium, *Law of War Manual* (1983), p. 38.

¹⁰ Bosnia and Herzegovina, *Military Instructions* (1992), Item 11, § 1.

¹¹ Cameroon, *Instructors’ Manual* (1992), p. 124, § 441.

¹² Canada, *LOAC Manual* (1999), p. 5-3, § 25.

¹³ Canada, *LOAC Manual* (1999), pp. 16-3 and 16-4, § 21(i).

¹⁴ Colombia, *Basic Military Manual* (1995), pp. 49–50.

19. Ecuador's Naval Manual states that "international law prohibits all biological weapons or methods of warfare whether they are directed against persons, animals or plants. Biological weapons include microbial or biological or toxin agents of any origin (natural or artificial) or method of production."¹⁵

20. France's LOAC Summary Note states that it is prohibited to use biological weapons.¹⁶

21. France's LOAC Teaching Note includes biological and bacteriological weapons in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁷

22. France's LOAC Manual incorporates the content of Article 1 of the 1972 BWC and makes reference to the 1925 Geneva Gas Protocol.¹⁸ It further includes biological and bacteriological weapons in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁹

23. Germany's Soldiers' Manual provides that "the use... of bacteriological means of warfare is prohibited".²⁰

24. Germany's Military Manual proscribes "the use of bacteriological weapons" and refers to the 1925 Geneva Gas Protocol. It further states that:

The development, manufacture, acquisition and stockpiling of bacteriological (biological) and toxin weapons is prohibited (BWC). These prohibitions shall apply both to biotechnological and synthetic procedures serving other but peaceful purposes. They also include genetic engineering procedures and micro-organisms altered through genetic engineering.²¹

25. Germany's IHL Manual states that "international humanitarian law prohibits the use of a number of means of warfare which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g. ... bacteriological means of warfare, e.g. substances which cause disease".²²

26. Italy's IHL Manual provides that "the use of bacteriological means... is forbidden in conformity with the international provisions in force".²³

27. Kenya's LOAC Manual prohibits the use of "bacteriological methods of warfare".²⁴

28. The Military Manual of the Netherlands states that the 1972 BWC "prohibits the development, production and stockpiling of bacteriological (biological) and toxin weapons (means of warfare). Logically this implies that the use of these weapons is also prohibited."²⁵

¹⁵ Ecuador, *Naval Manual* (1989), § 10.4.

¹⁶ France, *LOAC Summary Note* (1992), § 4.6. ¹⁷ France, *LOAC Teaching Note* (2000), p. 6.

¹⁸ France, *LOAC Manual* (2001), p. 22. ¹⁹ France, *LOAC Manual* (2001), p. 54.

²⁰ Germany, *Soldiers' Manual* (1991), p. 5.

²¹ Germany, *Military Manual* (1992), §§ 438–439.

²² Germany, *IHL Manual* (1996), § 305. ²³ Italy, *IHL Manual* (1991), Vol. I, § 19.

²⁴ Kenya, *LOAC Manual* (1997), Précis No. 3, p. 6.

²⁵ Netherlands, *Military Manual* (1993), pp. IV-7/IV-8, § 13.

29. The Military Handbook of the Netherlands states that “a general prohibition applies to the use of biological (bacteriological) means of warfare. The Netherlands shall in all circumstances respect this prohibition.”²⁶

30. New Zealand’s Military Manual states that “the [1925 Geneva Gas Protocol] prohibits the use . . . of bacteriological methods of warfare.”²⁷ It also includes “using bacteriological methods of warfare” in a list of “war crimes recognised by the customary law of armed conflict”.²⁸

31. Nigeria’s Manual on the Laws of War mentions the 1925 Geneva Gas Protocol and states that:

There is no rule to prevent measures being taken to dry up springs and destroy water-wells from which the enemy may draw water or devastate crops by means of chemicals and bacteria which are not harmful to human beings. Since 1925 a great number of States have signed a protocol for the prohibition of the use in war of asphyxiating gases or bacteriological means of warfare.

The manual includes “using bacteriological methods of warfare” in its list of war crimes.²⁹

32. Russia’s Military Manual prohibits bacteriological (biological) weapons. It refers to the 1925 Geneva Gas Protocol and the 1972 BWC.³⁰

33. South Africa’s LOAC Manual states that “the use of certain weapons is expressly prohibited by international agreement, treaty or custom (e.g. biological and toxic weapons)”.³¹

34. Spain’s LOAC Manual states that “it is prohibited to use . . . bacteriological weapons”. It repeats the content of Article 1 of the 1972 BWC.³²

35. Switzerland’s Teaching Manual states that the use of bacteriological means of warfare is prohibited.³³

36. Switzerland’s Basic Military Manual prohibits the use of biological weapons.³⁴

37. The UK Military Manual states that “the use of bacteriological methods of warfare is forbidden”.³⁵ A footnote explains that “the prohibition . . . in the [1925 Geneva] Gas Protocol was declaratory of the view generally accepted by the civilised world”. It adds that:

As Japan was not a party to the Protocol, the Russian military tribunal at Khabarovsk . . . would therefore seem to have assumed that the prohibition of bacteriological warfare derived from the customary law of war prevailing among civilised nations and it was only declaratory of such customary law.³⁶

²⁶ Netherlands, *Military Handbook* (1995), p. 7-39.

³³ Switzerland, *Teaching Manual* (1986), p. 41.

³⁴ Switzerland, *Basic Military Manual* (1987), Article 22.

³⁵ UK, *Military Manual* (1958), § 111. ³⁶ UK, *Military Manual* (1958), § 111, footnote 1(b).

The manual also provides that “in addition to the ‘grave breaches’ of the 1949 [Geneva] Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . using bacteriological methods of warfare”.³⁷

38. The UK LOAC Manual states that “the following are prohibited in *international* armed conflict: . . . f. bacteriological weapons”.³⁸ (emphasis in original)

39. The US Field Manual states that:

The reservation of the United States [to the 1925 Geneva Gas Protocol] does not, however, reserve the right to retaliate with bacteriological methods of warfare against a state if that state or any of its allies fails to respect the prohibitions of the Protocol. The prohibition concerning bacteriological methods of warfare which the United States has accepted under the Protocol, therefore, proscribes not only the initial but also any retaliatory use of bacteriological methods of warfare. In this connection, the United States considers bacteriological methods of warfare to include not only biological weapons but also toxins, which, although not living organisms and therefore susceptible of being characterized as chemical agents, are generally produced from biological agents. All toxins, however, regardless of the manner of production, are regarded by the United States as bacteriological methods of warfare within the meaning of the proscription of the Geneva Protocol of 1925.³⁹

40. The US Air Force Pamphlet states that:

International law prohibits biological weapons or methods of warfare whether they are directed against persons, animals or plants. The wholly indiscriminate and uncontrollable nature of biological weapons has resulted in the condemnation of biological weapons by the international community, and the practice of states in refraining from their use in warfare has confirmed this rule. The Biological Weapons Convention prohibits also the development, preparation, stockpiling and supply to others of such weapons.⁴⁰

41. The US Air Force Commander’s Handbook states that “the United States has renounced the use of bacteriological weapons under all circumstances, and their possession is forbidden by a 1972 Treaty”.⁴¹

42. The US Operational Law Handbook states that “the US has renounced . . . all use of biological weapons”.⁴²

43. The US Naval Handbook states that:

The United States considers the prohibition against the use of biological weapons during armed conflict to be part of customary international law and thereby binding on all nations whether or not they are parties to the 1925 Gas Protocol or the 1972 Biological Weapons Convention.

The United States has, therefore, formally renounced the use of biological weapons under any circumstance. Pursuant to its treaty obligations, the United

States has destroyed all its biological and toxin weapons and restricts its research activities to development of defensive capabilities.⁴³

44. The YPA Military Manual of the SFRY (FRY) prohibits the use of bacteriological (biological) means of warfare.⁴⁴

National Legislation

45. Under Armenia's Penal Code, the development, production, acquisition, sale, use and testing of biological weapons and weapons of mass destruction constitute crimes against the peace and security of mankind.⁴⁵

46. Australia's Biological Weapons Act provides that:

- (1) It is unlawful to develop, produce, stockpile or otherwise acquire or retain:
 - (a) microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes; or
 - (b) weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflicts;
- (2) A corporation that, or a natural person who, does an act or thing declared by subsection (1) to be unlawful is guilty of an offence and is punishable, on conviction:
 - (a) in the case of a corporation – by a fine not exceeding \$ 200,000; and
 - (b) in the case of a natural person – by a fine not exceeding \$ 10,000, or by imprisonment for a specified period or for life, or both.⁴⁶

47. The Criminal Code of Belarus provides that “production, acquisition, stockpiling, transport, transfer or sale of weapons of mass destruction prohibited by international treaties binding upon the Republic of Belarus” is a criminal offence, while the use of such weapons is a war crime.⁴⁷

48. Brazil's Military Penal Code prohibits the spreading of epidemics or infestations in a location under military control which could result in damage to forests, crops, grazing pastures or animals used for economic or military purposes.⁴⁸

49. China's Law Governing the Trial of War Criminals provides that “use of . . . bacteriological warfare” constitutes a war crime.⁴⁹

50. Colombia's Constitution prohibits the “manufacture, import, possession and use of . . . biological . . . weapons”.⁵⁰

51. Under Croatia's Criminal Code, the manufacture, improvement, production, stockpiling, offering for sale, purchase, interceding in purchasing or

selling, possession, transfer, transport, use of, and order to use, biological weapons are war crimes.⁵¹

52. Estonia's Penal Code punishes any "person who designs, manufactures, stores, acquires, hands over, sells or provides or offers for use in any other manner . . . biological or bacteriological weapons".⁵² Under the Code, "use of biological [or] bacteriological . . . weapons" is a war crime.⁵³

53. France's Law on the Prohibition of Biological Weapons prohibits the production, retention, acquisition, stockpiling and transfer of biological weapons.⁵⁴

54. Under Georgia's Criminal Code, "the production, acquisition or sale of . . . biological, or other kinds of weapon of mass destruction, prohibited by an international treaty" and the "use during hostilities or in armed conflict of such means and materials or weapons of mass destruction which are prohibited by an international treaty" are crimes.⁵⁵

55. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed conflict, "employs biological . . . weapons".⁵⁶

56. Hungary's Law/Decree on the Prohibition of Biological Weapons prohibits the development, production, stockpiling and acquisition or retention of microbial or other biological agents, or toxins, weapons, equipment and means of delivery as specified in Article 1 of the 1972 BWC.⁵⁷

57. Under Hungary's Criminal Code as amended, employing "bacteriological methods of warfare" as set forth in the 1925 Geneva Gas Protocol is a war crime.⁵⁸

58. Italy's Law of War Decree as amended states that "the use of bacteriological means . . . is forbidden in conformity with the international provisions in force".⁵⁹

59. Italy's Law on the Export, Import and Transit of Armaments provides that "the manufacture, import, export and transit of biological, chemical and nuclear weapons are prohibited, as is research designed for their production or the provision of the relevant technology".⁶⁰

60. Under Kazakhstan's Penal Code, "the production, acquisition, or sale of biological weapons" is a criminal offence.⁶¹

61. Moldova's Draft Penal Code punishes the use of bacteriological weapons.⁶²

⁶² Moldova, *Draft Penal Code* (1999), Article 138(2).

62. New Zealand's Disarmament Act provides that "no person shall manufacture, station, acquire, or possess, or have control over any biological weapon in the New Zealand Nuclear Free Zone".⁶³

63. Norway's Penal Code provides that:

Any person shall be liable to imprisonment for a term not exceeding 10 years who develops, produces, stores or otherwise obtains or possesses:

- (1) bacteriological or other biological substances or toxins regardless of their origin or method of production, of such a kind and in such quantities that they are not justified for preventive, protective or other peaceful purposes,
- (2) weapons, equipment or means of dissemination made for using such substances or toxins as are mentioned in item 1 for hostile purposes or in armed conflict.

Accomplices shall be liable to the same penalty.⁶⁴

64. Poland's Penal Code punishes "any person who uses a means of mass destruction prohibited by international law" and "any person who, against the prohibition by international law or by the provision of law, produces, stockpiles, acquires, sells, retains, transports or sends means of mass destruction or means of combat, or conducts research aimed at the production or use of such means".⁶⁵

65. South Africa's Non-Proliferation of Weapons of Mass Destruction Act provides that:

The Minister may, by notice in the Gazette, determine the general policy to be followed with a view to:

- ...
- (d) the imposition of a prohibition, whether for offensive or defensive purposes, on the development, production, acquisition, stockpiling, maintenance or transit of any weapons of mass destruction.⁶⁶

66. Switzerland's Military Criminal Code as amended punishes "whoever will intentionally spread a dangerous and transmissible human disease".⁶⁷

67. Switzerland's Federal Law on War Equipment as amended provides that:

It is prohibited:

- a. to develop, produce, deliver to anyone, acquire, import, export, procure the transit of or stockpile biological weapons, engage in the brokerage thereof or otherwise dispose of them;
- b. to induce anyone to commit an act mentioned under letter a;
- c. to facilitate the commission of an act mentioned under letter a.⁶⁸

⁶⁷ Switzerland, *Military Criminal Code as amended* (1927), Article 167.

⁶⁸ Switzerland, *Federal Law on War Equipment as amended* (1996), Article 7.

68. Tajikistan's Criminal Code punishes the "creation, production, acquisition, storage, transportation, sending or sale of . . . biological (bacteriological) . . . weapons of mass destruction, prohibited by an international treaty, as well as transfer to any other State, which does not possess nuclear weapons, of initial or special fissionable material, technologies, which can knowingly be used to produce weapons of mass destruction, or providing anyone with any other kind of weapons of mass destruction or components necessary for their production, prohibited by an international treaty". It further prohibits the "use of . . . biological (bacteriological) . . . weapons".⁶⁹

69. Under Ukraine's Criminal Code, "the use of weapons of mass destruction prohibited by international instruments consented to be binding by the [parliament] of Ukraine" is a war crime.⁷⁰

70. The UK Biological Weapons Act provides that:

No person shall develop, produce, stockpile, acquire or retain . . . any biological agent or toxin . . . in a quantity not justified for peaceful purposes . . . any weapon, equipment or means of delivery designed to use biological agents or toxins for hostile purposes or in armed conflict.⁷¹

71. The US Biological Weapons Anti-Terrorism Act criminalises "whoever knowingly develops, produces, stockpiles, transfers, acquires, retains, or possesses any biological agent, toxin or delivery system for use as a weapon or knowingly assists a foreign State or any organization to do so".⁷²

72. Uruguay's Organisational Law of Armed Forces states that it is forbidden for residents of the republic to possess war material for any purpose. Biological agents are included in this category.⁷³

73. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime.⁷⁴ The commentary on the Code adds that "the following weapons and means of combat are considered to be prohibited: . . . bacteriological agents".⁷⁵

National Case-law

74. In 1995, in a ruling on the constitutionality of AP II, Colombia's Constitutional Court stated in relation to the prohibition on the use of weapons of a nature to cause unnecessary suffering or superfluous injury that:

Although none of the treaty rules expressly applicable to internal conflicts prohibits indiscriminate attacks or the use of certain weapons, the Taormina Declaration

⁶⁹ Tajikistan, *Criminal Code* (1998), Articles 397 and 399, see also Article 405.

⁷¹ UK, *Biological Weapons Act* (1974), Section 1.

⁷² US, *Biological Weapons Anti-Terrorism Act* (1989), § 175.

⁷³ Uruguay, *Organisational Law of Armed Forces* (1974), Article 49.

⁷⁴ SFRY (FRY), *Penal Code as amended* (1976), Article 148(1).

⁷⁵ SFRY (FRY), *Penal Code as amended* (1976), commentary on Article 148(1).

consequently considers that the bans (established partly by customary law and partly by treaty law) on the use of...bacteriological weapons...apply to non-international armed conflicts, not only because they form part of customary international law but also because they evidently derive from the general rule prohibiting attacks against the civilian population.⁷⁶

75. The Report on the Practice of Japan states that there is no national legislation specifically dealing with the prohibition of the use of bacteriological weapons, but that the judgement in the *Shimoda case* held that "bacteria" were part of "prohibited materials" under international law.⁷⁷

Other National Practice

76. In 1989, the Minister of Foreign Affairs of Afghanistan stated that "the Republic of Afghanistan, while once again confirming its pledges on the non-use and elimination of chemical weapons, announces that it will never resort to the production, use, development, storage, or export of... biological weapons".⁷⁸

77. At the CDDH, Algeria supported the Philippine amendment (see *infra*) because "it was a simple reaffirmation of the principles of positive humanitarian law".⁷⁹

78. In 1993, Argentina's Minister of Defence said that "we will not manufacture bacteriological weapons because we deem them immoral".⁸⁰

79. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Australia stated that:

Both conventions have widespread adherence. The Biological Weapons Convention has 131 States parties. The very new Chemical Weapons Convention has already 159 signatories and 40 ratifications or acceptances. The final preambular paragraph to the Biological Weapons Convention expresses the conviction of the States Parties that the use of biological weapons "would be repugnant to the conscience of mankind and that no effort should be spared to minimise this risk". Clearly, this is a strong international statement that the use of such weapons would be contrary to fundamental general principles of humanity.⁸¹

80. In 1992, during a debate in the First Committee of the UN General Assembly, which dealt mostly with the 1972 BWC, Austria stated that the elimination of biological weapons was important.⁸²

81. In 1992, during a debate in the First Committee of the UN General Assembly, Bahrain stated that the Middle East had to be free from biological weapons.⁸³

82. At the Fourth Review Conference of States Parties to the BWC in 1996, Bangladesh affirmed its commitment to “general and complete disarmament”. It added that “any effort to try to contain the spread of weapons of mass destruction, biological weapons included, must be combined with measures for their complete elimination”.⁸⁴

83. In 1970, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), Belarus stated that:

The need for all States without exception to abide, in any armed conflict, by the existing international conventions defining and limiting the means, ways and methods of waging war assumes particular importance. Among these conventions are . . . the Geneva Protocol of 1925.⁸⁵

84. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Belarus ensured “the fulfilment of undertakings assumed by it under articles I, II, III, and IV, and also under the relevant parts of the preamble of the [1972 BWC]”.⁸⁶

85. In 1993, during a debate in the First Committee of the UN General Assembly, Belarus referred to a declaration in which all States which had emerged from the Soviet Union had expressed support for biological disarmament.⁸⁷

86. At the First Review Conference of States Parties to the BWC in 1980, Belgium stated that “with regard to article IV [of the 1972 BWC], Belgium, in common with many other States, had taken the necessary domestic measures, the Belgian Parliament having enacted legislation approving the Convention”.⁸⁸

87. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Benin confirmed that it “has developed no weapon of that kind, and intends to continue to respect its undertakings under the Convention, to which Benin is a party”.⁸⁹

⁸⁸ Belgium, Statement of 7 March 1980 at the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, UN Doc. BWC/CONF.I/SR.6, 7 March 1980, § 3.

⁸⁹ Benin, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 31.

88. In 1994, during a debate in the First Committee of the UN General Assembly, Benin advocated the elimination of bacteriological weapons.⁹⁰

89. At the Fourth Review Conference of States Parties to the BWC in 1996, Brazil stated that biological weapons, "given their sheer destructive force, indiscriminate effects and ghastly human toll . . . have from their inception generated international abhorrence". It further emphasised that it had always been a keen participant in efforts to rid the world of biological weapons. With reference to the BWC, it stated that it had "spared no effort in giving its contribution with a view to perfecting and strengthening this major international instrument".⁹¹

90. In 1991, during a debate in the First Committee of the UN General Assembly, Brunei declared that it had prohibited biological weapons.⁹²

91. At the First Review Conference of States Parties to the BWC in 1980, the representative of Bulgaria stated that:

10. His Government had already informed the Secretary-General of the United Nations that his country had never developed, produced, stockpiled or acquired by other means bacteriological (biological) weapons or toxins, and had stressed that it was strictly observing its commitments under the [1972 BCW]. That policy . . . provided a safeguard against any violations.
11. In the light of the obligations undertaken by . . . Bulgaria in ratifying all the international legal instruments banning or limiting the weapons or means used in armed conflicts, article 415 of the Bulgarian [Penal Code as amended] established severe penalties for anyone who in violation of the existing international rules of conduct in armed conflicts used, or ordered the use of, prohibited methods of warfare.⁹³

92. In 1977, during a debate in the First Committee of the UN General Assembly, Burma declared that the elimination of biological weapons was a goal of the Burmese Socialist Party.⁹⁴

93. At the CDDH, Canada voted against the Philippine amendment (see *infra*) because "the particular weapons are forbidden by international law and their use, other than by way of reprisal, already constitutes a war crime".⁹⁵

94. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Canada stated that "as a matter of national policy and in keeping with the Geneva Protocol of 1925, Canada does not 'develop, produce, stockpile, or otherwise acquire or retain' microbiological agents,

toxins, weapons or other means of delivery for purposes of use in armed conflict".⁹⁶

95. In 1994, during a debate in the First Committee of the UN General Assembly, Canada stated that "biological weapons have no place in this world".⁹⁷

96. At the Fourth Review Conference of States Parties to the BWC in 1996, Canada stressed that it "believes that the time has . . . come to strengthen" the BWC and that "the purpose of the Convention is to prohibit an entire class of abhorred weapons" (i.e. biological weapons).⁹⁸

97. At the Fifth Review Conference of States Parties to the BWC in 2001, Canada, when talking about weapons of mass destruction, especially biological weapons, stated that "we need to make sure that they are never used". It added that biological weapons "cannot even be weapons of last resort, for their very preparation is banned".⁹⁹

98. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Cape Verde stated that it "has never been in violation of the provisions of Articles I, II, III, IV, V and X of the Convention on biological weapons and respects the obligations undertaken pursuant to the above-mentioned articles".¹⁰⁰

99. In 1992, during a debate in the First Committee of the UN General Assembly, which dealt mostly with the 1972 BWC, Chile referred to the 1991 Mendoza Declaration on Chemical and Biological Weapons, stating that "the region's participation in the Mendoza Accord on the complete prohibition of . . . biological weapons is an unequivocal demonstration of the will for disarmament that inspires the countries of South America".¹⁰¹

100. In 1986, during a debate in the UN Security Council on the Iran–Iraq War, China held that it "consistently opposed the use of . . . bacteriological . . . weapons at any place and time".¹⁰²

101. In 1991, during a debate in the First Committee of the UN General Assembly, China stated that it had always "stood for the complete prohibition of . . . biological weapons".¹⁰³

⁹⁶ Canada, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 33, Article I.

¹⁰² China, Statement before the UN Security Council, UN Doc. S/PV.2666, 24 February, pp. 29–30.

¹⁰³ China, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/46/PV.9, 21 October 1991, p. 15.

102. A White Paper issued by the Information Office of the State Council of the People's Republic of China in 1995 states that China has consistently advocated the complete prohibition and thorough destruction of biological weapons. It opposes the production of biological weapons by any country and their proliferation in any form by any country. In 1984, China acceded to the 1972 BWC, and "since that date it has fully and conscientiously fulfilled its obligations under the convention".¹⁰⁴

103. At the Fourth Review Conference of States Parties to the BWC in 1996, China stated that it:

has all along stood against the arms race and for genuine disarmament, for the complete prohibition and thorough destruction of all weapons of mass destruction such as... biological weapons. The Chinese government gives full confirmation to the active role of the Convention, always supports the purposes and objectives of the Convention, and faithfully fulfils its obligations assumed as a State Party. China does not develop, produce, equipment or means of delivery prohibited under Article I of the Convention. China has always been against the proliferation of biological weapons and related technology. China has never in any way encouraged, assisted or induced any state, group of states or international organisation to conduct activities prohibited under the Convention.¹⁰⁵

104. At the Fifth Review Conference of States Parties to the BWC in 2001, China stated that it

is in favour of the complete prohibition and the thorough destruction of biological... weapons. Based on this very position, the Chinese government attaches great importance to the Convention and has always abided strictly its provisions in a serious and comprehensive manner.

It added that China "supports the effort to strengthen the effectiveness of the Convention. To this end, China has, since 1991, deeply involved itself in in-depth studies and exploration of possible verification measures within the Ad Hoc Group of Governmental Experts."¹⁰⁶

105. At the Fifth Review Conference of States Parties to the BWC in 2001, Croatia asked for the "immediate re-commencement of the work of the Ad Hoc Group, in whatever form delegations see fit".¹⁰⁷

106. In 1991, in a debate preceding UN Security Council Resolution 699 concerning the destruction of biological weapons in Iraq, Cuba stated that it favoured the "universal elimination of... biological weapons".¹⁰⁸

¹⁰⁴ White Paper on arms control and disarmament in China issued by the People's Republic of China, 16 November 1995, Xinhua News Agency, Beijing, as translated in BBC-SWB, 17 November 1995.

¹⁰⁵ China, Statement of 26 November 1996 at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

¹⁰⁷ Croatia, Statement of 19 November 2001 at the Fifth Review Conference of States Parties to the BWC, Geneva, 19 November–7 December 2001.

¹⁰⁸ Cuba, Statement before the UN Security Council, UN Doc. S/PV.2994, 17 June 1991, p. 23.

107. At the Fourth Review Conference of States Parties to the BWC in 1996, Cuba expressed the hope that the work of the Conference would lead to the crystallisation of the proposal to liberate the world of biological weapons.¹⁰⁹

108. In 1997, Cuba alleged that a US State Department aircraft, apparently on an approved flight to Grand Cayman Island, had dispensed Thrips Palmi insecticide over Cuba, which caused significant crop damage.¹¹⁰ The US Department of State categorically denied “the outrageous charges made by the Cuban Government” and noted that it had “not engaged in any act which would be in violation” of the 1972 BWC and that it had “unilaterally destroyed all stockpiled biological agents prior to entry into force of the Convention”.¹¹¹

109. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Cyprus stated that it “fully complies with the provisions of the Convention, as the Republic of Cyprus does not have at its disposal weapons of any such nature”.¹¹²

110. At the Second Review Conference of States Parties to the BWC in 1986, Czechoslovakia stated that it “fully complies with the obligations enshrined in its provisions and does not carry any weapons of that sort”.¹¹³

111. At the 733rd plenary meeting in Geneva of the Conference on Disarmament in 1996, the Czech Republic stated that it:

attaches great importance to the prohibition, elimination and non-proliferation of biological and toxin weapons. It regards the BWC as a binding international document and although it neither possesses nor develops any kind of biological weapons, it has been annually providing all necessary data in the form of non-mandatory declarations.¹¹⁴

112. At the Fifth Review Conference of States Parties to the BWC in 2001, the Czech Republic underlined “the importance the country attaches to the BWC and strict compliance with its terms and provisions”.¹¹⁵

113. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Denmark stated that:

¹⁰⁹ Cuba, Statement of 26 November 1996 at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

¹¹⁵ Czech Republic, Statement of 20 November 2001 at the Fifth Review Conference of States Parties to the BWC, Geneva, 19 November–7 December 2001.

Prior to ratification of the [1972 BWC], the Danish governmental departments concerned ascertained that no legislation, amendments of existing national law or other measures would be necessary in order to secure compliance with the obligations of the Convention. Accordingly, the requirements contained in the 1972 BWC have been implemented in Danish law and practice.¹¹⁶

114. In 1988, in a statement before the Fifteenth Special Session of the UN General Assembly, Ecuador stated that “among disarmament measures, Ecuador believes that priority should be given to the following: . . . a complete ban on the testing or production of new weapons of mass destruction, including . . . biological [weapons]”.¹¹⁷

115. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, Ecuador stated that “it is . . . timely to insist on observance of the international agreements which prohibit the use of asphyxiating and toxic gases and bacterial warfare and which seek the universal elimination of chemical and biological weapons”.¹¹⁸

116. At the CDDH, Egypt expressed “its disappointment at the failure of the Philippine amendment, establishing as a grave breach the use of prohibited weapons, to be adopted”, but noted that Article 74 of draft AP I (now Article 85) “as it stands now does cover the use of such weapons through their effects”.¹¹⁹

117. At the CDDH, Finland stated that it “attached the greatest importance . . . to the prohibition of . . . bacteriological warfare in the Geneva Protocol of 1925”.¹²⁰

118. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Finland stated that:

With regard to the compliance by the Government of Finland to articles I–V and X, I wish to communicate the following information: (1) the obligations set out in articles I–III have been complied with; (2) the legislation of Finland is in harmony with the obligations set out in article IV.¹²¹

119. At the Conference for the Supervision of the International Trade in Arms and Ammunition and in Implements of War in 1925, France, with regard to a Polish proposal to extend the prohibition contained in what became the 1925

¹¹⁶ Denmark, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 36.

¹²⁰ Finland, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 285, § 34.

¹²¹ Finland, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 37.

Geneva Gas Protocol to bacteriological warfare (see *infra*), begged “to second the Polish proposal”.¹²²

120. At the Second Review Conference of States Parties to the BWC in 1986, France stated that it:

had not initially signed the BWC taking a critical view of the lack of provisions relating to verification, it nevertheless recognised the importance of its purpose. It therefore adopted at the national level provisions similar to those of the Convention with regard to the prohibition of the development, production and stockpiling of bacteriological (biological) and toxin weapons and their destruction. Thus, since that date France has for its part assumed the obligations in this field stemming from the Convention of 10 April 1972.

Accordingly, it added, all technological research and work on biological weapons have been interrupted. The biological agents and toxins produced have been destroyed. Since then no research has been undertaken on the production for hostile purposes of biological or toxin weapons or on the dissemination of such agents. No aid has been given to third countries in these fields. Therefore, France has fulfilled all the obligations stemming from Articles I, II, III, and IV since 1972, in other words, well before its accession to the Convention (27 September 1984).¹²³

121. In 1991, during a debate in the UN Security Council preceding the adoption of Resolution 699 concerning the destruction of biological weapons in Iraq, France held that the ban on Iraqi possession of biological weapons was carried out with the perspective of regional and global disarmament.¹²⁴

122. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, the GDR stated that:

Being a Party to the [1972 BWC], the German Democratic Republic has been fulfilling conscientiously its obligations deriving from the provisions of the Convention. Since the GDR has not developed, produced, stockpiled or otherwise acquired or retained such agents, toxins, weapons, equipment or means of delivery as specified in article I, the ruling in article II calling for their destruction and diversion to peaceful purposes is not applicable.

... Violations by individuals of the provisions of the Convention are to be regarded as impossible to occur so that, for its part, the German Democratic Republic definitely can declare that the Convention is being strictly observed.¹²⁵

123. At the First Review Conference of States Parties to the BWC in 1980, the representative of the GDR stated that:

¹²² France, Statement of 8 June 1925 at the Conference for the Supervision of the International Trade in Arms and Ammunition and in Implements of War, Geneva, 4 May–17 June 1925, League of Nations, Records of the Conference, Doc. A.13.1925.IX, September 1925, p. 341.

¹²³ France, Statement at the Second Review Conference of States Parties to the BWC, Geneva, 8–26 September 1986, UN Doc. BWC/CONF.II/3Add. 5, 25 August 1986, pp. 1–2.

¹²⁴ France, Statement before the UN Security Council, UN Doc. S/PV.2981, 3 April 1991, p. 92.

¹²⁵ GDR, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 38.

His country had been among the first to accede to the [1972 BWC] and... it had strictly abided by the obligations it had thereby assumed. His Government held the view that the Convention also covered the prohibition of all new scientific and technological developments in the field of microbiological and other biological agents and toxins and recombinant DNA techniques. The Convention thus prohibited their misuse for military purposes.¹²⁶

124. In 1983, the German government declared in parliament that biological weapons were as such prohibited.¹²⁷

125. At the Second Review Conference of States Parties to the BWC in 1986, the FRG stated that it had:

never researched, developed, produced, stockpiled or otherwise acquired or retained microbial or other biological agents or toxins of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes, as well as weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict... Furthermore, in 1954 the Federal Republic of Germany gave an internationally binding pledge within the WEU not to manufacture... biological... weapons... The legislation in force in the Federal Republic of Germany guarantees observance of the Convention's provisions.¹²⁸

126. In 1968, during a debate in the First Committee of the UN General Assembly, Ghana supported the prohibition of all biological weapons.¹²⁹

127. At the First Review Conference of States Parties to the BWC in 1980, Ghana stated that it "had abided strictly by its obligations under the [1972 BWC] and, as a developing country, had no intention of developing bacteriological weapons".¹³⁰

128. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Greece stated that it "complies with and applies the obligations set out in Articles I, II, III, IV, V and X" of the 1972 BWC.¹³¹

129. In 1992, during a debate in the First Committee of the UN General Assembly, which dealt mostly with the 1972 BWC, Guinea stated that Africa "should also become a region free from biological weapons".¹³²

130. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Hungary declared that it:

¹²⁶ GDR, Statement of 6 March 1980 at the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, UN Doc. BWC/CONF.I/SR.5, 10 March 1980, § 16.

¹²⁷ Germany, Lower House of Parliament, Reply by the government to a question in parliament, *Kriegsvölkerrechtliche Verträge*, 5 October 1983, *BT-Drucksache* 10/445, 1983, p. 14.

¹²⁸ FRG, Statement at the Second Review Conference of States Parties to the BWC, Geneva, 8–26 September 1986, UN Doc. BWC/CONF.II/3/Add. 3, 25 August 1986, p. 2.

¹²⁹ Ghana, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1614, 21 November 1968, p. 6.

¹³⁰ Ghana, Statement of 7 March 1980 at the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, UN Doc. BWC/CONF.I/SR.7, 11 March 1980, § 19.

¹³¹ Greece, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 39.

¹³² Guinea, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/47/PV.3, 12 October 1992, p. 59.

has never been in possession of any agents, toxins, weapons, equipment or means of delivery specified in article I of the Convention, and as a Party to the Convention has always complied and continues to comply fully and in good faith with [articles I, II, III, IV, V and X] of the Convention.¹³³

131. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, India stated that “as a party to the Biological Weapons Convention, India continues to comply with all the obligations under the Convention”.¹³⁴

132. At the Fourth Review Conference of States Parties to the BWC in 1996, India stated that “it has been our consistent belief that the only certain defence against the inhumane weapons is their destruction and total elimination”.¹³⁵

133. At the Fifth Review Conference of States Parties to the BWC in 2001, India expressed its feeling that “the comprehensive legal norm against biological weapons, embodied by the Biological and Toxins Convention, needs to be strengthened”.¹³⁶

134. At the Fourth Review Conference of States Parties to the BWC in 1996, Indonesia stated that “biological . . . weapons have no place in today’s world and should be considered things of the past”.¹³⁷

135. The Guidance Book in the Field for the Indonesian Army concerning the Use of Biological Weapons states that the use of biological weapons is prohibited.¹³⁸

136. At the Fourth Review Conference of States Parties to the BWC in 1996, Iran stated that it believed in a total ban on the use of biological weapons which was explicit and devoid of judgemental interpretations. It noted that:

The use of biological weapons is already in contradiction to the provisions and the spirit of the 1925 Geneva Protocol and the BWC. In fact, the predominant *Opinio Juris* considers the prohibition of use a matter of customary international law. Yet, lack of explicit reference in the Convention on the one hand, and persistence of reservations on the Geneva Protocol on the other, can leave the door ajar for those who have held a different opinion in the past or may perhaps continue to do so in future.¹³⁹

¹³³ Hungary, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 40.

¹³⁴ India, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 41.

¹³⁹ Iran, Statement of 26 November 1996 at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

137. At the Fifth Review Conference of States Parties to the BWC in 2001, Iran recalled the “urgent need for an international legally binding instrument, for the strengthening of the Convention to be followed by establishment of an organisation in order to implement its provisions”. It added that it “supported the Ad Hoc Group negotiation and expected the successful conclusion and final adoption of a protocol”. According to Iran, the fact that the use is not expressly included in the Convention can be solved by using one of these alternatives: “insert the clause ‘use’ in the title and Article I, or the reservation to Geneva Protocol be withdrawn”.¹⁴⁰ Furthermore, while exercising its right of reply, it accused the US of not complying with its obligation by “transferring deadly agents to Israel and other allies as well as conducting research and development in the area of biological weapons”.¹⁴¹

138. In 1991, during a debate in the UN Security Council preceding the adoption of Resolution 699 concerning the destruction of biological weapons in Iraq, Iraq stated that it accepted not to “use, develop, manufacture or acquire any material referred to in the resolution”.¹⁴²

139. At the CDDH, Italy abstained in the vote on the Philippine amendment (see *infra*) stating that “it would not be useful because it dealt with means and methods of warfare which were already prohibited by the existing law”.¹⁴³

140. The Japanese army allegedly disseminated cholera and plague pathogens in several incidents in the USSR and Mongolia in the period 1939–1940 and in China between 1940 and 1944. These allegations were documented by Dr Robert Lim, the then head of the Chinese Red Cross, Dr R. Pollitzer, a League of Nations epidemiologist stationed in Hunan Province at the time of the alleged attacks, Dr P. Z. King, Director General of the Chinese National Health Administration, and a number of other sources.¹⁴⁴

141. In 1968, during a debate in the First Committee of the UN General Assembly, Japan stated that it should not only be prohibited to use biological weapons, but that this prohibition should also cover production and stockpiling.¹⁴⁵

¹⁴⁰ Iran, Statement of 19 November 2001 at the Fifth Review Conference of States Parties to the BWC, Geneva, 19 November–7 December 2001.

¹⁴⁵ Japan, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1616, 22 November 1968, p. 8.

142. In 1992, during a debate in the First Committee of the UN General Assembly, Japan stated that it “attached great importance to the prohibition of biological weapons”.¹⁴⁶

143. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Japan stated that the 1925 Geneva Gas Protocol and the 1972 BWC “and similar laws all rest on the desire to prevent the most irrational deeds of humankind. International law has always sought to play a humanitarian role.”¹⁴⁷

144. At the Fourth Review Conference of States Parties to the BWC in 1996, Japan stated that “it is extremely important that more countries accede to the Convention so that we can achieve the desired universality”.¹⁴⁸

145. At the Fifth Review Conference of States Parties to the BWC in 2001, Japan stated that it had “undertaken legislative measures to strengthen the national legislation with further punitive actions against those who use biological weapons as well as those who disseminate biological agents and toxins”.¹⁴⁹

146. At the CDDH, Jordan supported the principle behind the Philippine amendment (see *infra*), but stated that “it would be more generally acceptable if it were amended to apply only to the first user of weapons prohibited by international conventions”.¹⁵⁰

147. In 1994, during a debate in the First Committee of the UN General Assembly, South Korea stated that it was dedicated to the elimination of biological weapons.¹⁵¹

148. At the Fourth Review Conference of States Parties to the BWC in 1996, South Korea stated that “the Republic of Korea, since it acceded in 1987, has faithfully implemented the obligations and duties under the BWC”. It added that it “has never developed, produced, stockpiled or otherwise acquired or retained any biological agents, nor the means for their delivery”. It further stated that the need for a legally binding verification regime of the BWC “has been reaffirmed in the light of the recent evidence that biological materials have been illegally acquired and developed by some states parties to the BWC, and sub-state organisations”.¹⁵²

149. At the Fifth Review Conference of States Parties to the BWC in 2001, South Korea stated that it “has faithfully implemented its obligations and duties under the BWC since its accession to it in 1987”.¹⁵³

150. According to the Report on the Practice of South Korea, South Korea is of the opinion that the prohibition of the use of biological weapons is customary.¹⁵⁴

151. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Kuwait stated that it supported “the prohibition of all weapons, including biological weapons, which caused mass destruction and genocide”.¹⁵⁵

152. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Kuwait stated that:

With regard to Article I of the Biological Weapons Convention, Kuwait has not developed, produced or stockpiled such weapons or placed them at the disposal of its armed forces. Kuwait has not in any manner used microbial or other biological agents or toxins for non-peaceful purposes.

Kuwait does not intend to acquire or retain weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict.¹⁵⁶

153. In 1993, during a debate in the First Committee of the UN General Assembly, Kuwait said it supported all international efforts to destroy weapons of mass destruction.¹⁵⁷

154. In an article published in a military review, a member of the Kuwaiti armed forces stated that, during war, belligerents must:

respect restrictions and limits provided for in international conventions, such as restriction of the use of some weapons, and prohibition of using others, e.g. . . . biological weapons . . . This is in application of well-established principles in wars, such as considerations of military honour and humanitarian considerations.¹⁵⁸

155. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Laos stated that it:

has rigorously observed the relevant provisions of [the 1972 BWC] and favours their strict application in order to contribute to the cause of general and complete

disarmament. Furthermore, the Lao People's Republic has conducted no scientific or technical research with a view to developing and manufacturing such weapons.¹⁵⁹

156. In 1993, during a debate in the First Committee of the UN General Assembly, Lebanon held that a local ban on biological weapons was part of the concept of a global ban on the same weapons.¹⁶⁰

157. In 1991, during a debate in the First Committee of the UN General Assembly, Libya expressed its belief that there was a "need to prevent the human race from . . . biological warfare".¹⁶¹

158. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1972 BWC, Libya supported an Egyptian initiative for a Middle East zone free of weapons of mass destruction.¹⁶²

159. In 1993, during a debate in the First Committee of the UN General Assembly, Libya supported a regional ban on weapons of mass destruction.¹⁶³

160. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Malaysia stated that "biological weapons . . . have been banned".¹⁶⁴ In a part entitled "Principle of Non-Toxicity", Malaysia also referred to the 1925 Geneva Gas Protocol and the 1956 New Delhi Draft Rules.¹⁶⁵ Malaysia made the same reference in its oral pleadings in the *Nuclear Weapons case* in 1995.¹⁶⁶

161. At the Fourth Review Conference of States Parties to the BWC in 1996, Malta stated that it "strongly supports the BWC and is firmly committed to the total and comprehensive banning of biological weapons and to the control of the spread and use of such weapons".¹⁶⁷

162. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Mexico noted:

a series of international instruments . . . [which] led to a prohibition on the use of certain weapons. Such instruments included . . . the Protocol of 1925 for the

¹⁵⁹ Laos, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.I/4, 20 February 1980, § 43.

prohibition of the use in war . . . of bacteriological methods of warfare (The Geneva Gas Protocol); and the Convention on the prohibition of the development, production and stockpiling of bacteriological (biological) and toxin weapons and their destruction of 10 April 1972, etc.¹⁶⁸

163. At the Fifth Review Conference of States Parties to the BWC in 2001, Mexico stated that “the 1972 Convention broadens the provisions of the 1925 Protocol and renders obsolete the reservations that had restricted the latter to an instrument of first use prohibition”. It encouraged “the States that have not yet done so to withdraw these reservations”. It also urged that the “goal must be to review and strengthen the compliance with the regime on the prohibition of biological weapons to protect nations and individuals from the risk of the possible use of weapons of mass destruction”.¹⁶⁹

164. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Mongolia stated that, as a party to the 1972 BWC, it “strictly complies with all the obligations under the Convention and particularly with Articles I, II, III, IV, V and X of the said Convention”.¹⁷⁰

165. At the First Review Conference of States Parties to the BWC in 1980, the representative of New Zealand stated that “since New Zealand possessed none of the weapons or delivery systems referred to in article I of the [1972 BWC], his Government had not considered it necessary to enact any special legislation prohibiting the activities in question”.¹⁷¹

166. At the Fourth Review Conference of States Parties to the BWC in 1996, New Zealand stressed that it was “strongly committed to the BWC”. Moreover, it stated that it was very conscious that:

[B]iological weapons pose as great a threat to humanity as nuclear weapons. But they are much easier to manufacture and conceal. For that reason States Parties to the Convention have a major responsibility to strengthen the Convention and establish a mechanism to ensure that the Parties to the Convention comply with its prohibition.¹⁷²

167. At the First Review Conference of States Parties to the BWC in 1980, Nigeria reported that it “had complied fully with its obligations under the [1972 BWC]. As Nigeria did not possess biological weapons, as defined in article I, it

¹⁷¹ New Zealand, Statement of 7 March 1980 at the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, UN Doc. BWC/CONF.I/SR.6, 7 March 1980, § 13.

¹⁷² New Zealand, Statement of 25 November 1996 at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

followed that it had no such weapons to destroy, as required by article II, or, indeed, to transfer."¹⁷³

168. In 1995, during a debate in the First Committee of the UN General Assembly, Nigeria stated that it was committed to the total prohibition of biological weapons.¹⁷⁴

169. At the Fourth Review Conference of States Parties to the BWC in 1996, Nigeria stated that "it is our hope that all weapons of mass destruction – be they biological... – will be under ban, their production prohibited and their transfer and use outlawed".¹⁷⁵

170. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Norway stated that it "has never developed, produced or stored any biological weapons, and has never had the intention of using such weapons in a conflict (arts. I and II)".¹⁷⁶

171. At the Fifth Review Conference of States Parties to the BWC in 2001, Norway stated that "a multilateral, legally binding instrument is needed now more than ever to fill the existing gap in the non-proliferation regime". It stated that such a legally binding instrument were "very important aspects of our fight against the use, or threat of use, of biological weapons".¹⁷⁷

172. At the Fourth Review Conference of States Parties to the BWC in 1996, Pakistan stated that "the 1925 protocol and the BWC is a manifestation of a moral and cultural ethos that is over 1400 years old".¹⁷⁸

173. At the Fifth Review Conference of States Parties to the BWC in 2001, Pakistan stated that it "has been fully abiding by all the provisions of the BWC".¹⁷⁹

174. In 1991, during a debate in the First Committee of the UN General Assembly, Peru stated that it had invited the countries of the Rio Group to reach an agreement on the prohibition of biological weapons.¹⁸⁰

175. At the CDDH, the Philippines proposed an amendment to include "the use of weapons prohibited by International Conventions, namely: ... bacteriological methods of warfare" in the list of grave breaches in Article 74 of draft

¹⁷³ Nigeria, Statement of 7 March 1980 at the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, UN Doc. BWC/CONF.I/SR.7, 11 March 1980, § 13.

AP I (now Article 85).¹⁸¹ The proposal was rejected because it failed to obtain the necessary two-thirds majority (41 votes in favour, 25 against and 25 abstentions).¹⁸²

176. The Report on the Practice of the Philippines states with reference to the prohibition of biological weapons that “the country holds such prohibition customary”.¹⁸³

177. At the Conference for the Supervision of the International Trade in Arms and Ammunition and in Implements of War in 1925, Poland proposed to complete what became the 1925 Geneva Gas Protocol as follows:

In the third paragraph of the draft concerning chemical warfare, we would say: “declare that the High Contracting Parties, so far as they are not already parties to treaties prohibiting such use, accept this prohibition, and extend it to means of bacteriological warfare, and agree to be bound thereby as between themselves.”¹⁸⁴

178. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Poland stated that it “does not conduct any activities contrary to the provisions of [the 1972 BWC] and that the bacteriological and toxin weapons have never been nor are at present part of the equipment of its armed forces”.¹⁸⁵

179. At the Fifth Review Conference of States Parties to the BWC in 2001, Poland confirmed its “strong and constant support for the Biological and Toxins Weapons Convention... especially for the work on effectiveness and implementation of the Convention”.¹⁸⁶

180. At the Fourth Review Conference of States Parties to the BWC in 1996, Romania stated that:

The BWC together with complementary efforts aimed at the non-proliferation of biological and toxin weapons constitutes at present and in the years to come one of the main pillars of international stability and security, both at regional and global

¹⁸⁵ Poland, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. BWC/CONF.1/4, 20 February 1980, § 46.

¹⁸⁶ Poland, Statement of 20 November 2001 at the Fifth Review Conference of States Parties to the BWC, Geneva, 19 November–7 December 2001.

levels. To that effect, Romania . . . has a consistent policy of strict observance of the provisions of the Convention and the export controls of biological agents, equipment and technologies which could be used for the production of biological and toxin weapons.

Strongly supporting the view that export controls are an essential lever of enforcing non-proliferation, Romania has established the necessary mechanisms, procedures and lists of items, all similar to those convened within existing international non-proliferation regimes.

...

We re-emphasize the significance of this international norm against biological and toxin weapons, the importance of full implementation by all parties of the provisions of the Convention, as well as the need to make all efforts to secure universal adherence to [the] BWC.¹⁸⁷

181. At the Fifth Review Conference of States Parties to the BWC in 2001, Russia asserted that it was standing "for creating a verification mechanism on a multilateral basis".¹⁸⁸

182. According to the Report on the Practice of Rwanda, Rwanda has prohibited the use of bacteriological means of warfare as stipulated by the 1925 Geneva Gas Protocol.¹⁸⁹

183. In 1968, during a debate in the First Committee of the UN General Assembly, Saudi Arabia advocated a total prohibition of the use and production of biological weapons.¹⁹⁰

184. In 1993, during a debate in the First Committee of the UN General Assembly, Saudi Arabia stated that it had worked tirelessly to reach a global elimination of weapons of mass destruction.¹⁹¹

185. In 1995, during a debate in the First Committee of the UN General Assembly, Saudi Arabia stated that it supported "all treaties and conventions that aim at eliminating all types of weapons of mass destruction, including biological weapons".¹⁹²

186. At the Fourth Review Conference of States Parties to the BWC in 1996, South Africa declared that it remained "committed to achieving a world free of all weapons of mass destruction and to addressing the proliferation of conventional weapons". It also reaffirmed its "commitment to strengthening the BWC by establishing a verifiable compliance protocol for the Convention".¹⁹³

¹⁹³ South Africa, Statement of 26 November 1996 at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

187. At the Fifth Review Conference of States Parties to the BWC in 2001, South Africa stated that “the use of disease – in this case anthrax – as a weapon of terror should... be condemned in the strongest possible terms”. It further emphasised:

the importance of the work that had been undertaken to negotiate a legally binding Protocol to strengthen the implementation of the Convention... South Africa continues to see the strengthening of the implementation of the BWC as a core element of the international security architecture.¹⁹⁴

188. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Spain stated that “since Spain is not developing or producing bacteriological (biological) or toxin weapons or acquiring them from any other country, the conditions referred to in articles I, II, III, IV, V and X of the [1972 BWC] do not exist [for Spain]”.¹⁹⁵

189. In 1968, during a debate in the First Committee of the UN General Assembly, Sweden advocated a process leading to a total prohibition of the use, production and stockpiling of biological weapons.¹⁹⁶

190. In 1970, during a debate in the Third Committee of the UN General Assembly, Sweden stated that “the rationale for a comprehensive ban on biological weapons in international armed conflicts would seem to be equally valid in internal armed conflicts. At all events, there should be no hesitation in imposing a complete ban in internal conflicts.”¹⁹⁷

191. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Sweden stated that “all weapons could be used indiscriminately, but some were incapable of being directed at military objectives alone. One example was bacteriological weapons: germs could not distinguish between soldiers and civilians.”¹⁹⁸

192. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Sweden stated that:

In 1970 the Swedish Government declared that Sweden does not possess and does not intend to acquire biological... weapons. National investigations in 1974 showed that no ongoing activity violated the provisions of the [1972 BWC]...

... The prohibition of the development and production of biological and toxin weapons is covered by national Swedish legislation passed in 1935 on the control of production of war materials according to which no such production may take place

without the Government's permission. The provisions of the Convention concerning stockpiling, acquisition and possession of these weapons have not resulted in any special legislation. The provisions may, as necessary, be enforced in accordance with national legislation of 1974 on the handling of dangerous goods.¹⁹⁹

193. In 1991, during a debate in the First Committee of the UN General Assembly, Sweden urged States to withdraw reservations to the 1925 Geneva Gas Protocol in order to make "it possible finally to exclude the possibility that biological weapons may be used in the future".²⁰⁰

194. At the CDDH, Switzerland voted in favour of the Philippine amendment (see *supra*) because:

It would be a step forward to state expressly that any violation of The Hague Declaration of 1899 and the Geneva Protocol of 1925 would constitute a grave breach. The rules laid down in those two instruments were undisputed and indisputable, and the amendment would have a deterrent effect on any State tempted to violate them, by exposing the members of its armed forces to the penalties applicable under the Geneva Conventions.²⁰¹

195. At the First Review Conference of States Parties to the BWC in 1980, Switzerland stated that:

Since it had possessed no bacteriological or toxin weapons before the conclusion of the [1972 BWC], Switzerland had had no stocks to destroy. With regard to the other States parties, he regretted that they had not all given formal assurances on that point. The Swiss army actually had a biological branch, but its sole purpose was to care for the health of army personnel; it would play only a protective role if bacteriological weapons were used against Switzerland in an armed conflict.²⁰²

196. At the Fourth Review Conference of States Parties to the BWC in 1996, Switzerland stated that it had never equipped itself with biological weapons and that its research in this field was strictly limited to protective measures. It further stated that since 30 June 1972, it had enacted a law which subjects the production, importation and exportation of all weaponry to authorisation.²⁰³

¹⁹⁹ Sweden, Response to the request by the Preparatory Committee for the First Review Conference of States Parties to the BWC, Geneva, 3–21 March 1980, excerpted in UN Doc. 197. In 1993, during a debate in the First Committee of the UN General Assembly, Syria advocated a proposal to make the Middle East a zone free from weapons of mass destruction.²⁰⁴

198. In 1994, during a debate in the First Committee of the UN General Assembly, Syria supported an initiative to make the Middle East a zone free from weapons of mass destruction.²⁰⁵

199. At the Fifth Review Conference of States Parties to the BWC in 2001, Thailand declared that it had “always solemnly adhered to our commitments under the BWC”.²⁰⁶

200. In 1991, during a debate in the First Committee of the UN General Assembly, Tunisia advocated a complete ban on biological weapons.²⁰⁷

201. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Turkey stated that “no weapons, equipment or other materials that are the subject of the [1972 BWC] exist within the Turkish Armed Forces”.²⁰⁸

202. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, Ukraine stated that “the Ukrainian SSR is fully complying with its obligations under articles I, II, III, IV, V and X of the [1972 BWC], taking into account the relevant parts of the preamble to the Convention”.²⁰⁹

203. In 1994, during a debate in the First Committee of the UN General Assembly, Ukraine stated that it wanted to “rid the densely populated European continent, as well as other regions, of these deadly weapons by the beginning of next century”.²¹⁰

204. At the Fifth Review Conference of States Parties to the BWC in 2001, Ukraine stated that it “fully complies with its obligations under the Convention and has never had the intention to develop, produce, stockpile or acquire in any way the biological weapons, equipment or means of its delivery”.²¹¹

205. In 1970, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), the USSR stated that:

The use of . . . bacteriological methods of warfare . . . was prohibited by the Geneva Protocol of 17 June 1925. The United States signed that Protocol, but did not ratify it. However, that does not mean that the prohibition of the use of poisonous substances does not extend to the United States. That prohibition has become a generally recognized rule of international law, and countries which violate it must bear responsibility before the international community.²¹²

206. In 1970, during a debate in the Third Committee of the UN General Assembly, the USSR stated that the 1925 Geneva Gas Protocol was fully applicable in situations where freedom fighters struggled for liberation against colonial powers.²¹³

207. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, the USSR stated that:

In accordance with the law and practice of the Soviet Union, compliance with the provisions of the [1972 BWC] which was ratified by a Decree of the Presidium of the Supreme Soviet of the USSR dated 11 February 1975 is guaranteed by the appropriate State institutions of the USSR. The Soviet Union does not possess any of the bacteriological (biological) agents or toxins, weapons, equipment or means of delivery mentioned in article I of the Convention. Thus, the implementation of articles I, II, III and IV of the Convention is reliably ensured.²¹⁴

208. In 1987, during a debate in the First Committee of the UN General Assembly, the USSR stated that "measures to consolidate the regime of the 1925 Geneva Protocol prohibiting the use of bacteriological weapons in war are in the interest of all".²¹⁵

209. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, the USSR, with regard to UN Security Council resolution 687 (1991), stated that:

The most acute issue is that of creating an effective barrier against the use of weapons of mass destruction in that region. From that viewpoint, of great importance are the provisions in the resolution regarding Iraq's destruction of . . . biological weapons . . . and in the context of Iraq's confirmation of its obligations of the Geneva Protocol of 1925 to bring into play the International Atomic

Energy Agency... It is also important that all Middle Eastern countries accede to... those international agreements prohibiting... biological weapons.²¹⁶

210. The development of a biological weapons programme by the USSR between 1973 and 1992 was widely documented and detailed in a number of different sources.²¹⁷ The Chairman of the Presidential Committee on Chemical and Biological Weapons Problems, in response to a question about Soviet non-compliance with the 1972 BWC, said in an interview published in the journal *Rossiyskiye Vesti* in 1992 that:

Indeed, these clear violations... were only admitted after the totalitarian regime collapsed and duplicity in politics was abandoned. We admitted that after the convention was ratified, the offensive programs in the area of biological warfare were not immediately curtailed, research in this area continued, and production went on... The first palpable move... toward the offensive programs finally being wound down was made in 1985 when it was proposed that the Soviet Union present a report to the United Nations on its compliance with the convention. At this time research also began to be wound down, and the equipment for producing biological preparations began to be dismantled. But this winding down process went on for several years. The remnants of the offensive programs in the area of biological weapons were still around as recently as 1991. It was only in 1992 that Russia absolutely stopped this work.²¹⁸

211. During a tripartite meeting on biological weapons held in Moscow in September 1992 between Russia, UK and US, the Russian President admitted that Russia had conducted an offensive biological warfare programme in violation of the 1972 BWC.²¹⁹ However, the Russian government stated that it had taken steps to resolve compliance concerns, stating that it:

A. Noted that President Yeltsin had issued on 11 April 1992 a decree on securing the fulfilment of international obligations in the area of biological weapons. This affirms the legal succession of the Russian Federation to the obligations of the Convention and states that the development and carrying out of biological programs in violation of the Convention is illegal. Pursuant to that decree, the Presidential Committee on Convention-related problems of chemical weapons and biological weapons was entrusted with the oversight of the implementation of the 1972 Convention in the Russian Federation.

B. Confirmed the termination of offensive research, the dismantlement of experimental technological lines for the production of biological agents, and the closure of the biological weapons testing facility...

...

This means: work was under way, and we were deceived", *Izvestiya*, Moscow, 27 April 1992, p. 1, as translated from Russian in BBC-SWB, 30 April 1992.

²¹⁹ J. Dahlburg, "Russia Admits it Violated Pact on Biological Warfare", *Los Angeles Times*, 15 September 1992, p. A1.

H. The Russian Parliament has recommended to the President of the Russian Federation that he propose legislation to enforce Russia's obligations under the 1972 Convention.

As a result of these exchanges, Russia agreed to the followings steps:

A. Visits to any non-military biological site at any time in order to remove ambiguities, subject to the need to respect proprietary information on the basis of agreed principles. Such visits would include unrestricted access, sampling interviews with personnel, and audio and video taping. After initial visits to Russian facilities there will be comparable visits to such US and UK facilities on the same basis.

B. The provision, on request, of information about dismantlement accomplished to date.

In addition, the three governments agreed to create working groups to examine several different issues, including the establishment of a system of reciprocal visits to military biological facilities; a review of potential monitoring mechanisms for the 1972 BWC; consideration of cooperation in developing biological weapons defence and "consideration of an exchange of information on a confidential, reciprocal basis concerning past offensive programmes not recorded in detail in the declarations to the UN".²²⁰

212. On Primetime Live in 1998, the former First Deputy Director of Biopreparat from 1988 to 1992, Dr Kanatjan Alibekov (a.k.a. Ben Alibek), stated that in Russia, under the guise of the development of defensive biological weapons, research continued on new biological agents. In Moscow, this allegation was described as "sheer nonsense" by one member of the President's Committee on CBW Convention Problems, who also said that "Russia has carried out no research and development of biological weapons since all work in the field was cancelled in 1990".²²¹ The Russian Defence Ministry also issued a denial, saying that Russia "scrupulously observes" the 1972 BWC.²²²

213. In 1998, a Russian Foreign Ministry spokesman told a news briefing that the offensive military biological programme of the USSR had been discontinued.²²³

214. At the CDDH, the UK voted against the Philippine amendment (see *supra*) because:

A significant number of the States party to the Geneva Protocol of 1925 had entered a reservation thereto; for those States the Protocol contained no absolute prohibition on the use of the weapons mentioned in it, but rather a prohibition on the first use only. Nor was it convincing to state that the Geneva Protocol of 1925 represented no more than the existing customary law of war, ever since the adoption of

²²³ Aleksei Meshkov, "There are no reasons to doubt Russia's undeviating observance of all its commitments under convention banning biological weapons, says Russian Foreign Ministry", RIA Novosti, Moscow, 31 March 1998, via RIA-Novosti Hotline; A. Mironov and I. Chumakova, "Russia denies allegations of violating biological weapons ban", TASS, Moscow, 31 March 1998.

resolution XXVIII by the XXth International Conference of the Red Cross (Vienna 1965), States had been urged in United Nations resolutions to accede to that Protocol in accordance with its express terms. Such a situation was entirely inconsistent with the contention made in debate that the Geneva Protocol of 1925 reflected existing customary international law. That contention could not be supported.²²⁴

215. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, the UK stated that:

The United Kingdom has never possessed and has not acquired microbial or other biological agents and toxins in quantities which could be employed for weapons purposes. The United Kingdom maintains only small quantities of such agents and toxins for peaceful purposes, primarily prophylaxis and research . . . No system designed to apply these agents for hostile purposes exists, nor are being developed.²²⁵

216. At the First Review Conference of States Parties to the BWC in 1980, the UK stated that:

Since the United Kingdom has never possessed any of the agents proscribed by the [1972 BWC] in quantities other than those explicitly permitted, related action had been confined to the passing of domestic legislation [i.e. the Biological Weapons Act] in compliance with the provisions of article IV. In addition, the United Kingdom had, over the period since the Convention's entry into force, concluded a series of bilateral and multilateral agreements on public health and medical research which, *inter alia*, supported the provisions of article X.²²⁶

217. In 1983, in reply to a question in the House of Lords on the subject of the use of chemical weapons in South-East Asia, the UK Minister of State, FCO, stated that "the use of toxins in South-East Asia would represent a breach of the 1972 Convention banning biological and toxin weapons".²²⁷

218. In 1990, during a debate in the UN Security Council on a peaceful and just post-Cold War world, the UK recalled that, under paragraph 12 of Resolution 670 (1990), individuals were held responsible for grave breaches of the Geneva Conventions. It added that "we should also hold personally responsible those involved in violations of the laws of armed conflict, including the prohibition against initiating the use of . . . biological weapons contrary to the Geneva Protocol of 1925, to which Iraq is a party".²²⁸

219. In 1991, during a debate in the House of Commons on the Gulf conflict, the UK Prime Minister stated that "contrary to international agreements, Iraq

²²⁸ UK, Statement before the UN Security Council, UN Doc. S/PV.2963, 29 November 1990, § 78.

has produced and threatened to use both chemical and biological weapons, the use of which would be wholly contrary to international agreements".²²⁹

220. In 1991, in a report submitted to the UN Security Council on operations in the Gulf War, the UK stated that "the Iraqi Ambassador [to the UK] was also reminded of Iraq's obligations under the 1925 Geneva [Gas] Protocol in respect of . . . biological weapons. The United Kingdom would take the severest view of any use of these weapons by Iraq."²³⁰

221. In 1991, during a debate in the First Committee of the UN General Assembly, the UK explained that it intended to withdraw its reservation to the 1925 Geneva Gas Protocol, in which it had reserved the right to retaliate with biological weapons.²³¹

222. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, the UK, with regard to UN Security Council Resolution 687 (1991), stated that:

The resolution contains tough provisions for the destruction of Iraqi chemical and biological weapons . . . It is surely right to do so. For Iraq alone in the region has not only developed many of these weapons, it has actually used them both against a neighbouring State and against its own population, and it has made the threat of their use part of the daily discourse of its diplomacy as it has attempted to bully and coerce its neighbours.²³²

223. At the Fourth Review Conference of States Parties to the BWC in 1996, the UK stated that it was of the utmost importance

to send out a strong message. That the 1972 Convention remains the unequivocal and comprehensive ban on Biological Weapons. But that recent history has proved that a ban alone is not enough. That the overwhelming majority of States Parties believe that strengthening the Convention is both necessary and possible; and that we are all determined to work to achieve this as quickly as possible.²³³

224. In 1998, in response to a question in the House of Commons on the UK's position on biological weapons at a meeting of the Preparatory Committee for the Establishment of an International Criminal Court, the UK Prime Minister stated that:

The UK delegation supported proposals to include within the jurisdiction of the ICC war crimes under existing customary international law. For that reason, the delegation supported the inclusion of the use of methods of warfare of a nature to

cause superfluous injury or unnecessary suffering; these included bacteriological (biological) agents or toxins for hostile purposes or in armed conflict.²³⁴

225. According to the Report on UK Practice, representatives of the UK have repeatedly expressed condemnation of the use of biological weapons.²³⁵

226. At the Conference for the Supervision of the International Trade in Arms and Ammunition and in Implements of War in 1925, the US, with regard to a Polish proposal to extend the prohibition contained in what became the 1925 Geneva Gas Protocol to bacteriological warfare (see *supra*), stated that "bacteriological warfare is so revolting and so foul that it must meet with the condemnation of all civilized nations, and hence my delegation . . . accepts this amendment proposed by the Polish delegate".²³⁶

227. On 25 November 1969, the US President formally renounced the use of biological agents as weapons. On the same day, the US Secretary of State stated in a memo to the National Security Council that biological research and development would be limited to "defensive" activities and that research into "offensive" aspects of biological agents would only be permitted to the extent that it was pursued for "defensive" reasons.²³⁷

228. On 14 February 1970, the US President stated that "the United States renounces offensive preparations for and the use of toxins as a method of warfare". The reason given for the decision on toxins by the Office of the White House Press Secretary was that their production in any significant quantities "would require facilities similar to those needed for the production of biological agents. If the United States continued to operate such facilities, it would be difficult for others to know whether they were being used to produce only toxins but not biological agents."²³⁸

229. At the CDDH, the US voted against the Philippine amendment (see *supra*) because:

Grave breaches were meant to be the most serious type of crime; Parties had an obligation to punish or extradite those guilty of them. Such crimes should therefore be clearly specified, so that a soldier would know if he was about to commit an illegal act for which he could be punished. The amendment, however, was vague and imprecise . . . It would also punish those who used the weapons, namely,

the soldiers, rather than those who made the decision as to their use, namely, Governments.²³⁹

230. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, the US stated that:

Article I

The United States is in full compliance with the obligations contained in article I. Facilities previously used for development, production or stockpiling of biological weapons were now devoted to peaceful purposes . . .

...

Article IV

The US has taken, and is taking, a number of steps to prohibit and prevent activities contrary to the provisions of the Convention:

1. . . . all heads of federal departments and agencies certified to the President at his request, that their organizations were in compliance.
2. Detailed regulations have been established to ensure that the small remaining quantities of biological and toxin agents are used only for peaceful purposes.
3. Existing legislation already controls certain private actions concerning items prohibited under article I, including provisions of the Arms Export Control Act, the Export Administration Act, the Transportation of Dangerous Articles Act, and the regulations issued pursuant to these laws.²⁴⁰

231. In 1982, at the CSCE review meeting in Madrid, the US delegation directly accused the USSR of "seriously and deliberately" violating both the 1972 BWC and the 1925 Geneva Gas Protocol. The Soviet delegation rejected the charges as "monstrous accusations, false from beginning to end" and denied that the USSR had ever used chemical weapons "anywhere under any circumstances or by any means".²⁴¹

232. In an executive order issued in 1990, the US President stated that "the proliferation of . . . biological weapons constitutes an unusual and extraordinary threat to the national security and foreign policy of the United States". The order also provided for the possibility of imposing sanctions against foreign persons and governments found to have "knowingly and materially" contributed to efforts to "use, develop, produce, stockpile or otherwise acquire . . . biological weapons".²⁴²

233. In 1991, in a diplomatic note to Iraq concerning operations in the Gulf War, the US stated that it “expects the Government of Iraq to respect its obligations under the Geneva [Gas] Protocol of 1925 not to use . . . biological weapons”.²⁴³

234. In 1993, during a debate in the First Committee of the UN General Assembly, the US stated that it had worked for the elimination of bacteriological weapons.²⁴⁴

235. At the Fourth Review Conference of States Parties to the BWC in 1996, the US stated that it had “unilaterally renounced all use of biological and toxin weapons and destroyed its offensive stockpile before the Convention’s effective date in 1975”. In its concluding statement, the US stressed that it was important that biological weapons were “not just renounced, but banished from the face of the earth”.²⁴⁵

236. At the Fifth Review Conference of States Parties to the BWC in 2001, the US accused a number of countries of not complying with their obligations under the 1972 BWC. It named Iraq, North Korea, Libya, Iran, Syria and Sudan as violating the Convention and specified that “this list is not meant to be exhaustive”.²⁴⁶ In a written statement, the US President declared that:

All civilized nations reject as intolerable the use of disease and biological weapons as instruments of war and terror . . . The vast majority of nations has banned all biological weapons in accordance with the 1972 Biological and Toxins Weapons Convention (BWC) . . . The United States unilaterally destroyed its biological weapons stockpiles and dismantled or converted to peaceful uses the facilities that had been used for developing and producing them.²⁴⁷

237. In 1991, during a debate in the UN Security Council preceding the adoption of Resolution 699 concerning the destruction of biological weapons in Iraq, Yemen stated that it supported eradication of weapons of mass destruction in the Middle East, but that unilateral disarmament of Iraq would create imbalance in the region.²⁴⁸

238. In 1970, the SFRY informed the First Committee of the UN General Assembly “of the decision of the Yugoslav Government on a unilateral renunciation of biological weapons”.²⁴⁹

²⁴³ US, Department of State, Diplomatic Note to Iraq, Washington, 19 January 1991, annexed to Letter dated 21 January 1991 to the President of the UN Security Council, UN Doc. S/22122, 21 January 1991, Annex I, p. 2.

²⁴⁹ SFRY, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1750, 4 November 1970, p. 3, § 18.

239. At the CDDH, the SFRY voted in favour of the Philippine amendment (see *supra*). When the amendment was rejected it stated that it

deeply regrets that the use of unlawful methods or means of combat was not included in the grave breaches, particularly since to have done so would merely have been to have codified an already existing rule of customary law, because there can be no doubt that to use prohibited weapons or unlawful methods of making war is already to act unlawfully, that is, it is a war crime punishable by existing international law.²⁵⁰

240. In the preliminary stages of the First Review Conference of States Parties to the BWC in 1980, the SFRY stated that:

The Government of the Socialist Federal Republic of Yugoslavia strictly adheres to and fulfils the obligations regarding the prohibition of the development, production and stockpiling of bacteriological (biological) weapons, as set forth in articles I, II, IV, V and X of the [1972 BWC]. The Government of the Socialist Federal Republic of Yugoslavia further declares that it has never possessed biological weapons.²⁵¹

241. According to the Report on the Practice of Zimbabwe, Zimbabwe's practice in international fora shows that it believes that the prohibition of the use of biological weapons is customary.²⁵²

III. Practice of International Organisations and Conferences

United Nations

242. In a resolution adopted in 1938 concerning the protection of civilian populations against air bombardment in case of war, the Assembly of the League of Nations reaffirmed that "the use of . . . bacterial methods in the conduct of war is contrary to international law".²⁵³

243. In Resolution 687 adopted in 1991 after the Gulf War, the UN Security Council recalled the objective of universal elimination of biological weapons and created a "Special Commission, which shall carry out immediate on-site inspection of Iraq's biological . . . capabilities".²⁵⁴

244. In a resolution adopted in 1991, the UN Security Council confirmed that the Special Commission (UNSCOM) had the authority to destroy biological weapons in Iraq.²⁵⁵

²⁵⁵ UN Security Council, Res. 699, 17 June 1991, § 2.

245. In numerous resolutions, the UN General Assembly has called upon all States to become parties to the 1925 Geneva Gas Protocol.²⁵⁶

246. In numerous resolutions, the UN General Assembly has called upon all States to become parties to the 1972 BWC.²⁵⁷

247. A large number of UN General Assembly resolutions call for respect for the 1925 Geneva Gas Protocol or indicate its importance: 18 resolutions state that the General Assembly “reiterates its call for strict observance by all States of the principles and objectives” of the Protocol;²⁵⁸ another 14 resolutions repeat this call and condemn “all actions contrary to those objectives”.²⁵⁹ Similar wording is used in three other resolutions, in which the General Assembly stresses the “need for strict observance of existing international obligations regarding prohibitions on . . . biological weapons and condemns all actions that

contravene these obligations".²⁶⁰ Two resolutions refer to the "continuing importance of the 1925 Geneva Protocol",²⁶¹ and several resolutions are entitled "Measures to uphold the authority of the 1925 Geneva Protocol".²⁶² A number of others refer to the Protocol as part of the rules of IHL to be respected: "[the General Assembly]... calls upon all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular... the 1925 Geneva Protocol"²⁶³ and "convinced of the continuing value of established humanitarian rules relating to armed conflict, in particular... the 1925 Geneva Protocol".²⁶⁴ Two resolutions recall the provisions of the 1925 Geneva Gas Protocol and other relevant rules of customary international law.²⁶⁵

248. In a resolution adopted in 1969, the UN General Assembly stated that the 1925 Geneva Gas Protocol "embodies the generally recognised rules of international law prohibiting the use in international armed conflicts of all biological and chemical methods of warfare, regardless of any technical developments". It declared:

as contrary to the generally recognized rules of international law, as embodied in the [1925 Geneva Gas Protocol], the use in international armed conflicts of:

- ...
- (b) Any biological agents of warfare – living organisms, whatever their nature, or infective material derived from them – which are intended to cause disease or death in man, animals or plants, and which depend for their effects on their ability to multiply in the person, animal or plant attacked.²⁶⁶

The large number of abstentions in the vote on this resolution (36) was partly due to disagreement on the scope of the 1925 Geneva Gas Protocol. Other

²⁶⁶ UN General Assembly, Res. 2603 A (XXIV), 16 December 1969, preamble and § (b). The resolution was adopted by 80 votes in favour, 3 against (Australia, Portugal and US) and 36 abstentions (Austria, Belgium, Bolivia, Canada, Chile, China, Denmark, El Salvador, France, Greece, Iceland, Israel, Italy, Japan, Laos, Liberia, Luxembourg, Madagascar, Malawi, Malaysia, Netherlands, New Zealand, Nicaragua, Norway, Paraguay, Philippines, Sierra Leone, Singapore, South Africa, Swaziland, Thailand, Tunisia, Turkey, UK, Uruguay and Venezuela), UN Doc. A/PV.1836, 16 December 1969, p. 4.

States thought that the UN General Assembly should not interpret multilateral treaties.²⁶⁷

249. In a resolution adopted in 1970, the UN General Assembly called upon the government of Portugal:

not to use biological methods of warfare against the peoples of Angola, Mozambique and Guinea (Bissau), contrary to the generally recognized rules of international law embodied in the [1925 Geneva Protocol] and to General Assembly 2603 (XXIV) of 16 December 1969.²⁶⁸

250. In resolutions adopted in 1971, the UN General Assembly called upon "all parties to *any armed conflict* to observe the rules laid down . . . in the 1925 Geneva Protocol".²⁶⁹ (emphasis added)

251. In a resolution adopted in 1974, the UN General Assembly stated that "the use of . . . bacteriological weapons in the course of military operations constitutes one of the most flagrant violations of the Geneva [Gas] Protocol of 1925 . . . and the principles of international humanitarian law . . . and shall be severely condemned".²⁷⁰

252. In the Final Document of its Tenth Special Session in 1978, the UN General Assembly stated that:

72. All States should adhere to the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare, signed at Geneva on 17 June 1925.

73. All States which have not yet done so should consider adhering to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction.²⁷¹

253. In two resolutions, adopted in 1977 and 1978, the UN General Assembly called for "strict observance by all States of the principles and objectives of the 1972 Biological Weapons Treaty and the 1925 Geneva Protocol".²⁷²

254. In a resolution adopted in 1982, the UN General Assembly stated that "the use of . . . biological weapons has been declared incompatible with the accepted norms of civilization".²⁷³

²⁶⁷ Debates in the First Committee of the UN General Assembly, UN Doc.A/C.1/PV.1716, 9 December 1969; UN Doc. A/C.1/PV.1717, 10 December 1969.

²⁶⁸ UN General Assembly, Res. 2707 (XXV), 14 December 1970, § 9. (The resolution was adopted by 94 votes in favour, 6 against and 16 abstentions. Against: Brazil, Portugal, South Africa, Spain, UK and US. Abstaining: Argentina, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Italy, Luxembourg, Malawi, Netherlands, New Zealand, Norway, Paraguay and Sweden.)

²⁷³ UN General Assembly, Res. 37/98 E, 13 December 1982, preamble.

255. In a resolution adopted in 1996, the UN Sub-Commission on Human Rights stated that biological weapons were weapons of mass destruction and had indiscriminate effects. It also stated that the use of these weapons was incompatible with human rights and IHL.²⁷⁴

256. In 1969, in a report on chemical and bacteriological (biological) weapons and the effects of their possible use, the UN Secretary-General included an analysis by a group of experts on the effects of the use of biological weapons. The experts recommended the elimination of all biological weapons in order to make the world more peaceful. The UN Secretary-General urged all UN members: to accede to the 1925 Geneva Gas Protocol; to affirm that the prohibition covers all sorts of biological weapons; and to reach agreement to eliminate biological weapons.²⁷⁵

257. In reports in 1995 and 1996, the UN Secretary-General noted that UNSCOM, which was mandated to inspect and destroy facilities for weapons of mass destruction in Iraq following the Gulf War, had extensively documented an Iraqi biological weapons programme.²⁷⁶

258. In 1999, the report of an UNSCOM panel (constituted to examine issues of disarmament, monitoring and verification in Iraq following the decision to re-evaluate the work of UNSCOM) noted that:

22. UNSCOM uncovered the proscribed biological weapons (BW) programme of Iraq, whose complete existence had been concealed by Iraq until 1995 . . .
23. UNSCOM ordered and supervised the destruction of Iraq's main declared BW production and development facility, Al Hakam. Some 60 pieces of equipment from three other facilities involved in proscribed BW activities as well as some 22 tonnes of growth media for biological weapons production collected from four other facilities were also destroyed. As a result, the declared facilities of Iraq's biological weapons programme have been destroyed and rendered harmless.

Current status/remaining questions

24. In the biological area, Iraq's Full Final and Complete Disclosure (FFCD) has not been accepted by UNSCOM as a full account of Iraq's biological weapons programme . . . It has also been recognised that due to the fact that biological weapons agents can be produced using low technology and simple equipment, generally dual-use, Iraq possesses the capability and knowledge base through which biological warfare agents could be produced quickly and in volume.²⁷⁷

S/1996/848, 11 October 1996; Report of the Secretary-General on the activities of the Special Commission Established by the Secretary-General pursuant to paragraph 9 (b) (i) of resolution 687 (1991), UN Doc. S/1997/301, 11 April 1997.

²⁷⁷ UNSCOM, Panel on disarmament and current and future ongoing monitoring and verification issues, Final report of 27 March 1999 annexed to Letters dated 27 and 30 March 1999

259. In his message at the opening of the Fifth Review Conference of States Parties to the BWC, held in Geneva in 2001, the UN Secretary-General stated that:

144 States have now undertaken the commitment never, under any circumstances, to develop, produce, stockpile or otherwise acquire or retain biological or toxin weapons. They have recognised that the use of biological agents and toxins as weapons would, in the words of the Convention's preamble, "be repugnant to the conscience of mankind".

He added that "the challenge for the international community is clear: to implement, to the fullest extent possible, the prohibition regime offered by the Convention".²⁷⁸

Other International Organisations

260. In 1995, during a debate in the First Committee of the UN General Assembly, Spain, on behalf of the EU, expressed support for the strengthening of the prohibition against biological weapons.²⁷⁹

261. At the Fourth Review Conference of States Parties to the BWC in 1996, the EU stated that it believed that "there is an urgent need to strengthen compliance with the international system of non-proliferation of these weapons of mass destruction including through the reinforcement of the BWC with a legally binding and effective verification regime". According to the EU, "the strengthening of the BWC through agreement on a legally binding verification regime would contribute to international peace and security and must henceforth be accorded the priority it warrants in international arms control and disarmament negotiations".²⁸⁰

262. At the Fifth Review Conference of States Parties to the BWC in 2001, Spain, on behalf of the EU, explained that:

In its conclusion of 11 June 2001, the Council of the European Union confirmed its commitment to contribute to drawing up a Protocol including the set of concrete measures which the EU's Common Position of 17 May 1999 defined as essential for the establishment of an instrument which would effectively reinforce the Convention.²⁸¹

respectively from the Chairman of the panels established pursuant to the Note by the President of the Security Council of 30 January 1999 (S/1999/100) addressed to the President of the Security Council, UN Doc. S/1999/356, 30 March 1999, Annex I, §§ 22–24.

(The statement was also given on behalf of Bulgaria, Cyprus, Czech Republic, Estonia, Hungary, Iceland, Latvia, Liechtenstein, Lithuania, Norway, Poland, Romania, Slovenia and Slovakia.)

²⁸¹ EU, Statement of 19 November 2001 by Belgium on behalf of the EU at the Fifth Review Conference of States Parties to the BWC, Geneva, 19 November–7 December 2001.

263. In the Final Communiqué of its 12th Session in 1991, the GCC Supreme Council confirmed “the need to rid the entire Middle East region of all types of weapons of mass destruction, including . . . biological weapons”.²⁸²

264. In the Final Communiqué of its 16th Session in 1995, the GCC Supreme Council expressed “its deep regret that the Government of Iraq was continuing to produce bacteriological weapons of a pestilential nature to inflict overwhelming damage on Iraq itself and on the region as a whole”. It called for a zone free of weapons of mass destruction, including biological weapons, and confirmed “its concern for the elimination of all kinds of weapons of mass destruction, as a means of arriving at a Middle East region entirely free of such weapons”.²⁸³

International Conferences

265. The 20th International Conference of the Red Cross in 1965 adopted a resolution on the protection of civilian populations against the dangers of indiscriminate warfare which expressly invited “all Governments who have not yet done so to accede to the Geneva Gas Protocol of 1925 which prohibits the use of . . . bacteriological methods of warfare”.²⁸⁴

266. In a resolution adopted in 1968, the Teheran International Conference on Human Rights emphasised that “the widespread violence and brutality of our times, including . . . the use of . . . biological means of warfare . . . erode human rights and engender counter-brutality”.²⁸⁵

267. The 21st International Conference of the Red Cross in 1969 adopted a resolution on appealed to States to accede to the 1925 Geneva Gas Protocol and “to comply strictly with its provisions”. The Conference further urged governments “to conclude as rapidly as possible an agreement banning the production and stockpiling of chemical and bacteriological weapons”.²⁸⁶

268. There have so far been five review conferences of the BWC (1980, 1986, 1991, 1996 and 2001), during which numerous States declared their commitment to the 1972 BWC and to the prohibition of the use of biological weapons.

269. The Final Declaration of the Paris Conference of State Parties to the 1925 Geneva Gas Protocol and Other Interested States in 1989 affirmed that:

The participating States recognise the importance and continuous validity of the Protocol for the Prohibition of the Use of Asphyxiating, Poisonous or Other Gases,

and of Bacteriological Methods of Warfare, signed on 17 June 1925 in Geneva. The States party to the Protocol solemnly reaffirm the prohibition prescribed there in.²⁸⁷

IV. Practice of International Judicial and Quasi-judicial Bodies

270. In its advisory opinion in the *Nuclear Weapons case* in 1996, the ICJ stated that:

The pattern until now has been for weapons of mass destruction to be declared illegal by specific instruments. The most recent such instruments are the Convention of 10 April 1972 on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their destruction (which prohibits the possession of bacteriological and toxin weapons and reinforces the prohibition of their use).²⁸⁸

V. Practice of the International Red Cross and Red Crescent Movement

271. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that it is prohibited to use "bacteriological methods of warfare".²⁸⁹

272. In a Memorandum on the Applicability of International Humanitarian Law sent in 1990 to all States party to the Geneva Conventions in the context of the Gulf War, the ICRC stated that "the use of . . . bacteriological weapons is prohibited (1925 Geneva Protocol)".²⁹⁰

273. In a press release issued in 1991 in the context of the Gulf War, the ICRC reminded the parties that "the use of . . . bacteriological weapons is prohibited under international humanitarian law."²⁹¹

274. In 1994, in a Memorandum on Respect for International Humanitarian Law in Angola, the ICRC stated that "in particular, the use of . . . bacteriological weapons . . . is prohibited".²⁹²

275. In its statement at the Fourth Review Conference of States Parties to the BWC in 1996, the ICRC, referring to the 1925 Geneva Gas Protocol, stated that "the norms which your predecessors so carefully constructed have now become

²⁹² ICRC, Memorandum on Respect for International Humanitarian Law in Angola, 8 June 1994, § II, *IRRC*, No. 320, 1997, p. 504.

elements of customary international law. With few exceptions, they have been respected even in times of armed conflict." It called upon States to adhere to the BWC and to consider withdrawing any reservations that they might have to the Geneva Gas Protocol. The ICRC concluded by stating that:

Biological warfare, in whatever form and by whatever party, is rightfully considered abhorrent by the public conscience and by the world's most ancient cultures. This Conference's most important task will be to reaffirm, in both word and action, that no party should even think of using biological knowledge to inflict harm and to assure anyone who does that this will not be tolerated by the international community.²⁹³

276. In its working paper on war crimes submitted in 1997 to the Preparatory Committee for the Establishment of an International Criminal Court, the ICRC stated that:

The applicability of weapons prohibitions to internal conflicts and the prohibitions now clearly attached to the use of such weapons as . . . biological weapons . . . in time of non-international armed conflicts is to be related to the more general principle that all means and methods of warfare of a nature to cause superfluous injury or unnecessary suffering are unlawful.²⁹⁴

VI. Other Practice

277. According to commentators, between 1978 and 1987 the US repeatedly accused Soviet forces of having used toxin weapons in South-east Asia in the period 1978–1984. The allegations charged that attacks had been conducted by Soviet aircraft spraying a yellow material that fell like rain and contained trichothecene toxins, causing illness and death among thousands of victims, most of them among people from Laos living in Thai refugee camps. The USSR consistently denied the accusations concerning its alleged use of biological weapons in the region. In 1982, a UK government scientist analysed a sample of the "yellow rain" and concluded that it consisted largely of pollen. The UK finding was later independently corroborated by scientists in Australia, Canada, France, Sweden and Thailand. The US administration responded to this discovery by arguing that the USSR had deliberately added pollen when manufacturing the yellow rain. Between 1983 and 1986, following further scientific analysis, government and university researchers from France, Thailand, UK and US reported that the samples contained no trace of trichothecenes and concluded that the powder was actually the faeces of wild honeybees.²⁹⁵

²⁹³ ICRC, Statement at the Fourth Review Conference of States Parties to the BWC, Geneva, 25 November–6 December 1996.

²⁹⁵ Julian Robinson, Jeanne Harley Guillemin and Matthew Meselson, "Yellow Rain in Southeast Asia: The Story Collapses", in Susan Wright (ed.), *Preventing a Biological Arms Race*, MIT Press, Cambridge, Massachusetts, 1990, pp. 220–238.

278. Rule B1 of the Rules of International Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IHL, states that "the customary rule prohibiting... the use of bacteriological (biological) weapons is applicable in non-international armed conflicts".²⁹⁶

279. The Declaration of Minimum Humanitarian Standards, adopted by an expert meeting convened by the Institute for Human Rights of Åbo Akademi University in Turku/Åbo, Finland in 1990, states that "weapons or other material or methods prohibited in international armed conflicts must not be employed in any circumstances".²⁹⁷

280. SIPRI has documented a number of allegations concerning the use of biological weapons since the Second World War. However, it noted that "there are no indisputably verified instances of their having been used".²⁹⁸

281. The participating experts in the Workshop on International Criminalisation of Biological and Chemical Weapons at the Lauterpacht Research Centre for International Law in 1998 developed the text of a Draft Convention on the Prevention and Punishment of the Crime of Developing, Producing, Acquiring, Stockpiling, Retaining, Transferring or Using Biological and Chemical Weapons. The Draft Convention makes it an international criminal offence to use chemical or biological weapons.²⁹⁹

282. In 1999, the British Medical Association reported that in the light of the existence of non-parties to the 1925 Geneva Gas Protocol and the reservations of some States to the Protocol which permitted retaliatory use in kind of biological weapons, a number of countries undertook research in and developed and stockpiled biological agents for military retaliation purposes in the 20th century, although this practice had been progressively abandoned, in particular since the adoption of the 1972 BWC.³⁰⁰

283. According to a report by the Center for Non-Proliferation Studies, Algeria and India carry out research programmes into biological weapons. However, it emphasises that there is no evidence of production of such agents by those States. It adds that China, Egypt and Iran are likely to have maintained a research programme into biological weapons. It notes that Iraq had previously a research and production programme and emphasises that in the absence of

³⁰⁰ British Medical Association, *Biotechnology Weapons and Humanity*, Harwood Academic Publishers, London, 1999, pp. 14–32.

UN inspections and monitoring it is possible that Iraq has resumed its research programmes on biological agents. The report notes that Israel, Libya, North Korea and Syria conduct research programmes and that the production of biological weapons remains possible. It further states that Russia has a research programme. According to the report, it is also possible that Sudan and Taiwan have research programmes on biological agents.³⁰¹

CHEMICAL WEAPONS

A. Chemical Weapons (practice relating to Rule 74)	§§ 1–526
B. Riot Control Agents (practice relating to Rule 75)	§§ 527–595
C. Herbicides (practice relating to Rule 76)	§§ 596–638

A. Chemical Weapons

I. Treaties and Other Instruments

Treaties

1. The 1899 Hague Declaration concerning Asphyxiating Gases was the first treaty to outlaw the use of gas in warfare. In the Declaration, which has been ratified by 31 States, “the contracting Powers agree to abstain from the use of projectiles the sole object of which is the diffusion of asphyxiating or deleterious gases”.
2. Article 171 of the 1919 Treaty of Versailles stipulated that “the use of asphyxiating, poisonous or other gases and analogous liquids, materials or devices being prohibited, their manufacture and importation are strictly forbidden in Germany.”
3. Article 5 of the 1922 Treaty on the Use of Submarines and Noxious Gases in Warfare provides that:

The use in war of asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices, having been justly condemned by the general opinion of the civilized world and a prohibition of such having been declared in treaties to which a majority of the civilized Powers are parties,

The Signatory Powers, to the end that this prohibition shall be universally accepted as a part of international law binding alike the conscience and practice of nations, declare their assent to such prohibition, agree to be bound thereby between themselves and invite all other civilized nations to adhere thereto.

4. The 1925 Geneva Gas Protocol provides that:

Whereas the use in war of asphyxiating, poisonous or other gases, and of all analogous liquids, materials or devices, has been justly condemned by the general opinion of the civilized world; and

Whereas the prohibition of such use has been declared in Treaties to which the majority of Powers of the world are Parties; and

To the end that this prohibition shall be universally accepted as a part of International Law, binding alike the conscience and the practice of nations;

Declare:

That the High Contracting Parties, so far as they are not already Parties to Treaties prohibiting such use, accept this prohibition . . . and agree to be bound as between themselves according to the terms of this declaration.

Of the 132 States party, 39 made reservations upon ratification of the Protocol, stating that if an adverse party does not respect the Protocol, the ratifying State will no longer consider itself bound by the Protocol vis-à-vis that party (a number of the reservations included non-respect by allies also as a reason for no longer being obliged to respect the Protocol).¹ As at 1 March 2003, 18 of these reservations had been withdrawn.²

5. According to Article 14 of the 1947 Treaty of Peace between the Allied and Associated Powers and Bulgaria, Bulgaria "shall not retain, produce or otherwise acquire, or maintain facilities for the manufacture of, war material in excess of that required for the maintenance of the armed forces". According to Annex III of the treaty, "war material" comprises, *inter alia*, "asphyxiating, lethal, toxic or incapacitating substances intended for war purposes, or manufactured in excess of civilian requirements" (Category VI). Article 15 further provides that Bulgaria is obliged to hand over to the Allied Powers or destroy some of such war material.

6. According to Article 18 of the 1947 Treaty of Peace between the Allied and Associated Powers and Finland, "Finland shall not retain, produce or otherwise acquire, or maintain facilities for the manufacture of, war material in excess of that required for the maintenance of the armed forces". According to Annex III of the treaty, "war material" comprises, *inter alia*, "asphyxiating, lethal, toxic or incapacitating substances intended for war purposes, or manufactured in excess of civilian requirements" (Category VI). Article 19 further provides that Finland is obliged to hand over to the Allied Powers or destroy some of such "war material".

7. According to Article 16 of the 1947 Treaty of Peace between the Allied and Associated Powers and Hungary, "Hungary shall not retain, produce or otherwise acquire, or maintain facilities for the manufacture of, war material in

¹ Algeria, Angola, Australia, Bahrain, Bangladesh, Belgium, Bulgaria, Canada, Chile, China, Czechoslovakia, Estonia, Fiji, France, India, Iraq, Ireland, Israel, Jordan, North Korea, South Korea, Kuwait, Libya, Mongolia, Netherlands, New Zealand, Nigeria, Pakistan, Papua New Guinea, Portugal, Romania, Solomon Islands, South Africa, Spain, USSR, UK, US, Vietnam and SFRY.

² Ireland (1972); Australia (1986); New Zealand (1989); Czechoslovakia (1990); Mongolia (1990); Bulgaria (1991); Chile (1991); Romania (1991); UK (partially, 1991); Spain (1992); Netherlands (1995); France (1996); South Africa (1996); Belgium (1997); Estonia (1999); Canada (1999); Russia (2001); South Korea (2002).

excess of that required for the maintenance of the armed forces". According to Annex III of the treaty, "war material" comprises, *inter alia*, "asphyxiating, lethal, toxic or incapacitating substances intended for war purposes, or manufactured in excess of civilian requirements" (Category VI). Article 17 further provides that Hungary is obliged to hand over to the Allied Powers or destroy some of such "war material".

8. According to Article 53 of the 1947 Treaty of Peace between the Allied and Associated Powers and Italy, "Italy shall not manufacture or possess, either publicly or privately, any war material different from, or exceeding in quantity, that required for the forces permitted in" other sections of the treaty. According to the Annex XIII(C) of the treaty, "war material" comprises, *inter alia*, "asphyxiating, lethal, toxic or incapacitating substances intended for war purposes, or manufactured in excess of civilian requirements" (Category VI). Article 67 further provides that Italy is obliged to hand over to the Allied Powers or destroy such "war material".

9. According to Article 15 of the 1947 Treaty of Peace between the Allied and Associated Powers and Romania, "Romania shall not retain, produce or otherwise acquire, or maintain facilities for the manufacture of, war material in excess of that required for the maintenance of the armed forces". According to Annex III of the treaty, "war material" comprises, *inter alia*, "asphyxiating, lethal, toxic or incapacitating substances intended for war purposes, or manufactured in excess of civilian requirements" (Category VI). Article 16 further provides that Romania is obliged to hand over to the Allied Powers or destroy some of such "war material".

10. Article 13(1) of the 1955 Austrian State Treaty provides that:

Austria shall not possess, construct or experiment with –

- ...
- (j) asphyxiating, vesicant or poisonous materials or biological substances in quantities greater than, or of types other than, are required for legitimate civil purposes, or any apparatus designed to produce, project or spread such materials or substances for war purposes.

11. The preamble to the 1972 BWC states that the States party to the Convention are "convinced of the importance and urgency of eliminating from the arsenals of States, through effective measures, such dangerous weapons of mass destruction as those using chemical or bacteriological (biological) agents". States also recognize that "an agreement on the prohibition of bacteriological (biological) and toxin weapons represents a first possible step towards the achievement of agreement on effective measures also for the prohibition of the development, production and stockpiling of chemical weapons" and that they are "determined to continue negotiations to that end".

12. Article 1(1) of the 1990 US-Soviet Chemical Weapons Agreement states that:

In accordance with provisions of this Agreement, the Parties undertake:

- a. to cooperate regarding methods and technologies for the safe and efficient destruction of chemical weapons;
- b. not to produce chemical weapons;
- c. to reduce their chemical weapons stockpiles to equal, low levels;
- d. to cooperate in developing, testing, and carrying out appropriate inspection procedures; and
- e. to adopt practical measures to encourage all chemical weapons-capable states to become parties to the multilateral convention.

13. Article I of the 1993 CWC provides that:

1. Each State Party to this Convention undertakes never under any circumstances:
 - (a) To develop, produce, otherwise acquire, stockpile or retain chemical weapons, or transfer, directly or indirectly, chemical weapons to anyone;
 - (b) To use chemical weapons;
 - (c) To engage in any military preparations to use chemical weapons;
 - (d) To assist, encourage or induce, in any way, anyone to engage in any activity prohibited to a State Party under this Convention;
2. Each State Party undertakes to destroy chemical weapons it owns or possesses, or that are located in any place under its jurisdiction or control . . .
3. Each State Party undertakes to destroy all chemical weapons it abandoned on the territory of another State Party . . .
4. Each State Party undertakes to destroy any chemical weapons production facilities it owns or possesses, or that are located in any place under its jurisdiction or control.

14. The 1993 CWC prohibits the use of chemical weapons in any circumstances, including by way of reprisal, and also obliges States parties not to use chemical weapons against non-parties.³ Article XXII states that “the Articles of this Convention shall not be subject to reservations”. The treaty includes an extensive implementation and verification regime.

15. Pursuant to Article 8(2)(b)(xviii) of the 1998 ICC Statute, “employing asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices” is a war crime in international armed conflicts.

Other Instruments

16. Article 16(1) of the 1913 Oxford Manual of Naval War prohibits the use of “projectiles the sole object of which is the diffusion of asphyxiating or deleterious gases”.

17. Based on several documents supplying evidence of outrages committed during the First World War, the 1919 Report of the Commission on

³ Natalino Ronzitti, “Relations Between the Chemical Weapons Convention and Other Relevant International Norms”, *The Convention on the Prohibition and Elimination of Chemical Weapons: a Breakthrough in Multilateral Disarmament*, Hague Academy of International Law Workshop, Martinus Nijhoff Publishers, Dordrecht, 1994, p. 184.

Responsibility lists violations of the laws and customs of war which should be subject to criminal prosecution, including the “use of deleterious and asphyxiating gases”.

18. Articles 6 and 7 of the 1938 ILA Draft Convention for the Protection of Civilian Populations against New Engines of War provides that:

Art. 6. The use of chemical . . . weapons as against any State, whether or not a party to the present convention, and in any war, whatever its character, is prohibited.

Art. 7. (a) The prohibition of the use of chemical weapons shall apply to the use, by any method whatsoever, for the purpose of injuring an adversary, of any natural or synthetic substance (whether solid, liquid or gaseous) which is harmful to the human or animal organism by reason of its being a toxic, asphyxiating, irritant or vesicant substance.

(b) The said prohibition shall not apply:

- I. to explosives that are not in the last-mentioned category;
- II. to the noxious substances arising from the combustion or detonation of such explosives, provided that such explosives have not been designed or used with the object of producing such noxious substances;
- III. to smoke or fog used to screen objectives or for other military purposes, provided that such smoke or fog is not liable to produce harmful effects under normal conditions of use;
- IV. to gas that is merely lachrymatory.

19. Article 14 of the 1956 New Delhi Draft Rules provides, under the heading “Weapons with uncontrollable effects”, that:

The use is prohibited of weapons whose harmful effects – resulting in particular from the dissemination of . . . chemical . . . agents – could spread to an unforeseen degree or escape, either in space or in time, from the control of those who employ them, thus endangering the civilian population.

20. The preamble to the 1991 Mendoza Declaration on Chemical and Biological Weapons states that the parties are “convinced that a complete ban on chemical . . . weapons will contribute to strengthening the security of all States”. In paragraph 1, the parties declare their “full commitment not to develop, produce, acquire in any way, stockpile or retain, transfer directly or indirectly, or use chemical weapons”.

21. The 1991 Cartagena Declaration on Weapons of Mass Destruction expresses the commitment of the signatory governments to:

renounce the possession, production, development, use, testing and transfer of all weapons of mass destruction whether . . . toxin or chemical weapons, and to refrain from storing, acquiring or holding such categories of weapons, in any circumstances.

22. The 1992 India-Pakistan Declaration on Prohibition of Chemical Weapons provides that the governments of India and Pakistan:

undertake never under any circumstances:

- a) to develop, produce or otherwise acquire chemical weapons;
- b) to use chemical weapons;
- c) to assist, encourage or induce, in any way, anyone to engage in development, production, acquisition, stockpiling or use of chemical weapons.

23. Under Article 4(4) of Part IV of the 1998 Comprehensive Agreement on Respect for Human Rights and IHL in the Philippines, "civilian population and civilians . . . shall be protected . . . from . . . the stockpiling near or in their midst, and the use of chemical . . . weapons".

24. Section 6.2 of the 1999 UN Secretary-General's Bulletin provides that:

The United Nations force shall respect the rules prohibiting or restricting the use of certain weapons and methods of combat under the relevant instruments of international humanitarian law. These include, in particular, the prohibition on the use of asphyxiating, poisonous or other gases.

25. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes. According to Section 6(1)(b)(xviii), "employing asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices" is a war crime in international armed conflicts.

II. National Practice

Military Manuals

26. Australia's *Commanders' Guide* places chemical weapons under the heading "Prohibited weapons" and refers to the 1993 CWC.⁴ The manual defines the use of "certain unlawful weapons and ammunition" as "grave breaches or serious war crimes".⁵

27. Australia's *Defence Force Manual* provides that "asphyxiating, poisonous or other gases are prohibited".⁶ It adds that "chemical weapons, which include toxic chemicals and their precursors (those chemicals which can cause death, permanent harm or temporary incapacity to humans or animals) and munitions or devices designed to carry such chemicals, are banned".⁷ The manual defines the use of "certain unlawful weapons and ammunition" as "grave breaches or serious war crimes".⁸

28. Belgium's *Law of War Manual*, with reference to the 1925 Geneva Gas Protocol, proscribes "the use of asphyxiating, toxic or similar gases, as well as all liquids, materials or analogous devices", with a reservation on the first use.⁹

⁴ Australia, *Commanders' Guide* (1994), § 305.

⁵ Australia, *Commanders' Guide* (1994), § 1305(p).

⁶ Australia, *Defence Force Manual* (1994), § 410.

⁷ Australia, *Defence Force Manual* (1994), § 412.

⁸ Australia, *Defence Force Manual* (1994), § 1315(p).

⁹ Belgium, *Law of War Manual* (1983), p. 38.

29. Bosnia and Herzegovina's Military Instructions states that "it is prohibited to use . . . poisonous gas".¹⁰
30. Cameroon's *Instructors' Manual* states on the issue of chemical weapons that "the restrictions here are clear. It is prohibited to use such weapons against enemy combatants as well as against civilian populations." It also calls for the "total destruction of the existing stockpile".¹¹
31. Canada's LOAC Manual prohibits the use of asphyxiating, poisonous or other gases "at all times and under all circumstances".¹² It also bans the use of chemical weapons, "which include toxic chemicals and their precursors (those chemicals which can cause death, permanent harm or temporary incapacity to humans or animals) and munitions or devices designed to carry such chemicals".¹³ It defines "using asphyxiating, poisonous and other gases" as a war crime.¹⁴ The manual also provides that "smoke grenades, smoke ammunition from indirect fire weapons and tank smoke ammunition are not prohibited as long as they are used to conceal position or movement or to mask target".¹⁵
32. Canada's Code of Conduct provides that the use of chemical weapons is forbidden.¹⁶
33. Colombia's Basic Military Manual states that the use of weapons which "cause unnecessary and indiscriminate, extensive, lasting and serious damage to people and the environment" is prohibited. It adds that the use of chemical weapons, as well as their production, possession and importation, is banned.¹⁷
34. Ecuador's Naval Manual states, under the heading "Chemical weapons", that "international law, both customary and treaty-based, prohibits taking the initiative to use lethal chemical weapons during armed conflicts".¹⁸ It also provides that "the following acts constitute war crimes: . . . use of prohibited weapons or ammunition".¹⁹
35. France's LOAC Summary Note states that it is prohibited to use combat gases.²⁰
36. France's LOAC Teaching Note includes chemical weapons in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.²¹
37. France's LOAC Manual incorporates the content of Article 2 of the 1993 CWC and refers to the 1899 Hague Declaration concerning Asphyxiating Gases

¹⁰ Bosnia and Herzegovina, *Military Instructions* (1992), Item 11, § 1.

²¹ France, *LOAC Teaching Note* (2000), p. 6.

and the 1925 Geneva Gas Protocol.²² It also includes chemical weapons in the list of weapons that “are totally prohibited by the law of armed conflict” because of their inhuman and indiscriminate character.²³

38. Germany’s Soldiers’ Manual provides that “the use of chemical weapons (for example poisonous gas) . . . is prohibited”.²⁴

39. Germany’s Military Manual proscribes “the use of asphyxiating, poisonous or other gases and all analogous liquids, materials or similar devices in war” and refers to the 1925 Geneva Gas Protocol and to Article 23(a) of the 1907 HR. It adds that:

The prohibition also applies to the toxic contamination of water supply installations and foodstuffs and the use of irritant agents for military purposes. This prohibition does not refer to unintentional and insignificant poisonous secondary effects of otherwise permissible munitions.

It further states that:

The scope of this prohibition is restricted by the fact that, when signing the Geneva Gas Protocol, numerous states declared that this Protocol should cease to be binding in regard to any enemy state whose armed forces fail to respect the prohibition embodied in the Protocol.²⁵

The manual refers to the 1993 CWC and stresses that it was not at the time (1992) in force. However, it declares that:

On signing the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and their Destruction on 10 April 1972, the Federal Republic of Germany further declared that, in accordance with its attitude, it would neither develop nor acquire or stockpile under its own control chemical weapons whose manufacture it has already abstained from. This commitment was confirmed under Article 3 of the Treaty on the Final Settlement with respect to Germany of 12 September 1990.²⁶

40. Germany’s IHL Manual states that “international humanitarian law prohibits the use of a number of means of warfare, which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g. . . . chemical means of warfare, e.g. poisonous gases”.²⁷

41. Israel’s Manual on the Laws of War states that “today 128 countries are signatories to [the 1925 Geneva Gas Protocol], whose provisions are regarded as customary practice, thereby making it binding on all countries, irrespective of whether they signed the Protocol”.²⁸

²² France, *LOAC Manual* (2001), pp. 22 and 23.

²⁷ Germany, *IHL Manual* (1996), § 305.

²⁸ Israel, *Manual on the Laws of War* (1998), p. 20.

42. Italy's IHL Manual states that "the use... of asphyxiating, toxic or similar gases... is forbidden in conformity with the international provisions in force".²⁹

43. Kenya's LOAC Manual prohibits the use of "asphyxiating, poisonous or other gases, all analogous liquids, materials or devices".³⁰

44. The Military Manual of the Netherlands states that "it is generally accepted that this prohibition [of the use of chemical weapons] applies to States which have not ratified the Gas Protocol; it belongs to customary law".³¹

45. The Military Handbook of the Netherlands provides a general prohibition on the use of chemical weapons.³²

46. New Zealand's Military Manual states that "the 1925 Geneva Protocol prohibits the use in war of asphyxiating, poisonous and other gases, and bacteriological methods of warfare".³³ It further includes "using asphyxiating, poisonous and other gases" in a list of "war crimes recognised by the customary law of armed conflict".³⁴

47. Nigeria's Manual on the Laws of War includes "using asphyxiating, poisonous or other gases and all analogous liquids, materials or devices" in its list of war crimes.³⁵

48. Russia's Military Manual prohibits the use of "projectiles used with the only purpose to spread asphyxiating or poisonous gases... asphyxiating, poisonous or other similar gases and bacteriological means".³⁶

49. South Africa's LOAC Manual states that "the use of certain weapons is expressly prohibited by international agreement, treaty or custom (e.g. chemical... and toxic weapons)".³⁷

50. Spain's LOAC Manual prohibits the use of asphyxiating or poisonous gases. It reproduces the content of Articles I and IV of the 1993 CWC.³⁸

51. Switzerland's Teaching Manual prohibits the use of toxic gases of any kind.³⁹

52. Switzerland's Basic Military Manual prohibits the use of poison, asphyxiating, toxic or similar gases, or analogous liquids or materials.⁴⁰

53. The UK Military Manual provides that "asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices are forbidden".⁴¹ A footnote to this passage states that the use of chemical weapons in the First World

⁴¹ UK, *Military Manual* (1958), § 111.

War was illegal “in so far as it exposed combatants to unnecessary suffering”.⁴² The manual also provides that “in addition to the ‘grave breaches’ of the 1949 [Geneva] Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . using asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices”.⁴³

54. The UK LOAC Manual states that “the following are prohibited in *international* armed conflict: . . . e. the first use of gas and chemical weapons”.⁴⁴ (emphasis in original)

55. The US Field Manual provides that:

Although the language of the 1925 Geneva Protocol appears to ban unqualifiedly the use in war of the chemical weapons within the scope of its prohibition, reservations submitted by most of the Parties to the Protocol, including the United States, have, in effect, rendered the Protocol a prohibition only of the first use in war of materials within its scope. Therefore, the United States, like many other Parties, has reserved the right to use chemical weapons against a state if that state or any of its allies fails to respect the prohibitions of this Protocol.⁴⁵

56. The US Air Force Pamphlet states that:

The first use of lethal chemical weapons is now regarded as unlawful in armed conflicts. During World War II President Roosevelt, in response to reports that the enemy was seriously contemplating the use of gas warfare, stated: “Use of such weapons has been outlawed by the general opinion of civilized mankind. . . We shall under no circumstances resort to the use of such weapons unless they are first used by our enemies.” This United States position has been reaffirmed on many occasions by the United States as well as confirmed by resolutions in various international forums.⁴⁶

57. The US Air Force Commander’s Handbook states that “the United States, however, has reserved the right to use chemical weapons against ‘an enemy State if such State or any of its allies fails to respect the prohibition of the Protocol.’ The USSR and the People’s Republic of China have reserved similar rights.”⁴⁷

58. The US Operational Law Handbook states that “the US has renounced first use of chemical weapons”.⁴⁸

59. The US Naval Handbook states that:

The United States considers the prohibition against first use of lethal and incapacitating chemical weapons to be part of customary international law and, therefore, binding on all nations whether or not they are parties to the 1925 Gas Protocol. . . Consistent with its first-use reservation to the 1925 Gas Protocol, the United States

maintained a lethal and incapacitating chemical weapons capability for deterrence and possible retaliatory purposes only. National Command Authorities (NCA) approval was required for retaliatory use of lethal or incapacitating chemical weapons by U.S. forces. Retaliatory use of lethal or incapacitating chemical agents was to be terminated as soon as the enemy use of such agents that prompted the retaliation had ceased and any tactical advantage gained by the enemy through unlawful first use had been redressed. Upon coming into force of the 1993 Chemical Weapons Convention, any use of chemical weapons by a party to that convention, whether or not in retaliation against unlawful first use by another nation, will be prohibited.

[The 1993 CWC] will, upon entry into force, prohibit the development, production, stockpiling and use of chemical weapons, and mandate the destruction of chemical weapons and chemical weapons production facilities for all nations that are party to it.⁴⁹

60. The YPA Military Manual of the SFRY (FRY) prohibits the use of chemical agents such as asphyxiating and poisonous gases.⁵⁰

National Legislation

61. Under Armenia's Penal Code, the development, production, acquisition, sale, use and testing of chemical weapons and weapons of mass destruction constitute crimes against the peace and security of mankind.⁵¹

62. Australia's War Crimes Act considers "any war crime within the meaning of the instrument of appointment of the Board of Inquiry [set up to investigate war crimes committed by enemy subjects]" as a war crime, including the use of deleterious and asphyxiating gases.⁵²

63. Australia's Chemical Weapons (Prohibition) Act provides that:

A person must not intentionally or recklessly:

- (a) develop, produce, otherwise acquire, stockpile or retain chemical weapons or
- (b) transfer, directly or indirectly, chemical weapons to another person; or
- (c) use chemical weapons; or
- (d) engage in any military preparations to use chemical weapons; or
- (e) assist, encourage or induce, in any way, another person to engage in any activity prohibited to a State Party under the Convention; or
- (f) use riot control agents as a method of warfare.

Penalty: imprisonment for life.

It also specifies the purposes which are not prohibited under the 1993 CWC:

- (a) industrial, agricultural, research, medical, pharmaceutical or other peaceful purposes;
- (b) protective purposes, namely those purposes directly related to protection against toxic chemicals and to protection against chemical weapons;

⁴⁹ US, *Naval Handbook* (1995), §§ 10.3.1.1 and 10.3.1.2.

⁵² Australia, *War Crimes Act* (1945), Section 3.

- (c) military purposes not connected with the use of chemical weapons and not dependent on the use of the toxic properties of chemicals as a method of warfare;
- (d) law enforcement including domestic riot control purposes.⁵³

64. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including "employing prohibited gases, liquids, materials or devices" in international armed conflicts.⁵⁴

65. The Criminal Code of Belarus provides that "production, acquisition, stockpiling, transport, transfer or sale of weapons of mass destruction prohibited by international treaties binding upon the Republic of Belarus" is a criminal offence, while the use of such weapons is a war crime.⁵⁵

66. Bulgaria's Penal Code as amended provides that "a person who, in violation of the rules of international law for waging war, uses or orders the use of . . . chemical weapons" commits a war crime.⁵⁶

67. Under Burundi's Draft Law on Genocide, Crimes against Humanity and War Crimes, "the fact of employing asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices" constitutes a war crime in international armed conflicts.⁵⁷

68. Canada's Chemical Weapons Act provides that:

No person shall

- (a) develop, produce, otherwise acquire, stockpile or retain a chemical weapon or transfer, directly or indirectly, a chemical weapon to anyone;
- (b) use a chemical weapon;
- (c) engage in any military preparations to use a chemical weapon;
- (d) assist, encourage or induce, in any way, anyone to engage in any activity prohibited to a State Party under the Convention.⁵⁸

69. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.⁵⁹

70. China's Law Governing the Trial of War Criminals provides that "use of poison gas" constitutes a war crime.⁶⁰

71. Colombia's Constitution prohibits "the manufacture, import, possession, and use of chemical . . . weapons".⁶¹

⁵³ Australia, *Chemical Weapons (Prohibition) Act* (1994), p. 13, Section 12 and p. 95, Section 9.

⁶¹ Colombia, *Constitution* (1991), Article 81.

72. Colombia's Decree on the Control of Firearms, Ammunition and Explosives provides that "it is prohibited to carry devices manufactured on the basis of poisoned gases, corrosive substances or metal which by the expansion of gas produce fragments".⁶²

73. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.⁶³

74. Under Croatia's Criminal Code, the manufacture, improvement, production, stockpiling, offering for sale, purchase, interceding in purchasing or sale, possession, transfer, transport, use of, and order to use, chemical weapons are war crimes.⁶⁴

75. The Czech Republic's Act on the Prohibition of Chemical Weapons bans the "development, production, use and handling of chemical weapons", as well as the "import of chemical weapons to the Czech Republic or their transit".⁶⁵

76. Denmark's Executive Order on Weapons and Ammunition prohibits the importation, development, production, consumption, stockpiling, selling, exportation or possession of chemical weapons.⁶⁶

77. Ecuador's National Civil Police Penal Code states that members of the National Civil Police "who use or order to be used . . . asphyxiating or poisonous gases" commit a punishable offence.⁶⁷

78. Estonia's Penal Code punishes any "person who designs, manufactures, stores, acquires, hands over, sells or provides or offers for use in any other manner chemical . . . weapons". Under the Code, "use of . . . chemical weapons" is a war crime.⁶⁸

79. Under Finland's Revised Penal Code, it is a punishable offence to use, develop, produce, otherwise procure, stockpile, possess, transport or participate in military preparations for the use of chemical weapons, in violation of the 1993 CWC.⁶⁹

80. France's Law on the Implementation of the CWC prohibits the use of chemical weapons and the development, production, stockpiling, possession, retention, acquisition, assignment, import, export and transfer of such weapons, and selling or trading in them.⁷⁰

81. Under Georgia's Criminal Code, "the production, acquisition or sale of chemical . . . or other kinds of weapon of mass destruction prohibited by an

⁷⁰ France, *Law on the Implementation of the CWC* (1998), Article 2.

international treaty” and the “use during hostilities or in armed conflict of such means and materials or weapons of mass destruction which are prohibited by an international treaty” are crimes.⁷¹

82. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed conflict, “employs . . . chemical weapons”.⁷²

83. Under Hungary's Criminal Code as amended, employing “chemical weapons and chemical instruments of war” as defined in Article II(1) and (7) of the 1993 CWC is a war crime.⁷³

84. India's Chemical Weapons Act provides that:

- (1) No person shall
 - (a) develop, produce, otherwise acquire, stockpile, retain or use Chemical Weapons, or transfer, directly or indirectly, any Chemical Weapons to any person;
 - ...
 - (c) engage in any military preparations to use Chemical Weapons;
 - (d) assist, encourage or induce, in any manner, any person to engage in
 - (i) the use of any riot control agent as a method of warfare
 - (ii) any other activity prohibited to a State Party under the Convention.

It also prohibits the production, acquisition, retaining or use of toxic chemicals or precursors listed in Schedule 1 of the Annex on Chemicals to the Convention.⁷⁴

85. Ireland's Chemical Weapons Act provides that:

- 3. (1) No person shall –
 - (a) produce, develop, retain, use or transfer, directly or indirectly to anyone, a chemical weapon or assist another person to produce, develop, retain, use or transfer a chemical weapon,
 - (b) construct, convert, maintain or use any premises or equipment for a purpose referred to in paragraph (a) or assist another person to do any of those things for such a purpose, or
 - (c) engage in preparations of a military nature to use a chemical weapon.⁷⁵

86. Italy's Law of War Decree as amended, in an article dealing with “Bacteriological and chemical means”, provides that “the use . . . of asphyxiating, toxic or similar gases . . . is forbidden in conformity with the international provisions in force”.⁷⁶

⁷¹ Georgia, *Criminal Code* (1999), Articles 406 and 413(c).

⁷² Germany, *Law Introducing the International Crimes Code* (2002), Article 1, § 12(1)(2).

⁷³ Hungary, *Criminal Code as amended* (1978), Section 160/A(3)(c).

⁷⁴ India, *Chemical Weapons Act* (2000), Chapter III, §§ 13 and 15.

⁷⁵ Ireland, *Chemical Weapons Act* (1997), Article 3.

⁷⁶ Italy, *Law of War Decree as amended* (1938), Article 51.

87. Italy's Law on the Prohibition of Chemical Weapons provides that:

Production, transfer or receipt, directly or indirectly, acquisition, import, export, transit, retention and use – with the exception of the cases referred to in comma 2 – of the chemicals listed in Schedule 1 of the Annex on Chemicals to the Convention, as well as of any other chemical product which might be exclusively employed for the production of chemical weapons, are prohibited.⁷⁷

88. Japan's Law on the Prohibition of Chemical Weapons provides that:

1. No person shall manufacture chemical weapons.
2. No person shall possess, assign or take over chemical weapons.
3. No person shall manufacture, possess, assign or take over toxic chemicals or chemicals having toxicity equivalent thereto or raw materials of these chemicals with the aim to supply for the manufacture of chemical weapons.
4. No person shall manufacture, possess, assign or take over parts used exclusively for chemical weapons or machinery and equipment used exclusively in case of the use of chemical weapons, which are provided for by Cabinet Order.⁷⁸

89. Japan's Law on the Prevention of Personal Injury Caused by Sarin prohibits the production, importation and use of sarin, and provides for a severe prison sentence for offenders.⁷⁹

90. Under Kazakhstan's Penal Code, "the production, acquisition, or sale of . . . chemical weapons" and "the use of the weapons of mass destruction prohibited by an international treaty to which the Republic of Kazakhstan is a party" are criminal offences.⁸⁰

91. South Korea's Chemical Weapons Act provides that:

- (1) A person who develops, produces, stockpiles, transfers or uses chemical weapons or assists or induces any other person to do so in violation of Article 3(1) shall be punished by life imprisonment or imprisonment for not less than five years or a fine not exceeding 100 million Wons.
- (2) A person who causes harm to human life, body or property or disturbs the public peace through the use of chemical weapons shall be punished by the death penalty, life imprisonment or imprisonment for not less than seven years.⁸¹

92. Luxembourg's Law on the Approval of the CWC provides that no natural or legal person may:

- a. develop, produce or acquire chemical weapons by any other means, stockpile or preserve them in any capacity or for any purpose, or transfer them directly or indirectly to any person;
- b. use chemical weapons;
- c. undertake any preparatory steps for using chemical weapons;

⁷⁷ Italy, *Law on the Prohibition of Chemical Weapons* (1995), Article 3.

⁷⁸ Japan, *Law on the Prohibition of Chemical Weapons* (1995), Chapter 2, Article 3.

⁷⁹ Japan, *Law on the Prevention of Personal Injury Caused by Sarin* (1995), Articles 3 and 5.

⁸⁰ Kazakhstan, *Penal Code* (1997), Articles 158 and 159(2).

⁸¹ South Korea, *Chemical Weapons Act* (1996), Chapter VII, Article 25.

- d. assist, encourage or incite any person by whatever means to undertake any activity prohibited by the Convention and by this law;
- e. transfer or receive, subject to the applicable Community provisions, the chemical products defined in Annex 1 to the Convention in circumstances prohibited by the Convention and not authorised by the Licensing Office.⁸²

93. Under Mali's Penal Code, "using asphyxiating, toxic or assimilated gases and all analogous liquids, materials or devices" is a war crime in international armed conflicts.⁸³

94. The Definition of War Crimes Decree of the Netherlands includes the "use of deleterious and asphyxiating gases" in its list of war crimes.⁸⁴

95. According to the Chemical Weapons Act of the Netherlands, the development, production, acquisition, stockpiling, retaining, transfer and use of chemical weapons is prohibited.⁸⁵

96. Under the International Crimes Act of the Netherlands, "employing asphyxiating, poisonous or other gases and all analogous liquids, materials or devices" is a crime, when committed in an international armed conflict.⁸⁶

97. New Zealand's Chemical Weapons Act provides that:

- (1) Every person commits an offence who intentionally or recklessly
 - (a) Develops, produces, otherwise acquires, stockpiles or retains chemical weapons; or
 - (b) Transfers directly or indirectly, chemical weapons to another person; or
 - (c) Uses chemical weapons; or
 - (d) Engages in any military preparations to use chemical weapons; or
 - (e) Assists, encourages, or induces, in any way any person to engage in any activity prohibited to a State Party under the Convention.⁸⁷

98. Under New Zealand's International Crimes and ICC Act, war crimes include the crime defined in Article 8(2)(b)(xviii) of the 1998 ICC Statute.⁸⁸

99. Norway's Chemical Weapons Act provides that it is "prohibited to develop, produce, otherwise acquire, stockpile, transfer . . . chemical weapons in contravention of the Convention of 13 January 1993".⁸⁹

100. Panama incorporated the 1993 CWC in its entirety into national law in 1998.⁹⁰

101. Peru's Law on Chemical Weapons prohibits the use of chemical weapons, as well as their development, production, acquisition and delivery, and makes reference to the 1993 CWC.⁹¹

⁸² Luxembourg, *Law on the Approval of the CWC* (1997), Article 3.

⁸³ Mali, *Penal Code* (2001), Article 31(i)(18).

⁹⁰ Panama, *Chemical Weapons Law* (1998).

⁹¹ Peru, *Law on Chemical Weapons* (1996), Articles 4(b) and 5.

102. Poland's Penal Code punishes "any person who uses a means of mass destruction prohibited by international law" and "any person who, against the prohibition by international law or by the provision of law, produces, stockpiles, acquires, sells, retains, transports or sends means of mass destruction or means of combat, or conducts research aimed at the production or use of such means".⁹²

103. Romania's Law on the Prohibition of Chemical Weapons provides that:

- (1) It is prohibited for any person, under any circumstance:
 - (a) to develop, produce, acquire, retain or transfer chemical weapons, directly or indirectly, to other persons;
 - (b) to use chemical weapons;
 - (c) to engage, in any way, in military preparations to use chemical weapons;
 - (d) to assist, encourage or induce, in any way, other persons to engage in an activity prohibited under this Act;
- (2) Persons means any natural or legal person on the territory of Romania including public authorities.⁹³

It further provides that "the act of using chemical weapons is considered as a criminal act and is punished".⁹⁴

104. Under Russia's Criminal Code, the "use of weapons of mass destruction, prohibited by an international treaty to which the Russian Federation is a party" is a crime against peace and security of mankind.⁹⁵

105. Singapore's Chemical Weapons (Prohibition) Act provides that:

Any person who

- (a) uses a chemical weapon;
- (b) develops or produces a chemical weapon;
- (c) acquires, stockpiles or retains a chemical weapon;
- (d) transfers, directly or indirectly, a chemical weapon to another person;
- (f) knowingly assists, encourages or induces, in any way, another person to engage in any activity prohibited to a State Party under the Convention;

...

shall be guilty of an offence and shall on conviction be punished with

- (i) imprisonment for a term which may extend to life imprisonment, and
- (ii) a fine not exceeding \$ 1 million.⁹⁶

106. Slovenia's National Assembly passed a Chemical Weapons Law through a fast-track procedure in 1999.⁹⁷

107. South Africa's Non-Proliferation of Weapons of Mass Destruction Act provides that:

The Minister may, by notice in the Gazette, determine the general policy to be followed with a view to:

⁹² Poland, *Penal Code* (1997), Articles 120 and 121.

⁹³ Romania, *Law on the Prohibition of Chemical Weapons* (1997), Article 3.

⁹⁴ Romania, *Law on the Prohibition of Chemical Weapons* (1997), Article 50(1).

⁹⁶ Singapore, *Chemical Weapons (Prohibition) Act* (2000), Section 8.

⁹⁷ Slovenia, *Chemical Weapons Law* (1999).

...

- (d) the imposition of a prohibition, whether for offensive or defensive purposes, on the development, production, acquisition, stockpiling, maintenance or transit of any weapons of mass destruction.⁹⁸

108. Sweden's Penal Code as amended provides that:

A person who:

1. develops, produces or by other means acquires, stores or holds chemical weapons or directly or indirectly transfers chemical weapons to another person,
2. uses chemical weapons,
3. participates in military preparations for the use of chemical weapons,

... shall be sentenced, if the act is not regarded as a war crime against international law, for *unlawful handling of chemical weapons* to [punishment].⁹⁹ [emphasis in original]

109. Switzerland's Military Criminal Code as amended punishes "whoever will intentionally endanger somebody's life or physical integrity by means of ... toxic gases".¹⁰⁰

110. Switzerland's Chemical Weapons Implementation Order provides that:

It shall be prohibited:

- a. to develop, produce, acquire, deliver to anyone, import, export, procure the transit of or stockpile chemical weapons within the meaning of Article II of the Chemical Weapons Convention, engage in the brokerage thereof or otherwise dispose of them;
- b. to induce anyone to commit an act mentioned under letter a;
- c. to facilitate the commission of an act mentioned under letter a.¹⁰¹

111. Tajikistan's Criminal Code punishes the

development, production, acquisition, storage, transportation, sending or sale of ... chemical ... weapons of mass destruction, prohibited by an international treaty, as well as transfer to any other State, which does not possess nuclear weapons, of initial or special fissionable material, technologies, which can knowingly be used to produce weapons of mass destruction, or providing anyone with any other kind of weapons of mass destruction or components necessary for their production, prohibited by an international treaty.¹⁰²

112. Under Trinidad and Tobago's Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xviii) of the 1998 ICC Statute.¹⁰³

⁹⁸ South Africa, *Non-Proliferation of Weapons of Mass Destruction Act* (1993), Section 2(1)(d).

⁹⁹ Sweden, *Penal Code as amended* (1962), Chapter 22, § 6a(1)–(3).

¹⁰³ Trinidad and Tobago, *Draft ICC Act* (1999), Section 5(1)(a).

113. Pursuant to Ukraine's Criminal Code, "the use of weapons of mass destruction prohibited by international instruments consented to be binding by the [parliament] of Ukraine" is a war crime.¹⁰⁴

114. The UK Chemical Weapons Act provides that:

- (1) No person shall—
 - (a) use a chemical weapon;
 - (b) develop or produce a chemical weapon;
 - (c) have a chemical weapon in his possession;
 - (d) participate in the transfer of a chemical weapon;
 - (e) engage in military preparations, or in preparations of a military nature, intending to use a chemical weapon.¹⁰⁵

115. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xviii) of the 1998 ICC Statute.¹⁰⁶

116. The US Chemical Weapons Act provides that:

It shall be unlawful for any person knowingly

- (1) to develop, produce, otherwise acquire, transfer directly or indirectly, receive, stockpile, retain, own, possess, or use, or threaten to use, any chemical weapon; or
- (2) to assist or induce, in any way, any person to violate paragraph (1), or to attempt or conspire to violate paragraph (1).¹⁰⁷

117. Under Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime.¹⁰⁸ The commentary on this provision specifies that "the following weapons and means of combat are considered to be prohibited: . . . war gases".¹⁰⁹

118. Zimbabwe has incorporated the 1993 CWC into national law by means of the Chemical Weapons Prohibition Act.¹¹⁰

National Case-law

119. In 1995, in a ruling on the constitutionality of AP II, Colombia's Constitutional Court stated in relation to the prohibition on the use of weapons of a nature to cause unnecessary suffering or superfluous injury that:

Although none of the treaty rules expressly applicable to internal conflicts prohibits indiscriminate attacks or the use of certain weapons, the Taormina Declaration consequently considers that the bans (established partly by customary law and partly by

treaty law) on the use of chemical . . . weapons . . . apply to non-international armed conflicts, not only because they form part of customary international law but also because they evidently derive from the general rule prohibiting attacks against the civilian population.¹¹¹

120. In its judgement in the *Shimoda case* in 1963, Japan's District Court of Tokyo held that the use of poisonous gases was prohibited.¹¹²

Other National Practice

121. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, Afghanistan expressed its commitment to the non-use of chemical weapons, stating that:

Relying on the belief that the production, development, and propagation of chemical weapons should be prevented and that such weapons should be completely eliminated, the Republic of Afghanistan has acquired no chemical weapons of any type whatsoever. It does not and will not in the future seek to acquire such weapons, the use of which it considers a crime against humanity.¹¹³

122. In a speech delivered to the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, the Afghan Foreign Minister stated that Afghanistan, while once again confirming its pledges on the non-use and elimination of chemical weapons, announced that it would never resort to the production, use, development, storage or export of chemical weapons, and that it would not allow any country to pass chemical weapons through Afghan territory. The Foreign Minister added that Afghanistan would sign the convention on halting chemical weapons as soon as it was completed.¹¹⁴

123. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, the Albanian Minister of Foreign Affairs stated that "Albania not only is and always has been in favour of banning the production, storage, and use of chemical weapons, but is in favour of their total elimination".¹¹⁵

124. At the CDDH, Algeria supported the Philippine amendment (see *infra*) because "it was a simple reaffirmation of the principles of positive humanitarian law".¹¹⁶

125. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1993 CWC, the negotiation of which had been

concluded by the Conference on Disarmament, Algeria expressed "its traditional position" for a complete ban on chemical weapons and their use.¹¹⁷

126. At the 1992 Session of the Conference of Disarmament, Algeria stated that it "has always been, and remains, in favour of a total ban on chemical weapons and their use". It added that:

Algeria is not developing and does not produce chemical weapons, and it is not seeking to acquire them. It remains profoundly convinced that the best way to curb the threat of these weapons is to banish them once and for all, by means of this international convention. In this regard, it will be Algeria's honour and duty to be among the original signatories.¹¹⁸

127. At the First Conference of States Parties to the CWC in 1997, Algeria made statements in support of the object and purpose of the 1993 CWC.¹¹⁹

128. In 1988, in a statement before the Fifteenth Special Session of the UN General Assembly, the President of Argentina confirmed that "Argentina does not possess chemical-weapon arsenals and that it will continue to commit all its efforts to the conclusion of a convention on chemical weapons".¹²⁰

129. In 1989, in a reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Argentina declared that it did not possess chemical weapons.¹²¹

130. During the 1991 Session of the Conference on Disarmament, Argentina stated that it "does not possess and has never possessed or used chemical weapons".¹²²

131. In a press communiqué issued in 1997, the Ministry of Foreign Affairs of Argentina stated that:

Argentina... does not have any chemical weapons installations or deposits in its territory. Such a declaration clearly conveys to the international community Argentina's political will to abide by the convention provisions within the framework of its foreign policy, which is committed to disarmament and the non-proliferation of weapons of mass destruction.¹²³

132. At the First Conference of States Parties to the CWC in 1997, Armenia emphasised the importance of the 1993 CWC and stated its commitment and

E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

¹²² Argentina, Statement before the Conference on Disarmament, UN Doc. CD/PV. 596, 20 June 1991, p. 11.

¹²³ "Foreign Ministry says no chemical weapons installations on Argentine Territory", *Noticias Argentinas*, Buenos Aires, 28 May 1997, as translated in BBC-SWB, 30 May 1997.

its determination to contribute actively to the realisation of the Convention's aims. It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.¹²⁴

133. In 1966, during a debate in the First Committee of the UN General Assembly, Australia supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.¹²⁵

134. In 1989, Australia co-sponsored a draft resolution in the UN Commission on Human Rights which expressed "grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries".¹²⁶

135. In 1995, in a statement in the Senate, Australia's Minister of Foreign Affairs said that Australia expressly condemned the use of chemical weapons by terrorist groups.¹²⁷

136. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Australia stated that:

Given the ever present threat of destruction that is inherently associated with nuclear weapons, and the way in which that threat is now so universally understood, Australia submits the attitude of the international community is that there are some weapons the very existence of which is inconsistent with fundamental general principles of humanity. In the case of weapons of this type, international law does not merely prohibit their threat or use. It prohibits even their acquisition or manufacture and by extension their possession. Such an attitude has been manifested in the case of other weapons of mass destruction. Both the 1972 Biological Weapons and the 1992 Chemical Weapons Convention do not merely prohibit the use of biological and chemical weapons of mass destruction, but prevent their very existence... Clearly, this is a strong international statement that the use of such weapons would be contrary to fundamental general principles of humanity. The approach of both conventions indicates a further conviction that the threats posed by certain types of weapons are so grave that they should be eliminated altogether, with their mere possession by a State made unlawful.¹²⁸

137. At the First Conference of States Parties to the CWC in 1997, Australia stated that the 1993 CWC would serve both the international community's security and economic interests. It added that it hoped that the CWC would lead to a world free from the scourge of chemical weapons.¹²⁹

¹²⁹ Australia, Statement at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

138. At the 1986 Session of the Conference on Disarmament, Austria stated that "Austria was among the first Parties that signed the 1925 Geneva Protocol. Furthermore, Austria renounced the possession of chemical . . . weapons in the State Treaty of 1955."¹³⁰ At a later Session in 1988, Austria stated that it "does not possess or produce chemical weapons and has no facilities to produce such weapons".¹³¹

139. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, Austria stated that Resolution 687 was a step "towards the objective of a global ban on chemical weapons".¹³²

140. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1993 CWC, the negotiation of which had been concluded by the Conference on Disarmament, Austria stated that the elimination of chemical weapons was important.¹³³

141. In 1991, during a debate in the First Committee of the UN General Assembly, Bahrain stated that the Middle East had to be free from chemical weapons.¹³⁴

142. At the First Conference of States Parties to the CWC in 1997, Bahrain expressed support for the goals of the 1993 CWC and stated its full commitment to the provisions in the Convention and promised full cooperation with the OPCW.¹³⁵

143. At the First Conference of States Parties to the CWC in 1997, Bangladesh stated that it welcomed the entry into force of the 1993 CWC and hoped that it would be the first in a series that would eliminate weapons of mass destruction from the face of the earth.¹³⁶

144. In 1966, during a debate in the First Committee of the UN General Assembly, Belarus supported Hungary's view that the 1925 Geneva Gas Protocol had developed into customary international law and that the use of chemical weapons constituted an international crime.¹³⁷

145. In 1970, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), Belarus stated that:

¹³⁰ Austria, Statement before the Conference on Disarmament, UN Doc. CD/PV.371, 17 July 1986, p. 5.

/PV.20, 28 October 1991, p. 32.

¹³⁵ Bahrain, Statement at the First Conference of States Parties to the CWC, The Hague, 6-23 May 1997.

¹³⁶ Bangladesh, Statement at the First Conference of States Parties to the CWC, The Hague, 6-23 May 1997.

¹³⁷ Belarus, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/SR.1454, 15 November 1966, p. 168.

The need for all States without exception to abide, in any armed conflict, by the existing international conventions defining and limiting the means, ways and methods of waging war assumes particular importance. Among these conventions are . . . the Geneva Protocol of 1925.¹³⁸

146. In 1977, during a debate in the First Committee of the UN General Assembly, Belarus supported a complete ban on chemical weapons.¹³⁹

147. In 1987, during a debate in the First Committee of the UN General Assembly, Belarus stated that it was committed to a global ban on chemical weapons.¹⁴⁰

148. In 1993, during a debate in the First Committee of the UN General Assembly, Belarus referred to a declaration in which all States emerging from the former Soviet Union expressed their support for chemical disarmament.¹⁴¹

149. At the First Conference of States Parties to the CWC in 1997, Belarus pointed out the large amount of work that had already been done by the government of Belarus in the area of chemical weapons destruction. Furthermore, it stated that it was prepared to work closely with the OPCW to contribute to the implementation of the provisions of the 1993 CWC and hence to the strengthening of international peace and security.¹⁴²

150. In 1980, in a statement before the Lower House of Parliament, Belgium's Minister of Foreign Affairs stated that disapproval of the hostile use of chemical agents in combat, as well as the 1925 Geneva Gas Protocol, were part of customary law.¹⁴³

151. In 1987, during a debate in the First Committee of the UN General Assembly, Belgium stated that the use of chemical weapons in the Iran–Iraq War against civilian populations was a “particularly shocking violation of the 1925 Geneva Protocol”.¹⁴⁴

152. In 1989, Belgium co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988

¹³⁸ Belarus, Reply dated 2 March 1970 to the UN Secretary-General regarding the preparation of the study requested in paragraph 2 of General Assembly Resolution 2444 (XXIII), annexed to Report of the Secretary-General on respect for human rights in armed conflicts, UN Doc. A/8052, 18 September 1970, Annex III, p. 118, § 5.

using, inter alia, chemical weapons and causing mass exodus to neighbouring countries".¹⁴⁵

153. At the 1989 Session of the Government-Industry Conference against Chemical Weapons, Belgium stated that it:

attaches the greatest importance to the unanimous expression of a willingness to respect the Geneva Gas Protocol on the part of all participants. As we moving towards a treaty which totally prohibits chemical weapons we all have to contribute to the realisation of this goal, the finalisation of the draft treaty, universal adherence and confidence in its being respected.

It added that "Belgium has no chemical weapons and has no intention to acquire any. It is taking the necessary steps to eliminate, in optimal conditions, the chemical bombs dating from the First World War which are periodically found on its soil".¹⁴⁶

154. In 1994, during a debate in the First Committee of the UN General Assembly, Benin urged the elimination of chemical weapons.¹⁴⁷

155. The Report on the Practice of Botswana states that Botswana has no capacity in chemical warfare and that it is opposed to chemical weapons.¹⁴⁸

156. At the 1985 and 1988 sessions of the Conference on Disarmament, Brazil stated that it "does not possess and does not intend to develop, produce or stockpile" chemical weapons.¹⁴⁹

157. In 1993, the Permanent Representative of Brazil to the UN in Geneva stated that "since the time when chemical weapons were first used, the Brazilian Government has consistently argued against the use of these and all other inhumane means of warfare". He added that "the word 'inhumane' is employed here, in accordance with common usage, to mean weapons that cause unnecessary devastation and suffering".¹⁵⁰

158. At the First Conference of States Parties to the CWC in 1997, Brazil emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims. It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.¹⁵¹

159. In 1989, in a reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Brunei Darussalam declared that it did not possess chemical weapons.¹⁵²

160. In 1966, during a debate in the First Committee of the UN General Assembly, Bulgaria supported Hungary's view that the 1925 Geneva Gas Protocol had developed into customary international law and that the use of chemical weapons constituted an international crime.¹⁵³

161. In 1977, during a debate in the First Committee of the UN General Assembly, Bulgaria stated that chemical weapons had been morally and politically condemned for a long time.¹⁵⁴

162. In 1987, during a debate in the First Committee of the UN General Assembly, Bulgaria stated that it was committed to a global ban on chemical weapons.¹⁵⁵

163. During the 1988 and 1990 sessions of the Conference on Disarmament, Bulgaria stated that it did not possess, manufacture or stockpile chemical weapons.¹⁵⁶

164. In 1991, during a debate in the First Committee of the UN General Assembly, Bulgaria stated that it neither possessed nor produced chemical weapons.¹⁵⁷

165. In a declaration of 1 February 1996, the Bulgarian government stated that "there have not been stockpiles of chemical . . . weapons on the territory of Bulgaria in the past 50 years". The declaration was requested by the 28 member countries of the Australia Group, to which Bulgaria had applied for admission.¹⁵⁸

166. In 1987, during a debate in the First Committee of the UN General Assembly, Burkina Faso stated that it was committed to a global ban on chemical weapons.¹⁵⁹

¹⁵² Brunei Darussalam, Reply to a note verbale of the UN Secretary-General, referred to in Report of the Secretary-General on respect for the right to life: elimination of chemical weapons, prepared in accordance with UN Sub-Commission on Human Rights Resolution 1988/27, UN Doc. E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

¹⁵⁹ Burkina Faso, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/42/PV.30, 3 November 1987, p. 33.

167. In 1977, during a debate in the First Committee of the UN General Assembly, Burma explained that the elimination of chemical weapons was a goal for the Burma Socialist Party.¹⁶⁰

168. At the 1988 Session of the Conference on Disarmament, Burma declared that it “does not possess, develop, produce, stockpile or use chemical weapons. Nor will it do so in the future.”¹⁶¹

169. At the First Conference of States Parties to the CWC in 1997, Cameroon emphasised the importance of the 1993 CWC and stated its commitment to creating a world free of chemical weapons.¹⁶²

170. In 1966, during a debate in the First Committee of the UN General Assembly, Canada supported the principle that international law prohibited the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.¹⁶³

171. At the CDDH, Canada voted against the Philippine amendment (see *infra*) because “the particular weapons are forbidden by international law and their use, other than by way of reprisal, already constitutes a war crime”.¹⁶⁴

172. In 1977, during a debate in the First Committee of the UN General Assembly, Canada, while introducing the draft of UN General Assembly Resolution 32/77, stated that the world community “long ago reached consensus that a high priority should be accorded to early agreement on effective measures for the complete prohibition of the development, production and stockpiling of all chemical weapons and on their destruction”.¹⁶⁵

173. In 1989, Canada co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries”.¹⁶⁶

174. At the First Conference of States Parties to the CWC in 1997, Canada emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention’s aims. It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.¹⁶⁷

¹⁶⁷ Canada, Statement by the Speaker of the Senate at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

175. During the 1990 Session of the Conference on Disarmament, Chile stated that it did not produce or possess chemical weapons.¹⁶⁸

176. At the First Conference of States Parties to the CWC in 1997, Chile emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims. It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.¹⁶⁹

177. At the Meeting on Human Environment in 1972, China condemned the US for causing "unprecedented damage to the human environment" in South Vietnam through the use of "chemical toxic and poisonous gas".¹⁷⁰

178. In 1986, during a debate in the UN Security Council, China stated that it "consistently opposed the use of chemical and toxic weapons at any place and time".¹⁷¹

179. In 1987, during a debate in the First Committee of the UN General Assembly, China stated that it had "consistently" stood for the complete prohibition of chemical weapons.¹⁷²

180. In 1991, during a debate in the First Committee of the UN General Assembly, China stated that it neither possessed nor produced chemical weapons and that it had always stood for a complete prohibition of chemical weapons.¹⁷³

181. At the signing ceremony of the CWC in 1993, China's Minister of Foreign Affairs stated that "China consistently supports the absolute ban and total destruction of chemical weapons".¹⁷⁴

182. Before the adoption of the 1993 CWC, China unilaterally declared that it would not produce, possess or export chemical weapons.¹⁷⁵

183. At the First Conference of States Parties to the CWC in 1997, China stated that "it always advocated the complete prohibition and thorough destruction of chemical weapons".¹⁷⁶

184. In 1977, during a debate in the First Committee of the UN General Assembly, Colombia supported a complete ban on chemical weapons.¹⁷⁷

185. At the 1981 Session of the Government-Industry Conference against Chemical Weapons, Colombia stated that:

The Colombian Government, as it represents a country which does not manufacture or possess, nor intends to manufacture or possess, chemical weapons, as well as other weapons of mass destruction weapons, cannot but condemn the production, the possession, transfer and the use of such weapons.¹⁷⁸

186. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Colombia declared that it did not possess chemical weapons.¹⁷⁹

187. At the First Conference of States Parties to the CWC in 1997, DRC made statements in support of the object and purpose of the 1993 CWC.¹⁸⁰

188. At the First Conference of States Parties to the CWC in 1997, Côte d'Ivoire made statements in support of the object and purpose of the 1993 CWC.¹⁸¹

189. At the First Conference of States Parties to the CWC in 1997, Croatia stated that it "has never possessed or planned to produce chemical weapons nor even contemplated the idea of adhering to any form or method of chemical warfare, either tactical or strategic". It also stated that it "supports the provisions in the CWC and is in the middle of incorporating parts of it into its own national law".¹⁸²

190. In 1977, during a debate in the First Committee of the UN General Assembly, Cuba supported a complete ban on chemical weapons.¹⁸³

191. In 1991, during a debate in the UN Security Council, Cuba stated that it was in favour of the "universal elimination of . . . chemical . . . weapons".¹⁸⁴

192. During the 1991 Session of the Conference on Disarmament, Cuba stated that:

For Cuba, a country which does not possess chemical weapons, the conclusion of a non-discriminatory convention which prohibits the development, stockpiling, acquisition, transfer and use of these weapons and makes the necessary provision for

the destruction of existing stockpiles, production facilities and launching systems, is not only of crucial importance but is an essential guarantee in its perception of security.¹⁸⁵

193. In 1991, during a debate in the First Committee of the UN General Assembly, Cuba stated that it neither possessed nor produced chemical weapons.¹⁸⁶

194. At the First Conference of States Parties to the CWC in 1997, Cuba stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.¹⁸⁷

195. In 1966, during a debate in the First Committee of the UN General Assembly, Cyprus supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.¹⁸⁸

196. In 1966, during a debate in the First Committee of the UN General Assembly, Czechoslovakia supported Hungary's view that the 1925 Geneva Gas Protocol had developed into customary international law and that the use of chemical weapons constituted an international crime.¹⁸⁹

197. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Czechoslovakia declared that it did not possess chemical weapons.¹⁹⁰

198. At the 1989 Session of the Conference on Disarmament, Czechoslovakia stated that:

Two days before the Paris Conference, on 5 January, the Government of Czechoslovakia released a statement on issues concerning the prohibition and elimination of chemical weapons. This statement reaffirmed that Czechoslovakia does not possess, manufacture or stockpile on its territory any chemical weapons. Nor does it own facilities for their development or production. All scientific research in this field is oriented exclusively towards protection against the effects of chemical weapons and other peaceful goals.¹⁹¹

199. At the 1992 Session of the Conference on Disarmament, Czechoslovakia said that it had repeatedly stated that "it did not possess chemical weapons, and had declared its intention to become an original signatory of the CWC".¹⁹²

¹⁸⁵ Cuba, Statement before the Conference on Disarmament, UN Doc. CD/PV.603, 22 August 1991, p. 4.

¹⁹² Czechoslovakia, Statement before the Conference on Disarmament, UN Doc. CD/1136, UN Doc. CD/CW/WP.389, 27 February 1992, p. 1.

200. At the 1996 Session of the Conference on Disarmament, the Czech Republic stated that it “has never possessed or produced chemical weapons and neither have they ever been deployed on its territory. The humane idea of their complete ban and elimination has always had our full support.”¹⁹³

201. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons, the representative of Denmark, with respect to UN General Assembly Resolution 2603 (XXIV), stated that:

154. My delegation abstained in the vote on the draft resolution [on chemical and bacteriological (biological) weapons under discussion] on legal grounds. We cannot accept the concept on which the resolution is based, namely, that there exist generally recognized rules of international law according to which the prohibition in the 1925 Geneva [Gas] Protocol is total. Such a concept implies that there is a general, long-standing, well-established practice, as well as a legal conviction, that the resulting conduct manifested by action or inaction is legally binding; that is to say, there exists an *opinio juris*. Today's vote has proved that this is not the case...

155. Having said this, I wish to add that my Government is generally in favour of making the prohibition against chemical and bacteriological weapons as comprehensive as possible.¹⁹⁴

202. In 1988, during a debate in the UN General Assembly, Denmark stated that:

Many have been the calls over the years for a ban on chemical weapons. We appreciate the progress made at the Conference on Disarmament. The abhorrent use of chemical weapons has made even more urgent the task of reaching agreement on a global convention prohibiting such weapons. All sides must take an active part in the negotiations toward this end. Denmark has signed the 1925 Protocol without conditions. We do not have any chemical weapons. We do not want any. This has always been our policy and we have declared it openly. It would be a sign of confidence and an important political signal if all countries declared their policy towards chemical weapons and whether or not they possessed those weapons.¹⁹⁵

203. In 1989, Denmark co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries”.¹⁹⁶

¹⁹⁶ Denmark, Draft resolution on the situation of human rights in Iraq, UN Doc. E/CN.4/1989/L.82, 3 March 1989, § 2.

204. In 1988, in a statement before the Fifteenth Special Session of the UN General Assembly, Ecuador stated that “among disarmament measures, Ecuador believes that priority should be given to the following: . . . a complete ban on the testing or production of new weapons of mass destruction, including chemical [weapons]”.¹⁹⁷

205. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Ecuador declared that it did not possess chemical weapons.¹⁹⁸

206. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, Ecuador stated that “it is . . . timely to insist on observance of the international agreements which prohibit the use of asphyxiating and toxic gases and bacterial warfare and which seek the universal elimination of chemical and biological weapons”.¹⁹⁹

207. At the First Conference of States Parties to the CWC in 1997, Ecuador stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.²⁰⁰

208. Egypt is alleged to have used chemical agents in support of republican forces during the civil war in Yemen in the period between 1963 and 1967. The primary sources of these allegations were journalists, royalist sources opposed to the Egyptian intervention, and the ICRC. On 2 June 1967, the UK Prime Minister informed the House of Commons that he had evidence suggesting that poison gas had been used in Yemen.²⁰¹ The Egyptian government denied the allegations concerning the use of chemical agents in Yemen in a communiqué on 1 February 1967, in which the Minister of National Guidance stated that “in the name of the U.A.R. I have been entrusted to affirm once again and in a decisive manner that the U.A.R. has not used poisonous gas at any time and did not resort to using such gas even when there were military operations in Yemen”.²⁰²

209. At the CDDH, Egypt expressed “its disappointment at the failure of the Philippine amendment, establishing as a grave breach the use of prohibited weapons, to be adopted” but noted that Article 74 of draft AP I (now

Article 85) “as it stands now does cover the use of such weapons through their effects”.²⁰³

210. During the 1988 Session of the Conference on Disarmament, Egypt stated that:

Egypt views with deep concern the use of chemical weapons anywhere, and considers that reports to that effect should give further impetus to the speedy conclusion by the Conference of a convention in this connection . . . Egypt . . . calls upon all parties to respect international treaties and conventions and reaffirms the importance of adherence to the main principles contained in the 1925 Geneva Protocol . . . Egypt does not produce, develop or stockpile such weapons, which it rightly regards as weapons of mass destruction that should be banned.²⁰⁴

211. During the 1990 Session of the Conference on Disarmament, Egypt reiterated that it neither possessed nor produced chemical weapons.²⁰⁵

212. At the First Conference of States Parties to the CWC in 1997, El Salvador stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.²⁰⁶

213. In 1977, during a debate in the First Committee of the UN General Assembly, Ethiopia supported a complete ban on chemical weapons.²⁰⁷

214. During the 1989 Session of the Conference on Disarmament, Ethiopia stated that it considered chemical weapons and their complete destruction to be a matter of the utmost priority. Furthermore, it stated that Ethiopia did not produce or stockpile chemical weapons.²⁰⁸

215. At the First Conference of States Parties to the CWC in 1997, Ethiopia emphasised the importance of the 1993 CWC and stated its commitment to creating a world free of chemical weapons.²⁰⁹

216. At the CDDH, Finland stated that it “attached the greatest importance . . . to the prohibition of chemical . . . warfare in the Geneva Protocol of 1925”.²¹⁰

217. In 1991, during a debate in the First Committee of the UN General Assembly, Finland stated that a ban on chemical weapons was an urgent priority.²¹¹

²¹¹ Finland, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/46/PV.6, 16 October 1991, p. 21.

218. At the First Conference of States Parties to the CWC in 1997, Finland stated that it aligned itself with the position of the EU and added that it looked forward to “wiping all chemical weapons off the face of the earth”.²¹²

219. In 1966, during a debate in the First Committee of the UN General Assembly, France stated that it was opposed to a general prohibition of chemical weapons. It wondered “how could States which had not signed or ratified a treaty be required to undertake to observe its provisions?”²¹³

220. In 1980, during a debate in the First Committee of the UN General Assembly, France stated with respect to Resolution 35/144, which it had sponsored, that:

In sponsoring [Resolution 35/144], the French delegation had only one concern: the strengthening of the [1925 Geneva Gas Protocol], particularly by use of an inquiry procedure. Information from various sources regarding the possible use of chemical weapons suggested that it was appropriate, indeed even necessary for the international community to take a stand in favour of an impartial investigation into compliance with the provisions of the 1925 Protocol.

The French Government, as a depositary of the Geneva Protocol, felt that special attention had to be given to everything related to respect for commitments entered into in that connexion.

...

It seems to us that the authority of the Geneva Protocol, the banning of chemical weapons and the means of successfully ensuring that ban are all such important matters that they require and justify a clear affirmation of the will of the international community.²¹⁴

221. In 1987, in reply to a question in parliament, the French Minister of Foreign Affairs stated that “France attaches the greatest importance to the prohibition and elimination of chemical weapons”.²¹⁵

222. In 1988, the spokesperson for the French Ministry of Foreign Affairs condemned the use by Iraq of chemical gases against Iran. The French authorities reiterated “their absolute condemnation of these practices, in blatant violation of the Geneva Protocol of 1925”.²¹⁶

223. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, France declared that it did not possess chemical weapons.²¹⁷

²¹⁷ France, Reply to a note verbale of the UN Secretary-General, referred to in Report of the Secretary-General on respect for the right to life: elimination of chemical weapons, prepared in accordance with UN Sub-Commission on Human Rights Resolution 1988/27, UN Doc. E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

224. At the 1989 Session of the Conference on Disarmament, France stated that:

First of all, there is now a confirmed link between the present prohibition on use and the future [1993 CWC], a convention which will prohibit not only the use, but also the production, stockpiling and transfer of chemical weapons . . . Beyond the differences in legal commitments that exist between States, according to whether or not they are parties to the 1925 [Geneva Gas] Protocol, or whether they have tabled reservations to it, we now know – you now know – that there is a collective conviction on the part [of] 149 States, a conviction that makes it possible to move from the Protocol of 1925 to a global convention: the universal condemnation of the use of chemical weapons . . .

France possesses no chemical weapons and will not produce any once the [1993 CWC] enters into force.²¹⁸

225. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, France stated that the ban on the Iraqi possession of chemical weapons was carried out from the perspective of regional and global disarmament.²¹⁹

226. At the 1992 Session of the Conference on Disarmament, France stated that there were no chemical weapons present on its territory, nor did it hold such weapons in the territory of another State. It also stated that it had no chemical weapons production facilities.²²⁰

227. At the First Conference of States Parties to the CWC in 1997, Gambia made statements in support of the object and purpose of the 1993 CWC.²²¹

228. In 1987, during a debate in the First Committee of the UN General Assembly, the FRG noted that the world had called for the elimination of chemical weapons.²²²

229. In 1987, during a debate in the First Committee of the UN General Assembly, the FRG proposed a chemical weapons free zone in Europe.²²³

230. In 1989, the FRG co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries”.²²⁴

231. In 1977, during a debate in the First Committee of the UN General Assembly, the GDR said that the socialist States had demanded a comprehensive prohibition of chemical weapons in 1972.²²⁵

232. In 1980, during a debate in the UN General Assembly, the GDR stated with respect to Resolution 35/144 that:

A number of delegations referred to reports concerning the use of chemical agents in the ongoing conflict between Iran and Iraq. Some delegations referred to reports concerning the use of chemical agents by Israel against the Arab population of Jerusalem or the use of chemical agents by the South African racists against the population of Namibia. Were those statements by delegations taken into account in the drafting of the report on the administrative and financial implications?²²⁶

233. In 1988, the Foreign Affairs Committee of the German parliament stated that it was afraid that poison gas could be used by Iraqi forces against the Kurdish population in northern Iraq. The Committee rejected in particular the line of argument that the 1925 Geneva Gas Protocol applied only to international armed conflicts. It called upon the German government to investigate into the alleged involvement of German companies in the production of chemical weapons for Iraq and stated that "in the opinion of the German Parliament, on the way to a universal outlawing of chemical weapons, any use of poison gas must meet the determined resistance of the international community".²²⁷

234. In 1968, during a debate in the First Committee of the UN General Assembly, Ghana supported the view that all chemical weapons should be prohibited.²²⁸

235. In 1987, during a debate in the UN Security Council, Ghana expressed the opinion that the 1925 Geneva Gas Protocol was no longer effective and needed to be reviewed.²²⁹

236. At the First Conference of States Parties to the CWC in 1997, Ghana made statements in support of the object and purpose of the 1993 CWC.²³⁰

237. In 1966, during a debate in the First Committee of the UN General Assembly, Greece supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.²³¹

238. In 1987, during a debate in the First Committee of the UN General Assembly, Greece proposed a chemical weapons free zone in the Balkans.²³²

239. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1993 CWC, the negotiation of which had been concluded by the Conference on Disarmament, Guinea proposed that Africa become a continent free from chemical weapons.²³³

240. In 1987, during a debate in the First Committee of the UN General Assembly, Haiti stated that it was committed to a global ban on chemical weapons.²³⁴

241. At the First Conference of States Parties to the CWC in 1997, Haiti stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.²³⁵

242. At the First Conference of States Parties to the CWC in 1997, Honduras stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.²³⁶

243. In 1966, during a debate in the First Committee of the UN General Assembly, Hungary stated that:

33. ... Fascist Italy had used gas in the 1935–1936 war against Ethiopia, although both parties had accepted the provisions of the Geneva Protocol of 1925. Fascist Germany had used gas with unsurpassed savagery in a campaign of mass genocide. Chemical ... weapons were being produced in the present armaments race and some of them were actually being used in the war in Viet-Nam. In a report published by the South Viet-Nam National Liberation Front on 22 July 1966, the Committee for the Denunciation of War Crimes Perpetrated in South Viet-Nam by the United States of America had noted that the 406th mobile unit of the United States Bacterial and Chemical Warfare Institute had been transferred from Japan to South Viet-Nam, and that the number of people killed and poisoned in some of the areas affected by the chemicals used had risen by 30 per cent ...

34. ... A leading authority on international law [Lassa Oppenheim] had stated that the cumulative effect of customary law, and of the existing instruments such as the 1925 Protocol, was probably such as to render the prohibition legally effective upon practically all States ...

35. ... Indeed, the use of such mass weapons verged upon genocide ...

...

37. ... Accordingly, [the Hungarian] delegation had submitted a draft resolution ... in which the General Assembly, after recalling that the Geneva Protocol of 1925 had been recognized by many States, would declare that the

use of chemical . . . weapons for the purpose of destroying human beings and the means of their existence constituted an international crime.²³⁷

244. In 1987, during a debate in the First Committee of the UN General Assembly, India stated that its efforts to ban chemical weapons predated the birth of the UN.²³⁸

245. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, India declared that it did not possess chemical weapons.²³⁹

246. At the First Conference of States Parties to the CWC in 1997, India welcomed the entry into force of the 1993 CWC and offered its wholehearted cooperation. It stated that it hoped that the entry into force of the CWC would lead to the total elimination of chemical weapons.²⁴⁰

247. During the 1988 Session of the Conference on Disarmament, the Indonesian Minister of Foreign Affairs stated that Indonesia was a "country which has never possessed chemical weapons".²⁴¹

248. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, the Indonesia stated that it "never had and never will acquire chemical weapons".²⁴²

249. At the First Conference of States Parties to the CWC in 1997, Indonesia emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims.²⁴³

250. In 1987, during a debate in the First Committee of the UN General Assembly, Iran stated that it had never retaliated with chemical weapons against Iraq, even though the 1925 Geneva Gas Protocol only prohibited first use. It complained that the world community had not reacted to Iraq's breach of the 1925 Geneva Gas Protocol.²⁴⁴

251. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, after the ceasefire with Iraq, the Iranian Minister of

²⁴⁴ Iran, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/42/PV.17, 22 October 1987, pp. 8 and 39–40.

Foreign Affairs declared that Iran "never resorted to chemical weapons use, even in retaliation".²⁴⁵

252. At the 1989 Session of the Government-Industry Conference against Chemical Weapons, Iran declared in its plenary statement that during the war its chemical industry "never took any measure to divert its products for production of chemical weapons".²⁴⁶

253. In 1991, during a debate in the First Committee of the UN General Assembly, Iran stated that it wanted the fourth preambular paragraph and the third operative paragraph of Resolution 46/35 B to not only deplore and call for the elimination of the threat of chemical weapons, but also their use.²⁴⁷

254. At the First Conference of States Parties to the CWC in 1997, Iran stated its commitment to the goals and provisions of the 1993 CWC, but also said it understood why some of the Arab States had not signed or ratified the Convention on the grounds that Israel refused to get rid of its nuclear weapons.²⁴⁸

255. According to the Report on the Practice of Iran, during the war with Iraq, Iran continuously objected to the use of chemical weapons and asked for the condemnation of Iraq's use of these weapons. In its protests, Iran did not confine itself to the 1925 Geneva Gas Protocol, but stated that such use should be condemned by all the countries of the world, irrespective of whether they were parties to the Protocol or not.²⁴⁹

256. At the CDDH, Iraq supported the Philippine amendment (see *infra*), since "the use of . . . gas had been prohibited for a very long time but the user was not liable to criminal proceedings. It was high time that the use of such appalling weapons was made a grave offence."²⁵⁰

257. In 1990, the Iraqi President, halfway through a long speech at a military award ceremony broadcast the next day on Baghdad Radio, stated that "we do not need an atomic bomb. We have the binary chemical [*al-kimawi al-muzdawij*]. Let them take note of this. We have the binary chemical."²⁵¹

258. In 1991, during a debate in the UN Security Council, Iraq stated that it had “undertaken the unconditional obligation not to use, develop, manufacture or acquire any material referred to in [Security Council Resolution 687 (1991)]”.²⁵²

259. In 1987, during a debate in the First Committee of the UN General Assembly, Ireland condemned the use of chemical weapons against civilians.²⁵³

260. In 1987, during a debate in the First Committee of the UN General Assembly, Israel condemned the use of chemical weapons in the Iran–Iraq War and chemical attacks against the civilian population and expressed alarm that Syria had developed chemical weapons and that Iran had used them.²⁵⁴

261. In 1991, during a debate in the First Committee of the UN General Assembly, Israel stated that it wanted the Middle East to be a zone free from chemical weapons.²⁵⁵

262. In 1995, during a debate in the First Committee of the UN General Assembly, Israel stated that it had repeatedly called for the elimination of chemical weapons.²⁵⁶

263. At the First Conference of States Parties to the CWC in 1997, Israel stated that, although it had not yet ratified the Convention because virtually none of its Arab neighbours had done so, it was nonetheless “strongly committed to the fundamental goal of the Convention, that is, the total elimination of the scourge of chemical weapons from the face of the earth”.²⁵⁷

264. Italy is said to have used gas in the war against Abyssinia.²⁵⁸ Representatives of Abyssinia complained repeatedly to the Council of the League of Nations about alleged use of gas by the Italian army, and on 30 June 1936, the Emperor of Abyssinia himself protested against and denounced the use of gas by the Italian army before the League of Nations.²⁵⁹ The League condemned the use of gas and imposed sanctions against Italy.²⁶⁰

265. In 1966, during a debate in the First Committee of the UN General Assembly, Italy supported the principle that international law prohibits the

use of chemical weapons as a result of the 1925 Geneva Gas Protocol, but expressed reservations about the resolution's bias against the West.²⁶¹

266. At the CDDH, Italy abstained in the vote on the Philippine amendment (see *infra*) stating that "it would not be useful because it dealt with means and methods of warfare which were already prohibited by the existing law".²⁶²

267. In 1987, during a debate in the UN Security Council, Italy called the prohibition of chemical weapons "a great and precious accomplishment of our civilization".²⁶³

268. In 1987, during a debate in the First Committee of the UN General Assembly, Italy stated that it was committed to a global ban on chemical weapons.²⁶⁴

269. According to a commentator, gas was allegedly used by Japan in the Sino-Japanese War (1937–1943), even though Japan has never admitted this.²⁶⁵ China protested several times to the Council of the League of Nations about these breaches of international law.²⁶⁶

270. In 1968, during a debate in the First Committee of the UN General Assembly, Japan argued in favour of prohibiting not only the use of chemical weapons, but also their production and stockpiling.²⁶⁷

271. In 1987, during a debate in the First Committee of the UN General Assembly, Japan stated that it was committed to a global ban on chemical weapons.²⁶⁸

272. In 1988, in a statement before the Fifteenth Special Session of the UN General Assembly, Japan stated that:

Chemical weapons, in particular, are weapons of mass destruction which kill and injure people with their potent toxicity. They are also extremely dangerous because they are easy to produce and use. It is profoundly regrettable that these heinous weapons have actually been used, for example, in the conflict between Iran and Iraq, despite the prohibition of their use in war under an international convention . . . In order to prevent totally the use of these weapons, it is essential that their stockpiling and production be prohibited and, indeed, that they be eliminated globally.²⁶⁹

²⁶⁹ Japan, Statement before the Fifteenth Special Session of the UN General Assembly, UN Doc. A/S-15/PV.2, 1 June 1988, § 115.

273. In 1993, during a debate in the First Committee of the UN General Assembly, Japan stated that it “attached great importance to the prohibition of chemical weapons”.²⁷⁰

274. In its oral pleadings before the ICJ in the *Nuclear Weapons case* in 1995, Japan referred to the 1925 Geneva Gas Protocol when stating that “the use of weapons of mass destruction . . . is prohibited by international declarations and binding agreements. These principles serve the foundation for the concept of humane treatment.”²⁷¹

275. At the First Conference of States Parties to the CWC in 1997, Japan stated that “in order to effectively achieve the objectives of the Convention to eliminate chemical weapons, it is essential to ensure the universality of this Convention”. For this reason, Japan urged the urgent participation of as many countries as possible in the 1993 CWC. It further reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.²⁷²

276. At the CDDH, Jordan supported the principle behind the Philippine amendment (see *infra*) but stated that “it would be more generally acceptable if it were amended to apply only to the first user of weapons prohibited by international conventions”.²⁷³

277. According to the Report on the Practice of Jordan, Jordan does not use, manufacture or stockpile chemical weapons and it does not plan to do so in the future.²⁷⁴

278. In 1980, the Ministry of Foreign Affairs of Kampuchea deplored the fact that “the Vietnamese army is increasingly resorting to toxic chemical products. In addition to the air-spreadings of these toxic chemical products, the Vietnamese army has conducted the systematic shellings of poison gas in every place.”²⁷⁵

279. In 1987, during a debate in the First Committee of the UN General Assembly, Democratic Kampuchea stated that it was committed to a global ban on chemical weapons.²⁷⁶ In 1991, it was reported that in Cambodia “the Phnom Penh government accused the guerillas of using chemical weapons for the first

²⁷⁶ Democratic Kampuchea, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/42/PV.13, 20 October 1987, p. 33.

time in the 12 year-old civil war, by referring to artillery shells containing 'toxic substances' being fired".²⁷⁷

280. In 1966, during a debate in the First Committee of the UN General Assembly, Kenya supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.²⁷⁸

281. In 1987, during a debate in the First Committee of the UN General Assembly, Kenya maintained that "all States should co-operate in efforts to prevent the use of chemical weapons, in accordance with the principles and objectives of the Geneva Protocol of 1925" until a general convention prohibiting chemical weapons was enacted.²⁷⁹

282. At the First Conference of States Parties to the CWC in 1997, Kenya made statements in support of the object and purpose of the 1993 CWC.²⁸⁰

283. In a statement in January 1989, the Ministry of Foreign Affairs of North Korea stated that:

The government of the Republic in the future, too, as in the past, will not test, produce, store and introduce from outside nuclear and chemical weapons and will never permit the passage of foreign . . . chemical weapons through our territory and territorial waters and air.²⁸¹

284. In 1995, during a debate in the First Committee of the UN General Assembly, North Korea stated that it was opposed "in principle" to chemical weapons.²⁸²

285. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, South Korea declared that it did not possess chemical weapons.²⁸³

286. In 1994, during a debate in the First Committee of the UN General Assembly, South Korea stated that it was dedicated to the elimination of chemical weapons.²⁸⁴

287. At the First Conference of States Parties to the CWC in 1997, South Korea emphasised the importance of the 1993 CWC and stated its commitment and

E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

²⁸⁴ South Korea, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/49/PV.6, 19 October 1994, p. 12.

its determination to contribute actively to the realisation of the Convention's aims.²⁸⁵

288. According to the Report on the Practice of South Korea, South Korea is of the view that the prohibition on the use of chemical weapons is customary.²⁸⁶

289. In an article published in a military review, a member of the Kuwaiti armed forces stated that, during war, belligerents must:

respect restrictions and limits provided for in international conventions, such as restrictions of the use of some weapons, and prohibition of using others, e.g. chemical . . . weapons . . . This is in application of well-established principles in war, such as considerations of military honour and humanitarian considerations.²⁸⁷

290. At the First Conference of States Parties to the CWC in 1997, Kuwait expressed support for the goals of the 1993 CWC and stated its full commitment to the provisions in the Convention and promised full cooperation with the OPCW.²⁸⁸

291. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, Laos stated that it would accede to the 1925 Geneva Gas Protocol and noted that "Laos does not produce chemical weapons and does not intend to".²⁸⁹

292. At the First Conference of States Parties to the CWC in 1997, Laos emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims.²⁹⁰

293. In 1977, during a debate in the UN General Assembly, Lebanon stated that "the Lebanese spirit has always stood against such [chemical] weapons".²⁹¹

294. The Report on the Practice of Lebanon states that Lebanon's refusal to sign the 1993 CWC does not imply that it opposes a prohibition on chemical weapons.²⁹²

295. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, Lesotho stated that "any use of nuclear weapons, even in self-defense, would violate international humanitarian law, including the Hague and Geneva Conventions, which prohibit as practices of war . . . the use of poisonous gases, liquids and analogous substances".²⁹³

296. At the First Conference of States Parties to the CWC in 1997, Lesotho made statements in support of the object and purpose of the 1993 CWC.²⁹⁴

297. The day before his address to the Conference of State Parties to the 1925 Geneva Protocol in 1989, the Libyan Minister of Foreign Affairs told a French interviewer that “despite the fact that the production of chemical weapons is not banned by the Geneva agreement, Libya has decided of its own free will that it will not produce, and furthermore does not intend to produce, chemical weapons”.²⁹⁵

298. In 1991, during a debate in the First Committee of the UN General Assembly, Libya expressed its belief that there was a “need to protect the human race from chemical warfare”.²⁹⁶

299. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1993 CWC, the negotiation of which had been concluded by the Conference on Disarmament, Libya supported an Egyptian initiative for a Middle Eastern zone free of weapons of mass destruction.²⁹⁷

300. At the First Conference of States Parties to the CWC in 1997, Liechtenstein reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.²⁹⁸

301. In 1989, Luxembourg co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries”.²⁹⁹

302. At the First Conference of States Parties to the CWC in 1997, Luxembourg reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.³⁰⁰

303. In 1995, during a debate in the First Committee of the UN General Assembly, Malaysia supported a total ban on chemical weapons.³⁰¹

304. In its written statement submitted to the ICJ in the *Nuclear Weapons (WHO) case* in 1995, Malaysia stated that “chemical weapons have been banned”.³⁰² In a part entitled “Principle of Non-Toxicity”, it also referred to the

1925 Geneva Gas Protocol and the 1956 New Delhi Draft Rules.³⁰³ Malaysia made the same reference in its oral pleadings in the *Nuclear Weapons case* in 1995.³⁰⁴

305. At the First Conference of States Parties to the CWC in 1997, Malaysia welcomed the entry into force of the 1993 CWC and expressed the hope that it would lead to “a world free of the scourge of chemical weapons and global and regional security for all”.³⁰⁵

306. In 1966, during a debate in the First Committee of the UN General Assembly, Mali supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.³⁰⁶

307. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Malta declared that it did not possess chemical weapons.³⁰⁷

308. At the First Conference of States Parties to the CWC in 1997, Malta referred to the enactment of a bill that unanimously authorised the ratification of the 1993 CWC and stated that it was “a tangible attestation of Malta’s unwavering commitment to ensure that our society lives in a tranquil and safe environment free from the menace of chemical weapons”.³⁰⁸

309. At the First Conference of States Parties to the CWC in 1997, Mauritius made statements in support of the object and purpose of the 1993 CWC.³⁰⁹

310. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Mexico declared that it did not possess chemical weapons.³¹⁰

311. In 1992, during a debate in the First Committee of the UN General Assembly dealing mainly with the 1993 CWC, the negotiation of which had been concluded by the Conference on Disarmament, Mexico stated that it was very important that the international community was at the point of totally

E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

banning a category of weapons which, despite the restrictions on their use, had been used in several conflicts by States party to the 1925 Geneva Gas Protocol. For Mexico, this proved that those countries that possessed these kinds of weapons were really willing to rid the world of these weapons by signing this new international treaty.³¹¹

312. At the First Conference of States Parties to the CWC in 1997, Mexico stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.³¹²

313. In 1968, during a debate in the First Committee of the UN General Assembly, Mongolia deplored the use of chemical weapons in South Africa.³¹³

314. In 1987, during a debate in the First Committee of the UN General Assembly, Mongolia stated that it was committed to a global ban on chemical weapons.³¹⁴

315. At the First Conference of States Parties to the CWC in 1997, Morocco made statements in support of the object and purpose of the 1993 CWC.³¹⁵

316. In 1987, during a debate in the First Committee of the UN General Assembly, Nepal stated that it was committed to a global ban on chemical weapons.³¹⁶

317. In 1969, during the debate in the Third Committee of the UN General Assembly on Resolution 2597 (XXIV) reaffirming Resolution 2444 (XXIII), the Netherlands stated that it was "essential to update and broaden . . . the Geneva Protocol and to extend [its] application to cover armed conflicts which are not international in character".³¹⁷

318. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, the Netherlands declared that it did not possess chemical weapons.³¹⁸

319. In 1989, the Netherlands co-sponsored a draft resolution in the UN Commission on Human Rights which expressed "grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during

E/CN.4/Sub.2/1989/4, 17 August 1989, § 98.

1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries".³¹⁹

320. In an explanatory memorandum submitted to the Dutch parliament in 1993 in the context of the ratification of the CWC, the government of the Netherlands stated that "the absolute prohibition of the use of chemical weapons (Article 1 § b) should fall within the laws and customs of war, as mentioned in article 8 of the Criminal Law in Wartime Act". It went on to say that "thus, the use of chemical weapons during armed conflict is at all times a violation of article 8, and prosecutions and adjudication of such a violation will therefore take place in accordance with its provisions".³²⁰

321. In 1980, during a debate in the UN General Assembly, New Zealand stated with respect to Resolution 35/144, which it had sponsored, that:

Of course, . . . no territorial limitations [for the investigations to be carried out by the UN Secretary-General into the alleged use of chemical weapons] are proposed. The Secretary-General is simply asked to look, with the assistance of qualified medical and technical experts, into all complaints of the alleged use of chemical weapons in military operations and to examine the evidence brought to his attention with a view to ascertaining the facts.³²¹

322. In 1987, during a debate in the First Committee of the UN General Assembly, New Zealand condemned the use of chemical weapons against civilians.³²²

323. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, New Zealand declared that it did not possess chemical weapons.³²³

324. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, New Zealand stated, with reference to customary IHL, that "it is prohibited to use asphyxiating, poisonous or other gases and all analogous materials".³²⁴

325. At the First Conference of States Parties to the CWC in 1997, New Zealand emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims.³²⁵

326. In 1991, a Nigerian national newspaper reported that the Nigerian Ministry of Defence had organised a seminar in the 1990s “with the aim of sensitising the developing world to the adverse effects of a total ban on the production, storage and use of chemical weapons as advocated by the developed nations”.³²⁶

327. In 1995, during a debate in the First Committee of the UN General Assembly, Nigeria stated that it was committed to the total prohibition of chemical weapons.³²⁷

328. In 1989, Norway co-sponsored a draft resolution in the UN Commission on Human Rights which expressed “grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries”.³²⁸

329. At the First Conference of States Parties to the CWC in 1997, Norway reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.³²⁹

330. At the First Conference of States Parties to the CWC in 1997, Oman expressed support for the goals of the 1993 CWC and stated its full commitment to the provisions in the Convention and promised full cooperation with the OPCW.³³⁰

331. At the 1986 Session of the Conference on Disarmament, Pakistan declared that it “neither possesses chemical weapons nor desires to acquire them”.³³¹

332. In 1987, during a debate in the First Committee of the UN General Assembly, Pakistan stated that it was committed to a global ban on chemical weapons.³³²

333. Pakistan accused India of using chemical weapons in the Jammu and Kashmir region in 1999.³³³ The allegation was vigorously denied by India, which called it “totally absurd”.³³⁴

334. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Panama declared that it did not possess chemical weapons.³³⁵

335. In 1977, during a debate in the First Committee of the UN General Assembly, Peru supported a complete ban on chemical weapons.³³⁶

336. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Peru declared that it did not possess chemical weapons.³³⁷

337. In 1991, during a debate in the First Committee of the UN General Assembly, Peru stated that it had invited the countries of the Rio Group to reach an agreement on the prohibition of chemical weapons.³³⁸

338. In an official communiqué in 1995, Peru denied having used toxic chemical gases in its conflict with Ecuador.³³⁹

339. At the CDDH, the Philippines proposed an amendment to include “the use of weapons prohibited by international Convention, namely: . . . asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices” in the list of grave breaches in Article 74 of draft AP I (now Article 85).³⁴⁰ The proposal was rejected because it failed to obtain the necessary two-thirds majority (41 votes in favour, 25 against and 25 abstentions).³⁴¹

340. In 1991, during a debate in the First Committee of the UN General Assembly, the Philippines stated that it neither possessed nor produced chemical weapons.³⁴²

348. In 1991, during a debate in the First Committee of the UN General Assembly, Romania stated that it neither possessed nor produced chemical weapons.³⁵⁰

349. At the First Conference of States Parties to the CWC in 1997, Romania reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.³⁵¹

350. Use of chemical weapons by Russia was alleged during the two conflicts in Chechnya in 1994–1996³⁵² and 1999.³⁵³ These allegations were, however, categorically denied by Russian officials.³⁵⁴

351. At the First Conference of States Parties to the CWC in 1997, Russia stated that, although it had not yet ratified the 1993 CWC, it “intends to refrain from any action that would deprive the Convention of its object and purpose”. It further stated that:

After we signed the Convention we have been honouring and will continue to honour the commitments regarding the non-development and non-production of

³⁵⁴ ITAR-TASS from Moscow, 15 December 1994, as in FBIS-SOV-94-241, 15 December 1994, pp. 40–41; Anatoliy Yurkin from Moscow for ITAR-TASS world service (Moscow), 23 July 1996, as translated from the Russian in BBC-SWB, Part 1, EE/D2672/B, 24 July 1996; “Rebels claim victory over Russians in southwestern village of Bamut”, Radio Russia, Moscow, 24 July 1996, as reported in BBC-SWB, 25 July 1996; “Russian Defence Ministry denies using chemical weapons in Chechnya”, ITAR-TASS, Moscow, 9 December 1999, as in BBC-SWB, 9 December 1999; “Claims that Russia uses chemical weapons in Chechnya lies”, ITAR-TASS, Moscow, 10 December 1999; Russia, Statement of the official representative of the Foreign Ministry of the Russian Federation, 10 December 1999, *Diplomaticheskii vestnik*, No. 1, January 2000.

chemical weapons; their non-transfer, directly or indirectly, to anyone; the non-use of chemical weapons; the renunciation of engaging in any military preparations to use them, of providing assistance, encouraging or inducing in any way, anyone to engage in any activity prohibited by the convention.³⁵⁵

352. According to the Report on the Practice of Rwanda, there is no obvious evidence of a Rwandan *opinio juris* on the issue of chemical weapons. However, it states that, in practice, these types of weapons are not employed in Rwanda.³⁵⁶

353. In 1966, during a debate in the First Committee of the UN General Assembly, Saudi Arabia “whole-heartedly supported [a] Hungarian draft resolution” according to which the UN General Assembly would declare that “the use of chemical . . . weapons for the purpose of destroying human beings and the means of their existence constituted an international crime”.³⁵⁷

354. In 1968, during a debate in the First Committee of the UN General Assembly, Saudi Arabia advocated a total prohibition on the use and production of chemical weapons.³⁵⁸

355. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons and on what was to become Resolution 2603 (XXIV), the representative of Saudi Arabia stated that:

107. . . . Stockpiles of chemical weapons [should] be destroyed by all who have them in their arsenals. I would go further: they should not even be manufactured, let alone stockpiled . . .

108. The [1925 Geneva Gas Protocol] is unequivocal in considering the use of all poison gases and toxic chemical agents to be prohibited . . .

...

110. . . . I hope that in the future the United Nations will consider the use of any gas or germ as a criminal act.³⁵⁹

356. In 1995, during a debate in the First Committee of the UN General Assembly, Saudi Arabia stated that it supported “all treaties and conventions that aim at eliminating all types of weapons of mass destruction, including chemical weapons”.³⁶⁰

357. At the First Conference of States Parties to the CWC in 1997, Saudi Arabia stated its commitment to the goals and provisions of the 1993 CWC, but also said it understood why some of the Arab States had not signed or ratified

³⁵⁵ Russia, Statement at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

the Convention on the grounds that Israel refused to get rid of its nuclear weapons.³⁶¹

358. At the Fifth Conference of States Parties to the CWC in 2000, Slovenia stated that:

In 1999 Slovenia adopted the Penal Code which regulates punishment for offences connected with violations of the Convention on Chemical Weapons and the Law on Chemical Weapons, which stipulates the obligations, interdictions and restrictions regarding chemical weapons in line with the Convention and lays down the basis for adoption of regulations by which this matter will be finally dealt on a legal basis in Slovenia. To Slovenia, as a country which has never had chemical weapons, the Convention on Chemical Weapons is of great importance.³⁶²

359. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the Solomon Islands stated that “international law prohibits the use of weapons which: – are chemical”.³⁶³

360. At the First Conference of States Parties to the CWC in 1997, South Africa emphasised the importance of the 1993 CWC and stated its commitment to creating a world free of chemical weapons. It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.³⁶⁴

361. According to the Report on the Practice of South Africa, South Africa considers chemical weapons to be among “certain weapons . . . expressly prohibited by international agreement, treaty or custom”.³⁶⁵

362. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Sri Lanka stated that it “had consistently stood for total and complete disarmament and for a ban on all weapons of mass destruction, including . . . chemical weapons”.³⁶⁶

363. In 1977, during a debate in the First Committee of the UN General Assembly, Sri Lanka supported a complete ban on chemical weapons.³⁶⁷

364. At the First Conference of States Parties to the CWC in 1997, Sri Lanka emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention’s aims.³⁶⁸

³⁶¹ Saudi Arabia, Statement at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

³⁶⁷ Sri Lanka, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.20, 5 October 1977, p. 56.

³⁶⁸ Sri Lanka, Statement at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

365. At the Fifth Conference of States Parties to the CWC in 2000, Sri Lanka stated that it neither possessed chemical weapons, nor had a chemical industry which could produce them.³⁶⁹

366. Sudan has been accused of using chemical weapons on towns in the south of the country.³⁷⁰ This alleged use has, however, never been officially verified and has always been denied by the Sudanese government.³⁷¹ There are some reports by independent institutes or NGOs, but these, too, are contradictory.³⁷²

367. In 1968, during a debate in the First Committee of the UN General Assembly, Sweden proposed that the UN begin a process leading to a total prohibition of the use, production and stockpiling of chemical weapons.³⁷³

368. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons and on what was to become Resolution 2603 (XXIV), Sweden agreed that "there should be a total ban on the use of chemical and biological weapons".³⁷⁴

369. In 1970, during a debate in the Third Committee of the UN General Assembly, Sweden stated that "the rationale for a comprehensive ban on chemical weapons in international armed conflicts would seem to be equally valid in internal armed conflicts. At all events, there should be no hesitation in imposing a complete ban, in internal conflicts."³⁷⁵

370. In 1971, during a debate in the Fourth Committee of the UN General Assembly, Sweden stated that the use of chemical weapons was "contrary to the generally recognized rules of international law as embodied in the Geneva Protocol of 17 June 1925".³⁷⁶

371. In 1988, in a statement before the Fifteenth Special Session of the UN General Assembly, Sweden stated that:

89. The large-scale use of chemical weapons against the city of Halabja was a flagrant violation of the 1925 Geneva Protocol and of customary international law prohibiting the use of chemical weapons. Such attacks must be universally condemned.

³⁷⁶ Sweden, Statement before the Fourth Committee of the UN General Assembly, UN Doc. A/C.4/SR.1961, 3 December 1971, p. 249.

90. . . . The early conclusion of a convention which bans the production, storing and use of all chemical weapons should now be a high priority. All States should commit themselves to adhere to this treaty, thus eliminating the growing threat from chemical weapons.³⁷⁷

372. In 1989, Sweden co-sponsored a draft resolution in the UN Commission on Human Rights which expressed "grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries".³⁷⁸

373. At the First Conference of States Parties to the CWC in 1997, Sweden emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention's aims.³⁷⁹

374. At the CDDH, Switzerland voted in favour of the Philippine amendment (see *supra*) because:

It would be a step forward to state expressly that any violation of The Hague Declaration of 1899 and the Geneva Protocol of 1925 would constitute a grave breach. The rules laid down in those two instruments were undisputed and indisputable, and the amendment would have a deterrent effect on any State tempted to violate them, by exposing the members of its armed forces to the penalties applicable under the Geneva Conventions.³⁸⁰

375. In 1988, in a note on the prohibition on the use of chemical weapons issued, the Swiss Federal Department of Foreign Affairs stated that "the 1925 [Geneva Gas] Protocol declares a custom". It added that "the 1925 [Geneva Gas] Protocol and custom prohibit the first use of chemical weapons and accept the lawfulness of second use only in the case of reprisals in kind".³⁸¹

376. At the First Conference of States Parties to the CWC in 1997, Switzerland emphasised the importance of the 1993 CWC and stated its commitment to creating a world free of chemical weapons.³⁸²

377. In 1977, during a debate in the First Committee of the UN General Assembly, Syria supported a complete ban on chemical weapons.³⁸³

378. In 1987, during a debate in the First Committee of the UN General Assembly, Syria denied that it was developing chemical weapons.³⁸⁴
379. In 1966, during a debate in the First Committee of the UN General Assembly, Tanzania supported Hungary's view that the 1925 Geneva Gas Protocol had developed into customary international law and that the use of chemical weapons constituted an international crime.³⁸⁵
380. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Tanzania supported a ban on chemical weapons.³⁸⁶
381. At the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, Thailand stated that it was strongly opposed to the development, production, stockpiling, and use of chemical weapons in any circumstances for whatever reasons.³⁸⁷
382. In 1991, during a debate in the First Committee of the UN General Assembly, Thailand stated that it neither possessed nor produced chemical weapons.³⁸⁸
383. In 1995, during a debate in the First Committee of the UN General Assembly, Thailand stated that the world community desired a complete elimination of chemical weapons.³⁸⁹
384. At the First Conference of States Parties to the CWC in 1997, Thailand stated its full commitment to the 1993 CWC and emphasised the importance of establishing an effective mechanism to ensure universal compliance with the Convention.³⁹⁰
385. In 1991, during a debate in the First Committee of the UN General Assembly, Tunisia advocated a complete ban on chemical weapons.³⁹¹
386. In 1977, during a debate in the First Committee of the UN General Assembly, Turkey supported a complete ban on chemical weapons.³⁹²
387. At the First Conference of States Parties to the CWC in 1997, Turkey emphasised the importance of the 1993 CWC and stated its commitment and

its determination to contribute actively to the realisation of the Convention's aims.³⁹³

388. There have been allegations of the use of chemical weapons by Turkey against the country's Kurdish population; the use has not been verified and the allegations were denied by the Turkish government.³⁹⁴

389. In 1966, during a debate in the First Committee of the UN General Assembly, Ukraine supported Hungary's view that the 1925 Geneva Gas Protocol had developed into customary international law and that the use of chemical weapons constituted an international crime.³⁹⁵

390. In 1977, during a debate in the First Committee of the UN General Assembly, Ukraine also referred to the 1972 initiative and stated that the elimination of chemical weapons was one of the most important measures of disarmament.³⁹⁶

391. In 1987, during a debate in the First Committee of the UN General Assembly, Ukraine proposed a chemical weapons free zone in Europe.³⁹⁷

392. In 1991, during a debate in the First Committee of the UN General Assembly, Ukraine stated that it neither possessed nor produced chemical weapons.³⁹⁸

393. In 1994, during a debate in the First Committee of the UN General Assembly, Ukraine stated that it wanted to "rid the densely populated European continent, as well as other regions, of these deadly [chemical] weapons by the beginning of next century".³⁹⁹

394. At the First Conference of States Parties to the CWC in 1997, Ukraine stated that "it must be our general aim to give this document a universal stamp". It further offered its full cooperation with the OPCW and promised to ratify the 1993 CWC as soon as possible.⁴⁰⁰

⁴⁰⁰ Ukraine, Statement at the First Conference of States Parties to the CWC, The Hague, 6–23 May 1997.

395. In 1970, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), the USSR stated that:

The use of asphyxiating, poisonous and tear gases and other gases of a similar nature... was prohibited by the Geneva Protocol of 17 June 1925. The United States signed that Protocol, but did not ratify it. However, that does not mean that the prohibition of the use of poisonous substances does not extend to the United States. That prohibition has become a generally recognized rule of international law, and countries which violate it must bear responsibility before the international community.⁴⁰¹

396. In 1970, during a debate in the Third Committee of the UN General Assembly, the USSR stated that the 1925 Geneva Gas Protocol was fully applicable in situations where freedom fighters struggled for liberation against colonial powers.⁴⁰²

397. At the CSCE review meeting in Madrid in 1982, when the US delegation accused the USSR of violating the 1925 Geneva Gas Protocol, the Soviet delegation rejected the charges as "monstrous accusations, false from beginning to end" and denied that the USSR had ever used chemical weapons "anywhere under any circumstances or by any means".⁴⁰³

398. In 1987, during a debate in the First Committee of the UN General Assembly, the USSR strongly supported the global elimination of chemical weapons.⁴⁰⁴

399. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, the USSR declared that "it had never used chemical weapons or stockpiled them on foreign territories. It had stopped production of chemical weapons."⁴⁰⁵

400. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, the USSR stated with respect to Resolution 687 (1991) that:

The most acute issue is that of creating an effective barrier against the use of weapons of mass destruction in that region. From that viewpoint, of great importance are the provisions in the resolution regarding Iraq's destruction of chemical... weapons... and in the context of Iraq's confirmation of its obligations of

⁴⁰¹ USSR, Reply dated 30 December 1969 to the UN Secretary-General regarding the preparation of the study requested in paragraph 2 of General Assembly Resolution 2444 (XXIII), annexed to Report of the Secretary-General on respect for human rights in armed conflicts, UN Doc. A/8052, 18 September 1970, Annex III, p. 120.

⁴⁰⁴ USSR, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/42/PV.23, 27 October 1987, pp. 16-30.

⁴⁰⁵ USSR, Reply to a note verbale of the UN Secretary-General referred to in Report of the Secretary-General on respect for the right to life: elimination of chemical weapons, prepared in accordance with UN Sub-Commission on Human Rights Resolution 1988/27, UN Doc. E/CN.4/Sub.2/1989/4, 17 August 1989, §§ 98 and 105.

the Geneva Protocol of 1925 to bring into play the International Atomic Energy Agency... It is also important that all Middle Eastern countries accede to... those international agreements prohibiting chemical... weapons.⁴⁰⁶

401. In 1966, during a debate in the First Committee of the UN General Assembly, the UK supported the principle that international law prohibits the use of chemical weapons as a result of the 1925 Geneva Gas Protocol.⁴⁰⁷

402. At the CDDH, the UK voted against the Philippine amendment (see *supra*) because:

A significant number of the States party to the Geneva Protocol of 1925 had entered a reservation thereto; for those States the Protocol contained no absolute prohibition on the use of the weapons mentioned in it, but rather a prohibition on the first use only. Nor was it convincing to state that the Geneva Protocol of 1925 represented no more than the existing customary law of war; ever since the adoption of resolution XXVIII by the XXth International Conference of the Red Cross (Vienna 1965), States had been urged in United Nations resolutions to accede to that Protocol in accordance with its express terms. Such a situation was entirely inconsistent with the contention made in debate that the Geneva Protocol of 1925 reflected existing customary international law. That contention could not be supported.⁴⁰⁸

403. In 1977, during a debate in the First Committee of the UN General Assembly, the UK supported a complete ban on chemical weapons.⁴⁰⁹

404. In 1983, in reply to a question in the House of Lords on the subject of the use of chemical weapons in South-East Asia, the UK Minister of State, FCO, stated that "the use of chemical weapons is a flagrant contradiction of the civilized standards reflected in the 1925 [Geneva Gas] Protocol".⁴¹⁰

405. In 1987, during a debate in the First Committee of the UN General Assembly, the UK stated that it and its allies were committed to a global ban on chemical weapons.⁴¹¹

406. At a press conference held on 30 March 1988, a spokesperson for the UK Foreign and Commonwealth Office stated that the Iraqi use of chemical weapons against Kurdish civilians in Halabja "represents a serious and grave violation of the 1925 Geneva Protocol and international humanitarian law. The UK condemns unreservedly this and all other uses of chemical weapons".⁴¹²

⁴¹² UK, Statement by the FCO Spokesperson at a Press Conference, 30 March 1988, reprinted in *BYIL*, Vol. 59, 1988, p. 579.

407. In 1989, the UK co-sponsored a draft resolution in the UN Commission on Human Rights which expressed "grave concern about reports of killing of unarmed Kurdish civilians, in particular by military attacks during 1988 using, inter alia, chemical weapons and causing mass exodus to neighbouring countries".⁴¹³

408. In 1990, during a debate in the UN Security Council on a peaceful and just post-Cold War world, the UK stated that, under paragraph 13 of Resolution 670 (1990), individuals were held responsible for grave breaches of the Geneva Conventions and that "we should also hold personally responsible those involved in violations of the laws of armed conflict, including the prohibition against initiating the use of chemical . . . weapons contrary to the Geneva Protocol of 1925, to which Iraq is a party".⁴¹⁴

409. In 1991, during a debate in the House of Commons on the Gulf crisis, the UK Prime Minister stated that:

Chemical weapons, already used by Saddam Hussein against his own people, have been deployed. Contrary to international agreements, Iraq has produced and threatened to use both chemical and biological weapons, the use of which would be wholly contrary to international agreements.⁴¹⁵

410. In 1991, in a report submitted to the UN Security Council on operations in the Gulf War, the UK stated that "the Iraqi Ambassador [to the UK] was also reminded of Iraq's obligations under the 1925 Geneva [Gas] Protocol in respect of chemical . . . weapons. The United Kingdom would take the severest view of any use of these weapons by Iraq."⁴¹⁶

411. In 1991, during a debate in the House of Commons on the Gulf crisis, the UK Minister of State, FCO, stated that "we have always recognised that Saddam Hussein possesses chemical weapons and judging from his track record, he may well use them. To do so would be a breach of the 1925 [Geneva Gas Protocol]. It would be a gross crime."⁴¹⁷

412. In 1991, during a debate in the UN Security Council on the situation between Iraq and Kuwait, the UK stated with respect to Resolution 687 (1991) that:

The resolution contains tough provisions for the destruction of Iraqi chemical and biological weapons . . . It is surely right to do so. For Iraq alone in the region has not only developed many of these weapons, it has actually used them both against a

⁴¹⁷ UK, House of Commons, Statement by the Minister of State, FCO, *Hansard*, 22 February 1991, Vol. 186, col. 576.

neighbouring State and against its own population, and it has made the threat of their use part of the daily discourse of its diplomacy as it has attempted to bully and coerce its neighbours . . . But action against Iraq's weapons of mass destruction must clearly not be the end of the affair, a one-off operation, and that is why the resolution so clearly situates this action within the wider framework of work towards a whole region free of weapons of mass destruction and, indeed, towards even wider actions – for example to outlaw chemical weapons worldwide.⁴¹⁸

413. In 1993, during a debate in the House of Commons, the UK Secretary of State for Defence stated that:

We would view with the gravest concern any evidence revealed to the United Nations – which is studying the situation in southern Iraq – that might give it reason to believe that chemical weapons might have been used in that part of the country. Clearly, the use of such weapons is contrary to Iraq's international obligations; moreover, it gives rise to a particular sense of abhorrence which is felt not only by all hon. Members but by the international community as a whole.⁴¹⁹

414. In 1998, in reply to a question in House of Commons about the UK's position on chemical and biological weapons and nuclear weapons at a meeting of the Preparatory Committee for the Establishment of an International Criminal Court, the UK Prime Minister stated that:

The UK delegation supported proposals to include within the jurisdiction of the ICC war crimes under existing customary international law. For that reason, the delegation supported the inclusion of the use of methods of warfare of a nature to cause superfluous injury or unnecessary suffering; these included . . . chemical weapons as referred to in the 1993 Chemical Weapons Convention.⁴²⁰

415. According to the Report on UK Practice, an IFOR restricted document (Legal Standard Operating Procedures) provides for “no use of chemical weapons – other than tightly controlled use in riot control situations”.⁴²¹

416. In 1966, during a debate in the First Committee of the UN General Assembly, the US, in reply to allegations made by Hungary that the US were using chemical weapons in Viet-Nam, stated that “allegations that the United States was using poison gas in Viet-Nam were completely unfounded”.⁴²²

417. In 1966, during a debate in the First Committee of the UN General Assembly, the US stated that it supported the 1925 Geneva Gas Protocol, even though it had not ratified it.⁴²³

⁴²¹ Report on UK Practice, 1997, Chapter 3.4.

⁴²² US, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/SR.1451, 11 November 1966, § 41.

⁴²³ US, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/SR.1452, 14 November 1966, p. 158.

418. In 1970, during a debate in the Third Committee of the UN General Assembly, the US was criticised by different States for using chemical weapons in Vietnam in violation of the 1925 Geneva Gas Protocol. It rejected the allegations and proclaimed “its intention to abide strictly by [the 1925 Geneva Gas Protocol] terms” even though it was not a party.⁴²⁴

419. At the CDDH, the US voted against the Philippine amendment (see *supra*) because:

Grave breaches were meant to be the most serious type of crime; Parties had an obligation to punish or extradite those guilty of them. Such crimes should therefore be clearly specified, so that a soldier would know if he was about to commit an illegal act for which he could be punished. The amendment, however, was vague and imprecise . . . The amendment would also make it unlawful to use certain gases in retaliation, whereas under Protocol I only first use of such gases was unlawful. It would also punish those who used the weapons, namely, the soldiers, rather than those who made the decision as to their use, namely, Governments.⁴²⁵

420. In 1980, in a memorandum of law on the “Reported Use of Chemical Agents in Afghanistan, Laos, and Kampuchea”, a legal adviser of the US Department of State stressed that:

The prohibition of the first use in war of chemical weapons has, by reason of the practice and affirmations of states, become a part of the rules of customary international law which are binding on all states; and neither the limitations of the [1925 Geneva Gas] Protocol text nor reservations to it can detract from these obligations. Therefore, all states should be regarded as being bound to refrain from such first use, whether or not they or their opponents are parties to the Protocol.

...

In theory, an attempt might also be made to justify the use of chemical weapons in Afghanistan as a lawful reprisal against violations of the general laws of war by Afghan insurgents (such as the summary execution of Soviet prisoners). However, such an argument would face several serious problems. First, the prohibition in the [1925 Geneva Gas] Protocol and in customary international law apparently itself precludes use of chemical weapons in reprisal except in response to enemy use of weapons prohibited by the [1925 Geneva Gas] Protocol.⁴²⁶

The Department of State noted that “the Afghan conflict seems clearly to be an external invasion and occupation to which the rules of international armed conflict, including the rules against first use of chemical weapons, apply”. It added that “the [1925 Geneva Gas] Protocol itself does not apply to the Afghan conflict, because Afghanistan has never adhered to the Protocol . . . However, . . . the

⁴²⁵ US, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, pp. 280–281, § 7.

⁴²⁶ US, Department of State, Memorandum of law by a Legal Adviser on the “Reported Use of Chemical Agents in Afghanistan, Laos, and Kampuchea”, 9 April 1980, reprinted in Marian Nash Leich, *Digest of United States Practice in International Law, 1980*, Department of State Publication 9610, Washington, D.C., 1986, pp. 1027 and 1041, footnote 38.

prohibition on the first use of chemical weapons in war has become a part of customary international law binding on all states, whether or not parties to the Protocol". With respect to the conflict in Laos, the memorandum stated that "the customary law prohibition [has] generally been described as rules applying in international armed conflicts . . . There are at this time no strong precedents establishing that the prohibition on chemical weapons would be regarded as applying to a conflict of this character".⁴²⁷

421. In 1986, during a debate in the UN Security Council, the US stated that "the use of chemical weapons is a serious violation of international law".⁴²⁸

422. In 1987, during a debate in the UN Security Council, the US stated that chemical weapons were not capable of distinguishing between combatants and civilians.⁴²⁹

423. In an executive order issued in 1990, the US President stated that "the proliferation of chemical . . . weapons constitutes an unusual and extraordinary threat to the national security and foreign policy of the United States". The order also provided for the possibility of imposing sanctions against foreign persons and governments found to have "knowingly and materially" contributed to efforts to "use, develop, produce, stockpile or otherwise acquire chemical . . . weapons".⁴³⁰

424. In 1991, in a diplomatic note to Iraq concerning operations in the Gulf War, the US stated that it "expects the Government of Iraq to respect its obligations under the Geneva [Gas] Protocol of 1925 not to use chemical . . . weapons".⁴³¹

425. In 1991, during a debate in the UN Security Council, the US supported the resolution on the elimination of Iraq's chemical weapons in order to keep the region secure.⁴³²

426. In 1991, during a debate in the First Committee of the UN General Assembly, the US stated that a ban on chemical weapons was a top priority in its foreign policy.⁴³³

427. In 1993, during a debate in the First Committee of the UN General Assembly, the US stated that it had worked for the elimination of chemical weapons.⁴³⁴

⁴²⁷ US, Department of State, Memorandum of law by a Legal Adviser on the "Reported Use of Chemical Agents in Afghanistan, Laos, and Kampuchea", 9 April 1980, reprinted in Marian Nash Leich, *Digest of United States Practice in International Law, 1980*, Department of State Publication 9610, Washington, D.C., 1986, pp. 1033 and 1036.

⁴³⁴ US, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/48/SR.5, 19 October 1993, p. 10.

428. At the First Conference of States Parties to the CWC in 1997, the US stated that “the United States recognises the importance of our full participation in the chemical weapons convention at entry into force” and that “the United States stands committed to stopping the spread of weapons of mass destruction and to ensuring that the CWC is implemented effectively”. It further reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.⁴³⁵

429. In 1998, in a legal review of Oleoresin Capsicum (OC) pepper spray, the Deputy Assistant Judge Advocate General of the US Department of the Navy stated that:

Like the Biological Weapons Convention, the CWC is an arms control treaty and is not limited to application during international armed conflict (i.e., it applies at all times and under all circumstances unless the treaty indicates otherwise) . . .

. . . The chemical, of course, must be potentially toxic, i.e., have harmful chemical action on life processes. Furthermore, the toxicity must affect humans or animals.⁴³⁶

430. In 1998, CNN alleged that the US used chemical weapons (sarin) to kill defectors in the Vietnam War. The US State Department responded that it had not used sarin in the operation, and that “the US policy since World War II has prohibited the use of lethal chemical agents, including sarin, unless first used by the enemy”.⁴³⁷ Later, the CNN President apologised for the report and stated that “there is insufficient evidence that sarin or any other deadly gas was used”.⁴³⁸

431. At the First Conference of States Parties to the CWC in 1997, Uruguay emphasised the importance of the 1993 CWC and stated its commitment and its determination to contribute actively to the realisation of the Convention’s aims.⁴³⁹

432. In 1989, in reply to a note verbale of the UN Secretary-General on the subject of chemical weapons, Venezuela declared that it did not possess chemical weapons. It furthermore stated that:

In order to ensure strict compliance with the principles and objectives of the Geneva Protocol of 1925, it was essential that the countries which had entered reservations to the 1925 Protocol should withdraw them, because the purpose of most of these reservations was to allow the States that had made them to retain the possibility

of using chemical weapons in retaliation, should the need arise. As a result of these reservations, the Geneva Protocol, which was conceived as an instrument to prohibit the use of chemical weapons, had become an instrument of *non-first use*.⁴⁴⁰ [emphasis in original]

433. At the First Conference of States Parties to the CWC in 1997, Venezuela stated that it was in favour of global eradication of chemical weapons and stressed the importance of universal adherence to the 1993 CWC.⁴⁴¹

434. In 1981, in a letter to the UN Secretary-General in reaction to US allegations that charging Vietnam was “using Soviet-supplied toxic chemicals in Laos and Kampuchea”, Vietnam stated that:

The US is . . . supplying toxic chemicals to [others] to be used against the peoples of other countries as is the case in Afghanistan . . . [The charges made by the US are] aimed at covering the crime of the United States of using toxic chemicals on a large scale and for more than ten years during [US activities] against Vietnam . . . The Ministry of Foreign Affairs of the Socialist Republic of Viet Nam completely rejects the above [charges made by the US].⁴⁴²

435. In 1987, during a debate in the First Committee of the UN General Assembly, Vietnam stated that it was committed to a global ban on chemical weapons.⁴⁴³

436. At the 1989 Session of the Conference on Disarmament, Vietnam stated that “on the one hand, Viet Nam has been the victim of the use of chemical weapons on an enormous scale, while on the other it neither produces nor holds any chemical weapon”.⁴⁴⁴

437. In 1991, during a debate in the UN Security Council, Yemen stated that it supported the eradication of weapons of mass destruction in the Middle East, but that the unilateral disarmament of Iraq would create imbalance in the region.⁴⁴⁵

438. In 1977, during a debate in the First Committee of the UN General Assembly, the SFRY supported a complete ban on chemical weapons.⁴⁴⁶

⁴⁴⁰ Venezuela, Reply to a note verbale of the UN Secretary-General, referred to in Report of the Secretary-General on respect for the right to life: elimination of chemical weapons, prepared in accordance with UN Sub-Commission on Human Rights Resolution 1988/27, UN Doc. between Iran and Iraq] conclusions that chemical weapons continue to be used in the conflict and that their use has been on an ever more intensive scale than before,

1. *Affirms* the urgent necessity of strict observance of the [1925 Geneva Gas Protocol];
2. *Condemns vigorously* the continued use of chemical weapons in the conflict between the Islamic Republic of Iran and Iraq contrary to obligations under the Geneva Protocol;
3. *Expects* both sides to refrain from the future use of chemical weapons in accordance with their obligations under the Geneva Protocol;
4. *Calls upon* all States to continue to apply or to establish strict control of the export to the parties to the conflict of chemical products serving for the production of chemical weapons.⁴⁶¹ [emphasis in original]

451. In a resolution adopted in 1988, the UN Security Council expressed its concern over the possible use of chemical weapons in the future and its determination to “intensify its efforts to end all use of chemical weapons in violation of international obligations now and in the future”. The meaning of “international obligations” was explained in the second operative paragraph, which encourages the UN Secretary-General to investigate alleged breaches of “the 1925 Geneva Protocol or other relevant rules of customary law”.⁴⁶²

452. In Resolution 687 adopted in 1991 following the cessation of hostilities in the Gulf War, the UN Security Council recalled that:

Iraq has subscribed to the Final Declaration adopted by all States participating in the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States, held in Paris from 7 to 11 January 1989, establishing the objective of universal elimination of chemical and biological weapons.

In Part C of the resolution, the Security Council stated that it:

7. *Invites* Iraq to reaffirm unconditionally its obligations under the [1925 Geneva Gas Protocol] . . .
8. *Decides* that Iraq shall unconditionally accept the destruction, removal, or rendering harmless, under international supervision, of:
 - (a) All chemical and biological weapons and all stocks of agents and all related subsystems and components and all research, development, support and manufacturing facilities related thereto.⁴⁶³ [emphasis in original]

453. In a large number of resolutions adopted between 1968 and 1989, the UN General Assembly called on all States to become parties to the 1925 Geneva Gas Protocol.⁴⁶⁴

⁴⁶¹ UN Security Council, Res. 612, 9 May 1988, preamble and §§ 1–4.

⁴⁶² UN Security Council, Res. 620, 26 August 1988, § 2.

⁴⁶³ UN Security Council, Res. 687, 3 April 1991, Part C, §§ 7–8.

⁴⁶⁴ UN General Assembly, Res. 2444 (XXIII), 19 December 1968, § 5; Res. 2454 (XXIII) A, 20 December 1968, preamble; Res. 2603 (XXIV) B, 16 December 1969, § I(2); Res. 2662 (XXV), 7 December 1970, § 2; Res. 2677 (XXV), 9 December 1970, § 1; Res. 2827 (XXVI) A, 16 December 1971, § 6; Res. 2852 (XXVI), 20 December 1971, § 1; Res. 2853 (XXVI), 20 December 1971, § 1; Res. 2933 (XXVII), 29 December 1972, § 5; Res. 3077 (XXVIII), 6 December 1973, § 5; Res. 3256 (XXIX), 9 December 1974, § 5; Res. 31/65, 10 December 1976, § 4; Res. 32/77,

454. In several resolutions adopted between 1992 and 1999, the UN General Assembly called on all States to become parties to the 1993 CWC.⁴⁶⁵

455. A large number of UN General Assembly resolutions generally call for respect for the 1925 Geneva Gas Protocol or indicate its importance. Seventeen resolutions state that the UN General Assembly “reiterates its call for strict observance by all States of the principles and objectives of the 1925 Protocol”.⁴⁶⁶ Thirteen resolutions repeat this call and condemn “all actions contrary to those objectives”.⁴⁶⁷ Following the alleged use of chemical weapons by Iraq in 1988, the General Assembly further strengthened the language in several resolutions, by adding the word “vigorously” after “condemns”.⁴⁶⁸ In two other resolutions, the General Assembly stated the “need for strict observance of existing international obligations regarding prohibitions on chemical . . . weapons and condemns all actions that contravene these obligations”.⁴⁶⁹ Two resolutions referred to the “continuing importance of the 1925 Geneva Protocol”.⁴⁷⁰ Several resolutions had as their title “Measures to uphold the authority of the 1925 Geneva Protocol”.⁴⁷¹

456. A number of resolutions adopted by the UN General Assembly refer to the 1925 Geneva Gas Protocol as part of the rules of IHL to be respected. In them, the General Assembly calls upon “all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular . . . the

⁴⁶⁷ UN General Assembly, Res. 2162 (XXI) B, 5 December 1966, § 1; Res. 2662 (XXV), 7 December 1970, § 1; Res. 2674 (XXV), 9 December 1970, § 3; Res. 2827 (XXVI) A, 16 December 1971, preamble; Res. 2933 (XXVII), 29 November 1972, preamble; Res. 3077 (XXVIII), 6 December 1973, preamble; Res. 3256 (XXIX), 9 December 1974, preamble; Res. 3465 (XXX), 11 December 1975, preamble; Res. 37/98 E, 13 December 1982, § 2; Res. 39/65 A, 12 December 1984, preamble; Res. 42/37 C, 30 November 1987, § 1; Res. 43/74 A, 7 December 1988, § 1; Res. 44/115 B, 15 December 1989, § 1.

⁴⁶⁸ UN General Assembly, Res. 44/115 B, 15 December 1980, § 1; Res. 45/57 C, 4 December 1990, § 1; Res. 46/35 B, 6 December 1991, § 1.

⁴⁶⁹ UN General Assembly, Res. 40/92 C, 12 December 1985, § 1; Res. 41/58 C, 3 December 1986, § 1. (Similar wording is to be found in Res. 39/65 A, 12 December 1984, § 1.)

⁴⁷⁰ UN General Assembly, Res. 40/92 A, 12 December 1985, preamble; Res. 41/58 B, 3 December 1986, preamble.

⁴⁷¹ UN General Assembly, Res. 37/98 D, 13 December 1982; Res. 42/37 C, 30 November 1987; Res. 44/115 B, 15 December 1989; Res. 45/57 C, 4 December 1990; Res. 46/35 B, 6 December 1991; Res. 51/45 P, 10 December 1996.

1925 Geneva Protocol"⁴⁷² and states that it is "convinced of the continuing value of established humanitarian rules relating to armed conflict, in particular... the 1925 Geneva Protocol".⁴⁷³ Two resolutions recall "the provisions of the 1925 Geneva Protocol and other relevant rules of customary international law".⁴⁷⁴

457. In a resolution adopted in 1969, the UN General Assembly stated that the 1925 Geneva Gas Protocol "embodies the generally recognised rules of international law prohibiting the use in international armed conflicts of all... chemical methods of warfare, regardless of any technical developments". It declared:

as contrary to the generally recognized rules of international law, as embodied in the [1925 Geneva Gas Protocol] the use in international armed conflicts of:

- (a) Any chemical agents of warfare – chemical substances, whether gaseous, liquid or solid – which might be employed because of their direct toxic effects on man, animals or plants.⁴⁷⁵

The large number of States which abstained in the vote on the resolution (36) was partly due to disagreement on the scope of the 1925 Geneva Gas Protocol. Other States thought that the UN General Assembly should not interpret multilateral treaties.⁴⁷⁶

458. In a resolution adopted in 1970, the UN General Assembly called upon "the Government of Portugal not to use chemical... methods of warfare against the peoples of Angola, Mozambique and Guinea (Bissau) contrary to the generally recognised rules of international law embodied in the 1925 Geneva Protocol".⁴⁷⁷

459. In a resolution adopted in 1971, the UN General Assembly reiterated its condemnation of the use of chemical weapons by Portugal against certain

⁴⁷² UN General Assembly, Res. 3032 (XXVII), 18 December 1972, § 2; Res. 3102 (XXVIII), 12 December 1973, § 4; Res. 3319 (XXIX), 14 December 1974, § 3; Res. 3500 (XXX), 15 December 1975, § 1; Res. 31/19, 24 December 1976, § 1.

⁴⁷³ UN General Assembly, Res. 32/44, 8 December 1977, § 6.

⁴⁷⁴ UN General Assembly, Res. 42/37 C, 30 November 1987, preamble; Res. 43/74 A, 7 December 1988, preamble.

⁴⁷⁵ UN General Assembly, Res. 2603 A (XXIV), 16 December 1969, preamble and § (a). The resolution was adopted by 80 votes in favour, 3 against (Australia, Portugal and US) and 36 abstentions (Austria, Belgium, Bolivia, Canada, Chile, China, Denmark, El Salvador, France, Greece, Iceland, Israel, Italy, Japan, Laos, Liberia, Luxembourg, Madagascar, Malawi, Malaysia, Netherlands, New Zealand, Nicaragua, Norway, Paraguay, Philippines, Sierra Leone, Singapore, South Africa, Swaziland, Thailand, Tunisia, Turkey, UK, Uruguay and Venezuela), UN Doc. A/PV.1836, 16 December 1969, p. 4.

⁴⁷⁶ Debates in the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1716, 9 December 1969; UN Doc. A/C.1/PV.1717, 10 December 1969.

⁴⁷⁷ UN General Assembly, Res. 2707 (XXV), 14 December 1970, § 9. (The resolution was adopted by 94 votes in favour, 6 against and 16 abstentions. The votes against and abstaining appear to have been linked to the colonial question rather than to the evaluation of the value of the 1925 Geneva Gas Protocol as such.)

territories under its administration.⁴⁷⁸ The condemnation was repeated in two further resolutions in 1972 and 1973.⁴⁷⁹

460. In two resolutions adopted in 1971, the UN General Assembly called upon “all parties to any armed conflict to observe the rules laid down . . . in the 1925 Geneva Protocol”.⁴⁸⁰

461. In a resolution adopted in 1974, the UN General Assembly stated that “the use of chemical . . . weapons in the course of military operations constitutes one of the most flagrant violations of the Geneva [Gas] Protocol of 1925 . . . and the principles of international humanitarian law . . . and shall be severely condemned”.⁴⁸¹

462. With a view to reaching an agreement that would provide for the total elimination of chemical weapons, the UN General Assembly expressed support for the goal of a total ban in numerous resolutions.⁴⁸²

463. In 1978, in the Final Document of its Tenth Special Session, the UN General Assembly stated that:

72. All States should adhere to the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare, signed at Geneva on 17 June 1925.

75. The complete and effective prohibition of the development, production and stockpiling of all chemical weapons and their destruction represents one of the most urgent measures of disarmament. Consequently, the conclusions of a convention to this end, on which negotiations have been going on for several years, is one of the most urgent tasks of multilateral negotiations. After its conclusion, all States should contribute to ensuring the broadest possible application of the convention through its early signature and ratification.⁴⁸³

⁴⁷⁸ UN General Assembly, Res. 2795 (XXVI), 10 December 1971, preamble.

⁴⁷⁹ UN General Assembly, Res. 2918 (XXVII), 14 November 1972, preamble; Res. 3113 (XXVIII), 12 December 1973, § 3.

⁴⁸⁰ UN General Assembly, Res. 2852 (XXVI), 20 December 1971, § 1; Res. 2853 (XXVI), 20 December 1971, § 1.

⁴⁸¹ UN General Assembly, Res. 3318 (XXIX), 14 December 1974, § 2. (Similar language is used in Res. 39/65 E, 12 December 1984, which states in its second preambular paragraph that “the use of such agents in war is universally condemned.” The resolution was adopted without a vote.)

⁴⁸² UN General Assembly, Res. 2662 (XXV), 7 December 1970, § 5(a) and (b); Res. 2827 (XXVI) A, 16 December 1971, § 4; Res. 2827 (XXVI) B, 16 December 1971; Res. 2933 (XXVII), 29 December 1972, preamble, §§ 1 and 3; Res. 3077 (XXVIII), 6 December 1973, § 1; Res. 3256 (XXIX), 9 December 1974, §§ 1 and 2; Res. 3465 (XXX), 11 December 1975, preamble and § 2; Res. 31/65, 10 December 1976, preamble and § 1; Res. 32/77, 12 December 1977, preamble and § 1; Res. 33/59 A, 14 December 1978, preamble; Res. 34/72, 11 December 1979, § 1; Res. 35/144 A, 12 December 1980, § 1(a); Res. 36/96 B, 9 December 1981, § 1; Res. 37/98 A, 13 December 1982, preamble; Res. 37/98 B, 13 December 1982, preamble; Res. 38/187 A, 20 December 1983, preamble; Res. 39/65 A, 12 December 1984, § 3; Res. 39/65 C, 12 December 1984, § 2; Res. 40/92 A, 12 December 1985, preamble; Res. 41/58 B, 3 December 1986, preamble; Res. 41/58 C, 3 December 1986, § 3; Res. 42/37 A, 30 November 1987, § 2; Res. 43/74 C, 7 December 1988, preamble; Res. 44/115 A, 15 December 1989, preamble; Res. 45/57 A, 4 December 1990, preamble; Res. 46/35 C, 6 December 1991, preamble; Res. 47/39, 30 November 1992, preamble; Res. 51/45 P, 10 December 1996, preamble; Res. 51/45 T, 10 December 1996, preamble.

⁴⁸³ UN General Assembly, Final Document of the Tenth Special Session, UN Doc. A/S-10/2, 30 June 1978, III. Programme of Action, §§ 72 and 75.

464. In a resolution adopted in 1982, the UN General Assembly stated that “the use of chemical . . . weapons has been declared incompatible with the accepted norms of civilization”.⁴⁸⁴

465. In a resolution adopted in 1982, the UN General Assembly outlined a procedure for investigations into breaches of the 1925 Geneva Gas Protocol, which involved the UN Secretary-General convening a group of experts to investigate “activities that may constitute a violation of the Protocol or of the relevant rules of customary international law”.⁴⁸⁵ This resolution was adopted in the context of the East-West conflict over the alleged use of chemical weapons in Afghanistan, Kampuchea and Laos. Although the debates were strongly partisan in relation to the actual allegations, there was strong support for the norm prohibiting the use of chemical weapons.⁴⁸⁶

466. In a resolution adopted in 1988, the UN General Assembly expressed “deep dismay at the use of chemical weapons in violation of the 1925 Geneva Protocol and of other rules of customary international law” and requested that the Secretary-General investigate reports of the possible use of chemical weapons in the Iran–Iraq War.⁴⁸⁷ A further request for investigation into the use of chemical weapons was made in a resolution adopted by the UN General Assembly in 1989, which expressed the deep dismay of the UN General Assembly “at the use and risk of use of chemical weapons”.⁴⁸⁸

467. In a resolution adopted in 1991 on the situation of human rights in Iraq, the UN General Assembly stated that it was “deeply concerned by the fact that chemical weapons have been used on the Kurdish population”.⁴⁸⁹

468. In a resolution adopted in 1993, the UN General Assembly stated that it was “deeply concerned by the fact that chemical weapons have been used on the Kurdish population”.⁴⁹⁰

⁴⁸⁴ UN General Assembly, Res. 37/98 E, 13 December 1982, preamble. (Similar language is to be found in Res. 2162 (XXI) B, 5 December 1966, which states in its second preambular paragraph that “weapons of mass destruction constitute a danger to all mankind and are incompatible with the accepted norms of civilisation”. The resolution was adopted by 101 votes in favour, none against and 3 abstentions.)

⁴⁸⁵ UN General Assembly, Res. 37/98 D, 13 December 1982, § 4. (The resolution was adopted by 86 votes in favour, 19 against and 33 abstentions. Against: Afghanistan, Bulgaria, Belarus, Congo, Cuba, Czechoslovakia, Ethiopia, GDR, Grenada, Hungary, Laos, Libya, Mongolia, Poland, Syria, Ukraine, USSR, Vietnam and Democratic Yemen. Abstaining: Algeria, Argentina, Bahrain, Bhutan, Bolivia, Brazil, Burma, Burundi, Cyprus, Finland, Ghana, Guinea, Guinea-Bissau, Guyana, Iraq, Jordan, Kuwait, Madagascar, Mali, Mexico, Mozambique, Nicaragua, Panama, Peru, Qatar, Sierra Leone, Sri Lanka, Tanzania, Uganda, United Arab Emirates, Venezuela, Yemen and SFRY.)

⁴⁸⁶ UN General Assembly, UN Doc. A/37/PV.101, 13 December 1982, pp. 1667–1680.

⁴⁸⁷ UN General Assembly, Res. 43/74 A, 7 December 1988, preamble and § 5. (The resolution was adopted without a vote.)

⁴⁸⁸ UN General Assembly, Res. 44/115 B, 15 December 1989, preamble. (The resolution was adopted without a vote.)

⁴⁸⁹ UN General Assembly, Res. 46/134, 17 December 1991, preamble. The resolution was adopted by 129 votes in favour, one against (Iraq) and 17 abstentions (Bangladesh, Brunei Darussalam, China, Côte d’Ivoire, Cuba, Indonesia, Laos, Lesotho, Malaysia, Morocco, Namibia, Nigeria, Pakistan, Sri Lanka, Uganda, Tanzania and Zimbabwe).

⁴⁹⁰ UN General Assembly, Res. 48/144, 20 December 1993, preamble.

469. In several resolutions adopted between 1996 and 2000, the UN General Assembly stated its determination “to achieve the effective prohibition of the development, production, acquisition, transfer, stockpiling and use of chemical weapons and their destruction”. It stressed the importance of the OPCW and the necessity of universal adherence to the 1993 CWC.⁴⁹¹

470. In a resolution adopted in 1988, the UN Sub-Commission on Human Rights stated that it was “deeply concerned” by reports of the increased use of chemical weapons and called upon all States to “observe strictly the principles and objectives” of the 1925 Geneva Gas Protocol.⁴⁹²

471. In a resolution adopted in 1989, the UN Sub-Commission on Human Rights stated that the use of chemical weapons was “also incompatible with the prohibition against any form of torture or cruel, inhuman or degrading treatment or punishment”. It called upon all States “to abide by their international obligations in this field”.⁴⁹³

472. In a resolution adopted in 1996, the UN Sub-Commission on Human Rights stated that chemical weapons were “weapons of mass destruction or had indiscriminate effects”. It also stated that the use of these weapons was “incompatible with human rights and humanitarian law”.⁴⁹⁴

473. In 1969, in a report on chemical and bacteriological (biological) weapons and the effects of their possible use, the UN Secretary-General urged all UN member States to accede to the 1925 Geneva Gas Protocol, to affirm that the prohibition covered all sorts of chemical weapons and to reach an agreement on the elimination of chemical weapons.⁴⁹⁵

474. In 1981 and 1982, the UN Secretary-General produced reports on chemical and bacteriological (biological) weapons which included the reports of the Group of Experts to Investigate Reports on the Alleged Use of Chemical Weapons in accordance with UN General Assembly Resolutions 35/144 C (1980) and 36/96 C (1981).⁴⁹⁶

475. In 1984, in a message to the Presidents of Iran and Iraq, the UN Secretary-General stated that “it is a deplorable fact that chemical weapons have been used in contravention of the Geneva Protocol of 1925 . . . This drew widespread international condemnation. It is imperative that resort to such weapons should not occur.”⁴⁹⁷

⁴⁹¹ UN General Assembly, Res. 51/45 T, 10 December 1996, preamble and § 2; Res. 52/38 T, 9 December 1997, preamble and § 3; Res. 53/77 R, 4 December 1998, preamble and § 2; Res. 54/54 E, 1 December 1999, preamble and § 2; Res. 55/33 H, 20 November 2000, preamble and § 1.

⁴⁹² UN Sub-Commission on Human Rights, Res. 1988/27, 1 September 1988, preamble and § 1.

⁴⁹³ UN Sub-Commission on Human Rights, Res. 1989/39, 1 September 1989, preamble and § 1.

⁴⁹⁴ UN Sub-Commission on Human Rights, Res. 1996/16, 29 August 1996, § 1 and preamble.

⁴⁹⁶ UN Secretary-General, Report on chemical and bacteriological (biological) weapons, UN Doc. A/36/613, 20 November 1981; Report on chemical and bacteriological (biological) weapons, UN Doc. A/37/259, 1 December 1982.

⁴⁹⁷ UN Secretary-General, Messages dated 29 June 1984 to the President of Iran and to the President of Iraq, UN Doc. S/16663, 6 July 1984, p. 1.

476. In 1988, in a note with regard to a report of the Mission Dispatched by the UN Secretary-General to Investigate Allegations of the Use of Chemical Weapons in the Conflict between Iran and Iraq, the UN Secretary-General stated that:

It is with a sense of dismay and deep regret that the Secretary-General informs the Security Council that, despite many international appeals and world-wide condemnations, chemical weapons continue to be used in the conflict between the Islamic Republic of Iran and Iraq in violation of the [1925 Geneva Gas Protocol] and that, indeed, the use of such weapons may have intensified. This, regrettably, is the conclusion of the mission of the medical specialist with the Secretary-General dispatched recently to the Islamic Republic of Iran and Iraq to investigate the allegations lodged by both Governments of the use of chemical weapons.⁴⁹⁸

477. In 2001, in a report on violence against women perpetrated and/or condoned by the State during times of armed conflict, the Special Rapporteur of the UN Commission on Human Rights on Violence against Women, Its Causes and Consequences stated that:

Modern warfare has often entailed the deployment of chemical weapons, the use of which is now clearly banned by the Rome Statute of the ICC. Use of such weapons is a war crime and a crime against humanity. The Special Rapporteur has recently received a number of testimonies of victims of the use of chemical weapons, especially from Vietnam. The victims have suffered disabilities related to their reproductive organs and have given birth to children with severe disabilities. The consequences resulting from the use of chemical weapons can be devastating, not only for the victim concerned but also for the next generation, unborn at the time of the armed conflict.⁴⁹⁹

Other International Organisations

478. In a resolution on chemical weapons adopted in 1996, the APC-EU Joint Assembly noted that the "CWC prohibits the development, production, stockpiling, circulation and use of chemical weapons, thereby helping to safeguard peace and international security". It called upon all members to ratify the Convention as soon as possible.⁵⁰⁰

⁴⁹⁸ UN Secretary-General, Note on the report of the mission dispatched by the Secretary-General to investigate allegations of the use of chemical weapons in the conflict between Iran and Iraq, UN Doc. S/19823, 25 April 1988, p. 1, § 1; see also the subsequent notes by the UN Secretary-General on the same matter such as UN Doc S/20060, 20 July 1988, p. 1, § 1, UN Doc. S/20063, 25 July 1988, p. 1, § 1, UN Doc. S/20134, 19 August 1988, p. 1, § 1 and Julian Perry Robinson, "The Negotiations on the Chemical Weapons Convention: A Historical Overview", in Michael Bothe, Natalino Ronzitti and Allan Rosas (eds.), *The New Chemical Weapons Convention: Implementation and Prospects*, Kluwer Law International, The Hague, 1998, pp. 19 and 34.

⁴⁹⁹ UN Commission on Human Rights, Special Rapporteur on Violence against Women, Its Causes and Consequences, Report on violence against women perpetrated and/or condoned by the State during times of armed conflict (1997–2000), UN Doc. E/CN.4/2001/73, 23 January 2001, § 46.

⁵⁰⁰ ACP-EU Joint Assembly, Resolution on chemical weapons, 22 March 1996, *Official Journal*, No. C 254, 1996, Item 4.

479. In a resolution adopted in 1985 on war between Iran and Iraq, the Parliamentary Assembly of the Council of Europe called upon all member States to support efforts to put an end to the use of chemical weapons.⁵⁰¹

480. In 1985, in a report on the deteriorating situation in Afghanistan, the Rapporteur of the Parliamentary Assembly of the Council of Europe stated that “according to several concordant accounts, . . . chemical substances and incendiary bombs producing gases of various colours have been discharged”. In this respect, he added that the report of the Special Rapporteur of the UN Commission on Human Rights deserved mention.⁵⁰² In that report, the UN Special Rapporteur had recommended that “the parties to the conflict, namely government and opposition forces, should be reminded that it is their duty to apply fully the rules of international humanitarian law without discrimination”.⁵⁰³

481. In 1986, in a letter on the Iran–Iraq War submitted on behalf of the EC to the UN Secretary-General, the Netherlands stated that the EC member States were “particularly alarmed by renewed violations of humanitarian law and other laws of armed conflict, including the use of chemical weapons, and they condemn such violations wherever they occur”.⁵⁰⁴

482. In 1987, during a debate in the First Committee of the UN General Assembly, Denmark condemned, on behalf of the EC, the use of chemical weapons in the Iran–Iraq War and chemical attacks against the civilian population.⁵⁰⁵

483. The preamble to EEC Regulation No. 428/89 of 20 February 1989 concerning the export of certain chemical products recalls that, at the 1989 international conference in Paris, the EEC strongly condemned the use of chemical weapons.⁵⁰⁶

484. In 1990, during a debate in the First Committee of the UN General Assembly, Italy stated, on behalf of the EC, that it supported “the goal of a total chemical-weapons ban”.⁵⁰⁷

485. In 1991, during a debate in the First Committee of the UN General Assembly, the Netherlands expressed, on behalf of the EC, “the hope that States will make their commitment to the future Chemical Weapon Convention

⁵⁰¹ Council of Europe, Parliamentary Assembly, Resolution 849, 30 September 1985, pp. 103–104, § 10(v).

unambiguously clear" and declared that "it is important that [chemical] weapons be banned everywhere and forever".⁵⁰⁸

486. In 1995, during a debate in the First Committee of the UN General Assembly, Spain expressed support, on behalf of the EU, for the strengthening of the prohibition against chemical weapons.⁵⁰⁹

487. At the First Conference of States Parties to the CWC in 1997, the Netherlands stated, on behalf of the EU, that "Member states of the Union have worked actively to promote the universality of the Convention. We are committed to ensuring... that the treaty is universal." It reconfirmed its good intentions by once more emphasising its commitment to global chemical disarmament.⁵¹⁰

488. In the Final Communiqué of its 12th Session in 1991, the GCC Supreme Council confirmed "the necessity of making the whole Middle East region free of all sorts of weapons of mass destruction, including... chemical... weapons".⁵¹¹

489. In the Final Communiqué of its 16th Session in 1995, the GCC Supreme Council expressed "its great regret that the Iraqi government continues to produce... chemical and radioactive weapons which are... dangerous and destructive". It called for a zone free of weapons of mass destruction, including chemical weapons, and confirmed "the importance of considering the process of removing Iraqi weapons of mass destruction as a step towards evacuating the whole region of such destructive weapons". It further called for a "ban on the spreading of technology related to the research on weapons of mass destruction and their production in the Gulf region".⁵¹²

490. In a resolution adopted in 1970, the Council of the League of Arab States invited:

the Arab Member States that did not adhere to the 1925 [Geneva Gas Protocol] to adhere to it with the following reservations:

- ...
- (b) If there is a breach of the prohibition provided by the protocol, under any form and by any entity, the adhering State would be freed of its commitment to its provisions.⁵¹³

⁵¹² GCC, Supreme Council, 16th Session, Muscat, 4–6 December 1995, Final Communiqué, annexed to Letter dated 29 December 1995 from Oman to the UN Secretary-General, UN Doc. A/51/56-S/1995/1070, 29 December 1995.

⁵¹³ League of Arab States, Council, Res. 2676, 15 September 1970.

491. In 1994, the OIC expressed its deep concern that “UNPROFOR authorities allowed the Serbs from the UNPA’s in the Republic of Croatia to have at their disposal internationally prohibited weapons such as . . . poisonous gases used for mass killing of civilians”.⁵¹⁴

492. In its report on the implementation of the 1993 CWC in the year 2001, the OPCW stated that:

3. The year 2001 saw a number of significant milestones relating to the destruction of chemical weapons in all chemical weapons possessor States Parties – India, the Russian Federation, the United States of America, and a fourth State Party.
4. During 2001 India and the United States of America completed the destruction of 20% of their Category 1 chemical weapons ahead of the Convention’s timeline of 29 April 2002.
5. The destruction of Category 2 chemical weapons was well underway in 2001 in both India and the Russian Federation. No Category 2 chemical weapons were declared by the United States of America and the fourth chemical weapons possessor State Party.
6. India and the Russian Federation also completed the destruction of all their Category 3 chemical weapons in 2001. Another State Party had completed the destruction of these weapons in 1999. By the end of 2001 the United States of America had completed the destruction of over 99% of its Category 3 chemical weapons.⁵¹⁵

The OPCW further stated that:

Between [the entry into force of the 1993 CWC] and 31 December 2001, OPCW inspectors confirmed the destruction of a total of 6,518 metric tonnes of chemical agent contained in 2,098,013 munitions items (including 4,878 one-ton containers) in the four chemical weapons possessor States Parties [i.e. India, Russia, US and a fourth State Party].⁵¹⁶

International Conferences

493. The 20th International Conference of the Red Cross in 1965 adopted a resolution on the protection of civilian populations against the dangers of indiscriminate warfare which expressly invited “all Governments who have not yet done so to accede to the Geneva Gas Protocol of 1925 which prohibits the use of asphyxiating, poisonous, or other gases, all analogous liquids, materials or devices”.⁵¹⁷

494. In a resolution adopted in 1968 on human rights in armed conflicts, the Teheran International Conference on Human Rights emphasised that

⁵¹⁴ OIC, Declaration of the Enlarged Meeting of the Foreign Ministers of the Contact Group of the OIC and OIC States Contributing Troops to UNPROFOR in Bosnia and Herzegovina, Geneva, 6 December 1994, § 6.

⁵¹⁵ OPCW, Report on the Implementation of the 1993 CWC in the Year 2001, Doc. C-7/3, 10 October 2002, Introduction and Overview, §§ 3–6.

⁵¹⁶ OPCW, Report on the Implementation of the 1993 CWC in the Year 2001, Doc. C-7/3, 10 October 2002, § 2.15.

⁵¹⁷ 20th International Conference of the Red Cross, Vienna, 2–9 October 1965, Res. XXVIII.

“the widespread violence and brutality of our times, including... the use of chemical... means of warfare... erode human rights and engender counter-brutality”.⁵¹⁸

495. The 21st International Conference of the Red Cross in 1969 adopted a resolution on weapons of mass destruction in which it appealed to States to accede to the 1925 Geneva Gas Protocol and “to comply strictly with its provisions”. The Conference further urged governments “to conclude as rapidly as possible an agreement banning the production and stockpiling of chemical... weapons”.⁵¹⁹

496. The 25th International Conference of the Red Cross in 1986 adopted a resolution on protection of the civilian population in armed conflicts in which it deplored “the use of prohibited weapons such as chemical weapons... in violation of the laws and customs of war” and was “deeply concerned by information that prohibited weapons, including chemical weapons, have been used in some conflicts”.⁵²⁰

497. The Final Declaration of the Conference of States Parties to the 1925 Geneva Protocol and Other Interested States in 1989, adopted by consensus of the 149 participating States, stated that:

1. The participating States... are determined to prevent any recourse to chemical weapons by completely eliminating them. They solemnly affirm their commitments not to use chemical weapons and condemn such use...
2. The participating States recognize the importance and continuing validity of the [1925 Geneva Gas Protocol]. The States Parties to the Protocol solemnly reaffirm the prohibition as established in it. They call upon all States which have not yet done so to accede to the Protocol.
3. The participating States stress the necessity of concluding, at an early date, a Convention on the prohibition of the development, production, stockpiling and use of all chemical weapons, and on their destruction. This Convention shall be global and comprehensive and effectively verifiable. It should be of unlimited duration... In order to achieve as soon as possible the indispensable universal character of the Convention, they call upon all States to become parties thereto as soon as it is concluded.⁵²¹

498. During the First Session of the Conference of States Parties to the CWC in 1997, States parties widely acknowledged “a need for greater universality” and emphasized “the importance of ratification by the Russian Federation, States in ‘regions of tension’, and States with significant chemical industries”.⁵²²

IV. Practice of International Judicial and Quasi-judicial Bodies

499. In the *Tadić* case in 1995, the ICTY discussed the use of chemical weapons in internal conflicts. The Court of Appeal stated that the use of chemical weapons was prohibited in both international and non-international armed conflicts.⁵²³ The basis of the Tribunal's finding was the reaction to the Iraqi use of gas against Kurdish villages. The world community reacted to it with condemnation. The 12 member States of the EC had called for respect for IHL, including the 1925 Geneva Gas Protocol and UN Security Council Resolutions 612 and 620. Germany, UK and US had individually condemned the use of chemical weapons as being a breach of international law. Iraq had denied the allegations. This implied, in the view of the Tribunal, an acceptance that the prohibition also applied to internal conflicts. The Tribunal concluded that:

It is therefore clear that, whether or not Iraq really used chemical weapons against its own Kurdish nationals . . . there undisputedly emerged a general consensus in the international community on the principle that the use of those weapons is also prohibited in internal armed conflicts.⁵²⁴

V. Practice of the International Red Cross and Red Crescent Movement

500. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that the use of "asphyxiating, poisonous or other gases [and] all analogous liquids, materials or devices" is prohibited.⁵²⁵

501. In a statement issued on 31 January 1967, the ICRC referred to the "alleged use of poison gas" by Egypt in support of republican forces during the civil war in Yemen and appealed urgently to all parties to "observe the rules of international morality and law".⁵²⁶ On 2 June 1967, an ICRC press release noted that a medical team in North Yemen had "collected various indications pointing to the use of poison gas". The statement went on to say that the ICRC was "extremely disturbed and concerned by these methods of warfare which are absolutely forbidden by codified international and customary law" and that it had "communicated its delegates' reports to all authorities concerned in the Yemen conflict, requesting them to take the solemn engagement not to resort

in any circumstance whatsoever to the use of asphyxiating gases or any other similar toxic substance".⁵²⁷

502. In a memorandum on toxic gas in 1980, the ICRC stated that the prohibition of lethal poison gas was part of customary international law.⁵²⁸

503. At its Rio de Janeiro Session in 1987, the Council of Delegates adopted a resolution on the formal commitment by the Movement to obtain the full implementation of the Geneva Conventions in which it requested the ICRC "to take all necessary steps to enable it to protect and assist . . . victims of the use of prohibited weapons such as chemical weapons".⁵²⁹

504. In a press release issued in 1988 in the context of the Iran–Iraq War, the ICRC stated that:

In a new and tragic escalation of the Iran–Iraq conflict, chemical weapons have been used, killing a great number of civilians in the province of Sulaymaniyah. The use of chemical weapons, whether against military personnel or civilians, is absolutely forbidden by international law and is to be condemned at all times.⁵³⁰

505. In a Memorandum on the Applicability of International Humanitarian Law sent in 1990 to all States party to the Geneva Conventions in the context of the Gulf War, the ICRC stated that "the use of chemical . . . weapons is prohibited (1925 Geneva Protocol); the rules of the law of armed conflict also apply to weapons of mass destruction".⁵³¹

506. In a press release issued in 1991 in the context of the Gulf War, the ICRC reminded the parties that "the use of chemical . . . weapons is prohibited under international humanitarian law . . . Weapons of mass destruction having indiscriminate effects generally cause irreparable damage among the civilian population, which must be kept out of the fighting."⁵³²

507. In a letter to the ICRC in 1991, the Slovene Red Cross protested against "the use of chemical weapons in Croatia by the Yugoslav army".⁵³³

508. In a letter to the ICRC in 1991, the Croatian Red Cross stated that it had "received information from the battlefields that poisonous gas was applied against the defence forces of Croatia and civilians".⁵³⁴

⁵²⁷ ICRC, Press Release No. 829b, *The ICRC and the Yemen Conflict*, 2 June 1967, reprinted in SIPRI, *The Problem of Chemical and Biological Warfare*, Vol. VI, *The Prevention of CBW*, Almquist & Wiksell, Stockholm, 1975, p. 233, footnote 27.

⁵³⁴ Croatian Red Cross, *Appeal by the Croatian Red Cross*, 24 September 1991.

509. In a memorandum issued in 1992, the ICRC expressed the view that the use of chemical weapons undermined the prohibition of the use of inherently indiscriminate weapons.⁵³⁵

510. In 1993, the National Society of a State denounced the use of chemical weapons by another State. It stated that during the siege of a major city, troops of that State used chemical weapons, which killed 22 soldiers of the other State.⁵³⁶

511. At the conference to commemorate the entry into force of the 1993 CWC and the establishment of the OPCW in 1997, the ICRC noted that “despite the occurrence of several hundred conflicts since 1918 the use of chemical weapons has been confirmed in only a few cases, including in one instance by the ICRC”. After retracing the history of the prohibition on the use of chemical weapons, a prohibition which has been observed in the rules of warfare of “diverse moral and cultural systems”, the ICRC concluded that “both the law and public abhorrence have undoubtedly played a role in making poison warfare unacceptable”. The ICRC called upon States to adhere to the 1993 CWC, to work towards its universal application and to withdraw any reservations that they might have to the 1925 Geneva Gas Protocol.⁵³⁷

512. In 1994, in a Memorandum on Respect for International Humanitarian Law in Angola, the ICRC stated that “in particular, the use of chemical . . . weapons . . . is prohibited”.⁵³⁸

VI. Other Practice

513. It is reported that Germany used mustard gas on a large scale in the second Battle of Ypres in April 1915. UK forces reportedly retaliated with gas in September the same year. Approximately 1,000,000 injuries and 91,198 deaths in the First World War were gas-related.⁵³⁹

514. The USSR is reported to have used gas during its incursion into Sinkiang in clashes with the Tungan Mujahideen in 1934.⁵⁴⁰

515. In 1981, an armed opposition group accused the pilots of a State of using “chemical bombs, herbicides and defoliants” against its bases and villages.⁵⁴¹

516. Rule B1 of the Rules Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IHL,

⁵⁴¹ ICRC archive document.

states that “the customary rule prohibiting the use of chemical weapons, such as those containing asphyxiating or vesicant agents, . . . is applicable in non-international armed conflicts”.⁵⁴²

517. The Declaration of Minimum Humanitarian Standards, adopted by an expert meeting convened by the Institute for Human Rights of Åbo Akademi University in Turku/Åbo, Finland in 1990, states that “weapons or other material or methods prohibited in international armed conflicts must not be employed in any circumstances”.⁵⁴³

518. In 1990, in a report on human rights in Iraq, Middle East Watch stated with respect to the alleged use by Iraq of chemical weapons against the Kurdish minority in northern Iraq that:

Iraq’s defenders argue that it did not literally violate the Geneva Protocol of 1925 when it used chemical weapons against its Kurdish population. The language of the Protocol simply bans the use of chemical weapons “in war”. Based on the intent of the drafters, some jurists take the view that the Protocol applies only to international armed conflict, since that was the concern at the time of the states that drew it up. The Arab League ambassador to the United Nations . . . sought to use this legal loophole in Iraq’s defence when the United States, Britain, and others condemned Iraq’s use of chemical weapons against the Kurds in August and September 1988. The Arab League envoy pointed out that the 1925 Protocol prohibited the use of chemical weapons only between States and did not say anything about the use of such weapons within sovereign borders. He objected strongly to the United Nations being called upon “to investigate a matter within the prerogatives of sovereignty”. On the other hand, a leading expert on international humanitarian law [Theodor Meron] consulted by Middle East Watch expressed the view that the prohibition on poison-gas attacks had assumed the status of customary international law, and thus would be prohibited in all circumstances, despite the limited scope of the Protocol.⁵⁴⁴

519. On various occasions between 1990 and 1999, UNITA accused Angolan government forces of using chemical weapons against it.⁵⁴⁵ Many of these

allegations were not, however, substantiated. The only form of verification of use came from a private European medical team that visited Angola for eight days in 1990 and afterwards announced that the team's "clinical and toxicological study shows clearly that the chemical bombs have gassed the population in this region". The validity of these conclusions is, however, uncertain.⁵⁴⁶

520. In 1996, the United Tajik Opposition accused the government of Tajikistan of wanting to use chemical weapons against it. It stated that "according to reliable information from the sources close to the Dushanbe regime leadership, the authorities approached Russia with a request to apply chemical weapons in Tavildara to physically eliminate every living being in the region".⁵⁴⁷

521. In 1998, the participating experts at a Workshop on International Criminalisation of Biological and Chemical Weapons at the Lauterpacht Research Centre for International Law of Cambridge University formulated a Draft Convention on the Prevention and Punishment of the Crime of Developing, Producing, Acquiring, Stockpiling, Retaining, Transferring or Using Biological and Chemical Weapons. The Draft Convention makes it an international criminal offence to use chemical weapons.⁵⁴⁸

522. It is reported that "in 1999 three of the four states parties that have declared CW stockpiles to the OPCW – India, South Korea and the USA – began destroying these weapons. Russia has not begun the destruction of its CW stockpiles largely owing to a lack of sufficient funding."⁵⁴⁹

523. It is reported that Iraq destroyed chemical agents under UNSCOM supervision.⁵⁵⁰

government hands", RDP Antena 1 radio (Lisbon), 27 September 1999, as translated from the Portuguese in BBC-SWB, 27 September 1999.

⁵⁴⁹ Jean Pascal Zanders and Maria Wahlberg, "Chemical and biological weapon developments and arms control", in *SIPRI Yearbook 2000: Armaments, Disarmament and International Security*, Oxford University Press, Oxford, 2000, p. 513.

⁵⁵⁰ Maria Wahlberg, Milton Leitenberg and Jean Pascal Zanders, "The future of chemical and biological weapon disarmament in Iraq: from UNSCOM to UNMOVIC", in *SIPRI Yearbook 2000: Armaments, Disarmament and International Security*, Oxford University Press, Oxford, 2000, p. 570.

524. An article in the *Bulletin of the Atomic Scientists* in 1997 listed the following States as allegedly possessing chemical weapons: Bosnia and Herzegovina, Bulgaria, Burma, China, Egypt, France, North Korea, South Korea, India, Iran, Iraq, Israel, Libya, Pakistan, Romania, Russia, Saudi Arabia, Syria, Taiwan, US, Vietnam and FRY. The same article alleged that Burma, Iran, Iraq and Libya had used chemical weapons.⁵⁵¹

525. Employment of chemical weapons by at least four States parties has been alleged since the 1993 CWC entered into force for those countries: India,⁵⁵² Russia,⁵⁵³ Sudan⁵⁵⁴ and Turkey.⁵⁵⁵ The allegations remain unresolved in the public record, notwithstanding the verification capacity maintained by the OPCW.⁵⁵⁶

526. According to the Center for Nonproliferation Studies collecting information from open sources, in 2002 Algeria, Cuba, Sudan and Vietnam were possible possessors of chemical weapons. Probable possessors of chemical weapons were China, Egypt, Ethiopia, Israel, Myanmar, Pakistan and Taiwan. Known possessors, according to this source, were Iran, Iraq, North Korea, Libya, Russia and Syria.⁵⁵⁷

B. Riot Control Agents

I. Treaties and Other Instruments

Treaties

527. The 1925 Geneva Gas Protocol provides that:

Whereas the use in war of asphyxiating, poisonous or any other gases, and of all analogous liquids, materials or devices, has been justly condemned by the general opinion of the civilized world; . . .

To the end that this prohibition shall be universally accepted as a part of International Law, binding alike the conscience and the practice of nations;

Declare:

That the High Contracting Parties, so far as they are not already Parties to Treaties prohibiting such use, accept this prohibition.

No State has at any time ratified or acceded to the Protocol with a reservation or declaration of interpretation limiting the types of chemical weapons to which it applies.

528. Article I(5) of the 1993 CWC states that “each State Party undertakes not to use riot control agents as a method of warfare”.

529. The non-use of riot control agents is subject to the provisions of a number of articles in the 1993 CWC, first of which is the definition of “chemical weapons” in Article II:

1. “Chemical Weapons” means the following, together or separately:
 - (a) Toxic chemicals and their precursors, except where intended for purposes not prohibited under this Convention, as long as the types and quantities are consistent with such purposes.

530. Article II(2) of the 1993 CWC defines the term “toxic chemical” as:

any chemical which through its chemical action on life processes can cause death, temporary incapacitation or permanent harm to humans or animals. This includes all such chemicals, regardless of their origin or of their method of production, and regardless of whether they are produced in facilities, in munitions or elsewhere.

531. Article II(7) of the 1993 CWC defines “Riot Control Agent” as “any chemical not listed in a Schedule, which can produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure”.

532. Article II(9)(d) of the 1993 CWC provides that:

9. “Purposes Not Prohibited Under this Convention” means:
 - ...
 - (d) Law enforcement including domestic riot control purposes.

The cumulative effect of these provisions is that riot control agents may not be used as a method of warfare but may be used for certain law enforcement purposes including riot control.

Other Instruments

533. Article 7 of the 1938 ILA Draft Convention for the Protection of Civilian Populations against New Engines of War provides that:

- (a) The prohibition of the use of chemical weapons shall apply to the use, by any method whatsoever, for the purpose of injuring an adversary, of any natural or synthetic substance (whether solid, liquid or gaseous) which is harmful to the human or animal organism by reason of its being a toxic, asphyxiating, irritant or vesicant substance.

(b) The said prohibition shall not apply:

...

- III. to smoke or fog used to screen objectives or for other military purposes, provided that such smoke or fog is not liable to produce harmful effects under normal conditions of use;
- IV. to gas that is merely lachrymatory.

II. National Practice

Military Manuals

534. Australia's Commanders' Guide repeats the prohibition of the 1993 CWC, specifying that the use of riot control agents "by ADF members in peacetime requires approval at the highest level of command. Where such approval is given, strict rules of engagement are likely to prescribe the specific situations in which they may be employed."⁵⁵⁸

535. Australia's Defence Force Manual states that:

Riot control agents, including tear gas and other gases which have debilitating but non-permanent effects as a means of warfare, is prohibited in armed conflict under the 1993 Chemical Weapons Convention. This does not mean riot control agents cannot be used in times of conflict (e.g. against rioting prisoners of war). Legal advice should be sought on the occasions when their use is considered.⁵⁵⁹

536. Belgium's Law of War Manual states that "it is uncertain whether... chemical products that do not cause widespread, long-term and severe damage to the environment" are covered by the prohibition on the use of asphyxiating and other analogous gases.⁵⁶⁰

537. Canada's LOAC Manual states that "the use of riot control agents including tear gas and other gases that have debilitating but non-permanent effects, as a means of warfare is prohibited".⁵⁶¹

538. Canada's Code of Conduct provides that "the use of CS gas or pepper spray is lawful and may be used for crowd control purposes, but their use as a means of warfare is illegal".⁵⁶²

539. Germany's Military Manual, under the heading "Chemical Weapons", proscribes "the use of irritant agents for military purposes".⁵⁶³

540. The Military Manual of the Netherlands states that:

Opinion is divided over whether or not the prohibition applies to tear gas, defoliants and other non deadly means. It is said, with regard to tear gas, that it should be prohibited in armed conflicts. It can be used to control order. This should be

⁵⁵⁸ Australia, *Commanders' Guide* (1994), § 312.

⁵⁵⁹ Australia, *Defence Force Manual* (1994), § 413.

⁵⁶⁰ Belgium, *Law of War Manual* (1983), p. 38.

⁵⁶¹ Canada, *LOAC Manual* (1999), p. 5-3, § 27.

⁵⁶² Canada, *Code of Conduct* (2001), Rule 3, § 9.

⁵⁶³ Germany, *Military Manual* (1992), § 434.

distinguished from the use in armed conflict because there it runs the danger of provoking the use of other more dangerous chemicals.⁵⁶⁴

541. New Zealand's Military Manual, in a footnote relating to the 1925 Geneva Gas Protocol, states that "a number of states, including New Zealand, take the view that this does not prevent the use of lachrymose agents, especially if used to maintain or restore discipline in internment or prisoner of war camps".⁵⁶⁵ It further states that "among other war crimes recognised by the customary law of armed conflict are . . . using asphyxiating poisonous and other gases".⁵⁶⁶

542. Spain's LOAC Manual prohibits the use of riot control agents as a means of warfare.⁵⁶⁷

543. The US Field Manual states that:

It is the position of the United States that the Geneva Protocol of 1925 does not prohibit the use in war of . . . riot control agents, which are those agents of a type widely used by governments for law enforcement purposes because they produce, in all but the most unusual circumstances, merely transient effects that disappear within minutes after exposure to the agent has terminated. In this connection, however, the United States has unilaterally renounced, as a matter of national policy, certain uses in war of . . . riot control agents. The policy and provisions of Executive Order No. 11850 do not, however, prohibit or restrict the use of . . . riot control agents by US armed forces either (1) as retaliation in kind during armed conflict or (2) in situations when the United States is not engaged in armed conflict. Any use in armed conflict of . . . riot control agents, however, requires Presidential approval in advance.⁵⁶⁸

544. The US Rules of Engagement for Vietnam stated that:

Riot control agents will be used to the maximum extent possible. CS agents can be effectively employed in inhabited and urban area operations to flush enemy personnel from buildings and fortified positions, thus increasing the enemy's vulnerability to allied firepower while reducing the unnecessary danger to civilians and the likelihood of destruction of civilian property.⁵⁶⁹

545. The US Air Force Pamphlet restates Executive Order No. 11850 of 8 April 1975 and specifies that "the legal effect of this Executive Order is to reflect national policy. It is not intended to interpret the Geneva Protocol of 1925 or change the interpretation of the US that the Protocol does not restrain the use of riot control agents as such."⁵⁷⁰

546. The US Air Force Commander's Handbook states that:

The United States does not regard the Geneva [Gas] Protocol as forbidding use of riot control agents . . . in armed conflict. However, the United States has, as a matter of

⁵⁶⁴ Netherlands, *Military Manual* (1993), p. IV-6/IV-8, § 14.

⁵⁶⁵ New Zealand, *Military Manual* (1992), p. 5-15, § 512, footnote 51.

⁵⁶⁶ New Zealand, *Military Manual* (1992), § 1704(5).

⁵⁶⁷ Spain, *LOAC Manual* (1996), § 3.3.b.(8).

⁵⁶⁸ US, *Field Manual* (1956), § 38(d).

⁵⁶⁹ US, *Rules of Engagement for Vietnam* (1971), § d(2).

⁵⁷⁰ US, *Air Force Pamphlet* (1976), § 6-4(e).

national policy, renounced the first use of riot control agents . . . with certain limited exceptions specified in Executive Order 11850, 8 April 1975. Using . . . riot control agents . . . in armed conflict requires Presidential approval.⁵⁷¹

547. The US Operational Law Handbook states that the prohibition on “using weapons which cause unnecessary suffering, prolonged damage to the natural environment, or poison weapons . . . does preclude the use of . . . riot control agents by US forces in wartime when authorized by the President of the US or his delegate”.⁵⁷²

548. The US Naval Handbook states that:

The United States considers that use of riot control agents in armed conflict was not prohibited by the 1925 Gas Protocol. However, the United States formally renounced first use of riot control agents in armed conflict except in defensive military modes to save lives. Uses of riot control agents in time of armed conflict which the United States considers not to be violative of the 1925 Gas Protocol include:

1. Riot control situations in areas under effective U.S. military control, to include control of rioting prisoners of war.
2. Situations in which civilians are used to mask or screen attacks and civilian casualties can be reduced or avoided.
3. Rescue missions involving downed aircrews or escaping prisoners of war.
4. Protection of military supply depots, military convoys, and other military activities in rear echelon areas from civil disturbances, terrorist activities, or paramilitary operations.

Such employment of riot control agents by U.S. forces in armed conflict requires NCA approval.

Use of riot control agents as a “method of warfare” is prohibited by the 1993 Chemical Weapons Convention. However, that term is not defined by the Convention. The United States considers that this prohibition applies in international as well as internal armed conflict but that it does not apply in normal peacekeeping operations, law enforcement operations, humanitarian and disaster relief operations, counter-terrorist and hostage rescue operations, and non-combatant rescue operations conducted outside of such conflicts.

The United States also considers that it is permissible to use riot control agents against other than combatants in areas under direct U.S. military control, including to control rioting prisoners of war and to protect convoys from civil disturbances, terrorists and paramilitary organizations in rear areas outside the zone of immediate combat.⁵⁷³

National Legislation

549. Australia’s Chemical Weapons (Prohibition) Act provides that “a person must not intentionally or recklessly: . . . use riot control agents as a method of

⁵⁷¹ US, *Air Force Commander’s Handbook* (1980), § 6-3(a).

⁵⁷² US, *Operational Law Handbook* (1993), p. Q-182, § (i).

⁵⁷³ US, *Naval Handbook* (1995), §§ 10.3.2.1.1 and 10.3.2.1.2.

warfare. Penalty: imprisonment for life." It adds, however, that use for "law enforcement including domestic riot control purposes" is not prohibited.⁵⁷⁴

550. Under Hungary's Criminal Code as amended, employing "chemical weapons and chemical instruments of war" as defined in Article II(1) and (7) of the 1993 CWC is a war crime.⁵⁷⁵

551. India's Chemical Weapons Act provides that:

- (1) No person shall
 - ...
 - (b) use riot control agents as a method of warfare;
 - ...
 - (d) assist, encourage or induce, in any manner, any person to engage in
 - (i) the use of any riot control agent as a method of warfare
 - (ii) any other activity prohibited to a State Party under the Convention.⁵⁷⁶

552. New Zealand's Chemical Weapons Act provides that "every person commits an offence who intentionally or recklessly uses riot control agents as a method of warfare, and is liable on conviction on indictment to imprisonment for life or a fine not exceeding \$1,000,000".⁵⁷⁷

553. Romania's Law on the Prohibition of Chemical Weapons provides that:

- (1) It is prohibited for any person, under any circumstance:
 - ...
 - (e) to use riot control agents as a method of warfare.
- (2) Persons means any natural or legal person on the territory of Romania including public authorities.⁵⁷⁸

It further provides that:

- (1) The act of using chemical weapons is considered a criminal act and is punished by imprisonment, for not less than 5 years and not exceeding 15 years, and prohibition of certain rights.
- (2) In the case of an act with serious consequences, the penalty is imprisonment for not less than 10 years and not exceeding 20 years and prohibition of certain rights and if it caused the death of one or more persons, the penalty is life imprisonment or imprisonment for not less than 15 years and not exceeding 25 years and prohibition of certain rights.⁵⁷⁹

554. Singapore's Chemical Weapons (Prohibition) Act provides that:

Any person who:

- (a) uses a chemical weapon;
- ...

⁵⁷⁴ Australia, *Chemical Weapons (Prohibition) Act* (1994), p. 13, Section 12(f) and p. 95, Section 9(d).

⁵⁷⁷ New Zealand, *Chemical Weapons Act* (1996), Part II, Section 8.

⁵⁷⁸ Romania, *Law on the Prohibition of Chemical Weapons* (1997), Article 3.

⁵⁷⁹ Romania, *Law on the Prohibition of Chemical Weapons* (1997), Article 50.

(g) uses a riot control agent as a method of warfare

shall be guilty of an offence and shall on conviction be punished with

- (i) imprisonment for a term which may extend to life imprisonment, and
- (ii) a fine not exceeding \$ 1 million.⁵⁸⁰

555. Under Sweden's Penal Code as amended, "use of any weapon prohibited by international law" constitutes a crime against international law.⁵⁸¹ It further states that:

A person who:

- ... uses riot control materials as a means of warfare shall be sentenced, if the act is not regarded as a war crime against international law, for *unlawful handling of chemical weapons* to [punishment].⁵⁸² [emphasis in original]

National Case-law

556. No practice was found.

Other National Practice

557. In 1969, during a debate in the UN General Assembly on the question of chemical and bacteriological (biological) weapons, Australia stated that:

The draft resolution [on chemical and bacteriological (biological) weapons under discussion] would declare as contrary to the [1925 Geneva Gas Protocol] "any chemical agent of warfare" with "direct toxic effects on man, animals and plants". It is the view of the Australian Government that the use of non-lethal substances such as riot control agents... and defoliants does not contravene the Geneva Protocol nor customary international law.⁵⁸³

558. The Report on the Practice of Australia refers to a document of 1971 entitled "Protection of the Civil Population Against the Effects of Certain Weapons", which states that:

In answer to a question in the House of Representatives, the Australian Minister for External Affairs... stated that the use of non-lethal tear gases, C.N., C.S., and C.N.D.M., as used in South Vietnam "would not be contrary to any international convention, nor would it contravene the [1925 Geneva Gas Protocol]"...

Neither lethal nor non-lethal gases are employed at present in any part of [the Australian Military Forces], including [the Pacific Islands Regime]. No soldiers are trained in use of weapons involving the use of either such type of gas. In [Papua

⁵⁸⁰ Singapore, *Chemical Weapons (Prohibition) Act* (2000), Section 8.

⁵⁸¹ Sweden, *Penal Code as amended* (1962), Chapter 22, § 6(1).

⁵⁸² Sweden, *Penal Code as amended* (1962), Chapter 22, § 6a(4).

⁵⁸³ Australia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1716, 9 December 1969, § 180.

New Guinea] the civil constabulary are trained in the use of and have available non-lethal gas weapons.⁵⁸⁴

In this connection, the report states that “as a state party to the CWC, Australia is obligated not to use riot control agents as a weapon of war. The CWC does, however, explicitly allow the use of such agents for riots and quelling civil disturbances”.⁵⁸⁵

559. In 1971, during a debate in the UN General Assembly, Canada stated that:

Tear gas and other riot- and crowd-control agents were excluded from Canada’s commitment not to develop, produce, acquire, stockpile or use any chemical weapons in warfare . . . Canada’s reservations with regard to the use of these agents in war should be waived.⁵⁸⁶

560. In 1931, during the League of Nations Preparatory Commission for the Disarmament Conference, France, in a note regarding a memorandum submitted by the UK, stated that:

- I. All the texts at present in force or proposed in regard to the prohibition of the use *in war* of asphyxiating, poisonous or similar gases are identical. In the French delegation’s opinion, they apply to all gases employed with a view to toxic action on the human organism, whether the effects of such action are more or less temporary irritation of certain mucous membranes or whether they cause serious or even fatal lesions.
- II. The French military regulations, which refer to the undertaking not to use gas for warfare (*gaz de combat*) subject to reciprocity, classify such gases as suffocating, blistering, *irritant* and poisonous gases in general, and define irritant gases as those causing *tears*, sneezing, etc.
- III. The French Government therefore considers that the use of lachrymatory gases is covered by the prohibition arising out of the Geneva Protocol of 1925 . . .

The fact that, for the maintenance of internal order, the police, when dealing with offenders against the law, sometimes use various appliances discharging irritant gases cannot, in the French delegation’s opinion, be adduced in a discussion on this point, since the Protocol . . . relates only to the use of poisonous or similar gases *in war*.⁵⁸⁷ [emphasis in original]

561. In 1931, during the League of Nations Preparatory Commission for the Disarmament Conference, Italy, with respect to a memorandum submitted by the UK, stated that it “interprets the 1925 Protocol, to mean that ‘other gases’

⁵⁸⁴ Australia, *Protection of the Civil Population Against the Effects of Certain Weapons* (unknown author), Doc. AA-A1838/267, File No. AA-889/702/7/2 Pt 1, May 1971, Report on the Practice of Australia, 1998, Chapter 3.5.

⁵⁸⁵ Report on the Practice of Australia, 1998, Chapter 3.5.

⁵⁸⁶ Canada, Statement before the UN General Assembly, UN Doc A/PV.1827, 11 November 1971, p. 7.

⁵⁸⁷ France, Note by the French Delegation to the League of Nations Preparatory Commission for the Disarmament Conference regarding a British Memorandum, reprinted in League of Nations Doc. C.4.M.4. 1931, IX, Documents of the Preparatory Commission for the Disarmament Conference, Series X, Minutes of the Sixth Session (Second Part), 15 January 1931, p. 311.

include lachrymatory gases – that is to say that, subject to reciprocity, the use of lachrymatory gases is prohibited”.⁵⁸⁸

562. In 1966, during a debate in the First Committee of the UN General Assembly, Hungary stated that:

34. ... It was sometimes argued that the Geneva Protocol referred to circumstances existing in 1925, and not to the present situation when new types of gases, including comparatively harmless riot-control agents, had been invented. But practising riot control and conducting warfare were two distinctly different problems. The former fell within the domestic jurisdiction of each State, whereas the latter was governed by international law.
35. The gases being used in Viet-Nam were intended to undermine morale, destroy health, spread disease and create starvation. They were being used mainly in populated areas where they were likely to affect more people, and more civilians than soldiers. It had been asserted that able-bodied persons could recover quickly from the effects of the gases. But for elderly and sick people, pregnant women and children, the effects were very grave and sometimes fatal. Indeed, the use of such mass weapons verged upon genocide . . .
36. The hollow pretexts given for using riot-control gases in Viet-Nam had been rejected by world public opinion and by the international scientific community, including scholars in the United States itself. Weapons of that kind . . . were difficult to control and might affect those who were using them, as well as those against whom they were used.⁵⁸⁹

563. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons and on what was to become Resolution 2603 (XXIV), the representative of Saudi Arabia stated that:

108. . . I wish to mention a particular gas which is being used in many countries, namely tear gas, which is used inhumanely for breaking up demonstrations. Of course, here we are discussing the question of disarmament, the international aspect of these weapons, but we should not neglect or ignore the covenants of human rights or the Universal Declaration of Human Rights, which in its third article states that “everyone has the right to life, liberty and security of person”. We should at some time in the future go further than prohibiting or trying to prohibit the use of chemical weapons among nations. They should be banned inside every State, even tear gas should be banned.

109. . . If conventional means are not enough and tear gas or any similar gas is used to disperse crowds, then the Government had better fold up and dissolve.

110. . . I hope that in the future the United Nations will consider the use of any gas or germ as a criminal act.⁵⁹⁰

⁵⁸⁸ Italy, Statement before the League of Nations Preparatory Commission for the Disarmament Conference, 15 January 1931, League of Nations Doc. C.4.M.4. 1931, IX, Documents of the Preparatory Commission for the Disarmament Conference, Series X, Minutes of the Sixth Session (Second Part), 15 January 1931, p. 313.

⁵⁹⁰ Saudi Arabia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1717, 10 December 1969, §§ 108–110.

564. In 1931, during the League of Nations Preparatory Commission for the Disarmament Conference, Turkey, with respect to a memorandum submitted by the UK, stated that “we also consider the use of lachrymatory gases prohibited by the [1925 Geneva Gas] Protocol”.⁵⁹¹

565. In 1931, during the League of Nations Preparatory Commission for the Disarmament Conference, the USSR stated with respect to a memorandum submitted by the UK that:

In 1929, the Soviet delegation proposed not only the renunciation of the use of gases in warfare, but also of their preparation in peace-time; this proposal, however, was rejected by the majority of the Commission.

We interpret this paragraph [of the 1925 Geneva Gas Protocol] to mean that the use of all gases, including irritant gases, is prohibited.

As regards the text proposed by the French delegation [according to which “the use of lachrymatory gases is covered by the prohibition arising out of the Geneva Protocol of 1925” and “the fact that, for the maintenance of internal order, the police, when dealing with offenders against the law, sometimes use various appliances discharging irritant gases cannot . . . be adduced in a discussion on this point, since the Protocol . . . relates only to the use of poisonous or similar gases *in war*”, (emphasis in original)], the Soviet delegation is of [the] opinion that it is not for the Preparatory Commission to legalise the use of these gases by police forces, and it accordingly regards as unacceptable, particularly as one speaker referred to the use of gases by police forces for the purpose of controlling mobs.⁵⁹²

566. In 1970, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), the USSR stated that:

The use of . . . tear gases and other gases of a similar nature . . . was prohibited by the Geneva Protocol of 17 June 1925. The United States signed that Protocol, but did not ratify it. However, that does not mean that the prohibition of the use of poisonous substances does not extend to the United States. That prohibition has become a generally recognized rule of international law, and countries which violate it must bear responsibility before the international community.⁵⁹³

567. In 1989, the Moscow daily newspaper *Sovetskaya Rossiya* published an interview with the USSR’s Deputy Chief Military Prosecutor who was supervising a criminal investigation into the behaviour of MVD and army troops during

⁵⁹¹ Turkey, Statement before the League of Nations Preparatory Commission for the Disarmament Conference, 15 January 1931, League of Nations Doc. C.4.M.4. 1931, IX, Documents of the Preparatory Commission for the Disarmament Conference, Series X, Minutes of the Sixth Session (Second Part), 15 January 1931, p. 313.

⁵⁹² USSR, Statement before the League of Nations Preparatory Commission for the Disarmament Conference, 15 January 1931, League of Nations Doc. C.4.M.4. 1931, IX, Documents of the Preparatory Commission for the Disarmament Conference, Series X, Minutes of the Sixth Session (Second Part), 15 January 1931, p. 313.

⁵⁹³ USSR, Reply dated 30 December 1969 to the UN Secretary-General regarding the preparation of the study requested in paragraph 2 of General Assembly Resolution 2444 (XXIII), annexed to Report of the Secretary-General on respect for human rights in armed conflicts, UN Doc. A/8052, 18 September 1970, Annex III, p. 120.

their suppression of a demonstration in Tbilisi in April 1988. The Prosecutor stated that:

Special "cheremukha" (27 units) containing chloracetophenone and three units of K-51 containing CS were employed. They are not chemical weapons. In the US and other countries CS is ranked among the so-called "police gases". Let me also note that a USSR Supreme Soviet Presidium decree of 28 July 1988 makes provision for the use of special means . . . The arguments set out were confirmed by UN experts. Experts confirmed that only 30 people had been poisoned in connection with the troops' use of the special means "cheremukha" and K-51. Experts are continuing their studies . . . Nor do the claims that the troops allegedly used chloropicrin correspond with reality. Neither the Soviet Army nor the MVD internal troops have products containing chloropicrin designed for such purposes.⁵⁹⁴

568. In 1931, a memorandum submitted to the League of Nations Preparatory Commission for the Disarmament Conference, the UK government stated that:

Basing itself on this English text [of the 1925 Geneva Gas Protocol], the British Government have taken the view that the use in war of "other gases", including lachrymatory gases, was prohibited. They also considered that the intention was to incorporate the same prohibition in the present Convention [i.e. in a draft convention on disarmament discussed at the Preparatory Commission].⁵⁹⁵

Canada, China, Czechoslovakia, Japan, Romania, Spain and SFRY were among the States which expressly associated themselves with the UK memorandum.⁵⁹⁶

569. In 1970, in reply to a question in the House of Commons, the UK Secretary of State for Foreign and Commonwealth Affairs stated that:

In 1930, the Under-Secretary of State for Foreign Affairs . . . in reply to a Parliamentary Question on the scope of the [1925 Geneva Gas] Protocol said:

"Smoke screens are not considered as poisonous and do not, therefore, come within the terms of the Geneva Gas Protocol. Tear gases and shells producing poisonous fumes are, however, prohibited under the Protocol"

...

That is still the Government's position. However, modern technology has developed CS smoke which, unlike the tear gases available in 1930, is considered to be not significantly harmful to man in other than wholly exceptional circumstances; and we regard CS and other such gases accordingly as being outside the scope of

the [1925 Geneva Gas Protocol]. CS is in fact less toxic than the screening smokes which the 1930 statement specifically excluded.⁵⁹⁷

570. In 1992, in reply to a question in the House of Commons asking “what allowances have been made for the retention of disabling agents for riot control purposes under the terms of the [1993 CWC]”, the UK Minister of State, FCO, stated that:

Under the terms of the convention, states parties will be entitled to use toxic chemicals for law enforcement, including domestic riot control purposes, provided that such chemicals are limited to those not listed in the schedules to the convention and which can produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure. States parties will undertake not to use riot control agents as a method of warfare.⁵⁹⁸

571. In 1994, in reply to a question in the House of Commons about the use of gas weapons by the police, the UK Parliamentary Under-Secretary of State for Home Affairs stated that:

The Association of Chief Police Officers is considering the possible use of products containing the incapacitating inflammatory agent, oleoresin capsicum . . . The only chemical agent which police forces are currently permitted to use is CS irritant. The considerable research which has been undertaken into this agent was evaluated by the 1969–1971 inquiry into the medical and toxicological aspects of CS . . . Police forces are permitted to use CS in extreme public order incidents where the chief officer of police judges such action to be necessary because of risk of loss of life or serious injury or widespread destruction of property; or against armed besieged criminals or violently insane persons where a senior officer judges that not to use it would endanger lives. There are no current proposals to change arrangements relating to CS.⁵⁹⁹

572. In 1996, the House of Lords addressed a question to the UK government to the effect that:

How is the development and manufacture of chemical weapons for “domestic riot control purposes”, which are included as “Purposes Not Prohibited Under this Convention” in Article (9) of the Chemical Weapons Convention, to be distinguished from the development and manufacture of chemical weapons for purposes prohibited under the convention, and who is to be responsible for making these distinctions, and whether international peacekeeping operations are included among the “Purposes Not Prohibited Under this Convention”.⁶⁰⁰

⁵⁹⁷ UK, House of Commons, Reply by the Secretary of State for Foreign and Commonwealth Affairs, *Hansard*, 2 February 1970, Vol. 795, Written Answers, p. 18.

⁵⁹⁸ UK, House of Commons, Reply by the Minister of State, FCO, *Hansard*, 7 December 1992, Vol. 215, Written Answers, cols. 459–460.

⁵⁹⁹ UK, House of Commons, Reply by the Parliamentary Under-Secretary of State for Home Affairs, *Hansard*, 31 March 1994, Vol. 240, Written Answers, col. 946.

⁶⁰⁰ UK, House of Lords, Question addressed to the Government by Lord Kennet, *Hansard*, 18 June 1996, Vol. 573, Written Answers, cols. 23–24.

In a written answer to this question, the UK Minister of State, FCO, replied that:

The Chemical Weapons Convention prohibits the development and manufacture of any chemical weapons. The term "chemical weapons" includes toxic chemicals except those intended for purposes not prohibited by the convention, including "domestic riot control purposes". Provided that the types and quantities of chemicals used are consistent with the intended permitted purpose they are not prohibited under the convention. Each State Party is obliged to declare details of chemicals held for riot control purposes (commonly known as riot control agents). The convention establishes a verification mechanism to monitor States Parties' compliance with their obligations. The provisions include inspections of declared sites and investigations into allegations that riot control agents have been used in warfare. Inspections and investigations will be carried out by the Organisation for the Prohibition of Chemical Weapons.

The CWC prohibits the use of toxic chemicals as a method of warfare in international peacekeeping operations.⁶⁰¹

573. In 1998, the UK Minister of State for the Armed Forces provided a public explanation of why, in written answers to two parliamentary questions, he had told one questioner that "CS irritant is the only riot control agent held by my Department", having just informed the other questioner that "the Ministry of Defence currently holds stocks of CR gas . . . a riot control agent designed to cause temporary irritation". His explanation was that because the physiological effects of CR are among those which the 1993 CWC uses to define a "riot control agent" – because CR, in the words of Article II(7) 1993 CWC, "can produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure" – CR can properly be described as a "riot control agent", even though it is in fact held by the UK Defence Ministry for a purpose other than riot control, namely "maintaining an effective terrorism response capability".⁶⁰²

574. In 1998, in reply to a question in the House of Lords, the UK Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs stated that the government had recently approved the export to the Netherlands of 2,500 rounds of CS gas and shotgun ammunition for use in riot control by the Dutch contingent to the UN forces in Bosnia and Herzegovina.⁶⁰³

⁶⁰¹ UK, House of Lords, Reply by Minister of State, FCO, *Hansard*, 18 June 1996, Vol. 573, Written Answers, col. 24.

⁶⁰³ UK, House of Lords, Reply to a question by the Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs, *Hansard*, 12 January 1998, Vol. 584, Written Answers, cols. 122–123.

575. In 1927, during a debate in the US Senate, an argument against ratification of the 1925 Geneva Gas Protocol was that it outlawed the use of tear gas.⁶⁰⁴

576. In 1931, during the League of Nations Preparatory Commission for the Disarmament Conference, the US representative, with respect to a memorandum submitted by the UK, stated that:

While lachrymatory gases may serve some useful military purpose, for instance as harassing agencies, it is doubtless well-known to all my colleagues that the greatest use of lachrymatory gas is found, not in military service, but in police work either for controlling mobs, in which use it is certainly far more humane and probably more effective than the use of machine guns, sabres, or even truncheons, or it serves the purpose of effecting the capture of a barricaded criminal without bloodshed or loss of life... I think there would be considerable hesitation on the part of many Governments to bind themselves to refrain from the use in war, against an enemy, of agencies which they have adopted for peace-time use against their own population, agencies adopted on the ground that, while causing temporary inconvenience, they cause no real suffering or permanent disability, and are thereby more clearly humane than the use of weapons to which they were formerly obliged to resort to in times of emergency.⁶⁰⁵

577. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons, the US representative stated with respect to the then still draft Resolution 2603 (XXIV) that:

41. ... We do not agree with the interpretation which this resolution would place upon international law as embodied in the [1925 Geneva Gas Protocol]. I note that for the last forty years States have recognized the ambiguity of the Geneva Protocol, as to whether it prohibits the use of riot-control agents. They have not been able to resolve this ambiguity, despite several efforts to do so, and here we must respectfully differ with the Swedish delegation with regard to the conclusive – or we would say “inconclusive” – character of the negotiations leading up to the abortive Disarmament Conference of 1933. For if, as [the Swedish delegation] said... of the Geneva Protocol, “States did not doubt the comprehensive nature of the ban”, one must then ask why in the years after 1925 they continued to debate it.

...

43. We have examined in detail the negotiating histories of the 1899 and 1907 Hague Conventions, the Treaty of Versailles of 1919, the 1922 Washington Treaty, which never entered into force, and the 1925 Geneva Protocol, and we have come to the conclusion that the negotiating histories of these treaties

⁶⁰⁴ US, Senate, Statement by Senator James Reed, Congressional Records, Vol. 68, pp. 141–154, 1927, referred to in Richard R. Baxter and Thomas Buergenthal, “Legal Aspects of the Geneva Protocol of 1925”, *AJIL*, Vol. 64, 1970, p. 861.

⁶⁰⁵ US, Statement before the League of Nations Preparatory Commission for the Disarmament Conference, 15 January 1931, League of Nations Doc. C.4.M.4. 1931, IX, Documents of the Preparatory Commission for the Disarmament Conference, Series X, Minutes of the Sixth Session (Second Part), 15 January 1931, p. 311.

support the view that riot-control agents are not covered by the Geneva Protocol, and that, accordingly, [the draft resolution which became UN General Assembly resolution 2603 (XXIV)] incorrectly interprets the generally recognized rules of international law as embodied in the Geneva Protocol.⁶⁰⁶

578. Executive Order No. 11850, issued by the US President on 8 April 1975, states that:

The United States renounces, as a matter of national policy, . . . first use of riot control agents in war except in defensive military modes to save lives such as:

- a) Use of riot control agents in riot control situations in areas under direct and distinct U.S. military control, to include controlling rioting prisoners of war.
- b) Use of riot control agents in situations in which civilians are used to mask or screen attacks and civilian casualties can be reduced or avoided.
- c) Use of riot control agents in rescue missions in remotely isolated areas, of downed aircrews and passengers, and escaping prisoners.
- d) Use of riot control agents in rear echelon areas outside the zone of immediate combat to protect convoys from civil disturbances, terrorists and paramilitary organizations.

...

Section 1. The Secretary of Defense shall take all necessary measures to ensure that the use by the Armed Forces of the United States of any riot control agents . . . in war is prohibited unless such use has Presidential approval, in advance.⁶⁰⁷

579. Various sources observed that riot control agents were used in the Vietnam War by the US and South Vietnamese forces.⁶⁰⁸ In some circumstances, tear gas was allegedly used in conjunction with fragmentation bombs.⁶⁰⁹ An article in a Swedish newspaper stated that VX gas was used against the North Vietnamese army in Cambodia.⁶¹⁰

580. At the CDDH, the US stated, with regard to the asphyxiating, poisonous or other gases, that "opinions differed as to whether tear gas was covered by the Geneva Protocol of 1925".⁶¹¹

581. In 1980, in a memorandum of law on the "Reported Use of Chemical Agents in Afghanistan, Laos, and Kampuchea", a legal adviser of the US Department of State stressed that:

Although the United States does not regard the prohibition [on first use of chemical weapons] as applying to riot control agents, this view is not shared by the great

majority of states (including the Soviets), and they would presumably regard themselves as being entitled to use chemical agents (including lethal agents) in response to use of riot control agents against them.⁶¹²

582. In 1994, the US President transmitted to the US Senate the findings of his administration's review of the impact of the 1993 CWC on Executive Order No. 11850 concerning US policy on the use of riot control agents in armed conflict. The accompanying message of the President stated that:

Article I(5) of the CWC prohibits Parties from using [riot control agents, RCAs] as a "method of warfare". That phrase is not defined in the CWC. The United States interprets this provision to mean that:

- The CWC applies only to the use of RCAs in international or internal armed conflict. Other peacetime uses of RCAs, such as normal peacekeeping operations, law enforcement operations, humanitarian and disaster relief operations, counter-terrorist and hostage rescue operations, and non-combatant rescue operations conducted outside such conflicts are unaffected by the Convention.
- The CWC does not apply to all uses of RCAs in time of armed conflict. Use of RCAs solely against noncombatants for law enforcement, riot control, or other noncombatant purposes would not be considered as a "method of warfare" and therefore would not be prohibited. Accordingly, the CWC does not prohibit the use of RCAs in riot control situations in areas under direct U.S. military control, including against rioting prisoners of war, and to protect convoys from civil disturbances, terrorists, and paramilitary organizations in rear areas outside the zone of immediate combat.
- The CWC does prohibit the use of RCAs solely against combatants. In addition, according to the current international understanding, the CWC's prohibition on the use of RCAs as a "method of warfare" also precludes the use of RCAs even for humanitarian purposes in situations where combatants and noncombatants are intermingled, such as the rescue of downed air crews, passengers, and escaping prisoners and situations where civilians are being used to mask or screen attacks. However, were the international understanding of this issue to change, the United States would not consider itself bound by this position.⁶¹³

583. In 1996, during hearings on the 1993 CWC before the US Senate's Foreign Relations Committee, the US Secretary of Defense stated that:

The CWC does not prohibit the use of RCAs in riot control situations in areas under direct and distinct US military control, to include controlling rioting prisoners of war, and in rear echelon areas outside the zone of immediate combat to protect convoys from civil disturbance, terrorist and paramilitary organizations. The CWC does prohibit the use of RCAs solely against combatants and, according to the

⁶¹³ US, Message from the US President transmitting the report on the chemical weapons convention, 23 June 1994, *PM*, Vol. 140, PM 129, reprinted in *Congressional Record* (daily edition), 24 June 1994, p. S7635.

understanding of our allies and treaty signatories, even for humanitarian purposes in situations where combatants and non-combatants are intermingled.⁶¹⁴

At the same hearing, the Joint Staff Director of Strategic Plans and Policy stated that "in peacekeeping operations under Chapter six, Chapter seven UN operations, of course, the provisions of this convention don't apply, and we would be able to use riot control agents . . . It's my understanding that we could use riot control agents in Bosnia."⁶¹⁵

584. In 1998, in a legal review of Oleoresin Capsicum (OC) pepper spray, the Deputy Assistant Judge Advocate General of the US Department of the Navy stated that:

Oleoresin Capsicum is not calculated (i.e., designed), nor does it in fact cause unnecessary suffering. It is designed specifically to temporarily incapacitate violent or threatening subjects while reducing human suffering and is in consonance with the DoD [Non-Lethal Weapon] program. Its physiological effects, while relatively painful, are temporary and do not rise to the level of unnecessary suffering contemplated in the prohibition . . . Provided a military necessity justifies its employment, the principle of unnecessary suffering would not preclude employment of OC in appropriate circumstances.

...

The OC system contemplated for acquisition and employment by the Marine Corps is specifically designed to limit its effects only to intended targets. The contemplated OC dispersers utilize a target specific stream of ballistic droplets for controlled delivery and minimal cross contamination (i.e., point target delivery), rather than an aerosolized spray which increases the likelihood of unintended subject impact. Provided the weapon is employed in a discriminating manner, the principle of distinction/discrimination presents no prohibition to acquisition and employment of OC in appropriate circumstances.

...

The second major category of chemicals regulated by the CWC is Riot Control Agents . . .

While the proscriptions imposed by the CWC on *chemical weapons* are stated as absolute, the Convention seems to permit employment of RCAs, provided they are not used as a *method of warfare*. The CWC does not address whether a given substance can be subject to both the restrictions placed on RCAs and those placed on *chemical weapons*. Subsequent analysis in this memorandum concludes that RCAs are only constrained by the *method of warfare* restriction, that is, the CWC Treaty establishes a regime for treatment of RCAs separate from the regime dealing with *chemical weapons*.

. . . The definition of *toxic chemicals* [of the CWC] appears broad enough to include many, if not all, RCAs. Specifically, the use of the term *temporary incapacitation* in the definition of *toxic chemical* is difficult to distinguish from the term

⁶¹⁴ US, Statement by the Secretary of Defense on the Chemical Weapons Convention, Committee hearing, Senate Foreign Relations Committee, 28 March 1996, *FDCH Political Transcripts*, 28 March 1996, via Nexis.

⁶¹⁵ US, Statement by the Joint Staff Director of Strategic Plans and Policy, Committee hearing, Senate Foreign Relations Committee, 28 March 1996, *FDCH Political Transcripts*, 28 March 1996.

disabling effect used in the definition of RCAs. Thus, some contend that RCAs fall under the CWC's definition of *toxic chemical*. If that is the case, then RCAs become subject to the CWC's chemical weapon regime as well as the RCA regime. The consequences of such an interpretation are significant. RCAs would then be a *chemical weapon*, subject to all the limitations applicable to such weapons, unless they were used for a *purpose not prohibited*. This is problematic and would have a major impact on the use of RCAs since the *purposes not prohibited* exclusion for use of *chemical weapons* is an enumerated and apparently exclusive list of four activities only. Alternatively, if the CWC provides for a regime for RCAs separate than that for *chemical weapons*, then the only limitation on their use is that they may not be employed as a *method of warfare*.⁶¹⁶ [emphasis in original]

In a footnote on this point, the Deputy Assistant Judge Advocate General of the Department of the Navy stated that "if RCAs were subject to the chemical weapons regime, then the only 'purpose not prohibited' that would permit employment of RCAs is article II(9)(d) [of the 1993 CWC], the law enforcement exclusion".⁶¹⁷ However, he went on to state that:

It is apparent . . . that the nature of the harm caused by RCAs is generally much less severe and that the toxic effects of RCAs are transient. Thus, it is clear from the definition of RCAs that the CWC envisages RCAs to be a relatively benign category of chemicals. The fact that the definition excludes those chemicals listed on Chemical Annex Schedules, many of which are extremely toxic, bolsters this point. While RCAs may well be toxic chemicals, in establishing a separate regime for a particular category of toxic chemicals, RCAs, the CWC has limited the boundaries of this category by narrowly defining the chemicals that qualify as RCAs.⁶¹⁸

Turning to the 1925 Geneva Gas Protocol, the Deputy Assistant Judge Advocate General stated that:

Disagreement swirled around the Protocol's coverage of RCAs. Since the 1960s, the U.S. has maintained that the Protocol applies only to lethal and incapacitating chemical agents and not to RCAs. The U.S. therefore maintained that RCAs could be used during armed conflict. That view was not universally shared in the international community. The United States' extensive use of RCAs during the Vietnam War brought the differing interpretations to light. As a matter of national policy, however, the U.S., upon ratifying the Protocol in 1975, renounced the first use of RCAs in war except in defensive military modes to save lives. Nonetheless, the U.S. maintained that RCAs were not chemical weapons covered by the Protocol.

. . . Some nations, however, expressed concern that "RCAs would constitute an immediate risk and danger if they were allowed to develop into a new generation of

⁶¹⁶ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, §§ 4-5 and 6(c), pp. 6-7 and 14-15.

⁶¹⁷ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, footnote 37, p. 15.

⁶¹⁸ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, § 6(c), p. 16.

non-lethal but effective chemical agents of warfare, causing insurmountable problems in trying to distinguish between 'real' and 'non-lethal' chemical weapons on the battlefield, as well as 'real' and 'non-lethal' chemical warfare units." The result was a compromise in which the U.S. accepted the CWCs Article I (5) prohibition on the use of RCAs as a "method of warfare" in exchange for their categorization outside the chemical weapon regime.

...

The phrase *method of warfare* is not defined in the CWC or in the negotiating record and has been the subject of significant debate in the United States. The Administration view is that United States Armed Forces must be involved in an armed conflict, either international or non-international, to engage in a *method of warfare*.⁶¹⁹ [emphasis in original]

With respect to Executive Order No. 11850, issued by the US President on 8 April 1975, the Deputy Assistant Judge Advocate General stated that:

U.S. ratification of the Chemical Weapons Convention . . . created a debate regarding the continuing efficacy of [Executive Order] 11850, particularly exceptions (b) and (c) . . . If a use of RCAs constitutes a "method of warfare" then the CWC prohibits such use as a U.S. treaty obligation under international law. The executive order, however, authorizes use of RCAs, *in war* in certain situations. Though not explicitly stated, the apparent intent of the Executive Order permits RCA employment against combatants *in war* in situations like those enumerated in exceptions (b) and (c). Although the CWC does not define the phrase *method of warfare*, the apparent intent seems to prohibit the uses of RCAs contemplated in exceptions (b) and (c) to [Executive Order] 11850.

...

This review reiterates that the continuing efficacy of [Executive Order] 11850 is currently an issue of debate. The draft instruction [i.e., the draft of the Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 3110.07A, Nuclear, Biological, and Chemical (NBC) Defence; Riot Control Agents; and Herbicides Annual Review, of 1 March 1998] and its list of permissible uses of RCAs is, however, currently the U.S. military position. Should appropriate U.S. Government authority determine that [Executive Order] 11850 is no longer valid authority, such a decision would only impact the use of RCAs in war . . . when the U.S. is a party to the conflict. All other uses of RCAs listed in the draft instruction would remain unaffected.⁶²⁰ [emphasis in original]

585. In 1998, a US Department of Defense document discussing the use of chemical agents in the Vietnam War stated that the "use of tear gas, or Riot Control Agents (RCA) as they were sometimes called, was in accordance with US policy at the time".⁶²¹

⁶¹⁹ US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, §§ 6(c) and 7, pp. 18–20.

*III. Practice of International Organisations and Conferences**United Nations*

586. In a resolution adopted in 1969, the UN General Assembly stated that the 1925 Geneva Gas Protocol “embodies the generally recognised rules of international law prohibiting the use in international armed conflicts of all . . . chemical methods of warfare, regardless of any technical developments”. It declared:

as contrary to the generally recognized rules of international law, as embodied in the [1925 Geneva Gas Protocol] the use in international armed conflicts of:

- (a) Any chemical agents of warfare – chemical substances, whether gaseous, liquid or solid – which might be employed because of their direct toxic effects on man, animals or plants.⁶²²

The large number of abstentions was partly due to disagreement on the scope of the 1925 Geneva Gas Protocol. Other States thought that the UN General Assembly should not interpret multilateral treaties.⁶²³

587. In a resolution adopted in 1988 on the situation in the Palestinian and other Arab territories occupied by Israel, the UN Sub-Commission on Human Rights stated that “acts perpetrated by the Israeli occupation authorities [e.g.] firing gas bombs inside houses, mosques and hospitals . . . constitute grave violations of international law”.⁶²⁴ This statement was repeated in four further resolutions on the same subject between 1991 and 1993. The last two of these added that the acts were violations of the Geneva Conventions, the UDHR, the International Covenant on Economic, Social and Cultural Rights, and the International Covenant on Civil and Political Rights.⁶²⁵

Other International Organisations

⁶²⁹ Julian Perry Robinson, *The General Purpose Criterion and the New Utility of Toxicants as Weapons*, Working paper for the Pugwash Meeting No. 264, 17 June 2001, p. 4.

Declare:

That the High Contracting Parties, so far as they are not already Parties to Treaties prohibiting such use, accept this prohibition.

No State on ratifying the 1925 Geneva Gas Protocol has made a reservation or declaration of interpretation to the effect that the Protocol does not apply to herbicides.

597. Article I(1) of the 1976 ENMOD Convention provides that:

Each State Party to this convention undertakes not to engage in military or any other hostile use of environmental modification techniques having widespread, long-lasting or severe effects as the means of destruction, damage or injury to any other State Party.

598. Article II of the 1976 ENMOD Convention provides that:

As used in article I, the term “environmental modification techniques” refers to any technique for changing – through the deliberate manipulation of natural processes – the dynamics, composition or structure of the Earth, including its biota, lithosphere, hydrosphere and atmosphere, or of outer space.

599. The seventh preambular paragraph of the 1993 CWC reads: “Recognizing the prohibition, embodied in the pertinent agreements and relevant principles of international law, of the use of herbicides as a method of warfare, . . .”.

Other Instruments

600. No practice was found.

II. National Practice

Military Manuals

601. Australia’s Commanders’ Guide states that “it is prohibited to use methods or means of warfare which are intended or may be expected to cause widespread, long-term and severe damage to the natural environment and thereby prejudice the health or survival of the population”.⁶³⁰ It also states that “weapons that cause widespread, long-term and severe damage to the environment are prohibited”.⁶³¹

602. Australia’s Defence Force Manual states that:

Any method or means of warfare which is planned, or expected, to cause widespread, long-term and severe damage to the natural environment and thereby jeopardise the survival or seriously prejudice the health of the population is prohibited . . . Means and methods which are not expected to cause such damage are permitted even if damage results.⁶³²

⁶³⁰ Australia, *Commanders’ Guide* (1994), § 909, see also § 930.

⁶³¹ Australia, *Commanders’ Guide* (1994), § 310.

⁶³² Australia, *Defence Force Manual* (1994), § 713, see also § 545(b).

603. Belgium's Law of War Manual states that it is uncertain whether "chemical products that do not cause widespread, long-term and severe damage to the environment" are covered by the prohibition on the use of asphyxiating and other analogous gases.⁶³³

604. The Military Manual of the Netherlands states that "opinion is divided over whether [the prohibition on the use of chemical weapons] applies to . . . defoliants". Concerning defoliants, the manual states that Article 35 API was drafted in the light of the large-scale use of defoliants in the Vietnam War.⁶³⁴

605. Nigeria's Manual on the Laws of War mentions the 1925 Geneva Gas Protocol and states that "there is no rule to prevent measures being taken to dry up springs and destroy water-wells from which the enemy may draw water or devastate crops by means of chemicals and bacterias which are not harmful to human beings".⁶³⁵

606. The US Field Manual states that:

It is the position of the United States that the Geneva Protocol of 1925 does not prohibit the use in war of . . . chemical herbicides . . . In this connection, however, the United States has unilaterally renounced, as a matter of national policy, certain uses in war of chemical herbicides . . . The policy and provisions of Executive Order No. 11850 do not, however, prohibit or restrict the use of chemical herbicides . . . by US armed forces either (1) as retaliation in kind during armed conflict or (2) in situations when the United States is not engaged in armed conflict. Any use in armed conflict of herbicides . . . however, requires Presidential approval in advance.⁶³⁶

607. The US Air Force Pamphlet restates Executive Order No. 11850 of 8 April 1975 and specifies that "the legal effect of this Executive Order is to reflect national policy. It is not intended to interpret the Geneva Protocol of 1925 or change the interpretation of the US that the Protocol does not restrain the use of chemical herbicides as such."⁶³⁷

608. The US Air Force Commander's Handbook states that:

The United States does not regard the Geneva Protocol as forbidding use of . . . herbicides in armed conflict. However, the United States has, as a matter of national policy, renounced the first use of . . . herbicides, with certain limited exceptions specified in Executive Order 11850, 8 April 1975. Using . . . herbicides in armed conflict requires Presidential approval.⁶³⁸

609. The US Operational Law Handbook states that the prohibition on "using weapons which cause unnecessary suffering, prolonged damage to the natural

⁶³³ Belgium, *Law of War Manual* (1983), p. 38.

⁶³⁴ Netherlands, *Military Manual* (1993), pp. IV-8, § 14 and p. V-9, § 7.

⁶³⁵ Nigeria, *Manual on the Laws of War* (undated), §§ 12 and 6(9).

⁶³⁶ US, *Field Manual* (1956), § 38(d). ⁶³⁷ US, *Air Force Pamphlet* (1976), § 6-4(d).

⁶³⁸ US, *Air Force Commander's Handbook* (1980), § 6-3(a).

environment, or poison weapons...does preclude the use of herbicides... by US forces in wartime when authorized by the President of the US or his delegate".⁶³⁹

610. The US Naval Handbook states that:

The United States considers that use of herbicidal agents in wartime is not prohibited by either the 1925 Gas Protocol or the 1993 Chemical Weapons Convention but has formally renounced the first use of herbicides in time of armed conflict except for control of vegetation within U.S. bases and installations or around their immediate defensive perimeters. Use of herbicidal agents during armed conflict requires NCA approval.⁶⁴⁰

National Legislation

611. Brazil's Military Penal Code prohibits the spreading of epidemics or infestations in a location under military control which could result in damage to forests, crops, grazing pastures or animals used for economic or military purposes.⁶⁴¹

612. Ecuador's National Civil Police Penal Code states that members of the National Civil Police "who use or order to be used...herbicides" commit a punishable offence.⁶⁴²

National Case-law

613. No practice was found.

Other National Practice

614. Following the adoption of the Final Declaration of the Second ENMOD Review Conference by consensus, Argentina and Sweden "expressed their satisfaction with the ban on the use of herbicides as a method of warfare."⁶⁴³

615. In 1969, during a debate in the UN General Assembly on the question of chemical and bacteriological (biological) weapons, Australia stated that:

The draft resolution [on chemical and bacteriological (biological) weapons under discussion] would declare as contrary to the [1925 Geneva Gas Protocol] "any chemical agent of warfare" with "direct toxic effects on man, animals and plants". It is the view of the Australian Government that the use of non-lethal substances such as... herbicides and defoliants does not contravene the Geneva Protocol nor customary international law.⁶⁴⁴

⁶³⁹ US, *Operational Law Handbook* (1993), p. Q-182, § (i).

⁶⁴⁰ US, *Naval Handbook* (1995), § 10.3.3.

⁶⁴⁴ Australia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1716, 9 December 1969, § 180.

616. Following the adoption of the Final Declaration of the Second ENMOD Review Conference by consensus, Canada stated that “the work of the Conference demonstrated that all was not well with the Convention owing, in large measure, to significant problems with regard to the interpretation of its scope.”⁶⁴⁵ It added that “while some parties maintained that the ENMOD was a futuristic document covering exotic technologies that had yet to be invented, they contended at the same time that it covered the use of herbicides, which was a low-technology environmental modification technique.”⁶⁴⁶ Accordingly, Canada believed that “all environmental modification techniques were covered by the Convention, regardless of the level of technology applied.”⁶⁴⁷

617. In 1972, the head of the Chinese delegation to the Meeting on Human Environment condemned the US for having caused “unprecedented damage to the human environment” in South Vietnam through the use of “chemical, toxic and poisonous gas”, having as a consequence to poison “rivers and other water resources”.⁶⁴⁸

618. In 1980, the Chinese government denounced actions taken by Israel and accused it of having “inhumanely sprayed defoliant on Palestinian lands”.⁶⁴⁹

619. In 1966, during a debate in the First Committee of the UN General Assembly, Hungary stated with respect to the use of chemical weapons by the US in Viet-Nam that “food and drinking water were being poisoned by toxic herbicides”.⁶⁵⁰

620. The Minister of Foreign Affairs of the Netherlands stated in a parliamentary debate in 1995 that:

Generally speaking, the use of herbicides as a means of warfare is prohibited according to international customary law, and also according to the ENMOD treaty and the Geneva Conventions (1949), if this use causes widespread, long-term and severe damage. Then, the prohibition is binding upon all states.⁶⁵¹

⁶⁴⁵ Canada, Statement at the Second ENMOD Review Conference, Geneva, 14–21 September 1992, *United Nations Disarmament Yearbook*, Vol. 17, 1993, p. 233.

⁶⁴⁶ Canada, Statement at the Second ENMOD Review Conference, Geneva, 14–21 September 1992, *United Nations Disarmament Yearbook*, Vol. 17, 1993, p. 233.

⁶⁴⁸ China, Address to the Meeting of Human Environment on Our Government's Position on the Protection and Improvement of Human Environment, 10 June 1972, *Selected Documents of the Chinese Delegation to the United Nations*, The People's Press, Beijing, 1972, pp. 257–258.

⁶⁴⁹ China, Statement on the Issue of Human Rights in the Israeli Occupied Territory, 12 November 1980, *Selected Documents of the Chinese Delegation to the United Nations*, World Knowledge Press, Beijing, 1980, p. 97.

⁶⁵⁰ Hungary, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/SR.1451, 11 November 1966, § 35.

⁶⁵¹ Netherlands, Lower House of Parliament, Debate on Chemical Weapons, *Tweede Kamer* 68, 25 April 1995, pp. 68–4105.

621. During the Geneva Conference of 1925, the representative of Poland, a sponsor of the prohibition of biological weapons at this conference, repeatedly stated that unless biological warfare was outlawed, “great masses of men, animals and plants would be exterminated”.⁶⁵²

622. The commander of the Russian Defence Minister RKhB Protection Troops said to reporters in 2000 that “the Russian army is not planning to use any defoliants in the course of the anti-terrorism operation in Chechnya”. He was responding to reports that the army could use chemical herbicides to destroy natural cover throughout the highland areas of Chechnya.⁶⁵³

623. In 1969, during a debate in the UN General Assembly on the question of chemical and bacteriological (biological) weapons, Sweden stated that:

195. It has . . . been said that, in any case, the prohibitory rule [concerning chemical weapons] could not cover anti-plant agents as they were not known in 1925, and that when they were discussed in the General Commission of the Geneva Disarmament Conference of 1933 it was only sought to prohibit the use of anti-plant chemical agents which also were harmful to man or animals.

196. We maintain that the indiscriminate use of anti-plant agents in armed conflict runs counter to the generally recognized rules of international law.⁶⁵⁴

624. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons, the UK stated with respect to the then still draft Resolution 2603 (XXIV) that “the evidence seems to us to be notably inadequate for the assertion that the use in war of chemical substances specifically toxic to plants is prohibited by international law”.⁶⁵⁵

625. In 1966, during a debate in the First Committee of the UN General Assembly, the US stated that it supported the 1925 Geneva Gas Protocol, even though it had not ratified it, but that the use of herbicides in Vietnam was neither covered by the Protocol, nor against accepted norms of behaviour.⁶⁵⁶ In a subsequent debate, the US repeated its opposition to the view that herbicides were included in the scope of the 1925 Geneva Gas Protocol.⁶⁵⁷

626. In 1969, during a debate in the First Committee of the UN General Assembly on the question of chemical and bacteriological (biological) weapons,

⁶⁵² Poland, Statement made on 8 June 1925 at the Conference for the Supervision of the International Trade in Arms and Ammunition and in Implements of War, Geneva, 4 May–17 June 1925, League of Nations, Records of the Conference, Doc. A.13.1925.IX, September 1925, p. 340.

⁶⁵⁴ Sweden, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1716, 9 December 1969, §§ 195–196.

⁶⁵⁵ UK, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1717, 10 December 1969, § 51.

⁶⁵⁶ US, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/SR.1452, 14 November 1966, p. 158.

⁶⁵⁷ US, Statement before the UN General Assembly, UN Doc. A/PV.1484, 5 December 1966, p. 4.

the US stated with respect to the then still draft Resolution 2603 (XXIV) that:

Since chemical herbicides, unknown at the time the [1925 Geneva Gas Protocol] was negotiated, were not prohibited by that instrument, it is unwarranted for the General Assembly now to engage in lawmaking by attempting to extend the Geneva Protocol to include herbicides.⁶⁵⁸

627. Executive Order No. 11850, issued by the US President on 8 April 1975, states that:

The United States renounces, as a matter of national policy, first use of herbicides in war except use, under regulations applicable to their domestic use, for control of vegetation within U.S. bases and installations or around their immediate defensive perimeters.

...

Section 1. The Secretary of Defense shall take all necessary measures to ensure that the use by the Armed Forces of the United States of any ... chemical herbicides in war is prohibited unless such use has Presidential approval, in advance.⁶⁵⁹

628. The Report on US Practice states that the possibility of environmental damage caused by the use of herbicides during the Vietnam War was not a major issue in the Kennedy administration.⁶⁶⁰ On the other hand, one commentator notes that environmental concerns played a significant role in President Nixon's decision to end the herbicidal programme.⁶⁶¹

629. In 1998, in a legal review of Oleoresin Capsicum (OC) pepper spray, the Deputy Assistant Judge Advocate General of the US Department of the Navy stated that "the toxicity must affect humans or animals. Thus, herbicides would be excluded from the CWC's proscriptions." In a footnote on this point, he stated that "on the other hand, if a particular herbicide were toxic to humans and was intentionally employed against humans, it would be considered a chemical weapon".⁶⁶²

III. Practice of International Organisations and Conferences

United Nations

630. In a resolution adopted in 1969, the UN General Assembly stated that the 1925 Geneva Gas Protocol "embodies the generally recognised rules of

⁶⁵⁸ US, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1717, 10 December 1969, § 47.

⁶⁵⁹ US, Executive Order No. 11850, 8 April 1975, *Federal Register*, Vol. 40, 1975, p. 16187.

⁶⁶¹ William A. Buckingham, *Operation Ranch Hand: The Air Force and Herbicides in Southeast Asia, 1961–1971*, Office of Air Force History, US Air Force, Washington, 1982, pp. 138–140, 163 and 174–175.

⁶⁶² US, Department of the Navy, Deputy Assistant Judge Advocate General, International and Operational Law Division, Legal Review of Oleoresin Capsicum (OC) Pepper Spray, 19 May 1998, § 6(c) and footnote 27, p. 12.

international law prohibiting the use in international armed conflicts of all biological and chemical methods of warfare, regardless of any technical developments". It declared:

as contrary to the generally recognized rules of international law, as embodied in the [1925 Geneva Gas Protocol] the use in international armed conflicts of:

- (a) Any chemical agents of warfare – chemical substances, whether gaseous, liquid or solid – which might be employed because of their direct toxic effects on man, animals or plants.⁶⁶³

The large number of States which abstained in the vote on the resolution (36) was partly due to disagreement on the scope of the 1925 Geneva Gas Protocol.⁶⁶⁴

631. In a resolution adopted in 1992 following the Second Review Conference of the Parties to the ENMOD Convention, the UN General Assembly stated that it:

notes with satisfaction the confirmation by the Review Conference that the military or any other hostile use of herbicides as an environmental modification technique in the meaning of Article II is a method of warfare prohibited by Article I if such use of herbicides upsets the ecological balance of a region, thus causing widespread, long-lasting or severe effects as the means of destruction, damage or injury to any other State party.⁶⁶⁵

Other International Organisations

632. No practice was found.

International Conferences

633. The Final Declaration of the Second Review Conference of the Parties to the ENMOD Convention in 1992 stated that:

The conference reaffirms that the military and any other hostile use of herbicides as an environmental modification technique in the meaning of Article II is a method of warfare prohibited by Article I if such a use of herbicides upsets the ecological balance of a region, thus causing widespread, long-lasting or severe effects as the means of destruction, damage or injury to another State Party.⁶⁶⁶

⁶⁶³ UN General Assembly, Res. 2603 A (XXIV), 16 December 1969, preamble and § (a). The resolution was adopted by 80 votes in favour, 3 against (Australia, Portugal and US) and 36 abstentions (Austria, Belgium, Bolivia, Canada, Chile, China, Denmark, El Salvador, France, Greece, Iceland, Israel, Italy, Japan, Laos, Liberia, Luxembourg, Madagascar, Malawi, Malaysia, Netherlands, New Zealand, Nicaragua, Norway, Paraguay, Philippines, Sierra Leone, Singapore, South Africa, Swaziland, Thailand, Tunisia, Turkey, UK, Uruguay and Venezuela), UN Doc. A/PV.1836, 16 December 1969, p. 4.

⁶⁶⁴ Debates in the First Committee of the UN General Assembly, UN Doc.A/C.1/PV.1716, 9 December 1969; UN Doc. A/C.1/PV.1717, 10 December 1969.

EXPANDING BULLETS

Expanding Bullets (practice relating to Rule 77)

§§ 1–94

Expanding Bullets

I. Treaties and Other Instruments

Treaties

1. The 1899 Hague Declaration concerning Expanding Bullets stipulates that “the Contracting Parties agree to abstain from the use of bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions”.
2. Pursuant to Article 8(2)(b)(xix) of the 1998 ICC Statute, “employing bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions” constitutes a war crime in international armed conflicts.

Other Instruments

3. Article 16(2) of the 1913 Oxford Manual of Naval War provides that it is forbidden

to employ arms, projectiles, or materials calculated to cause unnecessary suffering. Entering especially into this category are . . . bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not cover the core entirely or is pierced with incisions.

4. Based on several documents supplying evidence of outrages committed during the First World War, the 1919 Report of the Commission on Responsibility lists violations of the laws and customs of war which should be subject to criminal prosecution, including the “use of . . . expanding bullets”.
5. Section 6.2 of the 1999 UN Secretary-General’s Bulletin provides that “the United Nations force shall respect the rules prohibiting or restricting the use of certain weapons . . . These include, in particular, the prohibition on the use of . . . bullets which . . . expand or flatten easily in the human body”.
6. The 2000 UNTAET Regulation No. 2000/15 establishes panels with exclusive jurisdiction over serious criminal offences, including war crimes.

According to Section 6(1)(b)(xix), “employing bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions” constitutes a war crime in international armed conflicts.

II. National Practice

Military Manuals

7. Australia’s *Commanders’ Guide* states that “use of the following types of weapons is prohibited: . . . (c) bullets with a hard envelope which do not entirely cover the core or are pierced with incisions (dum-dum bullets)”.¹ It also states that “hollow point weapons are prohibited because they cause gaping wounds which lead to unnecessary suffering”.² The *Guide* states that these weapons are included in those which are “totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering.”³ It further states that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as . . . expanding rounds”.⁴

8. Australia’s *Defence Force Manual* provides that:

Weapons such as irregularly shaped bullets, projectiles filled with broken glass, bullets which have been scored, have had their ends filed, have been altered or which have been smeared with any substance likely to exacerbate a trauma injury are prohibited. “Dum dum” bullets (those with a hard envelope that does not entirely cover the core or which have been pierced with incisions or which have had their points filed off) come within this category of weapon.⁵

The manual further states that “the following examples constitute grave breaches or serious war crimes likely to warrant institution of criminal proceedings: . . . using certain unlawful weapons and ammunition such as . . . expanding rounds”.⁶

9. Belgium’s *Law of War Manual* states, with a reference to the 1899 Hague Declaration concerning Expanding Bullets, that “the use of dum-dum bullets, i.e. bullets which expand or flatten easily in the human body, is banned”.⁷

10. Cameroon’s *Instructors’ Manual* states that:

¹ Australia, *Commanders’ Guide* (1994), § 932(c).

² Australia, *Commanders’ Guide* (1994), § 309.

³ Australia, *Commanders’ Guide* (1994), § 304.

⁴ Australia, *Commanders’ Guide* (1994), § 1305(p).

⁵ Australia, *Defence Force Manual* (1994), § 405.

⁶ Australia, *Defence Force Manual* (1994), § 1315(p).

⁷ Belgium, *Law of War Manual* (1983), p. 37.

These [small calibre] weapons are those which shoot bullets at very high initial speed and which cause excessive trauma comparable to that produced by dum-dum bullets

...

These bullets, unlike traditional bullets, spread or flatten out after entering the body to create a wound larger than their own diameter, thus causing excessive injury.⁸

11. Canada's LOAC Manual states that "bullets that expand or flatten easily in the human body, such as bullets with a hard envelope that not entirely covers the core or is pierced with incisions (i.e., hollow point or 'dum-dum' bullets)," are prohibited.⁹

12. Canada's Code of Conduct provides that "the alteration of ammunition so that it expands or flattens easily when striking the human body is expressly prohibited".¹⁰ It also provides that the use of "bullets designed to expand or flatten easily on contact with the human body (i.e., dum-dum bullets or hollow point bullets)" is forbidden.¹¹

13. The Military Manual of the Dominican Republic strictly prohibits the use of dum-dum bullets.¹²

14. Ecuador's Naval Manual states that:

Weapons which cause superfluous injury or unnecessary suffering are prohibited because the degree of pain, the severity of the injuries and the certainty of death they entail are clearly out of all proportion with the military advantage to be gained by their use... [D]um-dum bullets belong in this category since the small military advantage that may be derived from their use guarantees death due to... the expanding effect of soft-nosed or unjacketed lead bullets.¹³

15. France's LOAC Summary Note states that "it is prohibited to use... projectiles that spread or flatten easily in human body".¹⁴

16. France's LOAC Teaching Note includes dum-dum bullets and other weapons with expanding heads in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁵

17. France's LOAC Manual incorporates the content of the 1899 Hague Declaration concerning Expanding Bullets.¹⁶ It further includes dum-dum bullets and other weapons with expanding heads in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁷

⁸ Cameroon, *Instructors' Manual* (1992), p. 125, § 442.1.

⁹ Canada, *LOAC Manual* (1999), p. 5-2, § 12(b).

¹⁰ Canada, *Code of Conduct* (2001), Rule 3, § 4.

¹⁶ France, *LOAC Manual* (2001), p. 28.

¹⁷ France, *LOAC Manual* (2001), p. 54.

18. Germany's Soldiers' Manual provides that "it is prohibited to use means or methods of warfare which are intended or of a nature to cause superfluous injuries or unnecessary suffering (e.g. dum-dum bullets)".¹⁸

19. Germany's Military Manual states that:

It is prohibited to use bullets which expand or flatten easily in the human body (e.g. *dum-dum bullets*) . . . This applies also to the use of *shotguns*, since shot causes similar suffering unjustified from the military point of view. It is also prohibited to use projectiles of a nature:

- to burst or deform while penetrating the human body;
- to tumble early in the human body; or
- to cause shock waves leading to extensive tissue damage or even a lethal shock.¹⁹ [emphasis in original]

20. Germany's IHL Manual states that "international humanitarian law prohibits the use of a number of means of warfare which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g. bullets which easily expand or flatten in the human body, so-called dum-dum bullets".²⁰

21. Israel's Manual on the Laws of War includes dum-dum bullets in the list of prohibited weapons.²¹

22. Italy's IHL Manual states that "it is specifically prohibited . . . to use bullets which expand or flatten easily in the human body, or bullets which are pierced with incisions".²²

23. Kenya's LOAC Manual states that "the use of bullets that expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions, is prohibited".²³

24. The Military Manual of the Netherlands states that the use of

bullets which expand or transform inside the human body is prohibited; this is the prohibition of the so-called dum-dum bullet. These are bullets with a soft, possibly flattened head. The effect of transformation can also be obtained by using a saw or similar tool to remove the tip of the bullet.²⁴

25. The Military Handbook of the Netherlands prohibits the use of dum-dum bullets.²⁵

26. New Zealand's Military Manual states that the use of "bullets with a hard envelope which does not entirely cover the core, or is pierced with incisions (Dum Dum bullets)" is prohibited.²⁶ It notes that the qualification of the use of poison or poisoned weapons as a war crime "is an old-established rule of

¹⁸ Germany, *Soldiers' Manual* (1991), p. 5.

²⁵ Netherlands, *Military Handbook* (1995), p. 7-39.

²⁶ New Zealand, *Military Manual* (1992), §§ 510(c) (land warfare) and 617(c) (air warfare).

customary law and applies equally to the use of any forbidden weapon such as expanding (dum-dum) bullets".²⁷

27. Nigeria's Manual on the Laws of War states that "it is expressly forbidden to use . . . irregularly shaped bullets . . . The scoring of the surface of bullets and filing off of the end of their hard case . . . are also prohibited."²⁸ The manual includes "using expanding bullets" in its list of war crimes.²⁹

28. Russia's Military Manual prohibits the use of various weapons that cause unnecessary suffering, including "bullets that expand or flatten easily in the human body".³⁰

29. South Africa's LOAC Manual provides that "weapons which are calculated to cause unnecessary suffering are illegal *per se*. Such weapons include . . . dum-dum bullets."³¹

30. Spain's LOAC Manual imposes an "absolute prohibition on the use of . . . bullets that expand (Dum-Dum) or flatten easily in the human body".³²

31. The UK Military Manual states that the UK engages "to abstain from the use of bullets with a hard envelope which does not entirely cover the core, or is pierced with incisions".³³ It further notes that "it is expressly forbidden to employ arms, projectiles or material calculated to cause unnecessary suffering . . . such . . . as . . . irregularly-shaped bullets".³⁴ The manual also provides that "in addition to the 'grave breaches' of the 1949 Geneva Conventions, . . . the following are examples of punishable violations of the laws of war, or war crimes: . . . using expanding bullets".³⁵

32. The UK LOAC Manual states that "the following are prohibited in *international* armed conflict: . . . b. dum-dum bullets".³⁶ (emphasis in original)

33. The US Field Manual states that "usage, has . . . established the illegality of . . . the scoring of the surface or the filing off of the ends of the hard cases of bullets".³⁷

34. The US Air Force Pamphlet states that:

International law has condemned dum dum . . . bullets because of types of injuries and inevitability of death. Usage and practice has also determined that it is *per se* illegal . . . to use irregularly shaped bullets or to score the surface or to file off the end of the hard cases of the bullets which cause them to expand upon contact and thus aggravate the wound they cause.³⁸

35. The US Instructor's Guide stresses the prohibition of "irregular-shaped bullets such as dum-dum bullets".³⁹ It also provides that "in addition to the

grave breaches of the Geneva Conventions, the following acts are further examples of war crimes: using . . . forbidden arms or ammunition such as dum-dum bullets".⁴⁰

National Legislation

36. Andorra's Decree on Arms prohibits the use of expanding weapons.⁴¹

37. Australia's War Crimes Act considers "any war crime within the meaning of the instrument of appointment of the Board of Inquiry [set up to investigate war crimes committed by enemy subjects]" as a war crime, including the use of expanding bullets.⁴²

38. Australia's ICC (Consequential Amendments) Act incorporates in the Criminal Code the war crimes defined in the 1998 ICC Statute, including "employing prohibited bullets . . . [which] expand or flatten easily in the human body" in international armed conflicts.⁴³

39. Under Burundi's Draft Law on Genocide, Crimes against Humanity and War Crimes, "employing bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions," constitutes a war crime in international armed conflicts.⁴⁴

40. Canada's Crimes against Humanity and War Crimes Act provides that the war crimes defined in Article 8(2) of the 1998 ICC Statute are "crimes according to customary international law" and, as such, indictable offences under the Act.⁴⁵

41. Congo's Genocide, War Crimes and Crimes against Humanity Act defines war crimes with reference to the categories of crimes defined in Article 8 of the 1998 ICC Statute.⁴⁶

42. Ecuador's National Civil Police Penal Code punishes the members of the National Civil Police "who use or order to be used . . . dum-dum bullets".⁴⁷

43. Under Estonia's Penal Code, "use of . . . expanding bullets" is a war crime.⁴⁸

44. Under Georgia's Criminal Code, any war crime provided for by the 1998 ICC Statute, which is not explicitly mentioned in the Code, such as "employing bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions," in international armed conflicts, is a crime.⁴⁹

45. Germany's Law Introducing the International Crimes Code punishes anyone who, in connection with an international or non-international armed

conflict, “employs bullets which expand or flatten easily in the human body, in particular bullets with a hard envelope which does not entirely cover the core or is pierced with incisions”.⁵⁰

46. Italy’s Law of War Decree as amended provides that “it is prohibited to . . . use bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions”.⁵¹

47. Under Mali’s Penal Code, “using bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions” is a war crime in international armed conflicts.⁵²

48. The Definition of War Crimes Decree of the Netherlands includes the “use of . . . expanding bullets” in its list of war crimes.⁵³

49. Under the International Crimes Act of the Netherlands, “employing bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions” is a crime, when committed in an international armed conflict.⁵⁴

50. Under New Zealand’s International Crimes and ICC Act, war crimes include the crime defined in Article 8(2)(b)(xix) of the 1998 ICC Statute.⁵⁵

51. Under Trinidad and Tobago’s Draft ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xix) of the 1998 ICC Statute.⁵⁶

52. Under the UK ICC Act, it is a punishable offence to commit a war crime as defined in Article 8(2)(b)(xix) of the 1998 ICC Statute.⁵⁷

53. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, “means or methods of combat prohibited under the rules of international law, during a war or an armed conflict” is a war crime.⁵⁸ The commentary on the Penal Code as amended adds that “the following weapons and means of combat are considered to be prohibited: . . . projectiles that spread easily when they come in contact with a human body”.⁵⁹

National Case-law

54. In 1995, in a ruling on the constitutionality of AP II, the Constitutional Court of Colombia stated in relation to the prohibition on the use of weapons of a nature to cause unnecessary suffering or superfluous injury that:

⁵⁰ Germany, *Law Introducing the International Crimes Code* (2002), Article 1, § 12(1)(3).

⁵¹ Italy, *Law of War Decree as amended* (1938), Article 35(6).

⁵² Mali, *Penal Code* (2001), Article 31(i)(19).

⁵³ Netherlands, *Definition of War Crimes Decree* (1946), Article 1.

⁵⁴ Netherlands, *International Crimes Act* (2003), Article 5(5)(i).

⁵⁶ Trinidad and Tobago, *Draft ICC Act* (1999), Section 5(1)(a).

⁵⁷ UK, *ICC Act* (2001), Sections 50(1) and 51(1) (England and Wales) and Section 58(1) (Northern Ireland).

⁵⁸ SFRY (FRY), *Penal Code as amended* (1976), Article 148(1).

⁵⁹ SFRY (FRY), *Penal Code as amended* (1976), commentary on Article 148(1).

Although none of the treaty rules expressly applicable to internal conflicts prohibits indiscriminate attacks or the use of certain weapons, the Taormina Declaration consequently considers that the bans (established partly by customary law and partly by treaty law) on the use of . . . “dum-dum” bullets . . . apply to non-international armed conflicts, not only because they form part of customary international law but also because they evidently derive from the general rule prohibiting attacks against the civilian population.⁶⁰

Other National Practice

55. At the CDDH, Algeria supported the Philippine amendment (see *infra*), because “it was a simple reaffirmation of the principles of positive humanitarian law”.⁶¹

56. At the CDDH, Canada voted against the Philippine amendment (see *infra*) because “the particular weapons are forbidden by international law and their use, other than by way of reprisal, already constitutes a war crime”.⁶²

57. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH on the legality of high-velocity weapons, Colombia stated that “such weapons were indeed comparable to . . . dum-dum bullets . . . It was thus essential to expedite the formulation of rules prohibiting their use.”⁶³

58. At the CDDH, Egypt expressed “its disappointment at the failure of the Philippine amendment, establishing as a grave breach the use of prohibited weapons, to be adopted”, but noted that Article 74 of draft API (now Article 85) “as it stands now does cover the use of such weapons through their effects”.⁶⁴

59. The Report on the Practice of Ethiopia states, with reference to a press release by the Ministry of Defence, that “dum-dum bullets, which expand or flatten easily in the human body, were used during the war with Somalia in 1956”.⁶⁵

60. At the CDDH, Finland stated that it “attached the greatest importance to the prohibition of dum-dum bullets in The Hague Declaration of 1899”.⁶⁶

61. Finnish police are reported to have used hollow-point handgun bullets since 1994.⁶⁷ According to an article by the Finnish Senior Advisor of the Weapons Technology Police Technical Centre, the use of hollow-point expanding

handgun bullets presents some advantages, such as the avoidance of danger to bystanders through over-penetration of the bullet or ricochet. The article's author emphasises the existence of "a very common misunderstanding", which is that hollow-point handgun bullets cause much more tissue damage than non-deforming full metal jacket bullets. He states that "the truth, is, however, that a well designed expanding bullet causes less damage than some non-deforming full metal jacket bullet. This is because the latter starts tumbling causing an effect similar to that of an expanding bullet." He adds that:

Even when lethal ammunition are used some injury avoidance criteria must, however, be met. A bullet shall have consistent and controlled penetration thus minimising danger to bystanders while yet providing sufficient penetration in all circumstances. This is technically not possible without some braking mechanism like expansion or terminal ballistic instability. A bullet shall not cause more injury than is unavoidable. It shall not break up to fragments upon impact with soft tissue even when shot through various materials. A bullet shall have controlled trajectory. Upon impact with hard surface it shall not turn into excessively dangerous ricochets and the ricochets must not deflect significantly from the impact surface tangent.⁶⁸

62. According to the Report on the Practice of India, "since India has subscribed to most of the Conventions which specifically declare certain weapons as prohibited, there is no possibility of use . . . of expanding bullets in times of international or internal armed conflicts". In addition, the report states that, according to India's practice, there is "a ban and restriction on the use of . . . expanding bullets".⁶⁹

63. On the basis of an interview with the Director of the Nuclear, Biological and Chemical Weapons Division of the Indonesian Armed Forces, the Report on the Practice of Indonesia states that Indonesia has prohibited the use of expanding bullets.⁷⁰

64. At the CDDH, Iraq supported the Philippine amendment (see *infra*), since "the use of dum-dum bullets . . . had been prohibited for a very long time but the user was not liable to criminal proceedings. It was high time that the use of such appalling weapons was made a grave offence."⁷¹

65. At the CDDH, Italy abstained in the vote on the Philippine amendment (see *infra*) because "it would not be useful because it dealt with means and methods of warfare which were already prohibited by the existing law".⁷²

⁶⁸ Jorma Jussila, "Future Police Operations and Non-Lethal Weapons", *Medicine, Conflict and Survival*, Vol. 17, No. 3, July–September 2001, p. 259.

⁷² Italy, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 285, § 30.

66. According to the Report on the Practice of Jordan, Jordan has indicated that it does not use, manufacture or stockpile expanding bullets and it has no intention of possessing nor using such weapons in the future.⁷³

67. At the CDDH, the Philippines proposed an amendment to include “the use of weapons prohibited by International Conventions, namely: bullets which expand or flatten easily in the human body” in the list of grave breaches in Article 74 of draft API (now Article 85).⁷⁴ The proposal was rejected because it failed to obtain the necessary two-thirds majority (41 votes in favour, 25 against and 25 abstentions).⁷⁵

68. In 1977, during a debate in the First Committee of the UN General Assembly, Sweden stated that it, “together with others”, wanted to restate the ban on expanding bullets from 1899, but that the proposal had not met with general approval.⁷⁶

69. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Sweden stated that:

Several governments, including the US and the UK governments, had avoided a narrow interpretation of The Hague ban; their current military manuals prohibited not merely soft-nose bullets, but also irregularly-shaped bullets . . . It was significant that The Hague ban . . . had even had a decisive influence on the choice of weapons for police use, although it was not formally applicable in the domestic sphere.⁷⁷

70. At the CDDH, Switzerland voted in favour of the Philippine amendment (see *supra*) because:

It would be a step forward to state expressly that any violation of The Hague Declaration of 1899 and the Geneva Protocol of 1925 would constitute a grave breach. The rules laid down in those two instruments were undisputed and indisputable, and the amendment would have a deterrent effect on any State tempted to violate them, by exposing the members of its armed forces to the penalties applicable under the Geneva Conventions.⁷⁸

71. In 1974, in reply to a letter from a member of the US House of Representatives, the Acting General Counsel of the US Department of Defense stated that:

⁷³ Report on the Practice of Jordan, 1997, Chapter 3.4.

⁷⁷ Sweden, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.11, 21 February 1975, p. 111, § 29.

⁷⁸ Switzerland, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, p. 281, § 9.

The United States is not a party to the agreement prohibiting the use of expanding bullets or “dum-dums”, signed at The Hague, July 29 1899. In that Agreement, the parties agreed “to abstain from the use of bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core, or is pierced with incisions”. The United States has, however, acknowledged that it will abide by the terms of the agreement prohibiting expanding bullets.⁷⁹

72. At the CDDH, the US voted against the Philippine amendment (see *supra*) because:

Grave breaches were meant to be the most serious type of crime; Parties had an obligation to punish or extradite those guilty of them. Such crimes should therefore be clearly specified, so that a soldier would know if he was about to commit an illegal act for which he could be punished. The amendment, however, was vague and imprecise. What standard would be applied, for example, in deciding whether a bullet expanded or flattened “easily” in the human body? . . . It would also punish those who used the weapons, namely, the soldiers, rather than those who made the decision as to their use, namely, Governments.⁸⁰

73. In 1983, in a memorandum on the use of small-caliber armor-piercing incendiary (API) ammunition against enemy personnel, the US Department of the Army emphasised that no US ammunition violated, *inter alia*, the 1899 Hague Declaration concerning Expanding Bullets.⁸¹

74. In 1990, in a memorandum of law on sniper use of open-tip ammunition, the US Department of the Army stated that:

The United States is not a party to [the 1899 Hague Declaration concerning Expanding Bullets], but U.S. officials over the years have taken the position that the armed forces of the United States will adhere to its terms to the extent that its application is consistent with the object and purpose of article 23e of [the 1907 HR].⁸²

He added, however, that:

Wound ballistic research over the past fifteen years has determined that the prohibition contained in the 1899 Hague Declaration [concerning Expanding Bullets] is of minimal to no value, inasmuch as virtually all jacketed military bullets employed since 1899 with pointed ogival spitzer tip shape have a tendency to fragment on impact with soft tissue, harder organs, bone or the clothing and/or equipment worn by the individual soldier.

...

⁷⁹ US, Department of Defense, Acting General Counsel, Reply of 18 January 1974 to a letter of 14 November 1973 of a member of the House of Representatives, Arthur W. Rovine, *Digest of United States Practice in International Law, 1974*, Department of State Publication 8809, Washington, D.C., 1975, pp. 705–706.

⁸⁰ US, Statement at the CDDH, *Official Records*, Vol. VI, CDDH/SR.44, 30 May 1977, pp. 280–281, § 7.

⁸¹ US, Department of the Army, Office of the Judge Advocate General, Memorandum on the use of small-caliber armor-piercing incendiary (API) ammunition against enemy personnel, 15 March 1983, § 2.

⁸² US, Department of the Army, Office of the Judge Advocate General, Sniper Use of Open-Tip Ammunition – Memorandum of Law, 12 October 1990, p. 4, § 3.

Weighing the increased performance of the pointed ogival spitzer tip bullet against the increased injury its break-up may bring, the nations of the world – through almost a century of practice – have concluded that the need for the former outweighs concern for the latter and does not result in unnecessary suffering as prohibited by the 1899 Hague Declaration Concerning Expanding Bullets and the 1907 Hague Convention IV. The 1899 Hague Declaration Concerning Expanding Bullets remains valid for expression of the principle that a nation may not employ a bullet that expands easily on impact for the purpose of unnecessarily aggravating the wound inflicted upon an enemy soldier.⁸³

75. In 1990, in a memorandum of law on sniper use of open-tip ammunition, the US Department of the Army stated that the use of the 7.62 Norma Match ammunition with open-tip bullet is not contrary to the Hague or Geneva rules, since the

purpose of the 7.62mm “open-tip” MatchKing bullet is to provide maximum accuracy at very long range. . . It may fragment upon striking its target, although the probability of its fragmentation is not as great as some military ball bullets currently in use by some nations. Bullet fragmentation is not a design characteristic, however, nor a purpose for use of the MatchKing by U.S. Army snipers. Wounds caused by MatchKing ammunition are similar to those caused by a fully jacketed military ball bullet, which is legal under the law of war. . . The military necessity for its use. . . is complemented by the high degree of discriminate fire it offers.⁸⁴

76. In 1993, in a legal review of the USSOCOM Special Operations Offensive Handgun, the US Department of the Army stated that:

The Hague Declaration Concerning Expanding Bullets of 29 July 1899 prohibits the use in international armed conflict. . . of bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions.

The United States is not a party to this declaration, but has taken the position that it will adhere to the terms of this convention and its conventional military operations to the extent that its application is consistent with the object and purpose of article 23e of the [1907 HR].

...

The conflict spectrum clearly has changed from 1899, and the immediate incapacitation essential to the prevention of the release of dangerous materials or the murder of hostages or prisoners of war necessitates reconsideration of the 1899 prohibition in light of these changed circumstances. The Hague Declaration retains its general validity in limiting use of expanding ammunition by conventional military forces in conventional armed conflict when such use may result in superfluous injury, absent a clear showing of military necessity for its use.⁸⁵

⁸³ US, Department of the Army, Office of the Judge Advocate General, *Sniper Use of Open-Tip Ammunition – Memorandum of Law*, 12 October 1990, pp. 6–7, § 6.

⁸⁴ US, Department of the Army, Office of the Judge Advocate General, *Sniper use of open-tip ammunition – Memorandum of law*, 12 October 1990, p. 7.

⁸⁵ US, Department of the Army, Office of the Judge Advocate General, *Legal Review of USSOCOM Special Operations Offensive Handgun*, 16 February 1993, pp. 12 and 17.

77. In 1996, in a legal review of the Fabrique Nationale 5.7x28mm Weapon System, the US Department of the Army stated that “the United States is not a party to [the 1899 Hague Declaration concerning Expanding Bullets], but has taken the position that it will adhere to the terms of the convention in armed conflict to the extent that its application is consistent with the object and purpose of article 23e of the [1907 HR]”.⁸⁶

78. At the CDDH, the SFRY voted in favour of the Philippine amendment (see *supra*), but because that amendment had been rejected it stated that it

deeply regrets that the use of unlawful methods or means of combat was not included in the grave breaches, particularly since to have done so would merely have been to have codified an already existing rule of customary law, because there can be no doubt that to use prohibited weapons or unlawful methods of making war is already to act unlawfully, that is, it is a war crime punishable by existing international law.⁸⁷

79. In 1991, in a document entitled “Examples of violations of the rules of international law committed by the so-called armed forces of Slovenia”, the Ministry of Defence of the SFRY (FRY) stated that:

The nature of the injuries of some of the members of the Yugoslav People’s Army show that forbidden means have been used in the armed conflict, before all ammunition suitable to inflict disproportionate and needless injuries, that reduce the chances of the injured to survive.

In that respect, the injuries of [a] soldier . . . are characteristic. He was hit in the tip of his right forearm and the round had crumbled and split the forearm bone, the tissue and thus blew the fist of the injured to bits. In the riddled channel and the surrounding tissue, pieces of a fragmented round were found. All that implies for the use of the so-called soft-nosed bullet.⁸⁸

80. In a communication to the ICRC in 1991, a Red Cross Society transmitted a government report which denounced the use of dum-dum bullets in a non-international conflict.⁸⁹

81. In 2000, the government of a State stated that, although the prohibition of expanding bullets applied to military action and not to civil law enforcement, its police “should operate within the *spirit*” of the 1907 Hague Convention (IV) and therefore not cause unnecessary suffering. The justification of discharging a firearm by a police officer is to take immediate and effective action to stop a life-threatening action by an armed offender. In these circumstances, it is important to immediately stop the offender without putting at risk the lives of the officer or of others. Therefore, ammunition must immediately incapacitate and

⁸⁹ ICRC archive document.

minimise the risk of “over-penetration” (i.e. going through the target and perhaps hitting someone else as well). Expanding ammunition helped to slow the projectile on impact with the target; reduced the potential for over-penetration thereby endangering others; and minimised the potential of ricochet should it hit a hard surface. Handgun ammunition used by police forces in the State were jacketed soft-nosed, but when rifle ammunition was used in order to operate over longer ranges, it was usually full-metal jacket and conformed to military specifications. Handgun soft-point or hollow-point ammunition was designed to provide controlled expansion and did not fragment in the same way as “dum-dum” bullets.⁹⁰

III. Practice of International Organisations and Conferences

United Nations

82. In resolutions adopted in 1970 and 1971, the UN General Assembly called upon “all parties to any armed conflict to observe the rules laid down in the Hague Conventions of 1899 and 1907”.⁹¹

83. In a resolution adopted in 1972, the UN General Assembly called upon “all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular the Hague Conventions of 1899 and 1907”.⁹²

84. In a resolution adopted in 1973, the UN General Assembly reaffirmed the urgent need to ensure full and effective application by all the parties to armed conflicts of existing legal rules relating to such conflicts, in particular the Hague Conventions of 1899 and 1907.⁹³

85. In three resolutions adopted between 1974 and 1976, the UN General Assembly called upon “all parties to armed conflict” to acknowledge and to comply with their obligations under the humanitarian instruments and observe the international humanitarian rules which are applicable, in particular, the Hague Conventions of 1899 and 1907.⁹⁴

86. In 1969, in a report on respect for human rights in armed conflict, the UN Secretary-General stated that some weapons which caused unnecessary suffering “have been prohibited for a long time by the international community

⁹⁰ ICRC archive document.

⁹¹ UN General Assembly, Res. 2677 (XXV), 9 December 1970, § 1; Res. 2852 (XXVI), 20 December 1971, § 1.

⁹² UN General Assembly, Res. 3032 (XXVII), 18 December 1972, § 2. The resolution was adopted by 103 votes in favour, none against and 25 abstentions (Argentina, Australia, Belgium, Bolivia, Brazil, Burma, Canada, Colombia, Cuba, France, Greece, Guatemala, Honduras, Israel, Italy, Japan, Laos, Luxembourg, Malawi, Nepal, Portugal, South Africa, UK, US and Uruguay), UN Doc. A/PV.2114, 18 December 1972, p. 20.

⁹³ UN General Assembly, Res. 3102 (XXVIII), 12 December 1973, preamble. The resolution was adopted by 107 votes in favour, none against and 6 abstentions (Costa Rica, Israel, Paraguay, Portugal, Spain and US), UN Doc. A/PV.2197, 12 December 1973, p. 17.

⁹⁴ UN General Assembly, Res. 3319 (XXIX), 14 December 1974, § 3; Res. 3500 (XXX), 15 December 1975, § 1; Res. 31/19, 24 November 1976, § 1.

(see for instance, the Hague Declaration of 1899 which prohibits the use of bullets 'which expand or flatten in the human body').⁹⁵

87. In 1973, a survey conducted by the UN Secretariat noted that there was a consensus that expanding bullets were prohibited under the 1899 Hague Declaration concerning Expanding Bullets.⁹⁶

Other International Organisations

88. The first OAU/ICRC seminar on IHL for diplomats accredited to the OAU in 1994 recommended that the "Hague Law and relevant provisions regulating the means and methods of warfare such as the use of specific weapons must be applied to both international and non international conflictual situations".⁹⁷

International Conferences

89. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

90. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

91. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that "the use of bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions, is prohibited".⁹⁸

92. The ICRC Commentary on the Additional Protocols states that:

1419. The specific applications of the prohibition formulated in Article 23, paragraph 1(e), of the Hague Regulations, or resulting from the Declarations of St. Petersburg and The Hague, are not very numerous. They include:

- ...
2. "dum-dum" bullets, i.e., bullets which easily expand or flatten in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions or bullets of irregular shape or with a hollowed out nose;
- ...

⁹⁸ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 917.

1420. The weapons which are prohibited under the provisions of the Hague Law are, *a fortiori*, prohibited under [Article 35(2) AP I].⁹⁹

93. In a communication to the ICRC in 1991, a Red Cross Society denounced the use of dum-dum bullets in an international conflict.¹⁰⁰

VI. Other Practice

94. Rule B2 of the Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IIHL, states that “the customary rule prohibiting the use of bullets which expand or flatten easily in the human body, such as dum-dum bullets, is applicable in non-international armed conflicts”.¹⁰¹

EXPLODING BULLETS

Exploding Bullets (practice relating to Rule 78)

§§ 1–49

Exploding Bullets

I. Treaties and Other Instruments

Treaties

1. The 1868 St. Petersburg Declaration states that “the Contracting Parties engage mutually to renounce, in case of war among themselves, the employment by their military or naval troops of any projectile of a weight below 400 grammes, which is either explosive or charged with fulminating or inflammable substances”. The weight of 400 grammes was chosen since it was the weight of the smallest artillery shell of that time.

Other Instruments

2. Under Article 13(e) of the 1874 Brussels Declaration, “the use of projectiles prohibited by the Declaration of St. Petersburg of 1868” is “especially forbidden”.

3. Article 9(a) of the 1880 Oxford Manual states that “it is forbidden . . . to employ . . . projectiles, . . . calculated to cause superfluous suffering, or to aggravate wounds – notably projectiles of less weight than four hundred grams which are explosive or are charged with fulminating or inflammable substances”.

4. Article 16(2) of the 1913 Oxford Manual of Naval War provides that “it is forbidden . . . to employ . . . projectiles . . . calculated to cause unnecessary suffering. Entering especially into this category are explosive projectiles or those charged with fulminating or inflammable materials, less than 400 grammes in weight.”

5. Based on several documents supplying evidence of outrages committed during the First World War, the 1919 Report of the Commission on Responsibility lists violations of the laws and customs of war which should be subject to criminal prosecution, including the “use of explosive . . . bullets”.

6. Article 18 of the 1923 Hague Rules of Air Warfare provides that “the use of tracer, incendiary or explosive projectiles by or against aircraft is not prohibited.

This provision applies equally to states which are parties to the Declaration of St. Petersburg, 1868, and to those which are not."

7. Section 6.2 of the 1999 UN Secretary-General's Bulletin provides that "the United Nations force shall respect the rules prohibiting... the use of certain weapons... These include, in particular, the prohibition on the use of... bullets which explode... in the human body."

II. National Practice

Military Manuals

8. Australia's Commanders' Guide prohibits the use of "projectiles weighing less than 400 grams which are either explosive or charged with fulminating or inflammable substances (St. Petersburg)".¹

9. Australia's Defence Force Manual states that "bullets or other projectiles weighing less than 400 grams which are either explosive or contain fulminating or inflammable substances (exploding small arms projectiles) are prohibited".²

10. Belgium's Law of War Manual proscribes the use of exploding bullets under 400 grammes, with reference to the 1868 St. Petersburg Declaration.³

11. Canada's LOAC Manual states that "the following types of ammunition are prohibited: a. projectiles of a weight below 400 grams that are either explosive or charged with fulminating (exploding) or inflammable substances".⁴

12. France's LOAC Manual refers to the 1868 St. Petersburg Declaration.⁵

13. Germany's Military Manual states that:

In the 1868 St. Petersburg Declaration the use of explosive and incendiary projectiles under 400 grammes was prohibited, since these projectiles were deemed to cause disproportionately severe injury to soldiers, which is not necessary for putting them out of action. This prohibition is only of limited importance now, since it is reduced by customary law to the use of explosive and incendiary projectiles of a weight significantly lower than 400 grammes which can disable only the individual directly concerned but not any other persons. 20 mm high-explosive grenades and projectiles of a similar calibre are not prohibited.⁶

14. Italy's IHL Manual states that "it is specifically prohibited... to use explosive or incendiary projectiles of a weight below 400 grammes, except for air or anti-air systems."⁷

15. New Zealand's Military Manual prohibits the use of "projectiles weighing less than 400 grams which are either explosive or charged with fulminating or inflammable substances". It adds that:

The use of tracer and incendiary ammunition by the armed forces of belligerents was general during the Second World War and must be considered to be lawful. An argument can be made that the use of such ammunition is illegal if directed

¹ Australia, *Commanders' Guide* (1994), § 932(f).

² Australia, *Defence Force Manual* (1994), § 408.

⁴ Canada, *LOAC Manual* (1999), p. 5-2.

⁶ Germany, *Military Manual* (1992), § 406.

³ Belgium, *Law of War Manual* (1983), p. 37.

⁵ France, *LOAC Manual* (2001), p. 53.

⁷ Italy, *IHL Manual* (1991), Vol. I, § 8(5).

solely against combatant personnel because of the St Petersburg Declaration and [the 1907] HR Art. 23(e). This argument ignores the fact that the UN Conference which negotiated the [1980 Protocol III to the CCW], was unable to agree on any requirement to protect combatants from the effects of incendiary weapons.⁸

16. Russia's Military Manual prohibits the use of various weapons that cause unnecessary suffering, including "projectiles weighing less than 400 grammes, which are either explosive or charged with fulminating or inflammable substances".⁹

17. Spain's LOAC Manual imposes a total prohibition on "the use of projectiles weighing less than 400 grammes which are explosive".¹⁰

18. The UK Military Manual states that:

The international agreements limiting the means of destruction of enemy combatants are contained in [Article 23 of the 1907 HR] and in three Declarations and one Protocol, by which the contracting parties, of which Great Britain is one, engage to:

- (i) "to renounce in case of war amongst themselves, the employment by their military or naval troops of any projectile of a weight below 400 grammes . . . which is either explosive or charged with fulminating or inflammable substances" (Declaration of St. Petersburg, 1868)

...

... This work deals only with land warfare (whether conducted by land, sea or air forces) and therefore is not concerned with air warfare. However, attention must be drawn to the Air Warfare Rules drafted at the Hague in 1923 by a commission of jurists appointed by certain Governments. Art. 18 of that code provides as follows: "The use of tracer, incendiary or explosive projectiles by or against aircraft is not prohibited." This provision applies equally to States which are parties to the Declaration [of St. Petersburg of 1868], and those which are not. During the Second World War such projectiles were used by the air forces of all belligerents . . . The use of tracer and incendiary ammunition by the armed forces of belligerents was general during the Second World War and must be considered to be lawful provided that it is directed solely against inanimate military targets (including aircraft). The use of such ammunition is illegal if directed solely against combatant personnel. This is so for two reasons, first the renunciation contained in the Declaration of St. Petersburg, 1868, referred to and second the prohibition in [Article 23(e) of the 1907 HR].¹¹

19. The UK LOAC Manual states that "the following are prohibited in *international* armed conflict: a. explosive or inflammable bullets for use against personnel".¹² (emphasis in original)

20. The US Air Force Pamphlet states that "international law has condemned . . . exploding bullets because of types of injuries and inevitability of death".¹³

⁸ New Zealand, *Military Manual* (1992), § 510(f) and footnote 49, see also § 617(f) and footnote 37 (air warfare).

¹³ US, *Air Force Pamphlet* (1976), § 6-3(b)(2).

National Legislation

21. Andorra's Decree on Arms prohibits the use of exploding bullets.¹⁴
22. Australia's War Crimes Act considers "any war crime within the meaning of the instrument of appointment of the Board of Inquiry [set up to investigate war crimes committed by enemy subjects]" as a war crime, including the use of explosive bullets.¹⁵
23. Ecuador's National Civil Police Penal Code punishes the members of the National Civil Police "who use or order to be used . . . exploding bullets".¹⁶
24. Italy's Law of War Decree as amended provides that "it is prohibited . . . to use explosive or incendiary projectiles of a weight below 400 grammes, except for air or anti-air systems".¹⁷
25. The Definition of War Crimes Decree of the Netherlands includes the "use of explosive . . . bullets" in its list of war crimes.¹⁸
26. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime.¹⁹ The commentary on the Penal Code as amended notes that "the following weapons and means of combat are considered to be prohibited: explosive projectiles under 400 g. that burst or have an incendiary charge".²⁰

National Case-law

27. No practice was found.

Other National Practice

28. At the Second Review Conference of States Parties to the CCW in 2001, Brazil stated that it "shared the concern that the 1868 St. Petersburg Declaration's ban on the use of projectiles that might explode with the human body should not be subverted".²¹
29. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Colombia stated that "high-velocity small-calibre projectiles . . . were indeed comparable to exploding bullets" and should be prohibited.²²

²² Colombia, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.14, 5 March 1975, pp. 132–133, § 9.

30. According to the Report on the Practice of Indonesia, the use of exploding bullets is prohibited in Indonesia.²³

31. According to the Report on the Practice of Jordan, Jordan does not use, manufacture or stockpile explosive bullets and it has no intention of possessing or using such weapons in the future.²⁴

32. In a letter to the ICRC in 2001, Norway stated that:

We fully recognise the validity of the St. Petersburg Declaration and the customary law established on the basis of the Declaration. The principle set out in the Declaration should, however, be interpreted in the light of more recent international humanitarian law, and in particular the prohibition against employing weapons and ammunition that are of such a nature as to cause superfluous injury or unnecessary suffering. In the assessment of the legality of a particular weapon or kind of ammunition, there has been a clear practice among nations since 1868 of weighing the legality against the intended use of the weapon or ammunition. In such assessments several factors, such as distance from the target, intended target categories and depth of penetration are considered to be relevant when establishing the effect on the target.²⁵

33. At the Second Review Conference of States Parties to the CCW in 2001, Norway stated that it “endorsed all efforts to strengthen the fundamental principle that the development and use of weapons systems deemed contrary to the 1868 St. Petersburg Declaration should be prevented”.²⁶

34. In its written statement submitted to the ICJ in the *Nuclear Weapons case* in 1995, the UK stated that the 1868 St. Petersburg Declaration prohibited projectiles the use of which “was considered to be gratuitously cruel, because it caused horrific and almost invariably fatal injuries, while offering little or no military advantage over the use of ordinary ammunition”.²⁷

35. In 1998, in a legal review of a 12.7 mm explosive bullet, the US Department of the Army stated that “a projectile that will explode on impact with the human body would be prohibited by the law of war from use for anti-personnel purposes. This remains the view of the US.”²⁸ In an update of this legal review in 2000, the Department of the Army stated that “the considerable practice of nations during this century suggests that States accept that an exploding projectile designed exclusively for antipersonnel use would be prohibited, as there is no military purpose for it”.²⁹

36. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, the US stated that it agreed with the ICRC

²³ Report on the Practice of Indonesia, 1997, Chapter 3.4.

²⁴ Report on the Practice of Jordan, 1997, Chapter 3.4.

“that there is no valid military requirement for a bullet designed to explode upon impact with the human body”.³⁰

37. In a statement in 1991, the Supreme Command of the YPA of the SFRY stated that:

The authorities and Armed Forces of the Republic of Slovenia are treating JNA as an occupation army; and are in their ruthless assaults on JNA members and their families going as far as to employ means and methods which were not even used by fascist units and which are prohibited under international law . . . They are . . . using explosive bullets.³¹

III. Practice of International Organisations and Conferences

United Nations

38. No practice was found.

Other International Organisations

39. No practice was found.

International Conferences

40. In 1999, the ICRC organised an Expert Meeting on Exploding Projectiles of 12.7 mm and Below to which military, legal and ballistic governmental experts from Belgium, Norway, Switzerland and US (i.e. countries that produce and/or stock 12.7 mm multipurpose bullets) were invited in their personal capacity. The summary report of the meeting, reviewed and accepted by all participants, stated that there was a general consensus, in relation to projectiles of 12.7 mm and below, that:

The prohibition on the intentional use against combatants of such projectiles which explode upon impact with the human body, which originated in the 1868 St. Petersburg Declaration, continues to be valid.

The targeting of combatants with such projectiles the foreseeable effect of which is to explode upon impact with the human body would be contrary to the object and purpose of the St. Petersburg Declaration.

There is no military requirement for a projectile designed to explode upon impact with the human body.

...

States producing such projectiles notify past and future recipients of these projectiles that their intentional use against combatants is a violation of the Law of Armed Conflict.³²

41. The Final Declaration of the Second Review Conference of States Parties to the CCW in 2001 took note of “the report of the International Committee

³⁰ US, Statement at the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW, Geneva, 24–28 September 2001, UN Doc. CCW/CONF.II/PC.3/PV.1, 5 October 2001, p. 54.

of the Red Cross on 'Ensuring respect for the 1868 St. Petersburg Declaration prohibiting the use of certain explosive projectiles' (dated 18 September 2001)" and invited "States to consider this report and other relevant information, and take any appropriate action".³³

IV. Practice of International Judicial and Quasi-judicial Bodies

42. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

43. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that "the use of projectiles of a weight below 400 grammes, which are either explosive or charged with fulminating or inflammable substances, is prohibited".³⁴

44. The ICRC Commentary on the Additional Protocols states that:

1419. The specific applications of the prohibition formulated in Article 23, paragraph 1(e), of the Hague Regulations, or resulting from the Declarations of St. Petersburg and The Hague, are not very numerous. They include:

1. explosive bullets...

1420. The weapons which are prohibited under the provisions of the Hague Law are, *a fortiori*, prohibited under [Article 35(2) AP I].³⁵

45. In 1998, in a statement in the First Committee of the UN General Assembly, the ICRC declared that:

The ICRC considers the 1868 St. Petersburg Declaration, renouncing the use of exploding bullets, to be a cornerstone of efforts to protect soldiers from superfluous injury or unnecessary suffering. It is disturbing to learn that some armed forces are considering the use of bullets which will explode on impact with soft targets. The ICRC calls on all States rigorously to review, in accordance with article 36 of the 1977 Additional Protocol I, their procurement policies.³⁶

46. In 1999, in a statement in the First Committee of the UN General Assembly, the ICRC expressed concern about a "multipurpose" bullet, some versions of which exploded on impact with the human body. It further stated that:

The 1868 St. Petersburg Declaration prohibited the use of explosive bullets in order to protect soldiers from suffering which serves no military purpose and is therefore contrary to the laws of humanity. It is disturbing to learn that in recent years bullets capable of exploding on impact with a human body have been produced, sold and

³³ Second Review Conference of States Parties to the CCW, Geneva, 11–21 December 2001, Final Declaration, UN Doc. CCW/CONF.II/2, 2001, p. 9.

³⁴ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, § 916.

³⁶ ICRC, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/53/PV.9, 19 October 1998, p. 19.

used. In early 1999 the ICRC hosted a meeting of technical and legal governmental experts, who reaffirmed that the proliferation of such bullets is a serious problem and undermines the very purpose of the St. Petersburg Declaration. We urge all States to refrain from the production and export of such bullets and urge those that possess them to strictly prohibit their use against persons, a practice which violates existing law. The ICRC expects to report on this problem and seek appropriate action during the 2001 CCW Review Conference.³⁷

47. In a report submitted in 2001 to the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW, the ICRC recalled the consensus expressed by the participants in the 1999 Expert Meeting on Exploding Projectiles of 12.7 mm and Below:

calls on *all States* to

- take steps to ensure that explosive projectiles under 400 grams which may explode within the human body are not produced, used or transferred;
- undertake a rigorous review, as required by Article 36 of Protocol I of 1977 Additional to the Geneva Conventions of 1949, before acquiring or developing explosive projectiles under 400 grams and sniper rifles capable of using such projectiles in order to ensure that such projectiles will not explode within the human body.

The ICRC urges *States which produce or transfer explosive projectiles* under 400 grams which may explode within the human body urgently to:

- Inform past recipients of such projectiles that their use against combatants is prohibited under international humanitarian law.
- Suspend the production and export of such projectiles until they have been adapted so as to ensure that their use against combatants will not contravene the object and purpose of the St Petersburg Declaration. This would involve testing, redesign and other steps to ensure that the chance of the projectile's explosion within the human body (whether soft tissue or bone) has been eliminated.³⁸ [emphasis in original]

48. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, the ICRC stated that “the object and purpose of the 1868 [St. Petersburg] Declaration to protect combatants from unnecessary suffering or death from explosive projectiles remains valid and in the view of the ICRC is part of customary international law”.³⁹

VI. Other Practice

49. No practice was found.

WEAPONS PRIMARILY INJURING BY NON-DETECTABLE FRAGMENTS

Weapons Primarily Injuring by Non-Detectable Fragments
(practice relating to Rule 79)

§§ 1–55

Weapons Primarily Injuring by Non-Detectable Fragments

I. Treaties and Other Instruments

Treaties

1. The 1980 Protocol I to the CCW provides that “it is prohibited to use any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-rays”.
2. Upon ratification of the 1980 CCW, Canada stated that “with respect to [the 1980] Protocol I [to the CCW], it is the understanding of the Government of Canada that the use of plastics or similar materials for detonators or other weapons parts not designed to cause injury is not prohibited”.¹
3. Upon ratification of the 1980 CCW, France stated that:

with reference to the scope of application defined in article 1 of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, . . . it will apply the provisions of the Convention and its three Protocols [I, II and III] to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions of 12 August 1949 [international and non-international armed conflicts].²

4. Upon accession to the 1980 CCW, Israel stated that:

With reference to the scope of application defined in article 1 of the Convention, the Government of the State of Israel will apply the provisions of the Convention and those annexed Protocols to which Israel has agreed [I, II and III] become bound to all armed conflicts involving regular forces of States referred to in article 2 common to the Geneva Conventions of 12 August 1949, as well as to all armed conflicts referred to in article 3 common to the Geneva Conventions of 12 August 1949 [international and non-international armed conflicts].³

Israel also declared that “with respect to [the 1980] Protocol I [to the CCW], it is the understanding of the Government of Israel that the use of plastics or

² France, Reservations made upon ratification of the CCW, 4 March 1988.

³ Israel, Declarations and understandings made upon accession to the CCW, 22 March 1995, § (a).

similar materials for detonators or other weapon parts not designed to cause injury is not prohibited".⁴

5. Upon ratification of the 1980 CCW, the US declared that:

with reference to the scope of application defined in article 1 of the Convention, that the United States will apply the provisions of the Convention, Protocol I, and Protocol II to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions for the Protection of War Victims of August 12, 1949 [international and non-international armed conflicts].⁵

6. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.
3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

Other Instruments

7. Section 6.2 of the 1999 UN Secretary-General's Bulletin provides that "the use of certain conventional weapons, such as non-detectable fragments, ... is prohibited".

II. National Practice

Military Manuals

8. Argentina's Law of War Manual provides that it is prohibited "to use any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-ray".⁶

9. Australia's Commanders' Guide states that "munitions which produce fragments undetectable by X-ray machines, such as glass, are prohibited based upon the principle of unnecessary suffering".⁷ It provides that the use of "weapons which injure by fragments which, in the human body, escape detection by

⁴ Israel, Declarations and understandings made upon accession to the CCW, 22 March 1995, § (b).

⁵ US, Declaration made upon ratification of the CCW, 24 March 1995.

⁶ Argentina, *Law of War Manual* (1989), § 4.16.

⁷ Australia, *Commanders' Guide* (1994), § 308.

X-rays" is prohibited.⁸ The guide also states that these weapons are included in those which "are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law, are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering."⁹

10. Australia's Defence Force Manual states that "weapons which cause injury by the use of fragments which are undetectable by X-ray in the human body are prohibited".¹⁰ It also states that these weapons are included in those which "are totally prohibited. These blanket prohibitions, which may be traced to treaty or customary international law, are justified on the grounds that the subject weapons are either indiscriminate in their effect or cause unnecessary suffering."¹¹

11. Belgium's Law of War Manual states that "the use of any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-ray is prohibited".¹²

12. Canada's LOAC Manual provides that "weapons that cause injury by the use of fragments undetectable by X-ray in the human body are prohibited".¹³

13. Ecuador's Naval Manual states that "the incorporation in the ammunition of materials which are difficult to detect or undetectable by X-ray equipment, such as glass or clear plastic, is prohibited, since they unnecessarily inhibit the treatment of wounds".¹⁴

14. France's LOAC Teaching Note includes weapons that injure by non-detectable fragments in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁵

15. France's LOAC Manual includes weapons that injure by non-detectable fragments in the list of weapons that "are totally prohibited by the law of armed conflict" because of their inhuman and indiscriminate character.¹⁶

16. Germany's Military Manual prohibits the use of "any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-rays".¹⁷

17. Germany's IHL Manual states that:

International humanitarian law prohibits the use of a number of means of warfare, which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g. . . . weapons whose primary effect is to injure by fragments

⁸ Australia, *Commanders' Guide* (1994), § 932(d).

⁹ Australia, *Commanders' Guide* (1994), § 304.

which in the human body escape detection by X-rays, e.g. plastic or glass ammunition.¹⁸

18. Israel's Manual on the Laws of War states, regarding the use of weapons that injure by non-detectable fragments, that "the resultant injury is far in excess of what is required, hence forbidden".¹⁹

19. Italy's IHL Manual states that "it is specifically prohibited...to use...bullets radiologically invisible."²⁰

20. Kenya's LOAC Manual states that "the use of any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-ray is prohibited."²¹

21. The Military Manual of the Netherlands provides that:

Weapons whose primary effect is to cause wounds by means of elements (splinters or fragments) which cannot be detected by X-rays in the human body are prohibited...

The meaning of this prohibition, however, is limited. It is in fact what remains of attempts to get a prohibition for more categories of explosive ammunition, such as projectiles with pre-fragmented jacket, or filled with very small bullets (pellets) or with needle-like objects (fléchettes). These kinds of ammunition are not prohibited; in essence they do not differ from long existing and widely used high explosive shells.²²

22. New Zealand's Military Manual prohibits the use of "weapons the primary effect of which is to injure by fragments which in the human body escape detection by X-rays".²³

23. Nigeria's Manual on the Laws of War states that "it is expressly forbidden to use...projectiles with broken glass".²⁴

24. Russia's Military Manual prohibits the use of weapons that may cause superfluous injury or suffering and refers to the 1980 Protocol I to the CCW.²⁵

25. South Africa's LOAC Manual states that "weapons which are calculated to cause unnecessary suffering are illegal per se. Such weapons include...weapons filled with glass."²⁶

26. Spain's LOAC Manual imposes an "absolute prohibition on the use of...weapons the primary effect of which is to injure by fragments which in the human body escape detection by X-rays".²⁷

27. Sweden's IHL Manual states that "[the 1980] Protocol I to the CCW relates to certain fragmentation weapons. The Protocol forbids the use of weapons

whose primary effect is to injure by fragments which cannot be detected by X-raying the injured person.”²⁸

28. Under Switzerland’s Basic Military Manual, “it is prohibited to use weapons the primary effect of which is the formation of fragments non-detectable in the human body by X-rays”.²⁹

29. The UK Military Manual prohibits the use of projectiles filled with broken glass.³⁰

30. The UK LOAC Manual, under the heading “Future Developments”, considers the possibility, thanks to the 1980 CCW, of “a ban on weapons whose main purpose is to produce fragments that cannot be detected by X-ray”.³¹

31. The US Air Force Pamphlet states that “usage and practice has also determined that it is *per se* illegal to use projectiles filled with glass or other materials inherently difficult to detect medically”.³²

32. The US Air Force Commander’s Handbook states that “using clear glass as the injuring mechanism in an explosive projectile or bomb is prohibited, since glass is difficult for surgeons to detect in a wound and impedes treatment”.³³

33. The US Instructor’s Guide states that the principle of unnecessary suffering “outlawed the use of . . . projectiles filled with glass”.³⁴

34. The US Naval Handbook provides that “using materials that are difficult to detect or undetectable by field x-ray equipment, such as glass or clear plastic, as the injuring mechanism in military ammunition is prohibited, since they unnecessarily inhibit the treatment of wounds”.³⁵

National Legislation

35. Under Estonia’s Penal Code, “use of . . . weapons injuring by fragments invisible by X-ray” is a war crime.³⁶

36. Under Hungary’s Criminal Code as amended, employing “weapons causing injury by fragments which cannot be detected by X-ray” as defined in the 1980 Protocol I to the CCW is a war crime.³⁷

National Case-law

37. No practice was found.

Other National Practice

38. In 1977, in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Austria, Colombia, Denmark, Mexico, Norway, Spain, Sweden, Switzerland and SFRY presented a draft article for AP I stipulating that “it

is prohibited to use any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-rays".³⁸ The proposal received support from FRG, US and Venezuela.³⁹

39. During the CCW preparatory conference in 1979, Australia, Austria, Belarus, Belgium, Bulgaria, Canada, Cuba, Denmark, Finland, France, FRG, GDR, Greece, Hungary, Ireland, Italy, Jamaica, Mexico, Morocco, Netherlands, New Zealand, Norway, Panama, Philippines, Poland, Portugal, Romania, Spain, Sudan, Sweden, Switzerland, Syria, Togo, Ukraine, USSR, UK, US, Venezuela, SFRY and Zaire unanimously sponsored a proposal on the prohibition of weapons that primarily injure by non-detectable fragments, identical to the earlier consensus proposal.⁴⁰

40. At the First Review Conference of States Parties to the CCW in 1995, Australia stated that "the restrictions laid down in the Convention regarding the use of . . . weapons which injured by non-detectable fragments were strong and clear".⁴¹

41. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, India indicated that it "fully supported the idea of expanding the scope of the CCW to cover armed internal conflicts".⁴²

42. According to the Report on the Practice of India, in India there is "a ban and restriction on the use of . . . weapons primarily wounding by non-detectable fragments".⁴³

43. Referring to an interview with the Director of Nuclear, Biological and Chemical Weapons Division of the Indonesian Armed Forces, the Report on the Practice of Indonesia affirms that Indonesia prohibits the use of weapons primarily injuring by non-detectable fragments.⁴⁴

44. According to the Report on the Practice of Jordan, Jordan does not use, manufacture or stockpile weapons primarily wounding by non-detectable

³⁸ Austria, Colombia, Denmark, Mexico, Norway, Spain, Sweden, Switzerland and SFRY, Draft article entitled "Non-detectable fragments" submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/408/Rev.1, 17 March–10 June 1977, p. 539.

fragments and it has no intention of possessing nor of using such weapons in the future.⁴⁵

45. In 1992, during a debate in the First Committee of the UN General Assembly, the Netherlands implied that universal adherence to the 1980 CCW would give it effect in internal conflicts.⁴⁶

46. In 1979, in a legal review of the Maverick Alternate Warhead, the US Department of the Air Force stated that "it is generally accepted... that... only weapons designed to injure through non detectable fragments would be prohibited. Incidental effects arising from the use of a few plastic parts in a munition would still be considered lawful."⁴⁷

III. Practice of International Organisations and Conferences

United Nations

47. In a resolution adopted in 1980, the UN General Assembly welcomed the successful conclusion of the 1980 CCW and its Protocols and commended the Convention and the three annexed Protocols to all States "with a view to achieving the widest possible adherence to these instruments".⁴⁸

48. In numerous resolutions adopted between 1981 and 1998, the UN General Assembly urged all States that had not done so to accede to the 1980 CCW and its Protocols.⁴⁹

Other International Organisations

49. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe invited,

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

...

- b. ratify, if they have not done so, ... the United Nations Convention of 1980 on the prohibitions or restrictions on the use of certain conventional weapons and its protocols ...

...

- j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.⁵⁰

50. In a resolution adopted in 1994 on respect for IHL and support for humanitarian action in armed conflicts, the OAU Council of Ministers invited “all States that have not yet become party to the...[1980] CCW, to consider, or reconsider, without delay the possibility of doing so in the near future”.⁵¹

51. In two resolutions adopted in 1994 and 1996 on respect for IHL, the OAS General Assembly urged member States to accede to the 1980 CCW.⁵²

International Conferences

52. In 1976, the Rapporteur of the Working Group of the Ad Hoc Committee on Conventional Weapons established by the CDDH noted that “there had been agreement on the proposal” to prohibit the use of any weapon the primary effect of which is to injure by fragments non-detectable by X-ray.⁵³

IV. Practice of International Judicial and Quasi-judicial Bodies

53. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

54. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that “the use of any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-rays is prohibited”.⁵⁴

VI. Other Practice

55. No practice was found.

BOOBY-TRAPS

Booby-Traps (practice relating to Rule 80)

§§ 1–100

Booby-Traps*I. Treaties and Other Instruments**Treaties*

1. Article 2(2) of the 1980 Protocol II to the CCW and Article 2(4) of the 1996 Amended Protocol II to the CCW define a booby-trap as “any device or material which is designed, constructed or adapted to kill or injure, and which functions unexpectedly when a person disturbs or approaches an apparently harmless object or performs an apparently safe act”.

2. Article 4 of the 1980 Protocol II to the CCW provides that:

1. This Article applies to:

...
(b) booby-traps; ...

2. It is prohibited to use weapons to which this Article applies in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either: (a) they are placed on or in the close vicinity of a military objective belonging to or under the control of an adverse party; or (b) measures are taken to protect civilians from their effects, for example, the posting of warning signs, the posting of sentries, the issue of warnings or the provision of fences.

3. Article 6(2) of the 1980 Protocol II to the CCW and Article 3(3) of the 1996 Amended Protocol II to the CCW prohibit the use of booby-traps which are designed to cause or of a nature to cause superfluous injury or unnecessary suffering.

4. Article 3(4) of the 1980 Protocol II to the CCW and Article 3(10) of the 1996 Amended Protocol II to the CCW provide that:

All feasible precautions shall be taken to protect civilians from the effects of weapons to which this Article applies. Feasible precautions are those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.

Article 3(10) of the Protocol adds that:

These circumstances include, but are not limited to:

- ...
- (b) possible measures to protect civilians (for example, fencing, signs, warning and monitoring);
 - (c) the availability and feasibility of using alternatives.

Article 3(11) provides that "effective advance warning shall be given of any emplacement of... booby-traps... which may affect the civilian population, unless circumstances do not permit".

5. Article 6(1)(b) of the 1980 Protocol II to the CCW and Article 7(1) of the 1996 Amended Protocol II to the CCW list the categories of booby-traps that are banned. They provide that it is prohibited in all circumstances to use booby-traps and other devices which are in any way attached to or associated with:

- (a) internationally recognized protective emblems, signs or signals;
- (b) sick, wounded or dead persons;
- (c) burial or cremation sites or graves;
- (d) medical facilities, medical equipment, medical supplies or medical transportation;
- (e) children's toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children;
- (f) food or drink;
- (g) kitchen utensils or appliances except in military establishments, military locations or military supply depots;
- (h) objects clearly of a religious nature;
- (i) historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; or
- (j) animals or their carcasses.

6. Article 6(1)(a) of the 1980 Protocol II to the CCW and Article 7(2) of the 1996 Amended Protocol II to the CCW provide that "it is prohibited to use booby-traps or other devices in the form of apparently harmless portable objects which are specifically designed and constructed to contain explosive material".

7. Articles 7 and 9 of the 1980 Protocol II to the CCW and Articles 9 and 10 of the 1996 Amended Protocol II to the CCW contain detailed provisions on the recording and use of information on booby-traps and on the removal of booby-traps.

8. Upon signature of the 1980 CCW, China stated that:

The Protocol [to the CCW] on Prohibitions or Restrictions on the Use of Mines, Booby Traps and Other Devices fails to lay down strict restrictions on the use of such weapons by the aggressor on the territory of his victim and to provide

adequately for the right of a state victim of an aggressor to defend itself by all necessary means.¹

9. Upon ratification of the 1980 CCW, France stated that:

With reference to the scope of application defined in article 1 of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, . . . it will apply the provisions of the Convention and its three Protocols [I, II and III] to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions of 12 August 1949.²

10. Upon accession to the 1980 CCW, Israel stated that:

With reference to the scope of application defined in article 1 of the Convention, the Government of the State of Israel will apply the provisions of the Convention and those annexed Protocols to which Israel has agreed [I, II and III] to become bound to all armed conflicts involving regular forces of States referred to in article 2 common to the Geneva Conventions of 12 August 1949, as well as to all armed conflicts referred to in article 3 common to the Geneva Conventions of 12 August 1949.³

11. Upon ratification of the 1980 CCW, the US declared that:

With reference to the scope of application defined in article 1 of the Convention, . . . the United States will apply the provisions of the Convention, Protocol I, and Protocol II to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions for the Protection of War Victims of August 12, 1949.⁴

12. Upon ratification of the 1980 CCW, the US stated that "the United States understands that article 6(1) of the Protocol II [to the CCW] does not prohibit the adaptation for use as booby-traps of portable objects created for a purpose other than as a booby-trap if the adaptation does not violate paragraph (1)(b) of the article".⁵

13. Article 3(2) of the 1996 Amended Protocol II to the CCW provides that:

Each High Contracting Party or party to a conflict is, in accordance with the provisions of this Protocol, responsible for all . . . booby-traps . . . employed by it and undertakes to clear, remove, destroy or maintain them as specified in Article 10 of this Protocol.

14. Article 3(5) of the 1996 Amended Protocol II to the CCW prohibits the use of booby-traps that are designed to detonate "by the presence of commonly available mine detectors".

¹ China, Declaration made upon signature of the CCW, 14 September 1981, § 3.

² France, Reservations made upon ratification of the CCW, 4 March 1988.

³ Israel, Declarations and understandings made upon accession to the CCW, 22 March 1995, § (a).

⁴ US, Declaration made upon ratification of the CCW, 24 March 1995.

⁵ US, Statements of understanding made upon ratification of the CCW, 24 March 1995.

15. Article 7(3) of the 1996 Amended Protocol II to the CCW provides that:

3. Without prejudice to the provisions of Article 3, it is prohibited to use weapons to which this Article applies in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either:
 - a) they are placed on or in the close vicinity of a military objective; or
 - b) measures are taken to protect civilians from their effects, for example, the posting of warning sentries, the issuing of warnings or the provision of fences.

16. Article 1(2) of the 1996 Amended Protocol II to the CCW provides that:

This Protocol shall apply, in addition to situations referred to in Article I of this Convention, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.

17. Upon acceptance of the 1996 Amended Protocol II to the CCW, Austria, Denmark, Finland, France, Germany, Ireland, Italy, South Africa and Sweden stated that "the provisions of the amended Protocol which by their contents or nature may be applied also in peacetime, shall be observed at all times".⁶

18. Upon acceptance of the 1996 Amended Protocol II to the CCW, Belgium declared that "the provisions of Protocol II as amended which by their contents or nature may be applied also in peacetime, shall be observed at all times".⁷

19. Upon acceptance of the 1996 Amended Protocol II to the CCW, Canada stated that "it is understood that the provisions of Amended Protocol II shall, as the context requires, be observed at all times".⁸

20. Upon acceptance of the 1996 Amended Protocol II to the CCW, Greece declared that "it is understood that the provisions of the protocol shall, as the context requires, be observed at all times".⁹

⁶ Austria, Declaration made upon acceptance of Amended Protocol II to the CCW, 27 July 1998; Denmark, Declaration made upon acceptance of Amended Protocol II to the CCW, 30 April 1997; Finland, Declaration made upon acceptance of Amended Protocol II to the CCW, 3 April 1998; France, Declarations made upon acceptance of Amended Protocol II to the CCW, 23 July 1998; Germany, Declarations made upon acceptance of Amended Protocol II to the CCW, 2 May 1997; Ireland, Declaration made upon acceptance of Amended Protocol II to the CCW, 27 March 1997; Italy, Declarations made upon acceptance of Amended Protocol II to the CCW, 13 January 1999; South Africa, Declaration made upon acceptance of Amended Protocol II to the CCW, 26 June 1998; Sweden, Declaration made upon acceptance of Amended Protocol II to the CCW, 16 July 1997.

⁷ Belgium, Interpretative declarations made upon acceptance of Amended Protocol II to the CCW, 10 March 1999.

⁸ Canada, Statements of understanding made upon acceptance of Amended Protocol II to the CCW, 26 June 1998, § 1.

⁹ Greece, Declarations made upon acceptance of Amended Protocol II to the CCW, 20 January 1999.

21. Upon acceptance of the 1996 Amended Protocol II to the CCW, Liechtenstein stated that “the provisions of the amended Protocol II which by their contents or nature may also be applied in peacetime, shall be observed at all times”.¹⁰

22. Upon acceptance of the 1996 Amended Protocol II to the CCW, the Netherlands declared that “the provisions of the Protocol which, given their content or nature, can also be applied in peacetime, must be observed in all circumstances”.¹¹

23. Upon acceptance of the 1996 Amended Protocol II to the CCW, Pakistan stated that “the provisions of the Protocol must be observed at all times, depending on the circumstances”.¹²

24. Upon acceptance of the 1996 Amended Protocol II to the CCW, the US declared that:

- (A) the prohibition contained in Article 7(2) of the Amended Mines Protocol [1996 Amended Protocol II to the CCW] does not preclude the expedient adaptation or adaptation in advance of other objects for use as booby-traps or other devices;
- (B) a trip-wired hand grenade shall be considered a “booby-trap” under Article 2(4) of the Amended Mines Protocol and shall not be considered a “mine” or an “anti-personnel mine” under Article 2(1) or Article 2(3), respectively; and
- (C) none of the provisions of the Amended Mines Protocol, including Article 2(5), applies to hand grenade other than trip-wired hand grenades.¹³

25. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article 1 of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.
3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

¹¹ Netherlands, Declaration made upon acceptance of Amended Protocol II to the CCW, 25 March 1999, § 1.

¹² Pakistan, Declarations made upon acceptance of Amended Protocol II to the CCW, 9 March 1999, § 3.

¹³ US, Statements of understanding made upon acceptance of Amended Protocol II to the CCW, 24 May 1999, § (6)(A)–(C).

Other Instruments

26. Paragraph 6 of the 1991 Memorandum of Understanding on the Application of IHL between Croatia and the SFRY requires that hostilities be conducted in accordance with the 1980 Protocol II to the CCW.

27. Paragraph 2.5 of the 1992 Agreement on the Application of IHL between the Parties to the Conflict in Bosnia and Herzegovina requires that hostilities be conducted in accordance with the 1980 Protocol II to the CCW.

28. Section 6.2 of the 1999 UN Secretary-General's Bulletin states that the UN force is prohibited from using certain conventional weapons, such as booby-traps.

*II. National Practice**Military Manuals*

29. Argentina's Law of War Manual reproduces the content of Articles 2(2) and (4), 3, 4, 6 and 7 of the 1980 Protocol II to the CCW.¹⁴

30. Australia's Commanders' Guide states that "the primary concern with the employment of . . . booby traps is that they could be disturbed by innocent parties. Their use is permitted if they can be confined to areas where only lawful combatants would encounter them."¹⁵ It also states that:

Booby traps . . . may not be directed against civilians under any circumstances and they may not be used indiscriminately. Indiscriminate use is placement of such weapons which:

- a. is not on, or directed at, a military objective; or
- b. employs a method or means of delivery which cannot be directed at a specific military objective; or
- c. may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.¹⁶

The Guide adds that:

There are also restrictions on the use of . . . booby traps . . . These weapons may not be used in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either:

- (a) they are placed on or in the vicinity of a military objective belonging to or under the control of an enemy; or
- (b) measures are taken to protect civilians from their effects, e.g. posting of warning signs or sentries, issue of warnings or provision of fences.¹⁷

¹⁴ Argentina, *Law of War Manual* (1989), §§ 4.17, 4.18, 4.19, 4.20, 4.21, 4.23 and 4.24(2).

¹⁵ Australia, *Commanders' Guide* (1994), § 316.

¹⁶ Australia, *Commanders' Guide* (1994), § 937.

¹⁷ Australia, *Commanders' Guide* (1994), § 939.

The Guide further states that:

941. The use of the following types of booby traps is prohibited:
- a. any booby traps in the form of an apparently harmless portable object which is specifically designed and constructed (prefabricated) to contain explosive material and to detonate when it is disturbed or approached or,
 - b. booby traps which are in any way attached to or associated with:
 - (1) internationally recognized protective emblems and signs or signals;
 - (2) sick, wounded or dead persons;
 - (3) burial or cremation sites or graves;
 - (4) medical facilities, medical equipment, medical supplies or medical transportation;
 - (5) children's toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children;
 - (6) food or drink;
 - (7) kitchen utensils or appliances except in military establishment, military locations or military supply depots;
 - (8) objects clearly of a religious nature;
 - (9) historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; and
 - (10) animals or their carcasses.

942. The location of . . . areas where there is use of booby traps is to be recorded.¹⁸

31. Australia's Defence Force Manual states that:

All feasible precautions must be taken to protect civilians from the effects of . . . booby traps . . . They must not be directed at civilians nor may they be used indiscriminately. It is indiscriminate to place them so that they are not on or not directed at a military objective, to use them as a means of delivery which cannot be directed at a military target, or to place them so that they may be expected to cause excessive collateral damage, that is injury, loss or damage to civilians which is excessive in relation to the concrete and direct military advantage anticipated.¹⁹

The manual further repeats the prohibitions contained in Article 6 of the 1980 Protocol II to the CCW.²⁰ It adds that "when booby-traps are not prohibited, those that are used must not be designed to cause unnecessary injury or suffering".²¹ It also emphasises that "all feasible precautions must be taken to protect civilians from the effects of . . . booby-traps . . . They must not be directed at civilians nor may they be used indiscriminately." The manual further states that:

Booby traps . . . must not be used in areas containing civilian concentrations if combat between ground forces is neither imminent nor actually taking place unless they are placed on, or in the vicinity, of an enemy military objective or there are

¹⁸ Australia, *Commanders' Guide* (1994), §§ 941 and 942.

¹⁹ Australia, *Defence Force Manual* (1994), § 421.

²⁰ Australia, *Defence Force Manual* (1994), § 427.

²¹ Australia, *Defence Force Manual* (1994), § 428.

protective measures for civilians such as warning signs, sentries, fences or other warnings to civilians.²²

Lastly, the manual provides that “the location of . . . areas in which there has been large scale and pre-planned use of booby-traps must be recorded. A record should also be kept of all other . . . booby traps so that they may be disarmed when they are no longer required.”²³

32. Belgium’s Law of War Manual, under the heading “Mines and traps (booby traps)”, states that they “must only be used against military objectives”. It further states that:

Traps looking like portable inoffensive objects are prohibited.

It is also prohibited to attach traps to or associate them with:

- 1) internationally recognised protective emblems, signs or signals;
- 2) sick, wounded or dead persons;
- 3) burial sites;
- 4) medical material, medical installations etc.;
- 5) children’s toys, children’s food and children’s clothes;
- 6) food or drink;
- 7) kitchen utensils or appliances except in military establishments.²⁴

33. Bosnia and Herzegovina’s Military Instructions states that “all means and methods of warfare are allowed, except for the ones which are prohibited or restricted by the international law of war”.²⁵

34. Cameroon’s Instructors’ Manual provides that it is prohibited to use booby-traps of a nature to cause superfluous injuries (1980 Protocol II to the CCW, Article 6(2)), such as “perforation, impaling, crushing, poisoning, strangulation”. It also prohibits the use of booby-traps in the form of apparently harmless portable objects for daily use, such as food, or those associated with the sick, wounded or dead.²⁶

35. Canada’s Rules of Engagement for Operation Deliverance states that “unattended means of force, including booby traps . . . are not authorised”.²⁷

36. Canada’s LOAC Manual states that “explosive booby-traps are not to be employed as, or used as, a substitute for antipersonnel mines. Where booby-traps are lawfully used, they must not cause unnecessary injury or suffering.”²⁸ The manual provides an exhaustive list of prohibited objects to which booby-traps must not be attached. It states that:

Booby traps and other devices, attached to or associated with the following objects, are prohibited:

²² Australia, *Defence Force Manual* (1994), §§ 421 and 422.

²³ Australia, *Defence Force Manual* (1994), § 423.

²⁴ Belgium, *Law of War Manual* (1983), pp. 38–39.

²⁵ Bosnia and Herzegovina, *Military Instructions* (1992), Item 5, § 1.

²⁶ Cameroon, *Instructors’ Manual* (1992), p. 123, § 441.1(c).

²⁷ Canada, *Rules of Engagement for Operation Deliverance* (1992), § 28.

²⁸ Canada, *LOAC Manual* (1999), p. 5-4, § 40.

- (a) internationally recognized protective emblems and signs;
- (b) sick, wounded or dead persons;
- (c) burial or cremation sites or graves;
- (d) medical facilities, equipment, supplies or transportation;
- (e) children's toys or objects designed for feeding, health, hygiene, clothing or education of children;
- (f) food or drink;
- (g) kitchen utensils or appliances (except those in military establishment, locations or supply depots);
- (h) objects of a religious nature;
- (i) historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; or
- (j) animals or their carcasses.²⁹

The manual adds that: "it is prohibited to use booby-traps . . . in the form of apparently harmless portable objects which are specifically designed and construed to contain explosive material".³⁰ It also lists some restrictive rules about the use of booby-traps:

All feasible precautions must be taken to protect civilians from the effects of . . . booby traps. They must not be directed at civilians nor may they be used indiscriminately. It is indiscriminate to:

- (a) place . . . booby traps so that they are not on or not directed at a legitimate target;
- (b) use a means of delivery for . . . booby traps that cannot be directed at a legitimate target; and
- (c) place . . . booby traps so that they may be expected to cause collateral civilian damage that is excessive in relation to the concrete and direct military advantage anticipated.³¹

The manual further states that:

Booby traps . . . must not be used in areas containing civilian concentrations if combat between ground forces is neither imminent nor actually taking place unless: (a) they are placed on, or in the vicinity of, an enemy military objective; or (b) measures are taken to protect civilians (e.g. warning signs, sentries, fences or other warnings to civilians).³²

According to the manual, "the location of . . . areas in which there has been large scale and pre-planned use of booby traps must be recorded. A record should also be kept of all other . . . booby traps so that they may be disarmed when they are no longer required."³³ Lastly, the manual states that:

It is prohibited to use . . . booby traps that employ a mechanism or device specifically designed to detonate the munition by the presence of commonly available mine detectors as a result of their magnetic or other non-contact influence during normal use in detection operations.³⁴

²⁹ Canada, *LOAC Manual* (1999), p. 5-4, § 38.

³² Canada, *LOAC Manual* (1999), p. 5-5, § 45.

³⁴ Canada, *LOAC Manual* (1999), p. 5-5, § 47.

37. Canada's Code of Conduct provides that "booby traps are lawful but can only be used in very limited circumstances, and in particular must be directed only at military objectives".³⁵

38. Ecuador's Naval Manual states that:

Booby traps...are not unlawful, provided they are not designed to cause unnecessary suffering. Devices that are designed to simulate items likely to attract and injure non-combatants...are prohibited. Attaching booby traps to protected persons or objects, such as the wounded and sick, dead bodies, or medical facilities and supplies, is similarly prohibited.³⁶

39. France's LOAC Summary Note prohibits the use of booby-traps which are associated with: wounded and dead persons; protective emblems, signs or signals; toys or other objects designed for children; food or drink; objects clearly of a religious nature; works of art; and animals or their carcasses.³⁷

40. France's LOAC Teaching Note provides that "the use of booby-traps is permitted only on condition that they are laid outside areas where civilians are concentrated and that they are directed against military targets"³⁸

41. France's LOAC Manual quotes Articles 2(2) and 6 of the 1980 Protocol II to the CCW and specifies that "the use of booby-traps is permitted only on condition that they are laid outside areas where civilians are concentrated and that they are directed against military targets".³⁹

42. Germany's Military Manual states that "it is prohibited in all circumstances to use any booby-traps in the form of an apparently harmless portable object" and refers to the 1980 Protocol II to the CCW. It also prohibits:

booby-traps which are in any way attached to or associated with internationally recognized protective emblems, signs or signals, sick, wounded or dead persons, burial or cremation sites or graves, medical facilities, medical transportation, medical equipment or medical supplies, food or drink, objects of a religious nature, cultural objects and children's toys, and all other objects related to children, animals or their carcasses.

The manual further prohibits the use of "booby-traps designed to cause superfluous injury or unnecessary suffering", again with reference to the 1980 Protocol II to the CCW.⁴⁰ It adds that "this prohibition does not apply to fixed demolition appliances and portable demolition devices lacking harmless appearances".⁴¹ The manual further provides that "the location of... booby-traps shall be recorded: the parties to the conflict shall retain these records and whenever possible, by mutual agreement, provide for their publication".⁴²

³⁵ Canada, *Code of Conduct* (2001), Rule 3, § 7.

³⁶ Ecuador, *Naval Manual* (1989), § 9.5.

³⁷ France, *LOAC Summary Note* (1992), § 4.6.

³⁸ France, *LOAC Teaching Note* (2000), p. 6.

³⁹ France, *LOAC Manual* (2001), pp. 96 and 55.

⁴⁰ Germany, *Military Manual* (1992), § 415.

⁴¹ Germany, *Military Manual* (1992), § 416.

⁴² Germany, *Military Manual* (1992), § 417.

43. Germany's IHL Manual states that:

International humanitarian law prohibits the use of a number of means of warfare which are of a nature to violate the principle of humanity and to cause unnecessary suffering, e.g. . . . explosive traps, when used in the form of an apparently harmless portable object, e.g. disguised as children's toys.⁴³

44. Israel's Manual on the Laws of War states that "within the framework of the [1980] CCW Convention, it was decided to prohibit the exposure of the civilian population to booby traps and booby-trapped objects". It adds that:

The Protocol enumerates the objects and places where booby-trapping is severely and absolutely forbidden:

1. Innocent-looking objects (transistors, televisions)
2. Objects bearing international protection signs (a cross, crescent or red Magen David, U.N. emblems, etc.) or tied to them
3. Wounded, sick or dead, as well as interment or cremation sites. The booby trapping of the wounded or dead conflicts with the duty prescribed by the laws of war to administer treatment to the wounded and to see to the proper interment of the dead. Therefore, it was also prohibited to abuse the special treatment accorded them.
4. Hospitals, clinics, medical equipment, medical transports
5. Objects connected with children (toys, clothes, food, care utensils etc.)
6. Food, drink, eating utensils (except for eating utensils and preparation equipment in army facilities)
7. Objects connected with religious ritual
8. Historical sites, objets d'art or ritual articles, constituting the cultural or religious heritage of a people
9. Animals and their carcasses

In any event, the laws of war ban the use of a booby-trap designed to cause needless damage and suffering (also in cases where it is permitted to use booby traps against combatants).⁴⁴

45. Kenya's LOAC Manual prohibits the use of booby-traps which are:

in any way attached to or associated with internationally recognised protective emblems, signs or signals; sick, wounded or dead persons; burial or cremation sites or graves; medical facilities, medical equipment, medical supplies or medical transportation; children's toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children; food or drinks; kitchen utensils or appliances except in military establishments, military locations or military supply depots; objects clearly of a religious nature; historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; animals or their carcasses.

The manual further provides that booby-traps and other devices may only be used (except those quoted previously) in populated areas "when they are placed on or in the close vicinity of a military objective belonging to or under the

⁴³ Germany, *IHL Manual* (1996), § 305.

⁴⁴ Israel, *Manual on the Laws of War* (1998), pp. 15–16.

control of the enemy; or when measures are taken to protect civilian persons (e.g. warning signs, sentries, issue of warnings, provision of fences)". Lastly, it states that "the location shall be recorded of: . . . areas where large scale and pre-planned use is made of booby-traps, other . . . booby-traps, when the tactical situation permits".⁴⁵

46. The Military Manual of the Netherlands cites the prohibitions contained in Article 6 of the 1980 Protocol II to the CCW.⁴⁶

47. New Zealand's Military Manual restricts the use of booby-traps. It refers expressly to and reproduces the content of Articles 3, 4, 5 and 6 of the 1980 Protocol II to the CCW. It adds that "all feasible efforts will be made to record the location of all areas where there is a large-scale use of booby-traps".⁴⁷

48. Russia's Military Manual prohibits the use of weapons that are by nature indiscriminate. It refers to the 1980 Protocol II to the CCW.⁴⁸

49. South Africa's LOAC Manual does not prohibit booby-traps as such. It does, however, state that the main concern is whether indiscriminate use endangers the civilian population. When employing booby-traps, it says, the military must therefore consider what or who is the likely target.⁴⁹

50. Spain's LOAC Manual makes reference to Articles 3, 6 and 7 of the 1980 Protocol II to the CCW as the principal body of law concerning the restriction and prohibition of the use of booby-traps.⁵⁰ It also states that:

Independent of the type of target, its location, the kind of military operation, the given mission or any other circumstances, it is prohibited to use this type of weapon [i.e., among others, booby traps] . . . wherever its location is indiscriminate . . . wherever it cannot be guided towards a specific military target and wherever there is reason to believe that it will cause disproportionate collateral damage.⁵¹

51. Sweden's IHL Manual states that booby-traps cannot be "used against civilian populations or individual civilians, which is in full agreement with AP I (Art. 51)". It adds that "should it be necessary to use booby-traps against objectives within populated areas, special restrictions on delivery exist to protect the civilian population". It stresses that:

During the conflicts of recent years it has been possible to discern an increasing use of booby-traps. It has become common to use booby-traps even against persons and objects already afforded protection under earlier conventions. . . . This has led an increased terror effect in warfare, but with little or no military significance.

⁴⁸ Russia, *Military Manual* (1990), § 6(h).

⁴⁹ South Africa, *LOAC Manual* (1996), Article 34(f)(iv).

⁵⁰ Spain, *LOAC Manual* (1996), §§ 2.4.c.(2) and 3.2.a.(4).

⁵¹ Spain, *LOAC Manual* (1996), § 3.2.a.(3).

The manual refers to Articles 6 and 7 of the 1980 Protocol II to the CCW.⁵²

52. Switzerland's Military Manual states that "it is prohibited to use a booby-trap which functions unexpectedly when one moves or touches an apparently harmless object".⁵³

53. Switzerland's Basic Military Manual states that:

It is forbidden to use booby-traps wherever they can be expected directly to endanger the physical integrity and the lives of civilians. They must not be set up in a perfidious manner, that is be attached or connected in some way to protective signs or signals, protected persons, animals, food or protected installations.

It refers to the 1980 Protocol II to the CCW.⁵⁴

54. Switzerland's Teaching Manual provides that "it is prohibited to use booby-traps which can be triggered unexpectedly". It gives the example of a transistor radio.⁵⁵

55. The UK LOAC Manual, under the heading "Future Developments", considers the possibility of a treaty imposing "restrictions on the use of booby-traps".⁵⁶

56. The US Air Force Pamphlet states that:

Mines in the nature of booby-traps are frequently unlawfully used, such as when they are attached to objects under the protection of international law, e.g., wounded and sick, dead bodies and medical facilities. Also objectionable are portable booby traps in the form of fountain pens, watches and trinkets which suggest treachery and unfairly risk injuries to civilians likely to be attracted to the objects.⁵⁷

57. The US Rules of Engagement for Operation Desert Storm states that "booby traps may be used to protect friendly positions or to impede the progress of enemy forces. They may not be used on civilian personal property. They will be recovered or destroyed when the military necessity for their use no longer exists."⁵⁸

58. The US Naval Handbook states that:

Booby traps... are not unlawful, provided they are not designed to cause unnecessary suffering or employed in an indiscriminate manner... Attaching booby traps to protected persons or objects, such as the wounded and sick, dead bodies, or medical facilities and supplies, is similarly prohibited. Belligerents are required to record the location of booby traps... in the same manner as land mines.⁵⁹

⁵⁸ US, *Rules of Engagement for Operation Desert Storm* (1991), § E.

⁵⁹ US, *Naval Handbook* (1995), § 9.6.

National Legislation

59. Under Estonia's Penal Code, "use of... booby-traps, i.e. explosives disguised as small harmless objects" is a war crime.⁶⁰

60. Under Hungary's Criminal Code as amended, employing "booby-traps" as defined in Article 2 of the 1980 Protocol II to the CCW is a war crime.⁶¹

61. South Korea's Conventional Weapons Act provides that:

No one is allowed to use or transfer a weapon that falls under any of the following categories:

- (1) ... booby-traps... made to detonate resulting from the magnetism of a mine-destruction device or other cause without physical contact of person or device during detection operation with standard mine detection devices available in Korea.⁶²

The Act further prohibits the use of certain booby-traps:

which are attached to or associated with the following persons, things, or places:

1. Emblems, signs or signals protected under international laws including military flags, Red Cross emblems, civilian protective force emblems,
2. Sick, wounded or dead persons,
3. Cremation or burial sites or graves,
4. Medical facilities, medical equipment, medical supplies or medical transportation,
5. Children's toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children,
6. Food or drink,
7. Kitchen utensils or appliances not in the military unit, base or supply depot facilities,
8. Objects obviously used for religious purposes,
9. Historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of human beings, or
10. Animals or their carcasses.⁶³

The Act also provides that the "commander of the military unit that emplaces... booby-traps... must take all necessary measures including advance warning so as to prevent damage to the life, body, and property of the civilians residing in vicinity".⁶⁴ Lastly, it adds that:

1. The commander of the military unit that emplaced... booby-traps... must record and maintain the following information on the emplaced field:
 - a. Precise location and boundary of the emplaced area;
 - b. Type, number, emplacing method, type of fuse and life time of the emplaced... booby-traps ... , and
 - c. Location of every emplaced... booby-trap...

⁶³ South Korea, *Conventional Weapons Act* (2001), Article 4.

⁶⁴ South Korea, *Conventional Weapons Act* (2001), Article 6.

2. The commander of the emplacing unit must manage the information which was recorded and maintained as per the paragraph 1 in accordance with the Military Secret Protection Act.⁶⁵

National Case-law

62. In 1995, in a ruling on the constitutionality of AP II, Colombia's Constitutional Court stated with respect to the prohibition on the use of weapons of a nature to cause unnecessary suffering or superfluous injury that:

Although none of the treaty rules expressly applicable to internal conflicts prohibits indiscriminate attacks or the use of certain weapons, the Taormina Declaration consequently considers that the bans (established partly by customary law and partly by treaty law) on the use of . . . booby-traps . . . apply to non-international armed conflicts, not only because they form part of customary international law but also because they evidently derive from the general rule prohibiting attacks against the civilian population.⁶⁶

Other National Practice

63. At the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects held in Lucerne in 1974, Australia advocated a specific definition of "perfidiously used weapons" which included "explosives perfidious by nature" (toys and objects in daily life) and "booby traps which in the circumstances in which they are used present an actual danger to the civilian population".⁶⁷

64. At the CCW Preparatory Conference in 1978, Australia, Austria, Denmark, France, FRG, Mexico, Netherlands, New Zealand, Norway, Spain and UK submitted a similar proposal to one presented during the CDDH. However, the authors returned to using the expression "booby-trap" instead of "explosive or non-explosive device".⁶⁸ Mexico advocated "limitation of the use of . . . booby-traps to military targets and their immediate surroundings, with effective precautions to protect civilians".⁶⁹

65. In the Ad Hoc Committee on Conventional Weapons established by the CDDH, Denmark, France, Netherlands and UK submitted a proposal building on an earlier proposal from the Conference of Government Experts on the Use of Certain Conventional Weapons in Lugano in 1976 entitled "The Regulation

⁶⁵ South Korea, *Conventional Weapons Act* (2001), Article 8.

⁶⁸ Austria, Denmark, France, Mexico, Netherlands, Spain, Sweden, Switzerland and UK, Proposal submitted at the CCW Preparatory Conference, A/CONF.95/PREP.CONF./L.9, 12 September 1978 and A/CONF.95/PREP.CONF./L.9/Add.1, 13 September 1978; see also the proposal by the same States submitted at the CDDH, *Official Records*, Vol. XVI, CDDH/408/Rev.1, Appendix II, Working Group Document CDDH/IV/GT/4, p. 546, § 6.

⁶⁹ CCW Preparatory Conference, A/CONF.95/PREP.CONF./I/SR.3, 4 September 1978, pp. 3–4.

of the Use of Land-Mines and Other Devices". Article 5 ("Prohibitions on the Use of Certain Explosive and Non-Explosive Devices") read:

1. It is forbidden in any circumstance to use any apparently harmless portable object (other than an item of military equipment or supplies) which is specifically designed and constructed to obtain explosive material and to detonate when it is disturbed or approached.
2. It is forbidden in any circumstances to use any explosive or non-explosive device or other material which is deliberately placed to kill or injure when a person disturbs or approaches an apparently harmless object or performs an apparently safe act and which is in any way attached to or associated with:
 - (a) internationally recognized protective emblems, signs or signals;
 - (b) sick, wounded or dead persons;
 - (c) burial or cremation sites or graves;
 - (d) medical facilities, medical equipment, medical supplies or medical transport; or
 - (e) children's toys.
3. It is forbidden in any circumstances to use any non-explosive device or any material which is deliberately placed to kill or injure when a person disturbs or approaches an apparently harmless object or performs an apparently safe act and which is designed to kill or injure by stabbing, impaling, crushing, strangling, infecting or poisoning the victim.⁷⁰

66. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Egypt stated that:

14. It was generally agreed that time-delay weapons such as . . . booby traps, often placed far from the combat areas, could injure civilians as well as combatants and were therefore indiscriminate. Moreover, such devices generally exploded close to the victims, causing grave injuries; they also slowed up the evacuation of the sick and wounded from mined areas, thus increasing their suffering. His delegation called for prohibition of the use of weapons of that category.
15. Booby traps, often disguised as harmless devices such as pens or transistor radios, exposed civilians as well as combatants to the danger of injury from explosion and should therefore be banned.⁷¹

67. According to the Report on the Practice of Egypt, Egypt considers that, owing to their drastic effects, some weapons, such as delayed-action weapons and booby-traps, should be prohibited in any circumstances.⁷²

68. In 1994, at the Third Session of the Meeting of Governmental Experts prior to the CCW Review Conference, France and Germany advocated a total ban

⁷⁰ Denmark, France, Netherlands and UK, Article 5 of the proposal entitled "The Regulation of the Use of Land-Mines and Other Devices" submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/213 within CDDH/IV/226, pp. 590–591.

⁷¹ Egypt, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.6, 22 March 1974, p. 49, §§ 14–15.

⁷² Report on the Practice of Egypt, 1997, Chapter 3.4.

on the use of booby-traps. Their proposal provided a revision of Article 6 of the draft (1996) Amended Protocol II to the CCW as follows:

1. It is prohibited to [develop, manufacture, stockpile] use [or transfer, directly or indirectly]:
 - the booby-traps [defined in article 2, paragraph 2 of this Protocol] and . . .
2. The States Parties undertake to destroy weapons to which this article applies and which are in their ownership and possession.⁷³

69. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the FRG supported a proposal restricting the use of booby-traps.⁷⁴

70. In 1987, a member of the German parliament condemned the use of booby-traps by Russian forces in Afghanistan. He stated that “the USSR, in Afghanistan, uses so called butterfly-bombs against children, which the children mistake to be toys because of their small size and their slowly floating down from the sky”. The speaker continued that “this war against children is a shame”. His speech met with the approval of the majority of the members of parliament.⁷⁵

71. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, India indicated that it “fully supported the idea of expanding the scope of the CCW to cover armed internal conflicts”.⁷⁶

72. According to the Report on the Practice of India, in India there is “a ban and restriction on the use of . . . certain booby traps”.⁷⁷

73. According to the Report on the Practice of Indonesia, Indonesia has prohibited the use of certain booby-traps.⁷⁸

74. The Report on the Practice of Jordan states that Jordan does not use, manufacture or stockpile booby-traps and it does not plan to do so in the future.⁷⁹

75. In 1977, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Libya supported the proposal restricting the use of booby-traps submitted by Denmark, France, Netherlands and UK.⁸⁰

76. Mexico, Switzerland and SFRY submitted a draft article on booby traps to the Ad Hoc Committee on Conventional Weapons established by the CDDH, which summarised previous proposals from the Conference of Government

⁷³ France and Germany, Proposal submitted to the Meeting of Governmental Experts to Prepare the First Review Conference of States Parties to the CCW, Third Session, Geneva, 8–19 August 1994, UN Doc. CCW/CONF.I/GE/CRP.2/Rev.1, 28 June 1994, Geneva, 8–19 August 1994.

⁷⁸ Report on the Practice of Indonesia, 1997, Chapter 3.4.

⁷⁹ Report on the Practice of Jordan, 1997, Chapter 3.4.

⁸⁰ Libya, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.40, 19 May 1977, p. 411, § 38.

Experts on the Use of Certain Conventional Weapons in Lugano in 1976. The draft article provided, *inter alia*, that:

2. Booby-traps may only be used when they are placed inside or outside military objects. The civilian population in the proximity of such a site shall be given warning of danger.
3. It is prohibited in any circumstances to attach or connect booby-traps to the dead, sick or wounded, to first aid installations, equipment and supplies, to children's toys or to objects of current use among the civilian population.⁸¹

77. In 1992, during a debate in the First Committee of the UN General Assembly, the Netherlands implied that universal adherence to the 1980 CCW would give it effect in internal conflicts.⁸²

78. The Report on the Practice of the Netherlands states that the Netherlands is of the opinion that the use of "booby traps connected with the emblem of the Red Cross, wounded or dead persons, medical goods or children's toys is prohibited".⁸³

79. At the International Conference on the Protection of Victims of War in Geneva in 1993, Russia declared that, in order to protect the civilian population against indiscriminate weapons, booby-traps should be completely banned in internal conflicts.⁸⁴

80. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the US welcomed proposals by other States to restrict the use of booby-traps and stated that "it was clearly desirable to place certain restrictions on the use of land-mines and other devices, including booby-traps". It added that the US "welcomed and shared the concern evidenced in the various proposals for the protection of the civilian population against the effects of mines and similar devices, and believed that those proposals constituted a good basis for the formulation of an effective agreement".⁸⁵

81. Venezuela presented a proposal concerning booby traps to the Ad Hoc Committee on Conventional Weapons established by the CDDH, which read:

2. Booby traps may only be used when they are placed inside or outside clearly defined military objectives. In all cases, the civilian population in the proximity of booby traps shall be given warning of the danger.
3. It shall be prohibited in all circumstances to set or place booby traps on the dead, wounded or sick, on installations, vehicles or equipment used for relief

⁸¹ Mexico, Switzerland and SFRY, Draft article entitled "Booby-traps" submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/209 within CDDH/IV/226, p. 583.

purposes, on children's toys or on objects of common or domestic use for the civilian population.⁸⁶

82. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Venezuela stated that, regardless of its own proposal restricting the use of booby traps, it "was willing to support the proposal" made by Mexico, Switzerland and SFRY on the same issue.⁸⁷

83. According to the Report on the Practice of Zimbabwe, in Zimbabwe it is military practice not to use booby-traps.⁸⁸

84. During an armed conflict between two States, another State condemned the use by one of the States of a lethal incendiary booby-trap particularly attractive to children. In a report, the State emphasised that:

Children frequently are killed or maimed by bombs disguised as toys. The majority of these antipersonnel weapons are designed to maim rather than kill. However, reports of a new incendiary bomb describe a transparent, plastic tube shaped like a circle... It is filled with brightly coloured liquid and the device explodes when shaken. The victim is usually burned to death within minutes. These devices... are particularly attractive to children. We can only surmise that the targeting of children is part of the [State's] effort to demoralize the civilian population which overwhelmingly supports the freedom fighters.⁸⁹

III. Practice of International Organisations and Conferences

United Nations

85. In a resolution adopted in 1996 on the situation in Cyprus, the UN Security Council called upon the military authorities on both sides "to clear all... booby-trapped areas inside the buffer zone without further delay, as requested by UNFICYP".⁹⁰

86. In a resolution adopted in 1980, the UN General Assembly welcomed the successful agreement upon the 1980 CCW and its Protocols. It commended the Convention agreed upon "with a view to achieving the widest possible adherence to these instruments".⁹¹

87. Many resolutions of the UN General Assembly have urged "all States which have not yet done so to take all measures to become parties" to the 1980 CCW and its Protocols.⁹²

⁸⁶ Venezuela, Draft article entitled "Booby traps" submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/212 within CDDH/IV/226.

⁸⁷ Venezuela, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.28, 20 May 1976, p. 291, § 29.

88. In a resolution adopted in 1993, the UN General Assembly stated that it was “desirous of reinforcing international co-operation in the area of prohibitions or restrictions on the use of certain conventional weapons, in particular for the removal of . . . booby-traps”.⁹³

89. In several resolutions adopted between 1997 and 1999, the UN General Assembly expressed its satisfaction at the many ratifications of the 1996 Amended Protocol II to the CCW and urgently called upon all States that had not yet done so to become parties to the 1980 CCW and its Protocols, in particular Amended Protocol II.⁹⁴

90. In 1986, in a report on the situation of human rights in Afghanistan, the Special Rapporteur of the UN Commission on Human Rights condemned the booby-trapping of children’s toys.⁹⁵

Other International Organisations

91. In 1985, in a report on the deteriorating situation in Afghanistan, the Parliamentary Assembly of the Council of Europe noted that “children of all ages . . . have been the victims of . . . ‘booby-trapped toys’”.⁹⁶

92. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe invited:

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

- ...
- b. ratify, if they have not done so, . . . the United Nations Convention of 1980 on the prohibitions or restrictions on the use of certain conventional weapons [1980 CCW] and its protocols . . .
 - j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.⁹⁷

7 December 1988, § 3; Res. 45/64, 4 December 1990, § 3; Res. 46/40, 6 December 1991, § 3; Res. 47/56, 9 December 1992, § 3; Res. 48/79, 16 December 1993, § 3; Res. 49/79, 15 December 1994, § 3; Res. 50/74, 12 December 1995, § 3; Res. 51/49, 10 December 1996, § 3; Res. 52/42, 9 December 1997, § 3; Res. 53/81, 4 December 1998, § 5.

⁹⁷ Council of Europe, Parliamentary Assembly, Res. 1085, 24 April 1996, § 8b and j.

93. In a resolution adopted in 1994 on respect for IHL and support for humanitarian action in armed conflicts, the OAU Council of Ministers invited "all States that have not yet become party to the ... [1980] CCW, to consider, or reconsider, without delay the possibility of doing so in the near future".⁹⁸

94. In two resolutions adopted in 1994 and 1996, the OAS General Assembly urged all member States to accede to the 1980 CCW.⁹⁹

International Conferences

95. The 25th International Conference of the Red Cross in 1986 adopted a resolution in which it urged all States to become parties to the 1980 CCW and its Protocols "as early as possible so as ultimately to obtain universality of adherence". It noted "the dangers to civilians caused by ... booby-traps ... employed during an armed conflict and the need for international co-operation in this field consistent with Article 9 of Protocol II attached to the 1980 Convention".¹⁰⁰

96. The 26th International Conference of the Red Cross and Red Crescent in 1995 adopted a resolution in which it urged "all States which have not yet done so to become party to the [1980 CCW] and in particular to its Protocol II on landmines[, booby-traps and other devices], with a view to achieving universal adherence thereto" and underlined "the importance of respect for its provisions by all parties to armed conflict".¹⁰¹

IV. Practice of International Judicial and Quasi-judicial Bodies

97. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

98. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that:

The use of any booby-trap in the form of an apparently harmless portable object which is specifically designed and constructed to contain explosive material and to detonate when it is disturbed or approached, is prohibited.

The use of any booby-trap which is designed to cause superfluous or unnecessary suffering is prohibited.

The use of booby-traps which are in any way attached or associated with the following persons or objects is prohibited:

⁹⁸ OAU, Council of Ministers, Res. 1526 (LX), 6–11 June 1994, § 6.

⁹⁹ OAS, General Assembly, Res. 1270 (XXIV-O/94), 10 June 1994, § 1; Res. 1408 (XXVI-O/96), 7 June 1996, § 1.

¹⁰⁰ 25th International Conference of the Red Cross, Geneva, 23–31 October 1986, Res. VII, §§ B(2) and B(5).

¹⁰¹ 26th International Conference of the Red Cross and Red Crescent, Geneva, 3–7 December 1995, Res. II, § G(g).

- (a) internationally recognized protective emblems, signs or signals;
- (b) sick, wounded or dead persons;
- (c) burial or cremation sites or graves;
- (d) medical facilities, medical equipment, medical supplies or medical transportation;
- (e) children's toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children;
- (f) food or drink;
- (g) kitchen utensils or appliances except in military establishments, military locations or military supply depots;
- (h) objects clearly of a religious nature;
- (i) historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; or
- (j) animals or their carcasses.

... Booby-traps ... may be used in populated areas:

- a) when they are placed on or in the close vicinity of a military objective belonging to or under the control of the enemy; or
- b) when measures are taken to protect civilians persons (e.g. warning signs, sentries, issue of warnings, provision of fences).

The location shall be recorded of:

- ...
- b) areas where large-scale and pre-planned use is made of booby-traps.¹⁰²

VI. Other Practice

99. In 1986, in a report on the use of landmines in the conflicts in El Salvador and Nicaragua, Americas Watch listed the following uses of booby-traps among those that "should be prohibited in the conduct of hostilities in both countries":

- 1. Their direct use against individual or groups of unarmed civilians where no legitimate military objective, such as enemy combatants or war material, is present. Such uses of these weapons are indiscriminate.
- 2. The direct use against civilian objects, i.e., towns, villages, dwellings or buildings dedicated to civilian purposes where no military objective is present. Such weapons' use is also indiscriminate.
- ...
- 4. The use of ... booby-traps in or near a civilian locale containing military objectives which are deployed *without* any precaution, markings or other warnings, or which do *not* self-destruct or are *not* removed once their military purpose has been served. Such uses are similarly indiscriminate.¹⁰³ [emphasis in original]

¹⁰³ Americas Watch, *Land Mines in El Salvador and Nicaragua: The Civilian Victims*, New York, December 1986, pp. 100–101.

100. Rule B4 of the Rules of International Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IHHL, states that:

In application of the general rules listed in section A above, especially those on the distinction between combatants and civilians and on the immunity of the civilian population, . . . booby-traps . . . may not be directed against the civilian population as such or against individual civilians, nor used indiscriminately.

The prohibition of booby-traps listed in Article 6 of that Protocol II extends to their use in non-international armed conflicts, in application of the general rules on the distinction between combatants and civilians, the immunity of the civilian population, the prohibition of superfluous injury or unnecessary suffering, and the prohibition of perfidy.

To ensure the protection of the civilian population referred to in the previous paragraphs, precautions must be taken to protect them from attacks in the form of . . . booby-traps.¹⁰⁴

¹⁰⁴ IHHL, Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, Rule B4, *IRRC*, No. 278, 1990, p. 399.

LANDMINES

- | | |
|---|------------|
| A. Prohibition of Certain Types of Landmines | §§ 1–190 |
| B. Restrictions on the Use of Landmines (practice relating to Rule 81) | §§ 191–339 |
| C. Measures to Reduce the Danger Caused by Landmines (practice relating to Rules 82 and 83) | §§ 340–427 |

A. Prohibition of Certain Types of Landmines

I. Treaties and Other Instruments

Treaties

1. Article 3(3) of the 1996 Amended Protocol II to the CCW prohibits the use of any mine “which is designed or of a nature to cause superfluous injury or unnecessary suffering”.
2. Article 3(5) of the 1996 Amended Protocol II to the CCW prohibits the use of mines “which employ a mechanism or device specifically designed to detonate the munition by the presence of commonly available mine detectors as a result of their magnetic or other non-contact influence during normal use in detection operations”.
3. Article 3(6) of the 1996 Amended Protocol II to the CCW prohibits the use of a “self-deactivating mine equipped with an anti-handling device that is designed in such a manner that the anti-handling device is capable of functioning after the mine has ceased to be capable of functioning”.
4. Article 4 of the 1996 Amended Protocol II to the CCW provides that “it is prohibited to use anti-personnel mines which are not detectable, as specified in paragraph 2 of the Technical Annex”.
5. Article 6(2) of the 1996 Amended Protocol II to the CCW prohibits the use of remotely delivered anti-personnel mines which are not equipped with self-destruction and self-deactivation devices.
6. Article 6(3) of the 1996 Amended Protocol II to the CCW provides that:

It is prohibited to use remotely-delivered mines other than anti-personnel mines, unless, to the extent feasible, they are equipped with an effective self-destruction or self-neutralization mechanism and have a back-up self-deactivation feature, which

is designed so that the mine will no longer function as a mine when the mine no longer serves the military purpose for which it was placed in position

7. Upon ratification of the 1996 Amended Protocol II to the CCW, the UK declared that “nothing in the present declaration or in Protocol II as amended shall be taken as limiting the obligations of the United Kingdom under the . . . [1997 Ottawa Convention] nor its rights in relation to other Parties to that Convention”.¹

8. Article 1 of the 1997 Ottawa Convention provides that:

1. Each State Party undertakes never under any circumstances:
 - (a) To use anti-personnel mines;
 - (b) To develop, produce, otherwise acquire, stockpile, retain or transfer to anyone, directly or indirectly, anti-personnel mines;
 - (c) To assist, encourage or induce, in any way, anyone to engage in any activity prohibited to a State Party under this Convention.
2. Each State Party undertakes to destroy or ensure the destruction of all anti-personnel mines in accordance with the provisions of this Convention.

9. Article 2 of the 1997 Ottawa Convention contains the following definitions:

- (1) “Anti-personnel mine” means a mine designed to be exploded by the presence, proximity or contact of a person and that will incapacitate, injure or kill one or more persons. Mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices, are not considered anti-personnel mines as a result of being so equipped.
...
- (3) “Anti-handling device” means a device intended to protect a mine and which is part of, linked to, attached to or placed under the mine and which activates when an attempt is made to tamper with or otherwise intentionally disturb the mine.

10. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.

¹ UK, Declaration made upon ratification of the 1996 Amended Protocol II to the CCW, 11 February 1999, § (c).

3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

Other Instruments

11. Article III(8) of the 1992 N'Sele Ceasefire Agreement provides that "cease-fire" shall imply "a ban on any mine-laying operations".

12. Section 6.2 of the 1999 UN Secretary-General's Bulletin provides that:

The United Nations force shall respect the rules prohibiting or restricting the use of certain weapons and methods of combat under the relevant instruments of international humanitarian law . . . The use of certain conventional weapons . . . such as anti-personnel mines . . . is prohibited.

II. National Practice

Military Manuals

13. Canada's LOAC Manual states that:

The possession or use of anti-personnel mines is prohibited by the Anti-Personnel Mines Convention signed in 1997 by over 100 states. Canada has already ratified the Convention. While many other nations may continue to possess and use anti-personnel land mines, the CF is bound not to do so.²

It adds that "the use of an anti-personnel mine that is manually detonated (e.g., by land line or electronic signal from a remote or protected position) by a CF member is not prohibited". The manual places certain restrictions on the use of "horizontal fragmentation weapons which propel fragments in a horizontal arc of less than 90 degrees", including that they "may be used for a maximum period of 72 hours if they are located in the immediate proximity to the military unit that emplaced them, and the area is monitored by military personnel to ensure the effective exclusion of civilians".³ The manual also states that "it is prohibited to use mines . . . that employ a mechanism or device specifically designed to detonate the munition by the presence of commonly available mine detectors as a result of their magnetic or other non-contact influence during normal use in detection operations".⁴ It also states that "self-deactivating mines" are "lawful unless they are used with an anti-handling device that continues to function after the mine has stopped functioning". It adds, however, that "under Canadian doctrine, anti-handling devices are used only with tank-mines".⁵

14. Canada's Code of Conduct provides that "the use of land mines, other than anti-personnel mines, is lawful, but is subject to strict regulation . . . The use of

⁴ Canada, *LOAC Manual* (1999), p. 5-5, § 47.

⁵ Canada, *LOAC Manual* (1999), p. 5-5, §§ 48 and 49.

all but manually detonated anti-personnel mines (e.g., Claymore mine that is manually detonated) by CF members is prohibited.”⁶

15. Colombia’s Basic Military Manual states that the use of weapons which “cause unnecessary and indiscriminate, extensive, lasting and serious damage to people and the environment” is prohibited. It adds that “the use as well as the production, possession and importation of cruel means of war such as anti-personnel mines is banned”.⁷

16. France’s LOAC Teaching Note includes anti-personnel mines in the list of weapons that “are totally prohibited by the law of armed conflict” because of their inhuman and indiscriminate character.⁸

17. France’s LOAC Manual includes anti-personnel mines in the list of weapons that “are totally prohibited by the law of armed conflict” because of their inhuman and indiscriminate character.⁹ It notes that France is a party to the 1997 Ottawa Convention and summarises the provisions of the Convention prohibiting the use, stockpiling, production and transfer of anti-personnel mines “in or by ratifying States”.¹⁰

18. Israel’s Manual on the Laws of War underlines the existence of “a wide international movement . . . with a view to bring about an absolute prohibition of the use of anti-personnel mines”. It states that “Israel has not joined the Convention, just as the Arab states have not. Nevertheless Israel has declared a moratorium on the manufacture and export of anti-personnel mines.”¹¹

19. Russia’s Military Manual prohibits the use of weapons that are by nature indiscriminate or which cause unnecessary suffering. It refers to the 1980 Protocol II to the CCW.¹²

20. Spain’s LOAC Manual, referring to the use of mines, states that:

Independent of the type of target, its location, the kind of military operation, the given mission or any other circumstances, it is prohibited to use this type of weapon . . . wherever its location is indiscriminate . . . wherever it cannot be guided towards a specific military target and wherever there is reason to believe that it will cause disproportionate collateral damage.¹³

National Legislation

21. Numerous States have passed national legislation enacting comprehensive prohibitions on the use, stockpiling, production and transfer of anti-personnel mines, including: Albania,¹⁴ Australia,¹⁵ Austria,¹⁶ Belgium,¹⁷

⁶ Canada, *Code of Conduct* (2001), Rule 3, §§ 8 and 11.

⁷ Colombia, *Basic Military Manual* (1995), pp. 49–50.

⁸ France, *LOAC Teaching Note* (2000), p. 6. ⁹ France, *LOAC Manual* (2001), p. 54.

22. Regarding the implementation in domestic legislation of the 1997 Ottawa Convention as required by Article 9, the *Landmine Monitor Report 2001* states that:

Some countries have deemed existing domestic law to be sufficient to implement the treaty. These laws cover civilian possession of armaments and explosives. Included among these are Andorra,⁴³ Denmark,⁴⁴ Ireland,⁴⁵ Jordan,⁴⁶ Lesotho,⁴⁷ Liechtenstein,⁴⁸ Namibia,⁴⁹ Netherlands,⁵⁰ and Peru.⁵¹ Another seven States Parties indicate that the legislation used for ratification is sufficient because international treaties become self-executing in those countries: Mexico, Portugal, Rwanda, Seychelles, Slovakia, Slovenia, and Yemen.⁵² [footnotes added]

23. Hungary's Criminal Code as amended provides that:

The following shall be construed as weapons prohibited by international treaty:

- ...
- b) the following weapons listed in the protocols to the [1980 CCW]...
- ...
- 2. mines, remotely-delivered mines, anti-personnel mines, booby-traps and other devices specified in Points 1–5 of Article 2 of the Amended Protocol II...
- d) anti-personnel mines specified in Point 1 of Article 2 of the convention signed at Oslo on 18 September 1997 on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction.⁵³

24. Prior to adhering to the 1997 Ottawa Convention, Ireland enacted the Explosives (Landmine) Order, which provides that:

- 3. (1) No person shall manufacture, keep, import into the State, convey or sell any land mine.
- (2) In this Article "land mine" means any munition designed to be placed under, on or near the ground or other surface area and designed to be detonated or exploded by the presence or proximity of, or contact with, a person or vehicle.⁵⁴

25. South Korea's Conventional Weapons Act provides that:

No one is allowed to use or transfer a weapon that falls under any of the following:

- 1. Mines ... or other devices made to detonate resulting from the magnetism of a mine-detection device or other cause without physical contact of a person or device during detection operations with standard mine-detection devices available in Korea.
- 2. Anti-personnel mines that are undetectable by standard mine-detection devices available in Korea and that do not respond with a signal, which is detected from 8 grams or more of iron.
- 3. Remotely-delivered anti-personnel mines that do not fulfil any of the following:
 - (a) Over 90 percent of the total amount shot or dropped shall automatically detonate within 30 days.
 - (b) Over 99.9 percent of the total amount shot or dropped shall automatically detonate or otherwise lose its function as a mine within 120 days.⁵⁵

26. In 1998, Mexico adopted and published its Decree on the Ratification of the Ottawa Convention.⁵⁶ According to Mexico's Constitution, it is thereby considered as a Supreme Law in all the territory.⁵⁷

27. Portugal's Ministry of Foreign Affairs acknowledged in October 2000 that Portugal's official publication of the 1997 Ottawa Convention on 23 November

⁵³ Hungary, *Criminal Code as amended* (1978), Section 160/A(3).

⁵⁵ South Korea, *Conventional Weapons Act* (2001), Article 3.

⁵⁶ Mexico, *Decree on the Ratification of the Ottawa Convention* (1998).

⁵⁷ Mexico, *Constitution* (1917), Article 133.

1999 “does not achieve total legislative implementation of the Treaty through the imposition of penal sanctions and this matter should be handled at an inter-ministry level”.⁵⁸ In January 2001, the Ministries of Foreign Affairs and Defence stated that Portugal “is currently studying the way, in coordination with the different competent entities, to create internal legislation on this matter”. Nevertheless, they pointed out that Portugal had existing legislation which punished the possession, transportation, selling or production of explosive devices and substances.⁵⁹

28. An official of Slovakia stated that national implementation was achieved when the Slovak parliament approved ratification of the 1997 Ottawa Convention on 4 June 1999, making it part of national legislation.⁶⁰ It was published as a new law in the official bulletin of the Ministry of Justice.⁶¹

29. South Africa’s Anti-Personnel Mines Bill provides that it is one of “the principal objects of the Act . . . to prohibit the use, stockpiling, production, development, acquisition and transfer of anti-personnel mines and ensure the destruction thereof”. It adds that “neither an Organ of State nor a person within the Republic or any South African citizen outside the Republic may . . . place an anti-personnel mine”.⁶²

30. Under Sweden’s Penal Code as amended, “a person who uses, develops, manufactures, acquires, possesses or transfers anti-personnel mines [as defined in the 1997 Ottawa Convention] shall be sentenced for unlawful dealings with mines to imprisonment . . . unless the act is to be considered as a crime against international law”.⁶³

National Case-law

31. In 1995, in a ruling on the constitutionality of AP II, Colombia’s Constitutional Court stated in relation to the prohibition on the use of weapons of a nature to cause unnecessary suffering or superfluous injury that:

Although none of the treaty rules expressly applicable to internal conflicts prohibits indiscriminate attacks or the use of certain weapons, the Taormina Declaration consequently considers that the bans (established partly by customary law and partly by treaty law) on the use of . . . mines . . . apply to non-international armed conflicts, not only because they form part of customary international law but also because they evidently derive from the general rule prohibiting attacks against the civilian population.⁶⁴

Other National Practice

32. Between 1994 and September 1997, 117 States declared their support for a global ban on the production, stockpiling, transfer and use of anti-personnel mines. These States were: Afghanistan, Algeria, Angola, Antigua and Barbuda, Argentina, Australia, Austria, Bahamas, Barbados, Belgium, Belize, Benin, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Burkina Faso, Cambodia, Cameroon, Canada, Cape Verde, Chad, Chile, Colombia, Congo, Costa Rica, Côte d'Ivoire, Croatia, Czech Republic, Denmark, Dominica, Dominican Republic, Ecuador, El Salvador, Estonia, Ethiopia, Fiji, France, Gabon, Georgia, Germany, Ghana, Grenada, Guatemala, Guinea, Guyana, Haiti, Holy See, Honduras, Hungary, Iceland, Ireland, Italy, Jamaica, Japan, Jordan, Kenya, Kuwait, Laos, Lesotho, Liechtenstein, Luxembourg, FYROM, Malaysia, Malawi, Mali, Malta, Mauritania, Mauritius, Mexico, Moldova, Monaco, Mozambique, Namibia, Netherlands, New Zealand, Nicaragua, Nigeria, Norway, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Rwanda, St. Kitts and Nevis, St. Vincent and the Grenadines, San Marino, St. Lucia, Senegal, Seychelles, Sierra Leone, Slovakia, Slovenia, South Africa, Spain, Sudan, Surinam, Swaziland, Sweden, Switzerland, Tanzania, Togo, Trinidad and Tobago, Turkmenistan, Uganda, United Arab Emirates, UK, US, Uruguay, Venezuela, Yemen, Zambia and Zimbabwe.⁶⁵

33. The Final Declaration of the 1997 Brussels Conference on Anti-personnel Landmines, which called for the "early conclusion of a comprehensive ban on anti-personnel landmines" and welcomed "the convening of a Diplomatic Conference by the Government of Norway in Oslo on 1 September 1997 to negotiate such an agreement", was supported by 111 States. These were: Algeria, Angola, Antigua and Barbuda, Argentina, Australia, Austria, Bahamas, Barbados, Belgium, Belize, Benin, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Burkina Faso, Cambodia, Cameroon, Canada, Cape Verde, Chad, Chile, Colombia, Congo, Costa Rica, Côte d'Ivoire, Croatia, Czech Republic, Denmark, Dominica, Dominican Republic, Ecuador, El Salvador, Ethiopia, Fiji, France, Gabon, Germany, Ghana, Grenada, Guatemala, Guinea, Guyana, Haiti, Holy See, Honduras, Hungary, Iceland, Ireland, Italy, Jamaica, Japan, Jordan, Kenya, Kuwait, Lesotho, Liechtenstein, Luxembourg, Former Yugoslav Republic of Macedonia, Malaysia, Malawi, Mali, Malta, Mauritania, Mauritius, Mexico, Moldova, Monaco, Mozambique, Namibia, Netherlands, New Zealand, Nicaragua, Norway, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Rwanda, St. Kitts and Nevis, St. Vincent and the Grenadines, San Marino, St. Lucia, Senegal, Seychelles, Slovakia, Slovenia, South Africa, Spain, Sudan, Surinam, Swaziland, Sweden, Switzerland,

⁶⁵ ICRC, List of States unilaterally supporting a global ban on the production, stockpiling, transfer and use of anti-personnel mines, 18 September 1997 (public declarations on file with the ICRC).

Tanzania, Togo, Trinidad and Tobago, Turkmenistan, Uganda, United Arab Emirates, UK, US, Uruguay, Venezuela, Yemen, Zambia and Zimbabwe.⁶⁶

34. Between 1994 and September 1997, 29 States unilaterally prohibited the production of anti-personnel mines. These were: Australia, Austria, Belgium, Burkina Faso, Cambodia, Canada, Colombia, Congo, France, Germany, Ghana, Honduras, Ireland, Italy, Jamaica, Luxembourg, Mexico, Mozambique, Netherlands, New Zealand, Norway, Philippines, Portugal, Slovenia, South Africa, Sweden, Switzerland, UK and Zimbabwe.⁶⁷

35. Between 1994 and September 1997, 30 States unilaterally prohibited the use of anti-personnel mines by their own forces. These were: Australia, Austria, Belgium, Cambodia, Canada, Colombia, Congo, Croatia, Denmark, Fiji, France, Georgia, Germany, Haiti, Honduras, Ireland, Italy, Jamaica, Luxembourg, Mexico, Mozambique, Netherlands, New Zealand, Norway, Philippines, Portugal, South Africa, Sweden, Switzerland and UK.⁶⁸

36. At the Second Meeting of States Parties to the Ottawa Convention in 2000, several States in their interventions accused signatories, in particular Angola, Burundi, Sudan and some of the forces active in the DRC, of continuing to use mines in violation of their international obligations. In reply, Burundi denied any use of anti-personnel mines by its forces and welcomed an international fact-finding mission to its territory to investigate further, while Angola readily admitted its use of mines to defend military positions and requested understanding in light of its special circumstances.⁶⁹

37. At the First Meeting of States Parties to the Ottawa Convention in 1999, numerous States condemned the continued use of anti-personnel mines and, in particular, the use by treaty signatories including Angola and Senegal.⁷⁰

38. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Albania stated that it would "continue working on ratifying as soon as possible the Ottawa treaty".⁷¹

39. In 1995, during a debate in the First Committee of the UN General Assembly, Australia stated that it was "committed to the elimination of all anti-personnel land-mines as an ultimate goal".⁷²

⁶⁶ ICRC, Published list of signatories to the Brussels Declaration, 18 September 1997 (on file with the ICRC.)

40. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Australia stated that it would “promote the achievement of increased adherence to the Ottawa Convention, the commencement of negotiations for a transfer ban on landmines”.⁷³

41. At the Second Review Conference of States Parties to the CCW in 2001, Australia reiterated its “commitment to universal adherence both to the Convention on Conventional Weapons and its annexed protocols, and to the Ottawa Convention” and urged “all States which had not yet done so to accede to those important instruments”.

42. At the First Meeting of States Parties to the Ottawa Convention in 1999, Austria condemned the laying of new mines in “Kosovo, Angola and some other places”.⁷⁴

43. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Austria (together with the EU) stated that it would “support efforts to improve the humanitarian standards of the Protocol II to the 1980 CCW”.⁷⁵

44. At the Landmines Treaty Signing Conference in Ottawa in December 1997, Belarus stated that it “completely shares the objectives of the Convention” and that it would “search for financial resources for destruction of the existing millions of anti-personnel mines stockpiled in Belarus in order to achieve complete elimination of this weapon”.⁷⁶

45. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, Belarus stated that it had “established a moratorium on exports” of anti-personnel landmines and that it “does not produce and does not expect to produce or modernize mines in the future, neither anti-personnel nor any other mines”, nor did it “use mines to protect the state border or for any other purposes”.⁷⁷

46. In 1995, during a debate in the First Committee of the UN General Assembly, Benin declared that there was an “imperative need for a ban on the manufacture and use of anti-personnel land-mines”.⁷⁸

47. In 1995, during a debate in the First Committee of the UN General Assembly, Burkina Faso stated that it supported an eventual ban on anti-personnel mines.⁷⁹

⁷³ Australia, Statement at the 27th International Conference of the Red Cross and Red Crescent, Geneva, 31 October–6 November 1999.

48. In 1995, during a debate in the First Committee of the UN General Assembly, Canada stated that it continued “to advocate the elimination of land-mines, recognizing that this goal will take a considerable time to achieve”.⁸⁰

49. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Canada (together with the Canadian Red Cross and Norway) stated that it would “continue support for the universalization and full implementation of the Ottawa Convention”.⁸¹

50. At the Second Meeting of States Parties to the Ottawa Convention in 2000, Canada stated that it was:

deeply concerned by reports that Angola, a treaty signatory, continues to deploy new mines – increasing the scale of human tragedy for peoples who have already suffered after years of civil war. We are also concerned about allegations of new mine use by Burundi and Sudan, also treaty signatories. We urge these states to clarify these matters quickly and in a manner consistent with the political and moral obligations they undertook when they signed this Convention. There are also allegations that parties to the conflict in the Democratic Republic of the Congo have deployed mines. The fact the some of the states with forces engaged in the DRC are States Parties to this Convention underscores the need for these states to clarify the facts surrounding these allegations.

Canada further noted that:

Beyond the immediate community bound by this Convention, mines are still being used by governments and non-state actors to an extent that merits our collective condemnation. It is important to highlight the indiscriminate use of landmines by both Russian and Chechen forces in Chechnya – surely one of the most serious setbacks for the already minimal norms regarding mine use contained within the Landmines Protocol of the Convention on Certain Conventional weapons... We call upon all states, signatory and non-signatory alike, to work co-operatively to clarify compliance issues in a manner that will build greater respect for the norms we have worked so long and hard to create.⁸²

51. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Chile stated that it would “make every effort to ensure that lawmakers incorporate those offences and those set forth in the Ottawa landmines treaty... into domestic legislation”.⁸³

52. In 1998, in a White Paper on China’s National Defence, China stated that it was “in favour of imposing proper and rational restrictions on the use and

transfer of APLs in a bid to achieve the ultimate objective of a comprehensive prohibition of such landmines through a phased approach".⁸⁴

53. At the First Meeting of States Parties to the Ottawa Convention in 1999, China, attending the meeting as an observer, expressed the hope that "the international community could make joint efforts to further improve the international security environment, and to create favourable conditions for the ultimate goal of a complete ban on APLs in a bid to eliminate the threat to innocent civilians by APLs".⁸⁵

54. At the Second Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 2000, China stated in relation to anti-personnel landmines that "complete prohibition is undoubtedly the best solution . . . However, it should also be recognized that given the divergence of national conditions, countries may differ in terms of their respective security concerns and military technological development levels."⁸⁶

55. In 1995, during a debate in the First Committee of the UN General Assembly, Colombia reiterated its "support for the initiative of an international moratorium on the production and transfer of anti-personnel land-mines, with a view to their complete elimination".⁸⁷

56. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Costa Rica stated that it would promote "the struggle to clear the land of all anti-personnel mines".⁸⁸

57. In 1995, during a debate in the First Committee of the UN General Assembly, Côte d'Ivoire stated that it felt it was "time to think about an international agreement prohibiting the production, utilization and transfer of mines".⁸⁹

58. In 1995, during a debate in the First Committee of the UN General Assembly, Ecuador encouraged "new international efforts to find solutions to the problems caused by these weapons with a view to their total elimination".⁹⁰

59. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Egypt stated that:

It was generally agreed that time-delay weapons such as anti-personnel weapons, land-mines and aircraft, artillery and naval gun-delivered mines and booby traps, often placed far from the combat areas, could injure civilians as well as combatants

⁸⁴ China, Information Office of the State Council, White Paper: China's National Defence, 27 July 1998, cited in ICBL, *Landmine Monitor Report 2000*, August 2000, p. 481, footnote 3.

and were therefore indiscriminate. Moreover, such devices generally exploded close to the victims, causing grave injuries; they also slowed up the evacuation of the sick and wounded from mined areas, thus increasing their suffering. His delegation called for prohibition of the use of weapons of that category.⁹¹

60. In 2000, during a debate in the First Committee of the UN General Assembly, Egypt stated that while it recognised the “humanitarian goal” of the 1997 Ottawa Convention, it continued “to maintain that the Ottawa Convention lacks the vision necessary to deal comprehensively with all aspects related to landmines”.⁹²

61. In 1995, during a debate in the First Committee of the UN General Assembly, Ethiopia stated that there was “a compelling need for a total ban on these insidious weapons”.⁹³

62. In 1997, the Finnish government released a fact sheet in which it explained its position on the use of anti-personnel mines:

APLs are an integral part of the Finnish territorial defence doctrine. They would only be used in response to armed aggression against Finland. Given their importance to Finland’s defence, any decision to destroy APLs and to bear the considerable cost of providing the same defensive impact with other means would have to be made in the context of such a total ban that Finland regards as responding to the global landmine crisis.⁹⁴

63. In a speech addressed to the UN General Assembly in 1995, the German Minister of Foreign Affairs stated that “anti-personnel mines . . . are ‘weapons of mass destruction’. Day in, day out, they are taking a terrible toll on human life, and many of the victims are women and, above all, innocent children. If any kind of weapon must be outlawed, then this one should be.”⁹⁵

64. In 2001, Greece and Turkey made a joint statement in which they declared that:

They also recognize that a total ban on these [anti-personnel] mines is an important confidence building measure that would contribute to security and stability in the region. With these considerations in mind, the Minister of Foreign Affairs of the Republic of Turkey . . . and the Minister of Foreign Affairs of the Hellenic Republic . . . have emphasized the desirability of the adherence of all states to the Convention on Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, namely the Ottawa Convention. In this context, they have decided to concurrently start the procedures that will make

both sides parties to the Ottawa Convention. For this purpose, while Greece initiates ratification process, Turkey will start accession procedures. It is also agreed that the instruments of ratification by Greece and accession by Turkey will be simultaneously deposited with the Secretary General of the United Nations in due course.⁹⁶

65. In 1995, during a debate in the First Committee of the UN General Assembly, India stated that:

Having agreed to the extension of the scope of the Protocol to non-international armed conflicts as defined in the Geneva Conventions, [India] has proposed a ban on the use of land-mines in such conflicts and a ban on the transfer of these weapons . . . We would, therefore, be happy to join other sponsors of the draft resolution on a moratorium on the export of land-mines, with the goal of their eventual elimination as viable and humane alternatives are developed.⁹⁷

66. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, India stated that it:

remains committed to the objective of a non-discriminatory, universal and global ban on anti-personnel mines through a phased process that addresses the legitimate defence requirements of States, while at the same time ameliorating the humanitarian crises that have resulted from an irresponsible transfer and indiscriminate use of landmines.⁹⁸

67. At the First Meeting of States Parties to the Ottawa Convention in 1999, Israel, attending the meeting as an observer, Israel stated that it “wholeheartedly supports the ultimate goal of this Convention” and that it:

supports a gradual process in which each state will begin doing its part to reduce the indiscriminate use of landmines, toward the eventual goal of a total ban . . . The first step should be the elimination of the production of APLs to be followed by finding appropriate replacements for landmines and then, later on, when security circumstances allow, a total ban on the use of APLs.⁹⁹

68. In 2001, during a debate in the First Committee of the UN General Assembly, Israel stated that:

Israel supports the ultimate humanitarian goal of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on Their Destruction, aimed at eliminating the consequences of indiscriminate use of anti-personnel landmines . . . [Israel] is still required to resort to defensive operations

against terrorists in order to prevent attacks on its civilians. Therefore, we remain at present unable to support an immediate enactment of a total ban on landmines.¹⁰⁰

69. At the First Meeting of States Parties to the Ottawa Convention in 1999, Japan stated that it was deeply concerned about the use of anti-personnel landmines in Kosovo and called upon “all parties involved in the Kosovo question to refrain from the use of anti-personnel landmines”.¹⁰¹

70. In 2000, during a debate in the First Committee of the UN General Assembly, Kazakhstan stated that:

Kazakhstan fully supports the humanitarian orientation of the Ottawa Convention, whose goal is the complete elimination of anti-personnel mines . . . However, in our view, the movement for the complete prohibition of anti-personnel mines should be an ongoing and step-by-step process based on the mine Protocol to the Convention on inhumane weapons.¹⁰²

71. In 1995, during a debate in the First Committee of the UN General Assembly, Kenya declared its support for a ban on anti-personnel mines.¹⁰³

72. At the International Strategy Conference Towards a Global Ban on Anti-Personnel Mines in 1996, South Korea stated that it “in principle supports the ultimate goal of eliminating APLs” but that due to the “unique security situation” on the Korean Peninsula, it “cannot fully subscribe to the total and unconditional ban of APLs”.¹⁰⁴

73. At the 27th International Conference of the Red Cross and Red Crescent in 1999, FYROM stated that it would “work with the States and the relevant international bodies on a total elimination of anti-personnel landmines globally and in the region”.¹⁰⁵

74. In 1995, during a debate in the First Committee of the UN General Assembly, Mali stated that it was “urgent to put an end to the production of land-mines and to . . . plan for their progressive destruction”.¹⁰⁶

75. In 1993, during a debate in the First Committee of the UN General Assembly, Mexico stated that it supported an export moratorium on anti-personnel mines as “a step in the direction of the ultimate prohibition of anti-personnel mines and their destruction”.¹⁰⁷

¹⁰⁷ Mexico, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/48/SR.28, 18 November 1993, p. 9.

76. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Mexico stated that it would “redouble efforts and step up coordination with other governments and with civilian organizations for the universality and implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on their Destruction”.¹⁰⁸

77. In 1995, during a debate in the First Committee of the UN General Assembly, New Zealand stated that it remained “committed to the goal of the elimination of all anti-personnel land-mines”.¹⁰⁹

78. At the 27th International Conference of the Red Cross and Red Crescent in 1999, New Zealand stated that it would “continue to play a constructive role in international de-mining efforts and in encouraging the universal ratification of the Ottawa Convention”.¹¹⁰

79. In 1995, during a debate in the First Committee of the UN General Assembly, Nicaragua emphasised that “the definitive solution to the problem created by mines and other devices in various parts of the world lies in a total ban on the production, stockpiling, exportation and proliferation of such inhumane weapons”.¹¹¹

80. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Nicaragua stated that it would “work for prompt ratification of the 1980 United Nations Convention on Certain Conventional Weapons and its Protocols... [and] continue to work unsparingly for mine clearance with a view to making the region a mine-free zone and help mine-blast victims fully reintegrate into society”.¹¹²

81. In 1995, during a debate in the First Committee of the UN General Assembly, Norway stated that it would “continue to work for a total ban on the production, stockpiling, trade and use of anti-personnel land-mines”.¹¹³

82. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, Pakistan declared its hope that the international community would continue working towards “the objective of the complete elimination of anti-personnel mines everywhere”.¹¹⁴

83. In 1999, in a letter to the ICBL, Pakistan stated that while it “remains fully committed to the cause of eventual elimination of anti-personnel

landmines, defence requirements do not allow it to join the Ottawa Convention at present".¹¹⁵

84. In 2000, during a debate in the First Committee of the UN General Assembly, Pakistan stated that:

The issue of anti-personnel landmines has particular importance for Pakistan because we witnessed at first hand the plight and the suffering of innocent victims as a result of the massive saturation of Afghanistan with anti-personnel landmines. Millions of mines have still not been cleared in Afghanistan . . . Although our security environment does not permit us to accept a comprehensive ban on anti-personnel landmines, Pakistan will strictly abide by its commitments and obligations under the amended Protocol II on landmines, to the Convention on Certain Conventional Weapons. We will continue to work with other States parties to promote universal acceptance of Protocol II.¹¹⁶

85. At the First Session of the First Review Conference of States Parties to the CCW in 1995, Peru stated that it supported a prohibition on the use of landmines which were not equipped with self-destruct mechanisms.¹¹⁷

86. In 1995, during a debate in the First Committee of the UN General Assembly, Peru stated that it was essential that the international community adopt the necessary measures to eliminate anti-personnel landmines.¹¹⁸

87. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Peru stated that it would "support and work in favour of any initiatives launched to fortify the international system for the total prohibition of antipersonnel landmines".¹¹⁹

88. Prior to the international conference on "New Steps for a Mine-Free Future: Political, Military and Humanitarian Aspects", held in Moscow in May 1998, Russia stated in a press release issued by the Ministry of Defence that it was "in favour of a complete prohibition of antipersonnel landmines" and that it supported "a stage-by-stage and gradual progress towards this goal".¹²⁰

89. Slovenia, with a view to ensuring the effective national implementation of the 1997 Ottawa Convention, enacted two administrative measures concerning in particular the destruction of anti-personnel mines.¹²¹

90. In its report on “gross violations of human rights” committed between 1960 and 1993, South Africa’s Truth and Reconciliation Commission found that the ANC’s use of landmines in the rural areas of Northern and Eastern Transvaal in the period 1985–1987 “cannot be condoned in that it resulted in gross violations of human rights – causing injuries to and loss of lives of civilians, including farm labourers and children”. The Commission further noted that “the use of landmines inevitably leads to civilian casualties as it does not discriminate between military and civilian targets” and that “to its credit, the ANC abandoned the landmine campaign in the light of the high civilian casualty rate”.¹²²

91. At the 27th International Conference of the Red Cross and Red Crescent in 1999, South Africa stated that it would “promulgate legislation implementing the Ottawa Convention into domestic law”.¹²³

92. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Thailand stated that it would “take concrete steps towards elimination of anti-personnel mines and assistance to mine victims in accordance with the 1997 Ottawa Convention”.¹²⁴

93. In 1995, during the debate in the First Committee of the UN General Assembly on Resolution 50/70, which encouraged “further immediate international efforts to seek solutions to the problems caused by anti-personnel landmines, with a view to the eventual elimination of anti-personnel landmines”, Turkey stated that it understood the definition of “eventual elimination” in that paragraph as “a political goal that we must strive to attain in the future”. Turkey further noted that it had joined the consensus on the basis of its understanding of the paragraph on eventual elimination but that it would have abstained had the paragraph been put to a separate vote.¹²⁵

94. At the First Meeting of States Parties to the Ottawa Convention in 1999, the Turkish representative, attending the meeting as an observer, declared that “the security situation around Turkey so far precludes my country from signing the Ottawa Convention”. However, the delegate announced the government’s intention “to sign the Ottawa Convention at the beginning of the next decade if present conditions do not change adversely”.¹²⁶

95. In 2001, during a debate in the First Committee of the UN General Assembly, Turkey stated that:

¹²² South Africa, Truth and Reconciliation Commission Report, 1998, Vol. 2, p. 335.

¹²³ South Africa, Statement at the 27th International Conference of the Red Cross and Red Crescent, Geneva, 31 October–6 November 1999.

¹²⁴ Thailand, Statement at the 27th International Conference of the Red Cross and Red Crescent, Geneva, 31 October–6 November 1999.

¹²⁵ Turkey, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/50/PV.26, 17 November 1995, p. 18.

¹²⁶ Turkey, Statement at the First Meeting of States Parties to the Ottawa Convention, Maputo, 3–7 May 1999.

Turkey is fully conscious of the casualties and the ensuing human suffering caused by the irresponsible and indiscriminate use of mines. We attach importance to the mine-ban Treaty and consider it to be one of the major achievements of the international community towards the total elimination of anti-personnel mines. However, the security situation around Turkey is distinctly different from that faced by the proponents of the Ottawa process. This has prevented us from signing the Treaty. However, our commitment to the Treaty's goals was manifested by our participation in the First, Second and Third Meetings of the States Parties... Furthermore, Turkey has initiated a number of contacts with some neighbouring countries with a view to seeking the establishment of special regimes in order to keep our common borders free of anti-personnel mines... I would like to stress once more my Government's determination to become a party to the Ottawa Convention.¹²⁷

96. In a press release issued in March 2002, the Turkish Minister of Foreign Affairs declared that:

Turkey has come to the stage of submitting the Convention to the Turkish Grand National Assembly for finalization of the accession procedures. In the meantime, the duration of Turkey's national moratorium on the export and transfer of anti-personnel land mines expired in January 2002. Turkey has decided to extend once again her moratorium on the export and transfer of anti-personnel land mines, this time indefinitely, as an expression of her sincere commitment to becoming party to the Ottawa Convention.¹²⁸

97. At the 27th International Conference of the Red Cross and Red Crescent in 1999, Turkmenistan stated that it would "continue practical efforts to increase the number of governments joining the Ottawa Convention. As a country strongly backing the Ottawa process, Turkmenistan is committing itself to be in the lead of the Movement for complete elimination of land-mines."¹²⁹

98. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, Ukraine declared that:

Being an active participant of the Ottawa process, which by no means has the intention to compete with the Amended Protocol II, Ukraine follows consequent policy directed to the prohibition and elimination of APLs, as exemplified in spring 1998 by destruction of 100 thousands of PFM-1 type mines in stocks, signing on 24 February 1999 the Ottawa convention as well as prolongation for subsequent four years of the moratorium on export of all types of APLs, that originally was introduced by governmental Decree in September 1995.¹³⁰

99. In 1995, during a debate in the First Committee of the UN General Assembly, the US stated that "we must renew our commitment to clear, control

¹²⁷ Turkey, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/56/PV.11, 17 October 2001, pp. 14–15.

and eventually eliminate these indiscriminate killers and we must act on this commitment now".¹³¹

100. In 1996, in a White House fact sheet announcing its anti-personnel landmine policy, the US stated that it would "aggressively pursue an international agreement to ban use, stockpiling, production, and transfer of anti-personnel landmines with a view to completing the negotiation as soon as possible".¹³²

101. In 1998, US Presidential Decision Directive (PDD) 64 stated that the US would sign the 1997 Ottawa Convention by 2006 if it succeeded in developing suitable alternatives to anti-personnel mines and mixed anti-tank systems by that time. It also stated that the US would end the use of anti-personnel landmines outside Korea by 2003.¹³³

III. Practice of International Organisations and Conferences

United Nations

102. In a resolutions adopted in 1996, the UN Security Council called upon "the Government of Angola and UNITA to signal their commitment to peace by destroying their stockpiles of landmines".¹³⁴ In a further resolution adopted the same year, the Security Council reiterated "the need for continued commitment to peace by destruction of stockpiles of landmines monitored and verified by UNAVEM III".¹³⁵

103. In a resolution adopted in 1997 on the situation in Georgia, the UN Security Council stated that it condemned "the continued laying of mines, including new types of mines, in the Gali region, which has already caused several deaths and injuries among the civilian population and the peacekeepers and the observers of the international community". It called upon the parties "to take all measures in their power to prevent mine-laying and intensified activities by armed groups".¹³⁶ In another resolution adopted several months later, the UN Security Council repeated this call.¹³⁷

104. In a resolution adopted in 1998 on the situation in Angola, the UN Security Council called on the government of Angola and in particular UNITA "to cease minelaying activity".¹³⁸

105. In two resolutions adopted in 1999 and 2000 on the protection of civilians in armed conflict, the UN Security Council took note of the entry into force

¹³⁸ UN Security Council, Res. 1213, 3 December 1998, § 7.

of the 1997 Ottawa Convention and of the 1996 Amended Protocol II to the CCW and recalled “the relevant provisions contained therein”. It further noted “the beneficial effects that their implementation will have on the safety of civilians”.¹³⁹

106. In a resolution adopted in 1980, the UN General Assembly welcomed the successful conclusion of the 1980 CCW and its Protocols and commended the Convention and the three annexed Protocols to all States “with a view to achieving the widest possible adherence to these instruments”.¹⁴⁰

107. In numerous resolutions adopted between 1981 and 1998, the UN General Assembly urged all States that had not done so to accede to the 1980 CCW and its Protocols.¹⁴¹

108. In two resolutions adopted in 1994 and 1995 on the moratorium on the export of anti-personnel landmines, the UN General Assembly stated that it encouraged “further immediate international efforts to seek solutions to the problems caused by anti-personnel land-mines, with a view to the eventual elimination of anti-personnel land-mines”.¹⁴²

109. In three resolutions adopted between 1994 and 1996, the UN General Assembly urged the Cambodian government to ban all anti-personnel landmines.¹⁴³

110. In a resolution adopted in 1996, the UN General Assembly recalled with satisfaction “its resolutions 49/75 D and 50/70 O, in which it, *inter alia*, established as a goal of the international community, the eventual elimination of anti-personnel landmines”. The General Assembly declared that it recognised the need to pursue “an effective, legally binding international agreement to ban the use, stockpiling, production and transfer of anti-personnel landmines”.¹⁴⁴

111. In a resolution adopted in 1997, the UN General Assembly urged all States to adhere to the 1997 Ottawa Convention. It stressed the need to work towards universalisation of this Convention in all relevant fora.¹⁴⁵

¹⁴⁴ UN General Assembly, Res. 51/45 S, 10 December 1996, preamble. (The resolution was adopted by 155 votes in favour, none against and 10 abstentions. Abstaining: Belarus, China, Cuba, North Korea, South Korea, Israel, Pakistan, Russia, Syria and Turkey.)

¹⁴⁵ UN General Assembly, Res. 52/38 A, 9 December 1997, preamble. (The resolution was adopted by 142 votes in favour, none against and 18 abstentions. Abstaining: Azerbaijan, China, Cuba, Egypt, India, Iran, Israel, Kazakhstan, South Korea, Mongolia, Morocco, Myanmar, Pakistan, Russia, Syria, Tajikistan, Turkey and US.)

112. In a resolution adopted in 1997, the UN General Assembly urged “all States and regional organizations to intensify their efforts to contribute to the objective of the elimination of anti-personnel landmines”.¹⁴⁶

113. In a resolution adopted in 1998, the UN General Assembly reiterated its invitation to all States to accede to or ratify the 1997 Ottawa Convention.¹⁴⁷

114. In two resolutions adopted in 1999 and 2000 respectively, the UN General Assembly emphasised the “desirability of attracting the adherence of all States to the [Ottawa] Convention” and stated its determination “to work strenuously towards the promotion of its universalization”. The General Assembly also invited “all States that have not ratified the Convention or acceded to it to provide, on a voluntary basis, information to make global mine action efforts more effective”.¹⁴⁸

115. In a resolution adopted in 1996 on the situation of human rights in Cambodia, the UN Commission on Human Rights welcomed “the intention of the Government of Cambodia to ban all anti-personnel landmines”.¹⁴⁹

116. In two resolutions adopted in 1995 and 1996 respectively, the UN Sub-Commission on Human Rights urged States that had not yet done so to sign and ratify the 1980 CCW and its Protocols and declared itself “in favour of a total ban on the production, marketing and use of anti-personnel landmines”. In the second resolution, the Sub-Commission declared that it favoured a total ban on anti-personnel landmines “as a means to protect the right to life” and urged all States “to modify, where necessary, their legislation in order to prohibit the production, marketing and use of anti-personnel land-mines in and from their territories”.¹⁵⁰

117. In 1994, in a report on assistance in mine clearance, the UN Secretary-General stated that the “best and most effective way to halt the proliferation of mines is to ban completely the production, use and transfer of all landmines.

¹⁴⁶ UN General Assembly, Res. 52/38 H, 9 December 1997, § 1. (The resolution was adopted by 147 votes in favour, none against and 15 abstentions. Abstaining: Benin, Botswana, Cuba, Eritrea, Indonesia, Kenya, Malawi, Mexico, Mozambique, Namibia, Philippines, South Africa, Togo, Zambia and Zimbabwe.)

¹⁴⁷ UN General Assembly, Res. 53/77 N, 4 December 1998, § 1. (The resolution was adopted by 147 in favour, none against and 21 abstentions. Abstaining: Azerbaijan, China, Cuba, Egypt, India, Iran, Israel, Kazakhstan, Libya, Marshall Islands, Micronesia, Morocco, Myanmar, Pakistan, South Korea, Russia, Syria, Tajikistan, US, Vietnam and Yemen.)

¹⁴⁸ UN General Assembly, Res. 54/54 B, 1 December 1999, preamble and § 5 (the resolution was adopted by 139 in favour, one against and 20 abstentions. Against: Lebanon. Abstaining: Azerbaijan, China, Cuba, Egypt, India, Iran, Israel, Kazakhstan, South Korea, Libya, Marshall Islands, Micronesia, Morocco, Myanmar, Pakistan, Russia, Syria, US, Uzbekistan and Vietnam); Res. 55/33 V, December 2000, preamble and § 5 (the resolution was adopted by 143 votes in favour, none against and 22 abstentions. Abstaining: Azerbaijan, China, Cuba, Egypt, India, Iran, Israel, Kazakhstan, South Korea, Kyrgyzstan, Lebanon, Libya, Marshall Islands, Micronesia, Morocco, Myanmar, Pakistan, Russia, Syria, US, Uzbekistan and Vietnam).

¹⁴⁹ UN Commission on Human Rights, Res. 1996/54, 19 April 1996, § 22.

¹⁵⁰ UN Sub-Commission on Human Rights, Res. 1995/24, 24 August 1995, §§ 2 and 7; Res. 1996/15, 23 August 1996, preamble and §§ 1, 2 and 3.

Member States are invited to consider establishing such a ban as a matter of urgency."¹⁵¹

118. In 1994, in an article on landmines in *Foreign Affairs*, the UN Secretary-General stated that "the nature of mines makes them indiscriminate as to their effect; as such, they are prohibited under international humanitarian law, and practical measures should be taken to put that prohibition into general practice". He went on to suggest that the aim of any future international mines treaty should be "to reach agreement on a total ban on the production, stockpiling, trade and use of mines and their components".¹⁵²

119. In 1995, in a report on assistance in mine clearance, the UN Secretary-General emphasised that "the ultimate goal must be a total ban on the production, transfer and use of landmines. Only a total ban will stop their spread."¹⁵³

120. In 1996 and again in 1997, the UN Secretary-General reported that a total ban on landmines remained the ultimate objective of his office.¹⁵⁴

121. In 1996, in a report on the impact of armed conflict on children, the UN Secretary-General stated that "the only viable long-term solution to the global land-mine epidemic is a total and immediate ban on all land-mines, beginning with anti-personnel mines" and commended an initiative for a statutory ban on landmines.¹⁵⁵

122. In 1998, in a report on assistance in mine clearance, the UN Secretary-General emphasised the importance of the 1997 Ottawa Convention and of the 1996 Amended Protocol II to the CCW, as well as the desirability of attracting the adherence of all States to both instruments.¹⁵⁶

123. In 1997, in a report on the situation of human rights in Cambodia, the Special Representative of the UN Commission on Human Rights stated that the use of anti-personnel landmines by any party to the conflict must be stopped. He recommended an initiative for a statutory ban on landmines.¹⁵⁷

Other International Organisations

124. In a resolution on landmines in Angola adopted at its Dakar Session in 1995, the ACP-EU Joint Assembly state that it supported "all current appeals,

namely within the framework of the United Nations, to ban globally all use, production and export of anti-personnel land mines".¹⁵⁸

125. In a resolution on landmines adopted at its Brussels Session in 1995, the ACP-EU Joint Assembly called for a "total ban on the sale, production, transfer, export and use of land mines and their components". It further urged that:

Pending the adopting and implementation of all necessary national and international legal instruments, manufacturers and national suppliers of land mines should be held responsible as reflected, for example, by the introduction of a tax intended to fund the destruction of these mines.¹⁵⁹

126. In a resolution on anti-personnel mines adopted at its Windhoek Session in March 1996, the ACP-EU Joint Assembly expressed regret that the First Review Conference of States Parties to the CCW in 1995 had not reached an agreement to ban anti-personnel mines. It called on all ACP and EU member States "to draw up and adopt without delay national legislation placing an outright ban on the production, stockpiling, transfer, sale, import, export and use of anti-personnel land mines and/or their component parts" and called for "the destruction of existing stockpiles wherever they may be held, and whatever their type or particular characteristics".¹⁶⁰

127. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe emphasised that it "appreciates... [the] diplomatic efforts [of the ICRC] to secure the banning of certain particularly cruel weapons, such as antipersonnel mines".¹⁶¹ It also invited:

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

- ...
- i. support total prohibition of the transfer and use of land-based antipersonnel mines, and to ban their export immediately.¹⁶²

128. In a press release issued in 1996, the Parliamentary Assembly of the Council of Europe demanded a total ban on the transfer, exportation and use of anti-personnel landmines.¹⁶³

129. In 1995, in answer to a question from the European Parliament, the EU Council of Ministers stated that member States welcomed the adoption of a

resolution declaring the elimination of landmines as a goal of the 49th Session of the UN General Assembly.¹⁶⁴

130. In 1995, in answer to a question from the European Parliament, the European Commission stated that it was conscious of the suffering inflicted by landmines and that it supported “further measures for the curtailment of the availability and use of anti-personnel landmines, through multilateral action, with an effective regime of control and verification and with the ultimate goal of eliminating such weapons”.¹⁶⁵

131. In 1996, the EU Council of Ministers adopted a joint action on anti-personnel landmines in order to achieve their complete elimination. The way to reach this objective, it stated, was through raising the issue in the appropriate international fora. It declared that member States would “endeavour to implement national restrictions or bans additional to those contained in the 1996 Amended Protocol II to the CCW, particularly on the operational use of anti-personnel landmines”.¹⁶⁶

132. In a resolution adopted in 1995 on the failure of the international conference on anti-personnel mines, the European Parliament reiterated “its demand for a total ban on anti-personnel mines and spare parts, to cover the production, storage, transfer, sale, export and use of such weapons”. It called on “all Member States to establish immediately such a ban in the European Union as a joint action under the Common Foreign and Security Policy”.¹⁶⁷

133. In a resolution adopted in 1996 on the Ottawa Conference on anti-personnel landmines, the European Parliament reiterated its demand “for a total ban on anti-personnel mines to cover the production, storage, transfer, sale, export and use of such weapons” and called on the EU and its member States to unilaterally ban the production and use of all mines.¹⁶⁸

134. In 1995, during a debate in the First Committee of the UN General Assembly, the EU called on all participating States at the Review Conference of States Parties to the CCW:

to spare no effort to ensure a satisfactory outcome of the Review Conference, which will significantly reduce the dangers posed by the indiscriminate use of landmines and contribute to the eventual elimination of anti-personnel landmines, as viable and humane alternatives are developed, as the ultimate goal of efforts in this field.¹⁶⁹

¹⁶⁹ EU, Statement by Spain on behalf of the EU before the First Committee of the UN General Assembly, UN Doc. A/C.1/50/PV.3, 16 October 1995, p. 13.

135. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, the EU stated that “the total elimination of anti-personnel mines remains a key objective, as provided for in the Ottawa Convention”.¹⁷⁰

136. In 2000, during a debate in the First Committee of the UN General Assembly, the EU welcomed the large number of signatories to the 1997 Ottawa Convention and called upon “all States to work together to achieve the total elimination of anti-personnel landmines throughout the world”.¹⁷¹

137. In a resolution adopted in 1994 on respect for IHL and support for humanitarian action in armed conflicts, the OAU Council of Ministers invited “all States that have not yet become party to the ... [1980] CCW, to consider, or reconsider, without delay the possibility of doing so in the near future”.¹⁷²

138. In a resolution adopted in 1995 on the 1980 CCW and problems posed by the proliferation of anti-personnel mines in Africa, the OAU Council of Ministers stated that it was concerned by the indiscriminate use of landmines worldwide, and especially in Africa. It urged all members “to defend an African common position ... particularly: (i) the total ban on the manufacture and use of mines”.¹⁷³

139. In a resolution adopted in 1996 on the revision of the 1980 CCW and the problems posed by the proliferation of anti-personnel mines in Africa, the OAU Council of Ministers noted that Africa had the largest presence of landmines of all continents. It therefore called upon African sub-regional organisations to take initiatives to ban landmines.¹⁷⁴

140. In a resolution adopted in 1996 on international humanitarian law, water and armed conflict in Africa, the OAU Council of Ministers reaffirmed Africa’s common position supporting a total ban on anti-personnel landmines.¹⁷⁵

141. In 1997, in a decision based on the report of the OAU Secretary-General on the issue of anti-personnel mines and the efforts undertaken at the international level to achieve a global prohibition, the OAU Council of Ministers urged its members to participate fully and actively in the Ottawa process in order to sign a treaty completely banning landmines.¹⁷⁶

142. In the recommendations of the second OAU/ICRC seminar on IHL for diplomats accredited to the OAU held in 1995, the participants expressed “their deep concern about the scourge of mines and their generalised and indiscriminate use and the attendant harmful consequences”. They recommended the “establishment and adoption within that perspective, of an African common position on the following issues: a total ban of the manufacture and use of

mines; the extension of the scope of implementation of the 1980 Convention to non-international armed conflict".¹⁷⁷

143. In the recommendations of the third OAU/ICRC seminar on IHL for diplomats accredited to the OAU held in 1996, the participants reaffirmed "the African common position on the total ban on anti-personnel mines as contained in Resolution CM/Res. 1628 (LXIII)" and deplored "the mixed outcome" of the 1996 CCW Review Conference. They stressed "the necessity to adopt purposeful measures at both national and regional levels to ensure a total ban on anti-personnel mines".¹⁷⁸

144. In the recommendations of the fourth OAU/ICRC seminar on IHL for diplomats accredited to the OAU held in 1997, the participants stated that they "appreciated the efforts made by the ICRC and the OAU for the total elimination of anti-personnel mines, that is, the total ban on their production, transfer, stockpiling". They further expressed their support for "the Ottawa process aimed at the conclusion of a Treaty on the total ban on mines in December 1997 and called upon the African countries to contribute fully to it".¹⁷⁹

145. In 1997, the OAU Secretary-General reported that the government of Mozambique, during the Fourth International Conference of NGOs on Land Mines, held in Maputo in February 1997, had announced its decision to prohibit, with immediate effect, the production, marketing, utilisation and unauthorised transportation of anti-personnel mines. The Secretary-General further noted that:

This announcement, which came after the decision made by South Africa on 19th of February to prohibit the utilization, development, production and storage of mines, was warmly welcomed by the participants. The meeting also commended the OAU for the resolutions it adopted and, through which, it unanimously stood for a total ban on mines. . . . At the end of the meeting, the participants adopted a declaration calling upon all governments to proceed resolutely with the signing of the [Ottawa] Treaty.¹⁸⁰

146. In April 1998, in a report on the OAU and Rappane's Continental Conference on Children in Situations of Armed Conflict, the OAU Secretary-General stated that member States should give their full support to the 1997 Ottawa Convention and that "the use of landmines by persons involved in armed conflict, whether by rebel forces or any other group, should be condemned and the perpetrators treated as the authors of crimes against humanity and punished in accordance with the law in force".¹⁸¹

147. In an introductory note to the proceedings of the OAU Conference of Heads of State and Government and the Council of Ministers held in Burkina Faso in June 1998, the OAU Secretary-General wrote that the Council of Ministers "invites its members to sign and ratify the Ottawa treaty".¹⁸²

148. In two resolutions adopted in 1994 and 1996 on respect for IHL, the OAS General Assembly urged member States to accede to the 1980 CCW.¹⁸³

149. In a resolution adopted in 1995 on respect for international humanitarian law, the OAS General Assembly urged all member States to take part in the Review Conference of States Parties to the CCW "with a view to promoting, in such countries as consider doing so desirable, the eventual prohibition of anti-personnel mines".¹⁸⁴

150. In a resolution adopted in 1996, the OAS General Assembly set as its goal "the global elimination of anti-personnel landmines and conversion of the Western Hemisphere into an antipersonnel-landmine-free zone". It also encouraged member States to adopt, as a preliminary step towards a complete ban, domestic legislation to prohibit private possession and transfer of landmines.¹⁸⁵

151. In a resolution adopted in 1998, the OAS General Assembly reaffirmed its goal "of the global elimination of antipersonnel land mines and the conversion of the Western Hemisphere into an antipersonnel-landmine-free zone". It urged "member States that have not yet signed or ratified the Ottawa Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction to consider doing so as soon as possible to ensure its earliest possible entry to force".¹⁸⁶

152. In two resolutions on the elimination of anti-personnel mines and mine-clearing operations adopted in 1995 and 1996 respectively, the OIC expressed its "deep concern over the consequences of the use of anti-personnel mines on the security of civilian populations and their economic development". It asked "OIC member states to take part in the efforts aimed at adopting effective measures to put an end to the indiscriminate use of anti-personnel mines, for their complete elimination".¹⁸⁷

International Conferences

153. In a resolution adopted in 1995 on challenges posed by calamities arising from armed conflicts, the 93rd Inter-Parliamentary Conference called on States

“to lay down a ban on anti-personnel mines” during the review of the 1980 CCW.¹⁸⁸

154. In a resolution adopted in 1995 on health and war, the Conference of African Ministers of Health requested member States “to decree the ban on anti-personnel mines on the review of the CCW . . . and to extend the Convention to cover all internal conflicts”.¹⁸⁹

155. During the First Session of the First Review Conference of States Parties to the CCW in November 1995, the effort to create a global ban on anti-personnel landmines was supported by “sixteen States, the UN Secretary-General, the heads of numerous UN agencies, the Council of Ministers of the Organization of African Unity, the European Parliament and Pope John Paul II”.¹⁹⁰

156. The 26th International Conference of the Red Cross and Red Crescent in 1995 adopted a resolution on the protection of the civilian population in period of armed conflict in which it took note of the fact that “the Movement and a growing number of States, international, regional and non-governmental organizations have undertaken to work urgently for the total elimination of anti-personnel landmines”. It further noted that “the ultimate goal of States is to achieve the eventual elimination of anti-personnel landmines as viable alternatives are developed that significantly reduce the risk to the civilian population”.¹⁹¹

157. In 1996, the Canadian government hosted an International Strategy Conference, held in Ottawa, entitled “Towards a Global Ban on Anti-personnel Mines”. The conference was attended by 50 pro-ban States, which became known as the Ottawa Group,¹⁹² as well as by numerous inter-governmental and non-governmental organisations. The Final Declaration of the Ottawa Conference committed all those present to work together to ensure “the earliest possible conclusion of a legally binding international agreement to ban anti-personnel mines” and for this purpose noted that a follow-on conference would be held in Brussels in 1997 “to review the progress of the international

community in achieving a global ban on anti-personnel mines".¹⁹³ The Ottawa Conference also adopted a detailed Global Plan of Action which laid out "concrete activities to be undertaken by the international community – on an immediate and urgent basis – to build upon the Ottawa Declaration and to move this process ahead in preparation for the follow-up meeting". The Global Plan of Action stated that "building the necessary political will for a new legally-binding international agreement banning AP mines will require more nations to adopt national bans or moratoria on the production, stockpiling, use and transfer of AP mines".¹⁹⁴

158. In a resolution adopted in 1996 on a worldwide ban on anti-personnel mines and the need for mine clearance for humanitarian purposes, the 96th Inter-Parliamentary Conference called on parliamentarians "to urge their governments to ban anti-personnel mines . . . and support international efforts to achieve a binding international agreement on a global ban". It requested the UN "to strengthen its efforts to secure the elimination of anti-personnel landmines".¹⁹⁵

159. The Final Declaration of the 1997 Brussels Conference on Anti-personnel Landmines, which was signed by over 100 States, recalled UN General Assembly Resolution 51/45 S and urged the vigorous pursuit of "an effective, legally binding international agreement to ban the use, stockpiling, production and transfer of anti-personnel landmines". The Declaration also welcomed "the convening of a Diplomatic Conference by the Government of Norway in Oslo on 1 September 1997 to negotiate such an agreement".¹⁹⁶

160. The Maputo Declaration, adopted by the First Meeting of States Parties to the Ottawa Convention in 1999, reaffirmed their "unwavering commitment to the total eradication of an insidious instrument of war and terror: anti-personnel mines". The Declaration also called upon "those who continue to use, develop, produce, otherwise acquire, stockpile, retain and transfer these weapons: cease now, and join us in this task". The parties to the 1997 Ottawa Convention further declared:

In this spirit, we voice our outrage at the unabated use of anti-personnel mines in conflicts around the world. To those few signatories who continue to use these

weapons, this is a violation of the object and purpose of the Convention that you solemnly signed. We call upon you to respect your commitments.¹⁹⁷

161. In a resolution adopted on the occasion of the 50th anniversary of the Geneva Conventions in 1999 on the contribution of parliaments to ensuring respect for and promoting International humanitarian law, the 102nd Inter-Parliamentary Conference stressed “the serious threat posed by the widespread use of landmines, which have brought dead to many innocent civilians and hindered the return of refugees, the provision of infrastructure and reconstruction in the affected areas long after hostilities have ended”. It therefore stated that it:

10. Also calls on States to accede to or ratify the Ottawa Convention on Anti-Personal Mines, if they have not done so;
- ...
12. Calls on States to assist, at the international level, in efforts to eliminate the use of landmines, and to monitor compliance with the provisions of the Ottawa Convention;
- ...
14. Condemns those States and non-State actors that produce, use or export these obnoxious weapons in defiance of the Ottawa Convention;
15. Urges States that produce or use this pernicious weapons, to cease production immediately.¹⁹⁸

162. The Declaration adopted by the Second Meeting of States Parties to the Ottawa Convention in 2000 stated that:

5. We deplore the continued use of anti-personnel mines. Such acts are contrary to the aims of the Convention and exacerbate the humanitarian problems already caused by the use of these weapons. We call upon all those who continue to use anti-personnel mines, as well as those who develop, produce, otherwise acquire, stockpile, retain and transfer these weapons, to cease now and to join us in the task of eradicating these weapons.
6. We implore those States that have declared their commitment to the object and purpose of the Convention and that continue to use anti-personnel mines to recognize that this is a clear violation of their solemn commitment. We call upon all States concerned to respect their commitments.¹⁹⁹

163. In the Final Declaration of the Second Review Conference of States Parties to the CCW in 2001, the participants expressed:

their conviction that all States should strive towards the goal of the eventual elimination of anti-personnel mines globally and in this regard [noted] that a significant

¹⁹⁷ First Meeting of States Parties to the Ottawa Convention, Maputo, 3–7 May 1999, Declaration, UN Doc. APLC/MSP.1/1999/1, 20 May 1999, §§ 1, 6 and 11, see also § 3.

¹⁹⁸ 102nd Inter-Parliamentary Conference, Berlin, 10–15 October 1999, Resolution on the contribution of parliaments to ensuring respect for and promoting international humanitarian law on the occasion of the 50th anniversary of the Geneva Conventions, preamble and §§ 10, 12, 14 and 15.

¹⁹⁹ Second Meeting of States Parties to the Ottawa Convention, Geneva, 11–15 September 2000, Declaration, UN Doc. APLC/MSP.2/2000/L.8, 13 September 2000, p. 12, §§ 5–6.

number of States Parties have formally committed themselves to a prohibition of the use, stockpiling, production and transfer of anti-personnel mines and on their destruction.²⁰⁰

The following 65 States participated in the conference as parties to the 1980 CCW: Argentina, Australia, Austria, Bangladesh, Belarus, Belgium, Benin, Bolivia, Bosnia and Herzegovina, Brazil, Bulgaria, Canada, China, Colombia, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Guatemala, Holy See, Hungary, India, Ireland, Israel, Italy, Japan, Jordan, South Korea, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Mauritius, Mexico, Monaco, Mongolia, Netherlands, New Zealand, Norway, Pakistan, Peru, Philippines, Poland, Portugal, Romania, Russian Federation, Senegal, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Tunisia, Ukraine, UK, US and SFRY (FRY); the following four States participated as Signatory States: Egypt, Morocco, Turkey and Vietnam; the following 18 States not parties to the 1980 CCW participated as observers: Albania, Armenia, Bahrain, Chile, Eritrea, Honduras, Iran, Kuwait, Libya, Oman, Saudi Arabia, Singapore, Sri Lanka, Tanzania, Thailand, Tonga, Venezuela and Yemen.²⁰¹

164. The Final Declaration of the African Parliamentary Conference on International Humanitarian Law for the Protection of Civilians during Armed Conflict in 2002 emphasised that the participants were “worried in the face of the rapid expansion of arms trade and the uncontrolled proliferation of weapons, notably those which can have indiscriminate effects or cause unnecessary suffering, like antipersonnel mines”.²⁰²

IV. Practice of International Judicial and Quasi-judicial Bodies

165. In its Final Report to the ICTY Prosecutor in 2000, the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia stated that “whether antipersonnel landmines are prohibited under current customary law is debatable, although there is a strong trend in that direction”.²⁰³

166. In a resolution on anti-personnel mines adopted in 1995, the ACiHPR urged African States to “participate in large numbers in the 1996 CCW Review Conference to press for the introduction of a clause on the prohibition or restriction of the use of mines in that Convention”.²⁰⁴

²⁰⁴ ACiHPR, Res. 4 (XVII), 13–22 March 1995, §§ 1 and 2.

V. Practice of the International Red Cross and Red Crescent Movement

167. In 1993, in a publication entitled "Mines: A Perverse Use of Technology", the ICRC condemned the indiscriminate use of anti-personnel mines. The foreword by the ICRC President urged "all States, humanitarian organizations and peoples of the world... to unite their energies to eradicate this scourge".²⁰⁵

168. In February 1994, prior to the First Preparatory Meeting of a group of governmental experts for the Review Conference of the CCW, the ICRC President stated that "from a humanitarian point of view, we believe that a world-wide ban on anti-personnel mines is the only, truly effective solution".²⁰⁶

169. In May 1994, at the Second Session of the Meeting of Governmental Experts prior to the CCW Review Conference, the ICRC presented several alternative proposals on landmines. The ICRC described its proposal calling for a prohibition on the use, manufacture, stockpiling or transfer of anti-personnel mines as the way to "most effectively deal with the problems caused by landmines".²⁰⁷

170. In 1994, in a statement before the First Committee of the UN General Assembly, the ICRC declared that it was "firmly of the opinion that the only really effective measure is to ban the use and production of anti-personnel landmines".²⁰⁸

171. In 1995, in a position paper released following the final meeting of the group of governmental experts that proposed amendments for the First Session of the CCW Review Conference, the ICRC expressed its conviction that the "only clear and effective means of ending the suffering inflicted on civilians by anti-personnel landmines is their total prohibition".²⁰⁹

172. At the UN International Meeting on Mine Clearance in 1995, the ICRC President stated that "it is essential that the forthcoming Vienna Review Conference of the 1980 UN Convention on Certain Conventional Weapons reaches

²⁰⁵ ICRC, *Mines: A Perverse Use of Technology*, Geneva, 1993, extracts reprinted in Louis Maresca and Stuart Maslen (eds.), *The Banning of Anti-Personnel Landmines*, Cambridge University Press, Cambridge, 2000, pp. 257–263.

the goal, endorsed by the 49th UN General Assembly, of the elimination of anti-personnel mines".²¹⁰

173. In 1995, in a statement before the First Committee of the UN General Assembly, the ICRC expressed its disappointment at the failure of the First Review Conference of States Parties to the CCW to reach agreement on a strengthened Protocol II and appealed to States "to evaluate whether measures short of a total ban on anti-personnel landmines will in fact put a stop to the present situation".²¹¹

174. In 1995, in a position paper on landmines, the ICRC reiterated its earlier position stating that it remained convinced that "the only effective means of ending the scourge of anti-personnel landmines is to entirely prohibit their production, transfer and use".²¹²

175. In November 1995, the ICRC, together with National Red Cross and Red Crescent Societies, launched an international media campaign calling for a ban on anti-personnel landmines under the slogan "Landmines must be stopped".²¹³

176. At its Geneva Session in 1995, the Council of Delegates adopted a resolution on anti-personnel landmines in which it expressed its "great concern about the indiscriminate effects of anti-personnel landmines and the consequences for civilian populations and humanitarian action" and urged all components of the Movement "to work for a total ban on anti-personnel landmines".²¹⁴

177. At the Second Session of the First Review Conference of States Parties to the CCW in 1996, the ICRC stated that "only a total ban on anti-personnel landmines can solve the problem".²¹⁵

178. In a press release issued at the end of the Second Session of the First Review Conference of States Parties to the CCW in May 1996, the ICRC described the 1996 Amended Protocol II to the CCW as "woefully inadequate" in its

limitations on the use of anti-personnel mines and called for “ongoing work towards a total ban” to be undertaken at national and regional levels.²¹⁶

179. At the International Strategy Conference Towards a Global Ban on Anti-Personnel Mines in 1996, the ICRC President stated that “anti-personnel mines must not only be outlawed, but their use must also be stigmatized, so that whatever their understanding of the law combatants will choose not to use them because they are considered abhorrent to the societies in which they operate”.²¹⁷

180. In 1996, in the First Committee of the UN General Assembly, the ICRC welcomed the establishment of the Ottawa Group and the Canadian initiative to invite foreign ministers to Ottawa to sign a mine ban treaty in December 1997. The ICRC stated that it would promote adherence to the 1996 Amended Protocol II to the CCW, but urged States “to go far beyond the provisions of the Protocol and to renounce the production, transfer and use of anti-personnel mines”. The ICRC also called for the UN General Assembly to adopt a strong resolution unequivocally supporting “a global ban on, and the elimination of, anti-personnel mines”.²¹⁸

181. At its Seville Session in 1997, the Council of Delegates adopted a resolution on peace, international humanitarian law and human rights in which it urgently called upon National Societies to promote the signing by their governments of the 1997 Ottawa Convention, “to work for the earliest possible ratification of this treaty to ensure its rapid entry into force, and to encourage their governments to take all appropriate additional means to achieve the total elimination of all anti-personnel mines”.²¹⁹

182. In a statement at the First Meeting of States Parties to the Ottawa Convention in 1999, the ICRC voiced its “concern about the reports of new use of landmines in some countries. There is clearly a need for a collective response from States Parties on this issue. This concern is particularly acute when such use involves a signatory State.” The ICRC urged “the conference to send a clear message that anti-personnel mines are no longer an acceptable weapon of warfare and to remind any signatory State using them that such use is contrary to the spirit and purpose of the Ottawa treaty”.²²⁰

²¹⁶ ICRC, Statement at the First Review Conference of States Parties to the CCW (Second Session), ICRC Views Amended Landmine Protocol as “Woefully Inadequate”, Geneva, 3 May 1996, reprinted in Louis Maresca and Stuart Maslen (eds.), *The Banning of Anti-Personnel Landmines*, Cambridge University Press, Cambridge, 2000, pp. 448–449.

²²⁰ ICRC, Statement by the Vice President at the First Meeting of States Parties to the Ottawa Convention, Maputo, 3–7 May 1999.

183. At its Geneva Session in 1999, the Council of Delegates adopted a resolution in which it approved the Movement's Strategy on Landmines, one of the core elements of which was to "achieve universal adherence to and effective implementation of the norms established by the Ottawa Convention and amended Protocol II to the 1980 Convention on Certain Conventional Weapons".²²¹

VI. Other Practice

184. In 1993, an armed opposition group stated that it had never used landmines.²²²

185. In the Final Declaration of the ICRC Regional Seminar for Asian Military and Strategic Studies Experts in 1997, the participants called upon States of the Asian region to consider the following urgent measures, especially:

1. The adoption of national prohibitions on the production, stockpiling, transfer and use of anti-personnel mines . . .
5. The rapid adoption of a regional agreement to prohibit remotely delivered anti-personnel mines in Asia so as to prevent an escalation of mine warfare in the region and even higher levels of civilian casualties
6. Participation in upcoming negotiations aimed at the conclusion of a new treaty comprehensively prohibiting anti-personnel landmines by the end of 1997.

The participants further appealed to the international community:

1. To pursue as a matter of urgency the prohibition and elimination of anti-personnel mines . . .
3. To recognise that the use of anti-personnel landmines in internal armed conflicts, either by State or non-State actors, should not be condoned
4. To explore how non-State actors involved in internal armed conflicts can be encouraged to end the use of anti-personnel mines.²²³

186. In its statement to the First Meeting of States Parties to the Ottawa Convention in 1999, the ICBL noted the use of mines in 13 conflicts and allegations of such use in 5 other conflicts during the period December 1997–May 1999.²²⁴

187. The ICBL's *Landmine Monitor Report 1999* noted that while there was no evidence of anti-personnel landmine use by any of the States parties to the 1997 Ottawa Convention, there was evidence to suggest that mines had been used in 13 conflicts during the period December 1997–March 1999 and there were allegations of such use in five other conflicts in the same period. According to

²²¹ International Red Cross and Red Crescent Movement, Council of Delegates, Geneva Session, 29–30 October 1999, Res. 10, § 1.

²²⁴ ICBL, Statement at the First Meeting of States Parties to the Ottawa Convention, Maputo, 3–7 May 1999.

the report, there was alleged new use of anti-personnel mines by government forces in this period in: Angola, Burma, DRC, Eritrea, Guinea-Bissau, Senegal, Sri Lanka, Sudan, Turkey and FRY.²²⁵

188. In presenting the *Landmine Monitor Report* at the First Meeting of States Parties to the Ottawa Convention in 1999, the ICBL highlighted the use of anti-personnel mines by three States signatory to the 1997 Ottawa Convention:

Angola's continued use has been properly noted and criticised by many yesterday and today. Guinea-Bissau also used mines in its internal conflict in 1998, and it is likely that the forces of Senegal used mines as well in that conflict. . . Yugoslavia has rightly been criticised for recent mine use, but non-signatories and non-state actors are still using mines on a near daily basis in places such as Burma and Sri Lanka, and on occasion in such rarely noticed places as Djibouti.²²⁶

189. At the Second Meeting of States Parties to the Ottawa Convention in 2000, the ICBL delivered a statement in which it urged pro-ban governments "not only to criticise and stigmatise mine users consistently, but also to take concrete steps to penalise them, diplomatically or otherwise – while taking care not to penalise civilians living in mined areas". In the same statement, while noting the overall decrease in anti-personnel mine use throughout the world, the ICBL highlighted the "disturbing" use of mines by Ottawa Convention signatories Angola, Burundi and Sudan and stated that even though these countries have yet to ratify the treaty "they are in violation of international law because they engage in activities that defeat the object and purpose of the treaty that they have signed".²²⁷

190. The ICBL's *Landmine Monitor Report 2000* identified 11 governments and dozens of armed opposition groups that had used mines since the 1997 Ottawa Convention entered into force in March 1999. Non-State actors named in the report as having used anti-personnel mines between 1999 and 2000 were identified in the following regions: Angola, Afghanistan, Chechnya, Colombia, DRC, Georgia, northern Iraq, Kashmir, southern Lebanon, Nepal, Philippines, Senegal, Somalia, Sri Lanka, Sudan, Turkey and Uganda.²²⁸

B. Restrictions on the Use of Landmines

I. Treaties and Other Instruments

Treaties

191. Article 2(1) of the 1980 Protocol II to the CCW defines a mine "any munition placed under, on or near the ground or other surface area and designed

²²⁵ ICBL, *Landmine Monitor Report 1999*, 1999, Executive Summary, p. 5.

²²⁸ ICBL, *Landmine Monitor Report 2000*, August 2000, pp. 4–6.

to be detonated or exploded by the presence, proximity or contact of a person or vehicle”.

192. Article 3(4) of the 1980 Protocol II to the CCW and Article 3(10) of the 1996 Amended Protocol II to the CCW require parties to take “all feasible precautions” to protect civilians from mines. “Feasible precautions” are defined in both the original and amended protocol as “those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations”. Amended Protocol II lists these circumstances as including, but not being limited to:

- (a) the short- and long-term effect of mines upon the local civilian population for the duration of the minefield;
- (b) possible measures to protect civilians (for example, fencing, signs, warning and monitoring);
- (c) the availability and feasibility of using alternatives; and
- (d) the short- and long-term military requirements for a minefield.

193. Article 3(2) of the 1980 Protocol II to the CCW and Article 3(7) of the 1996 Amended Protocol II to the CCW prohibit the use of mines against the civilian population by way of reprisal.

194. Articles 4 and 5 of the 1980 Protocol II to the CCW provide that:

Article 4

1. This Article applies to:
 - (a) mines other than remotely delivered mines;
 - ...
2. It is prohibited to use weapons to which this Article applies in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either:
 - (a) they are placed on or in the close vicinity of a military objective belonging to or under the control of an adverse party; or
 - (b) measures are taken to protect civilians from their effects, for example, the posting of warning signs, the posting of sentries, the issue of warnings or the provision of fences.

Article 5

1. The use of remotely delivered mines is prohibited unless such mines are only used within an area which is itself a military objective or which contains military objectives, and unless:
 - (a) their location can be accurately recorded in accordance with Article 7(1)(a); or
 - (b) an effective neutralizing mechanism is used on each such mine, that is to say, a self-actuating mechanism which is designed to render a mine harmless or cause it to destroy itself when it is anticipated that the mine will no longer serve the military purpose for which it was placed in position, or a remotely-controlled mechanism which is designed to render harmless or destroy a mine when the mine no longer serves the military purpose for which it was placed in position.

2. Effective advance warning shall be given of any delivery or dropping of remotely delivered mines which may affect the civilian population, unless circumstances do not permit.

195. Upon signature of the 1980 CCW, China stated that:

The Protocol [to the CCW] on Prohibitions or Restrictions on the Use of Mines, Booby Traps and Other Devices fails to lay down strict restrictions on the use of such weapons by the aggressor on the territory of his victim and to provide adequately for the right of a state victim of an aggressor to defend itself by all necessary means.²²⁹

196. Upon ratification of the 1980 CCW, France stated that:

With reference to the scope of application defined in article 1 of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, . . . it will apply the provisions of the Convention and its three Protocols [I, II and III] to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions of 12 August 1949 [international and non-international armed conflicts].²³⁰

197. Upon accession to the 1980 CCW, the Holy See declared that:

The Holy See . . . reiterates the objective hoped for by many parties: an agreement that would totally ban anti-personnel mines, the effects of which are tragically well-known.

In this regard, the Holy See considers that the modifications made so far in the second Protocol are insufficient and inadequate. It wishes, by means of its own accession to the Convention, to offer support to every effort aimed at effectively banning anti-personnel mines . . .²³¹

198. Upon accession to the 1980 CCW, Israel stated that:

With reference to the scope of application defined in article 1 of the [1980 CCW], the Government of the State of Israel will apply the provisions of the Convention and those annexed Protocols to which Israel has agreed [I, II and III] to become bound to all armed conflicts involving regular forces of States referred to in article 2 common to the Geneva Conventions of 12 August 1949, as well as to all armed conflicts referred to in article 3 common to the Geneva Conventions of 12 August 1949.²³²

199. Upon ratification of the 1980 CCW, the US declared that:

With reference to the scope of application defined in article 1 of the Convention, . . . the United States will apply the provisions of the Convention, Protocol I,

²²⁹ China, Declaration made upon signature of the CCW, 14 September 1981, § 3.

²³⁰ France, Reservations made upon ratification of the CCW, 4 March 1988.

and Protocol II to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions for the Protection of War Victims of August 12, 1949 [international and non-international armed conflicts].²³³

200. Article 1(2) of the 1996 Amended Protocol II to the CCW provides that:

This Protocol shall apply, in addition to situations referred to in Article I of this Convention, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949 [non-international armed conflicts]. This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.

201. Article 2 of the 1996 Amended Protocol II to the CCW contains the following definitions:

For the purpose of this Protocol:

1. "Mine" means a munition placed under, on or near the ground or other surface area and designed to be exploded by the presence, proximity or contact of a person or vehicle.
- ...
3. "anti-personnel mine" means a mine primarily designed to be exploded by the presence, proximity or contact of a person and that will incapacitate, injure or kill one or more persons.

202. Article 3(11) of the 1996 Amended Protocol II to the CCW provides that "effective advance warning shall be given of any emplacement of mines... which may affect the civilian population, unless circumstances do not permit".

203. Articles 5 and 6 of the 1996 Amended Protocol II to the CCW provide that:

Article 5

1. This Article applies to anti-personnel mines other than remotely-delivered mines.
2. It is prohibited to use weapons to which this Article applies which are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex, unless:
 - (a) such weapons are placed within a perimeter-marked area which is monitored by military personnel and protected by fencing or other means, to ensure the effective exclusion of civilians from the area. The marking must be of a distinct and durable character and must at least be visible to a person who is about to enter the perimeter-marked area; and
 - (b) such weapons are cleared before the area is abandoned, unless the area is turned over to the forces of another State which accept responsibility for the maintenance of the protections required by this Article and the subsequent clearance of those weapons.

²³³ US, Declaration made upon ratification of the CCW, 24 March 1995.

3. A party to a conflict is relieved from further compliance with the provisions of sub-paragraphs 2 (a) and 2 (b) of this Article only if such compliance is not feasible due to forcible loss of control of the area as a result of enemy military action, including situations where direct enemy military action makes it impossible to comply. If that party regains control of the area, it shall resume compliance with the provisions of sub-paragraphs 2 (a) and 2 (b) of this Article.
4. If the forces of a party to a conflict gain control of an area in which weapons to which this Article applies have been laid, such forces shall, to the maximum extent feasible, maintain and, if necessary, establish the protections required by this Article until such weapons have been cleared.
5. All feasible measures shall be taken to prevent the unauthorized removal, defacement, destruction or concealment of any device, system or material used to establish the perimeter of a perimeter-marked area.
6. Weapons to which this Article applies which propel fragments in a horizontal arc of less than 90 degrees and which are placed on or above the ground may be used without the measures provided for in sub-paragraph 2 (a) of this Article for a maximum period of 72 hours, if:
 - (a) they are located in immediate proximity to the military unit that emplaced them; and
 - (b) the area is monitored by military personnel to ensure the effective exclusion of civilians.

Article 6

1. It is prohibited to use remotely-delivered mines unless they are recorded in accordance with sub-paragraph I (b) of the Technical Annex.
2. It is prohibited to use remotely-delivered anti-personnel mines which are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex.
3. It is prohibited to use remotely-delivered mines other than anti-personnel mines, unless, to the extent feasible, they are equipped with an effective self-destruction or self-neutralization mechanism and have a back-up self-deactivation feature, which is designed so that the mine will no longer function as a mine when the mine no longer serves the military purpose for which it was placed in position.
4. Effective advance warning shall be given of any delivery or dropping of remotely-delivered mines which may affect the civilian population, unless circumstances do not permit.

204. Upon acceptance of the 1996 Amended Protocol II to the CCW, Austria, Denmark, Finland, France, Germany, Ireland, South Africa and Sweden stated that:

The provisions of the amended Protocol which by their contents or nature may be applied also in peacetime, shall be observed at all times . . .

It is the understanding of [the State in question] that the word "primarily" is included in article 2, paragraph 3 of the amended Protocol to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices are not considered anti-personnel mines as a result of being so equipped.²³⁴

²³⁴ Austria, Declaration made upon acceptance of Amended Protocol II to the CCW, 27 July 1998; Denmark, Declaration made upon acceptance of Amended Protocol II to the CCW, 30 April

205. Upon acceptance of the 1996 Amended Protocol II to the CCW, Belgium stated that:

It is the understanding of the Government of the Kingdom of Belgium that the provisions of Protocol II as amended which by their contents or nature may be applied also in peacetime, shall be observed at all times.

...

It is the understanding of the Government of the Kingdom of Belgium that the word "primarily" is included in article 2, paragraph 3 of amended Protocol II to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices, are not considered anti-personnel mines as a result of being so equipped.²³⁵

206. Upon acceptance of the 1996 Amended Protocol II to the CCW, Canada made the following reservation: "Canada reserves the right to transfer and use a small number of mines prohibited under this Protocol to be used exclusively for training and testing purposes. Canada will ensure that the number of such mines shall not exceed that absolutely necessary for such purposes."²³⁶ Canada also declared that:

1. It is understood that the provisions of Amended Protocol II shall, as the context requires, be observed at all times.
2. It is understood that the word "primarily" is included in Article 2, paragraph 3 of Amended Protocol II to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices, are not considered anti-personnel mines as a result of being so equipped.
3. It is understood that the maintenance of a minefield referred to in Article 10, in accordance with the standards on marking, monitoring and protection by fencing or other means set out in Amended Protocol II, would not be considered as a use of the mines contained therein.²³⁷

207. Upon acceptance of the 1996 Amended Protocol II to the CCW, China declared that:

[T]he word "primarily" is included in article 2, paragraph 3 of the amended Protocol to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices are not considered anti-personnel mines as a result of being so equipped.²³⁸

1997; Finland, Declaration made upon acceptance of Amended Protocol II to the CCW, 3 April 1998; France, Declarations made upon acceptance of Amended Protocol II to the CCW, 23 July 1998; Germany, Declarations made upon acceptance of Amended Protocol II to the CCW, 2 May 1997; Ireland, Declaration made upon acceptance of Amended Protocol II to the CCW, 27 March 1997; South Africa, Declaration made upon acceptance of Amended Protocol II to the CCW, 26 June 1998; Sweden, Declaration made upon acceptance of Amended Protocol II to the CCW, 16 July 1997.

²³⁵ Belgium, Interpretative declarations made upon acceptance of Amended Protocol II to the CCW, 10 March 1999.

²³⁶ Canada, Reservation made upon acceptance of Amended Protocol II to the CCW, 26 June 1998.

²³⁷ Canada, Statements of understanding made upon acceptance of Amended Protocol II to the CCW, 26 June 1998, §§ 1–3.

²³⁸ China, Declaration made upon acceptance of Amended Protocol II to the CCW, 4 November 1998.

208. Upon acceptance of the 1996 Amended Protocol II to the CCW, Germany, Greece, South Africa and Sweden stated that:

It is understood that article 5, paragraph 2(b) does not preclude agreement among the states concerned, in connection with peace treaties or similar arrangements, to allocate responsibilities under paragraph 2(b) in another manner which nevertheless respects the essential spirit and purpose of the article.²³⁹

209. Upon acceptance of the 1996 Amended Protocol II to the CCW, Greece stated that:

It is understood that the provisions of the protocol shall, as the context requires, be observed at all times . . .

It is the understanding of Greece that the word "primarily" is included in article 2, paragraph 3 of the amended Protocol to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices are not considered anti-personnel mines as a result of being so equipped.²⁴⁰

210. Upon acceptance of the 1996 Amended Protocol II to the CCW, Hungary declared that:

The Republic of Hungary . . .

- 4) announces a total ban on the development, production, acquisition, export and transfer of all types of anti-personnel landmines;
- ...
- 9) reiterates her commitment to promote the early conclusion of and wide adherence to an international convention stipulating a total and comprehensive ban on anti-personnel landmines, by reaffirming her determination to contribute actively to the success of international efforts furthering this goal.²⁴¹

211. Upon acceptance of the 1996 Amended Protocol II to the CCW, Italy stated that:

The provisions of the amended Protocol which by their contents or nature may be applied also in peacetime, shall be observed at all times . . .

Under article 2 of the amended Protocol II, in order to fully address the humanitarian concerns raised by anti-personnel land-mines, the Italian Parliament has enacted and brought into force a legislation containing a far more stringent definition of those devices. In this regard, while reaffirming its commitment to promote the further development of international humanitarian law, the Italian Government confirms its understanding that the word "primarily" is included in article 2,

²³⁹ Germany, Declarations made upon acceptance of Amended Protocol II to the CCW, 2 May 1997; Greece, Declarations made upon acceptance of Amended Protocol II to the CCW, 20 January 1999; South Africa, Declaration made upon acceptance of Amended Protocol II to the CCW, 26 June 1998; Sweden, Declarations made upon acceptance of Amended Protocol II to the CCW, 16 July 1997.

²⁴⁰ Greece, Declarations made upon acceptance of Amended Protocol II to the CCW, 20 January 1999.

²⁴¹ Hungary, Declaration made upon acceptance of Amended Protocol II to the CCW, 30 January 1998, §§ 4 and 9.

paragraph 3 of the amended Protocol to clarify that mines designed to be detonated by the presence, proximity or contact of a vehicle as opposed to a person, that are equipped with anti-handling devices are not considered anti-personnel mines as a result of being so equipped.²⁴²

212. Upon acceptance of the 1996 Amended Protocol II to the CCW, Liechtenstein declared that “the provisions of the amended Protocol II which by their contents or nature may also be applied in peacetime, shall be observed at all times”.²⁴³

213. Upon acceptance of the 1996 Amended Protocol II to the CCW, the Netherlands stated that:

With regard to Article 1, paragraph 2:

The Government of the Kingdom of the Netherlands takes the view that the provisions of the Protocol which, given their content or nature, can also be applied in peacetime, must be observed in all circumstances.

...

With regard to Article 2, paragraph 3:

The Government of the Kingdom of the Netherlands takes the view that the word “primarily” means only that mines that are designed to be exploded by the presence, proximity or contact of a vehicle and that are equipped with an anti-handling device are not regarded as anti-personnel mines because of that device.²⁴⁴

214. Upon acceptance of the 1996 Amended Protocol II to the CCW, Pakistan stated that:

Article 1:

...

The provisions of the Protocol must be observed at all times, depending on the circumstances...

Article 2 (paragraph 3):

In the context of the word “primarily”, it is understood that such anti-tank mines which use anti-personnel mines as a fuse but do not explode on contact with a person are not anti-personnel mines.²⁴⁵

215. Upon acceptance of the 1996 Amended Protocol II to the CCW, Switzerland declared that it “interprets the definition of ‘anti-personnel mine’ as excluding any mine designed to explode in the presence or proximity of, or upon contact with, a vehicle, when such mine is equipped with an anti-handling device”.²⁴⁶

²⁴² Italy, Declarations made upon acceptance of Amended Protocol II to the CCW, 13 January 1999.

²⁴³ Liechtenstein, Declaration made upon acceptance of Amended Protocol II to the CCW, 19 November 1997.

²⁴⁴ Netherlands, Declaration made upon acceptance of Amended Protocol II to the CCW, 25 March 1999, §§ 1 and 2.

²⁴⁵ Pakistan, Declarations made upon acceptance of Amended Protocol II to the CCW, 9 March 1999, §§ 3 and 4.

²⁴⁶ Switzerland, Declaration made upon acceptance of Amended Protocol II to the CCW, 24 March 1998.

216. Upon acceptance of the 1996 Amended Protocol II to the CCW, the US declared that:

- (2) **EFFECTIVE EXCLUSION.** – The United States understands that, for the purposes of Article 5(6)(b) of the Amended Mines Protocol, the maintenance of observation over avenues of approach where mines subject to that Article are deployed constitutes one acceptable form of monitoring to ensure the effective exclusion of civilians.
- ...
- (5) **PEACE TREATIES.** – The United States understands that the allocation of responsibilities for landmines in Article 5(2)(b) of the Amended Mines Protocol does not preclude agreement, in connection with peace treaties or similar arrangements, to allocate responsibilities under that Article in a manner that respects the essential spirit and purpose of the Article.
- (6) **BOOBY-TRAPS AND OTHER DEVICES.** – For the purposes of the Amended Mines Protocol, the United States understands that –
 - ...
 - (B) a trip-wired hand grenade shall be considered a “booby-trap” under Article 2(4) of the Amended Mines Protocol and shall not be considered a “mine” or an “anti-personnel mine” under Article 2(1) or Article 2(3), respectively; and
 - (C) none of the provisions of the Amended Mines Protocol, including Article 2(5), applies to hand grenade other than trip-wired hand grenades.²⁴⁷

217. At the Second Session of the First Review Conference of States Parties to the CCW in 1996, Australia, Bulgaria, Canada, Czech Republic, Denmark, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Netherlands, Norway, Poland, Romania, South Africa, Sweden, UK and US each made statements of understanding concerning the word “primarily” in Article 2(3) of Amended Protocol II. All stated in similar terms that mines designed to be detonated by the presence, proximity or contact of a vehicle, as opposed to a person, that are equipped with anti-handling devices shall not be considered to be anti-personnel mines as a result of being so equipped.²⁴⁸

218. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment, not yet in force, states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal

²⁴⁷ US, Statements of understanding made upon acceptance of Amended Protocol II to the CCW, 24 May 1999, §§ 2, 5 and 6(B)–(C).

²⁴⁸ First Review Conference of States Parties to the CCW (Second Session), Interpretative statements on article 2 of Amended Protocol II, UN Doc. CCW/CONF.I/SR.14, 3 May 1996, pp. 3 and 4, § 8.

disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.

3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

Other Instruments

219. Paragraph 6 of the 1991 Memorandum of Understanding on the Application of IHL between Croatia and the SFRY requires that hostilities be conducted in accordance with the 1980 Protocol II to the CCW.

220. Paragraph 2.5 of the 1992 Agreement on the Application of IHL between the Parties to the Conflict in Bosnia and Herzegovina requires that hostilities be conducted in accordance with the 1980 Protocol II to the CCW.

II. National Practice

Military Manuals

221. Argentina's Law of War Manual reproduces the content of Articles 2(1) and (4), 3, 4 and 5 of the 1980 Protocol II to the CCW.²⁴⁹

222. Australia's Commanders' Guide lists mines under the heading "Limitations on lawful weapons" and states that "the primary concern with the employment of mines and booby traps is that they could be disturbed by innocent parties". It states, however, that the use of mines is permitted "if they can be confined to areas where only lawful combatants would encounter them".²⁵⁰ It refers to the restrictions on the use of mines contained in Article 3(3) and (4) and Article 4 of the 1980 Protocol II to the CCW. The Guide also states that:

Mines . . . may not be directed against civilians under any circumstances and they may not be used indiscriminately. Indiscriminate use is placement of such weapons which:

- a. is not on, or directed at, a military objective; or
- b. employs a method or means of delivery which cannot be directed at a specific military objective; or
- c. may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.²⁵¹

The Guide further provides that:

Remotely delivered mines may only be used within an area which is a military objective or which contains military objectives. Either the location of minefields containing remotely delivered mines must be accurately recorded or the mines

²⁴⁹ Argentina, *Law of War Manual* (1989), §§ 4.17–4.22.

²⁵⁰ Australia, *Commanders' Guide* (1994), § 316.

²⁵¹ Australia, *Commanders' Guide* (1994), § 937.

themselves must be equipped with an effective neutralising mechanism which destroys or renders them harmless after a period of time. If circumstances permit, the civilian population should be warned in advance of the delivery of remotely delivered mines which may affect them.²⁵²

223. Australia's Defence Force Manual provides that:

All feasible precautions must be taken to protect civilians from the effects of land mines . . . and similar devices. They must not be directed at civilians nor may they be used indiscriminately. It is indiscriminate to place them so that they are not on or not directed at a military objective, to use a means of delivery which cannot be directed at a military target, or to place them so that they may be expected to cause excessive collateral damage, that is, injury, loss or damage to civilians which is excessive in relation to the concrete and direct military advantage anticipated.²⁵³

The manual adds that:

Land mines (other than remotely delivered mines) . . . must not be used in areas containing civilian concentrations if combat between ground forces is neither imminent nor actually taking place unless they are placed on, or in the vicinity, of an enemy military objective or there are protective measures for civilians such as warning signs, sentries, fences or other warnings to civilians.²⁵⁴

With respect to remotely delivered landmines, the manual states that they "can be used within the area of a military objective if their location can be accurately recorded and they can be neutralised when they no longer serve the military purpose of which they were placed in position". It further states that "if circumstances permit, effective advance warning should be given where remotely delivered mines are likely to affect civilians".²⁵⁵

224. Belgium's Law of War Manual states, with reference to Article 3 of the 1980 Protocol II to the CCW, that mines can only be used against military objectives. It also states, with reference to Article 5 of the 1980 CCW, that remotely delivered minefields are only permitted if the location of the mines is mapped and if the mines are fitted with self-neutralising devices. The manual adds that the civilian population must be warned in advance of the emplacement of remotely delivered mines unless circumstances do not permit.²⁵⁶

225. Cameroon's Instructors' Manual states that the restrictions contained in the 1980 Protocol II to the CCW must be scrupulously applied in order to avoid civilian casualties. The manual provides, therefore, that the use of mines, booby-traps and other devices must follow the rules on the prohibition of indiscriminate use and on the taking of all feasible precautions to protect civilians as provided for in Article 3 of the 1980 Protocol II to the CCW.²⁵⁷

²⁵² Australia, *Commanders' Guide* (1994), § 940.

²⁵³ Australia, *Defence Force Manual* (1994), § 421.

²⁵⁴ Australia, *Defence Force Manual* (1994), § 422.

²⁵⁵ Australia, *Defence Force Manual* (1994), § 425.

²⁵⁶ Belgium, *Law of War Manual* (1983), p. 38.

²⁵⁷ Cameroon, *Instructors' Manual* (1992), p. 123, § 441.

226. Canada's LOAC Manual, under the heading "Use of authorized land mines", states that states that:

All feasible precautions must be taken to protect civilians from the effects of land mines . . . They must not be directed at civilians nor may they be used indiscriminately. It is indiscriminate to:

- (a) place mines . . . so that they are not on or not directed at a legitimate target;
- (b) use a means of delivery for mines . . . that cannot be directed at a legitimate target; and
- (c) place mines . . . so that they may be expected to cause collateral civilian damage that is excessive in relation to the concrete and direct military advantage anticipated.²⁵⁸

With respect to remotely delivered mines, the manual provides that they

can only be used within the area of a military objective if their location can be accurately recorded, and they can be neutralized when they no longer serve the military purpose for which they were placed in position. Each mine must have: (a) an effective self neutralizing or destroying mechanism; or (b) a remotely controlled mechanism designed to render the mine harmless or destroy it.²⁵⁹

227. France's LOAC Teaching Note states that:

The use of mines except from anti-personnel mines is allowed on the condition that the exact location of mine fields is recorded. All feasible precautions must be taken to protect civilians from the effects of these mines.²⁶⁰

228. According to France's LOAC Manual, employing landmines (except anti-personnel mines) is allowed on condition that all feasible precautions are taken to protect civilians from the effects of these mines. At the end of hostilities, the mine fields have to be indicated and as far as possible neutralised.²⁶¹

229. Germany's Military Manual states that the "use of mines and other devices on land is, in principle, permissible". It adds that:

It is prohibited to direct the above mentioned munitions – neither by way of reprisals – against the civilian population as such or against individual civilians. Any indiscriminate use of these weapons is prohibited. All feasible precautions shall be taken to protect civilians also from unintended effects of these munitions.²⁶²

The manual further provides that:

Mines and other devices shall not be used in any built-up area or other area predominantly inhabited by civilians in which combat between ground forces is neither taking place nor imminent. Exceptions are permissible if: these munitions are placed on or in the close vicinity of a military objective; or measures are taken to

²⁵⁸ Canada, *LOAC Manual* (1999), p. 5-5, § 44.

²⁵⁹ Canada, *LOAC Manual* (1999), p. 5-5, § 50.

²⁶⁰ France, *LOAC Teaching Note* (2000), p. 7.

²⁶¹ France, *LOAC Manual* (2001), pp. 55 and 82.

²⁶² Germany, *Military Manual* (1992), §§ 409-411.

protect civilians from their effects, for example, the posting of warning signs, the posting of sentries, the provision of fences or the issue of warnings.²⁶³

With respect to the use of remotely delivered mines, the manual provides that this kind of weapon is prohibited unless such mines are only used within an area which is itself a military objective or which contains military objectives . . . If a mine does no longer serve its military purpose, a self-actuating mechanism shall ensure its destruction or neutralization within a reasonable lapse of time.

The manual also states that “effective advance warning shall be given of any delivery or dropping of remotely delivered mines which may affect the civilian population, unless circumstances do not permit”.²⁶⁴

230. Israel’s Manual on the Laws of War states that:

The mining of areas for protection against invasion of a country’s territory is permitted. The problem arises when mines are used as aggressive weapons and concealed within enemy territory (where the concealing party has no control over the movement of people). Such mines are liable to lie in the path of innocent civilians and injure them rather than combatants. In other words, the prohibition is not on the weapon itself but on the manner of its employment. Likewise, it is forbidden to use mines flung from a plane or fired in shells.²⁶⁵

231. Kenya’s LOAC Manual states that mines, other than remotely delivered, may be used in populated areas “when they are placed on or in the close vicinity of a military objective belonging to or under the control of the enemy; or when measures are taken to protect civilian persons (e.g. warning signs, sentries, issue of warnings, provision of fences)”. According to the manual, remotely delivered mines

may be used

- a) only within an area being itself a military objective, or containing military objectives, and
- b) when their location can be accurately recorded, or an effective neutralising mechanism is issued on each mine;
- c) subject to effective advanced warning to the civilian population when the tactical situation permits.²⁶⁶

232. The Military Manual of the Netherlands reproduces Articles 4 and 5 of the 1980 Protocol II to the CCW.²⁶⁷

233. New Zealand’s Military Manual states that “Protocol II to the CCW . . . restricts the use of mines . . . It also contains specific provisions on the use of

²⁶³ Germany, *Military Manual* (1992), p. 38.

²⁶⁴ Germany, *Military Manual* (1992), §§ 413–414.

²⁶⁵ Israel, *Manual on the Laws of War* (1998), p. 14.

²⁶⁷ Netherlands, *Military Manual* (1993), pp. IV-6/IV-10.

remotely delivered mines". The manual reproduces Articles 3–8 of the 1980 Protocol II to the CCW.²⁶⁸

234. Spain's LOAC Manual provides the same restrictions and prohibitions on the use of mines and remotely delivered mines as are contained in Articles 3, 4, and 5 of the 1980 Protocol II to the CCW.²⁶⁹ It also states that:

Independent of the type of target, its location, the kind of military operation, the given mission or any other circumstances, it is prohibited to use this type of weapon [i.e., *inter alia*, mines] . . . wherever its location is indiscriminate . . . wherever it cannot be guided towards a specific military target and wherever there is reason to believe that it will cause disproportionate collateral damage.²⁷⁰

235. Sweden's IHL Manual, with reference to the 1980 Protocol II to the CCW, states that landmines cannot be "used against civilian populations or individual civilians, which is in full agreement with AP I (Art. 51)". It adds that "it is particularly stated that the indiscriminate use of mines . . . is prohibited". It further stresses that "the new method of remote delivery, *i.e.* planting mines from aircraft or dispersing them over large areas by firing them with missiles or artillery, may be used only against an area which is itself a military objective or which contains military objectives".²⁷¹

236. The US Air Force Pamphlet states that:

Aerial dropped mines . . . are not prohibited under international law, provided that they do not in their design or inherent characteristics cause unnecessary suffering. The manner of use of such weapons, however, is regulated by the rules of armed conflict . . . Necessary precautions must be taken in the use of all weapons, including delayed action weapons, to avoid or minimize incidental civilian casualties. Also mines must not be used for the purpose of preventing rescue of or protection to wounded or sick persons or to deny other humanitarian protections.²⁷²

237. The US Air Force Commander's Handbook states that:

The main legal problem raised by mine warfare is to make sure that civilian persons and property are not unnecessarily endangered, both during and after the conflict, and the parties to the conflict should take reasonable measures to this end. Depending on the circumstances, these measures might include warning civilians, using mines that self-destruct after a period of time and clearing minefields after the end of hostilities.²⁷³

238. The US Naval Handbook states that:

As with all weapons, to be lawful, land mines must be directed at military objectives. The controlled nature of command detonated land mines provides effective

²⁶⁸ New Zealand, *Military Manual* (1992), § 514.

²⁶⁹ Spain, *LOAC Manual* (1996), § 2.4.c.(2).

²⁷⁰ Spain, *LOAC Manual* (1996), § 3.2.a.(3).

²⁷² US, *Air Force Pamphlet* (1976), § 6-6(d).

²⁷³ US, *Air Force Commander's Handbook* (1980), § 6-5.

target discrimination. In the case of non-command detonated land mines, however, there exists potential for indiscriminate injury to noncombatants. Accordingly special care must be taken when employing land mines to ensure non-combatants are not indiscriminately injured.²⁷⁴

National Legislation

239. South Korea's Conventional Weapons Act provides that "the commander of the military unit that emplaces mines . . . must take all necessary measures including advance warning so as to prevent damage to the life, body, and property of the civilians residing in the vicinity".²⁷⁵ It adds that:

1. The Commander of the military unit that has emplaced mines or controls over the mine-emplaced area that can potentially harm civilians (herein after referred to as "minefield") must place warning signs that fulfil the conditions specified in the attached material in or around the minefield.
2. The Commander of the military unit that holds jurisdiction over the minefield with non remotely-delivered anti-personnel mines which do not fulfil the conditions of Article 3, paragraph 3, must take the necessary precautions and measures to deny access of civilians in addition to the warning sign as stipulated in Article 1. However, an exceptional case would be: if the angle of flight taken by the fragment is less than 90 degrees from the horizontal level, the use of the anti-personnel mine occurs within 72 hours since it has been placed and the military unit that emplaced the anti-personnel mine is adjacent.
3. No one is allowed to remove, damage, destroy, hide or otherwise undermine the proper utility of the warning signs placed as per the Article 1.²⁷⁶

240. Under the US War Crimes Act as amended, wilfully killing or causing serious injury to civilians in relation to an armed conflict and in violation of the provisions of the 1996 Amended Protocol II to the CCW is a war crime.²⁷⁷

National Case-law

241. No practice was found.

Other National Practice

242. In 1994, during a debate in the First Committee of the UN General Assembly, Australia stated that the 1980 Protocol II to the CCW "should apply to non-international as well as to international conflicts", that "mines should not be exported to States that are not party to Protocol II" and that "anti-personnel mines should be detectable and incorporate a self-destruct mechanism".²⁷⁸

243. In 1995, in response to a report of the Australian Joint Standing Committee on Foreign Affairs, Defence and Trade that recommended that "international

²⁷⁵ South Korea, *Conventional Weapons Act* (2001), Article 6.

²⁷⁶ South Korea, *Conventional Weapons Act* (2001), Article 7.

²⁷⁷ US, *War Crimes Act as amended* (1996), Section 2441(c)(4).

²⁷⁸ Australia, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/49/PV.3, 17 October 1994, p. 15.

conventions relating to land mines could be couched in terms of rights and obligations, thereby making international criminal law applicable and making breaches subject to international criminal tribunals or war crimes tribunals", the Australian government stated that:

One of our proposals for the Review Conference [of the CCW] was to have the States parties acknowledge in their conference declaration that a deliberate or indiscriminate use of land mines against civilians ought to attract the same criminal responsibility as it does under other humanitarian instruments.²⁷⁹

244. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, Canada stated that it:

continues to have serious concerns about reports concerning the indiscriminate use of anti-personnel mines by the Russian military in the context of the ongoing conflict in Chechnya... Many of these mines were remotely delivered against no apparent military target... Moreover, Russian forces appear to have undertaken few if any steps to protect civilians in that conflict from the effects of mines, for example through the posting of signs, sentries or fences around known mined areas.

It also voiced its concerns "about recent public reports that representatives of the state-owned Pakistan Ordnance Factories are alleged to have offered anti-personnel mines for sale to a private UK citizen in direct violation of their obligations under the Amended Protocol II to the CCW".²⁸⁰

245. At the Second Meeting of States Parties to the Ottawa Convention in 2000, Canada stated that:

It is important to highlight the indiscriminate use of landmines by both Russian and Chechen forces in Chechnya – surely one of the most serious setbacks for the already minimal norms regarding mine use contained within the Landmines Protocol of the Convention on Certain Conventional Weapons.²⁸¹

246. In 1993, during a debate in the First Committee of the UN General Assembly, China stated that it "understood the desire to avoid the killing of civilians by land mines, but oversimplified measures limited to halting the export of those weapons could not solve the problem".²⁸²

247. At the Second Session of the First Review Conference of States Parties to the CCW in 1996, China expressed its concern about the suffering of and casualties among civilians caused by the "irresponsible use of landmines, especially anti-personnel landmines". It added that "China has made enormous

²⁷⁹ Australia, Senate, *Debates*, 29 November 1995, Vol. 176, pp. 4246–4281, reprinted in *Australian Yearbook of International Law*, 1995, pp. 737 and 741–742.

²⁸⁰ Canada, Statement at the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW, Geneva, 15 December 1999.

²⁸² China, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/48/SR.28, 18 November 1993, p. 7.

efforts on a series of important issues such as the scope of application, technical specifications on the detectability, self-destruction and self-deactivation of landmines and transfer of landmines". It announced that "pending the entry-into-force of the Amended Protocol, it will implement a moratorium on its export of anti-personnel landmines which do not meet the technical specifications on detectability, self-destruction and self-deactivation as provided for by the Protocol".²⁸³

248. At the Second Review Conference of States Parties to the CCW in 2001, the representative of China declared that "his country, a party to the Convention and all its protocols, faithfully discharged its obligations under them. His Government had launched a number of education campaigns concerning the Convention... Furthermore, the Government had amended domestic law in order to guarantee the enforcement of the Convention."²⁸⁴

249. In 1994, during a debate in the First Committee of the UN General Assembly, the Czech Republic stated that it supported proposals concerning "the detectability of landmines and the limitation of their functioning after the end of conflicts", as well as "a moratorium on the export of such land-mines".²⁸⁵

250. In 1993, during a debate in the First Committee of the UN General Assembly, Egypt stated that it supported the comments made by several other delegations which had expressed the view that export restrictions alone "would not achieve the desired results" and that "a resolution dealing with the production and use of anti-personnel mines would have been preferable".²⁸⁶

251. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Finland stated that:

In the case of weapons, the draft Additional Protocols did little more than reaffirm existing law and should be supplemented with prohibitions and restrictions of the use of specific categories of conventional weapons. The Ad Hoc Committee should endeavour to define such weapons and prepare a list mentioning, at least, ... delayed action weapons including mines.²⁸⁷

252. In 1994, during a debate in the First Committee of the UN General Assembly, Finland stated that it wished to prevent "future indiscriminate and irresponsible use of anti-personnel land-mines".²⁸⁸

²⁸³ China, Statement at the First Review Conference of States Parties to the CCW (Second Session), Geneva, 22 April–3 May 1996, UN Doc. CCW/CONF.I/SR.11, 29 January 1996, § 20.

²⁸⁸ Finland, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/49/PV.4, 18 October 1994, p. 17.

253. In 1993, during a debate in the First Committee of the UN General Assembly, France stated that while it

strongly supported international action on the indiscriminate laying of non-self-destructing mines... Protocol II to the inhuman weapons convention permitted self-destructing or self-neutralizing anti-personnel mines as legitimate forms of self-defence if directed at military targets.²⁸⁹

254. In 1993, during a debate in the First Committee of the UN General Assembly, Ghana stated that "it would have been preferable for the resolution to cover the production, use and stockpiling of anti-personnel mines, as well as their export".²⁹⁰

255. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Italy stated that "the obligation to record the location of minefields and to fit a neutralising mechanism on remotely delivered mines provided a satisfactory guarantee for the civilian population".²⁹¹

256. In 1994, during a debate in the First Committee of the UN General Assembly, Japan stated that it would "participate actively in the work of reviewing the [1980 CCW] in order to tighten the controls on the use and availability of land-mines".²⁹²

257. In 2000, during a debate in the First Committee of the UN General Assembly, South Korea stated that it was intending to accede to the 1980 CCW and the 1996 Amended Protocol II to the CCW.²⁹³

258. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Kuwait stated that:

17. ... As a defensive measure, the practice of laying mine-fields – provided that they were properly marked for the benefit of the local population and friendly forces – could not be prohibited. It supported restrictions on the use of mines as a defensive weapon and that their use as offensive weapons should be prohibited... He himself considered that the use of anti-personnel landmines for the purpose of paralysing the enemy's movements was acceptable.
18. On the other hand, he stressed the danger to civilians as well as to members of the armed forces of air-delivered mines, which were likely to strike indiscriminately, especially if they were scattered over a wide area. He therefore considered that, in the case of delayed-action and treacherous weapons, it was better to make every effort to provide a rule for limiting their use rather than

to try to lay stress on their inhuman aspects or the medical results they produced, and that the best course would be to regard them as defensive weapons and to prohibit their use as offensive weapons.²⁹⁴

259. At the CCW Preparatory Conference, Mexico stated that it had already submitted proposals concerning the “limitation of the use of anti-personnel and anti-tank mines and booby traps to military targets and their immediate surroundings, with effective precautions to protect civilians”.²⁹⁵

260. In 1994, during a debate in the First Committee of the UN General Assembly, New Zealand advocated a “tougher regime of controls on the use . . . of mines”.²⁹⁶

261. In 1994, during a debate in the First Committee of the UN General Assembly, Norway called for restrictions “on the production and use of such land-mines” and the development of “an efficient verification regime” for the enforcement of the 1980 CCW and its Protocols.²⁹⁷

262. In 2000, during a debate in the First Committee of the UN General Assembly, Pakistan stated that “although our security environment does not permit us to accept a comprehensive ban on APLs, Pakistan will strictly abide by its commitments and obligations under the amended Protocol II on landmines”.²⁹⁸

263. At the Second Review Conference of States Parties to the CCW in 2001, Pakistan declared its full commitment to the 1980 CCW and proposed that during the Review Conference a method would be examined to accelerate the process of achieving universal adherence to the CCW and its Protocols.²⁹⁹

264. In government communiqués in 1995, Peru stated that it considered Ecuador’s “indiscriminate use” of anti-personnel landmines in the border dispute between them as a violation of Articles 35(2) and 51(4) AP I and as a violation of the 1980 CCW.³⁰⁰

265. In 1995, during a debate in the First Committee of the UN General Assembly, Peru stated that it deemed it “essential to . . . set up standards to determine the responsibilities of States and the application of sanctions for damage caused to non-combatant victims and the environment”.³⁰¹

³⁰¹ Peru, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/50/PV.9, 25 October 1995, p. 11.

266. In 1995, during a debate in the First Committee of the UN General Assembly, Poland stated that it had “declared a moratorium on the export of anti-personnel land-mines that do not have self-destruct or self-neutralizing devices”.³⁰²

267. In 1993, during a debate in the First Committee of the UN General Assembly, Sri Lanka stated that it felt that the proposed moratorium on the export of anti-personnel mines was inadequate as it did not deal with production or use, and in particular the use of anti-personnel landmines by non-State entities.³⁰³

268. At the CCW Preparatory Conference, Switzerland stated that it supported “the prohibition or extensive restriction of the use of mines and booby-traps, backed by the necessary guarantees”.³⁰⁴

269. In 1994, during a debate in the First Committee of the UN General Assembly, Ukraine advocated “strong action to reduce the threat posed to civilian populations by the indiscriminate use of landmines”.³⁰⁵

270. In 1976, during a meeting of the Ad Hoc Committee on Conventional Weapons established by the CDDH, the UK, introducing a working paper on the regulation of the use of landmines and other devices on behalf of France, Netherlands and UK, stated that:

Article 2 of the present working paper . . . required the location of minefields to be recorded. It should, however, be noted that the amount of detail in which the recording was made would depend on the type of minefield in question. Where mines were laid by engineers, it might be possible to record the location of each one; in minefields laid by artillery, however, it would only be possible to record the area covered.³⁰⁶

271. In 1993, during a debate in the First Committee of the UN General Assembly, the UK stated that while it “strongly supported international action on the indiscriminate laying of non-self-destructing mines . . . Protocol II to the inhumane weapons convention permitted self-destructing or self-neutralizing anti-personnel mines as legitimate forms of self-defence if directed at military targets”.³⁰⁷

272. In 1995, during a debate in the House of Commons, the UK Minister of State for Defence Procurement stated that “the parties in the conflict in the former Yugoslavia have indiscriminately sown anti-personnel land mines. That

may be in direct contravention of the United Nations weaponry convention [1980 CCW].³⁰⁸

273. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of the US stated that:

35. It was clearly desirable to place certain restrictions on the use of land mines and other devices... Her delegation supported reasonable and feasible requirements for recording the location of minefields. In that respect she agreed with the statement of the United Kingdom representative at [another meeting of the Committee on Conventional Weapons] that the nature and extent of the recording would depend on the type of minefield in question and the circumstances and method of its emplacement.

36. She also supported a prohibition on the use of remotely delivered mines unless such mines were fitted with a neutralizing mechanism or the area in which they were delivered was clearly marked. Furthermore, her delegation welcomed and shared the concern evidenced in the various proposals for the protection of the civilian population against the effects of mines and similar devices.³⁰⁹

274. Following a decision by the US President in 1996, the US unilaterally undertook:

not to use, and to place in inactive stockpile status with intent to demilitarize by the end of 1999, all non-self-destructing APL not needed for (a) training personnel engaged in demining and countermining operations, and (b) to defend the United States and its allies from armed aggression across the Korean demilitarized zone.³¹⁰

275. In 1991, a State denounced the use of drop-mines on civilian objects in the non-international conflict to which it was a party.³¹¹

III. Practice of International Organisations and Conferences

United Nations

276. In two resolutions adopted in 1994, the UN Security Council condemned all acts by parties to the conflict in Angola "including the laying of landmines, that imperil or inhibit humanitarian relief efforts".³¹²

277. In a resolution adopted in 1994 concerning the situation in Angola, the UN Security Council noted that "the widespread dispersal of landmines is causing hardship to the civilian population and is hampering the return of refugees and displaced persons and other humanitarian relief efforts".³¹³

³¹³ UN Security Council, Res. 965, 30 November 1994, preamble.

278. In a resolution adopted in 1995, the UN Security Council noted “with concern that unexploded landmines constitute a substantial hazard to the population of Rwanda” and underlined “the importance the Council attaches to efforts to eliminate the threat posed by unexploded landmines in a number of States”.³¹⁴

279. In a resolution adopted in 1996, the UN Security Council expressed “its regret at the civilian casualties inflicted by landmines” and called upon all parties in Afghanistan “to desist from the indiscriminate use of landmines”.³¹⁵

280. In a resolution adopted in 1996, the UN Security Council expressed its “serious concern at the indiscriminate use of landmines in Tajikistan and the threat which this poses to the population and UNMOT personnel”.³¹⁶

281. In a resolution adopted in 1997 on the situation in Georgia, the UN Security Council stated that it was “deeply concerned at the continued deterioration of the security conditions in the Gali region, with an increase of acts of violence by armed groups, and indiscriminate laying of mines”. It also condemned “the continued laying of mines, including new types of mines, in the Gali region, which has already caused several deaths and injuries among the civilian population and the peacekeepers and the observers of the international community”.³¹⁷

282. In numerous resolutions adopted between 1986 and 1999, the UN General Assembly expressed its wish for all States to accede to the 1980 CCW and its Protocols.³¹⁸

283. In two resolutions adopted in 1994 and 1995 respectively, the UN General Assembly stated that it was “gravely concerned with the suffering and casualties caused to non-combatants as a result of the proliferation, as well as the indiscriminate and irresponsible use of anti-personnel land-mines”. It emphasised the importance of the 1980 CCW and its Protocols as the “authoritative international instrument governing the responsible use of anti-personnel land-mines and related devices”.³¹⁹

284. In three resolutions adopted between 1994 and 1996, the UN General Assembly expressed grave concern at the indiscriminate use of anti-personnel landmines in Cambodia.³²⁰

285. In three resolutions adopted between 1994 and 1996, the UN General Assembly deplored the use of landmines against civilians in Sudan.³²¹

286. In a resolution adopted in 1996, the UN General Assembly welcomed the adoption of Amended Protocol II to the CCW, as well as the “national measures adopted by an increasing number of Member States relating to bans, moratoriums or restrictions on the transfer, use or production of anti-personnel landmines or to the reduction of existing stockpiles of such mines”. It urged “more international co-operation in the area of prohibitions or restrictions on the use of certain conventional weapons”.³²²

287. In a resolution adopted in 1998, the UN General Assembly welcomed “as interim measures, the various bans, moratoriums and other restrictions already declared by States on anti-personnel landmines” and called upon “States that have not yet done so to declare and implement such bans, moratoriums and other restrictions as soon as possible”.³²³

288. In three resolutions adopted between 1997 and 1999, the UN General Assembly welcomed the adoption of the 1996 Amended Protocol II to the CCW and urged all States which had not yet done so to agree to be bound by it.³²⁴

³²¹ UN General Assembly, Res. 49/198, 23 December 1994 (the resolution was adopted by 101 votes in favour, 13 against and 49 abstentions. care not to create additional risks to life in attacking military targets and, in particular, to end the practice of laying mines or explosives in areas where civilians work, live or circulate.³³¹

Other International Organisations

296. In a resolution on landmines in Angola adopted at its Dakar Session in February 1995, the ACP-EU Joint Assembly appealed to the Angolan government "to finally sign and ratify the 1980 CCW including the 1980 Protocol II to the CCW, and abide by its provisions".³³²

297. In a resolution on landmines adopted at its Brussels Session in September 1995, the ACP-EU Joint Assembly called upon African and Asian countries which had not yet done so to ratify the 1980 CCW.³³³

298. In a joint statement in 1993, the Social, Health and Family Affairs Committee of the Parliamentary Assembly of the Council of Europe and UNICEF condemned "the widespread use of antipersonnel mines, particularly those which look like toys, of which the main victims are children".³³⁴

299. In a resolution on Rwanda and the prevention of humanitarian crises adopted in 1994, the Parliamentary Assembly of the Council of Europe invited all member States to ratify the 1980 CCW and support a revision of Protocol II, particularly with a view to making self-destruct mechanisms compulsory on landmines.³³⁵

300. In 1995, in a written declaration on landmines and blinding laser weapons, 25 European parliamentarians declared their support for a strengthened 1980 Protocol II to the CCW applicable in non-international armed conflict.³³⁶

301. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe invited:

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

- ...
- b. ratify, if they have not done so, ... the [1980 CCW] and its protocols ...
- ...
- j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.³³⁷

³³⁷ Council of Europe, Parliamentary Assembly, Res. 1085, 24 April 1996, § 8b and j.

302. In 1995, the EU Council of Ministers adopted a decision concerning a joint action on anti-personnel landmines, the aim of which was “to help combat the indiscriminate use and spread throughout the world of anti-personnel landmines which are very dangerous for civilian populations”. It stated that the member States “shall work to strengthen [the 1980 Protocol II to the CCW], in particular by . . . extending its scope to non-international armed conflicts [and] substantially strengthening restrictions or bans on anti-personnel mines”.³³⁸

303. In 1995, in answer to a question from the European Parliament, the European Commission stated that it was conscious of the suffering inflicted by landmines and that it supported “further measures for the curtailment of the availability and use of antipersonnel-landmines, through multilateral action, with an effective regime of control and verification and with the ultimate goal of eliminating such weapons”.³³⁹

304. In 1996, the EU Council adopted a decision concerning a joint action on anti-personnel landmines stating that “the European Union has resolved to combat and end the indiscriminate use and spread throughout the world of anti-personnel landmines as well as to contribute to solving problems already caused by these weapons”.³⁴⁰

305. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, the EU stated that “wide adherence to Amended Protocol II to the CCW is . . . important . . . The EU is committed to the goal of total elimination of anti-personnel mines world-wide as well as to contributing to solving problems caused by these weapons.”³⁴¹

306. In a resolution adopted in 1994 on respect for international humanitarian law and support for humanitarian action in armed conflicts, the OAU Council of Ministers invited its members to “consider, or reconsider, without delay the possibility” of adhering to the 1980 CCW.³⁴²

307. In a resolution adopted in 1995 on the 1980 CCW and problems posed by the proliferation of anti-personnel mines in Africa, the OAU Council of Ministers stated that it was “deeply concerned over the tragic consequences resulting from the generalised and indiscriminate use of anti-personnel mines and the fact that of all the regions of the world, Africa is the continent with the largest number of these weapons”. It further condemned “cases of flagrant violation of the IHL by the indiscriminate use of anti-personnel mines” and urged member

States to support an African common position advocating “the extension of the field of application of the 1980 Convention to non-international armed conflicts”.³⁴³

308. In a resolution adopted in 1996 on the revision of the 1980 CCW and problems posed by the proliferation of anti-personnel mines in Africa, the OAU Council of Ministers noted that the African continent had the largest presence of landmines of all continents. It condemned the indiscriminate use of landmines and urged all member States which had not yet acceded to the CCW “to consider doing so as early as possible, particularly to its Protocol II”.³⁴⁴

309. In the recommendations of the second OAU/ICRC seminar on IHL for diplomats accredited to the OAU in 1995, the participants expressed “their deep concern about the scourge of mines and their generalised and indiscriminate use and the attendant harmful consequences”. They recommended the “establishment and adoption... of an African common position on the following issues:... The extension of the scope of implementation of the 1980 Convention to non-international armed conflicts [and] inclusion, in the Convention, of a mechanism to guarantee an effective implementation of the Convention.”³⁴⁵

310. In a resolution adopted in 1994 on respect for international humanitarian law, the OAS General Assembly stated that it was “deeply disturbed by the testing, production, sale, transfer, and use of certain conventional weapons which may be deemed to be excessively injurious or to have indiscriminate effects”. It urged all member States to accede to the 1980 CCW.³⁴⁶

311. In a resolution adopted in 1995 on respect for international humanitarian law, the OAS General Assembly stated that it was “alarmed by the terrible and lasting consequences for the civilian population of the use of anti-personnel mines”. It urged member States “to consider the possibility of becoming parties to the 1980 CCW and... to take part in the Review Conference on that Convention”.³⁴⁷

312. In a resolution adopted in 1996 on respect for international humanitarian law, the OAS General Assembly stated that it was “particularly alarmed at the indiscriminate effects of land mines on the civilian population and on humanitarian action” and urged those countries that deemed it desirable to consider the possibility of taking steps internally to prohibit the manufacture, sale and exportation of anti-personal mines”. It urged non-parties to the 1980 CCW to accede to it.³⁴⁸

International Conferences

313. Mexico and Switzerland proposed a draft article to the Ad Hoc Committee on Conventional Weapons established by the CDDH entitled "Anti-tank and anti-personnel mines" which read:

1. It is prohibited to lay mines in an area which contains a concentration of civilians and in which combat between ground forces is neither taking place nor imminent, unless:
 - (a) they are placed on or in the immediate vicinity of a military objective; and
 - (b) effective precautions have been taken to protect civilians from their effects.
2. The location of methodically laid minefields shall be recorded on sketches or plans, or shown on topographic maps. Such documents shall, so far as possible, be prepared in respect of mines laid during combat. These documents shall be preserved in order to make possible the subsequent removal of the mines without danger.
3. It is prohibited to lay remotely-delivered mines or similar explosive devices which are dropped, fired or teleguided, unless:
 - (a) they are equipped with a self-destruct or neutralization mechanism which becomes operative on the expiry of . . . hours at most, and
 - (b) the area in which they are employed is inside the combat zone of the ground forces.³⁴⁹

314. In the Ad Hoc Committee on Conventional Weapons established by the CDDH, a proposal entitled "Anti-personnel land-mines" was supported by Afghanistan, Algeria, Austria, Colombia, Egypt, Kuwait, Lebanon, Mali, Mauritania, Mexico, Norway, Sudan, Sweden, Switzerland, Venezuela and SFRY which stated that "anti-personnel land-mines must not be laid by aircraft".³⁵⁰ According to an explanatory memorandum:

The use of anti-personnel mines is a generally accepted means of hampering enemy advance and of putting combatants out of action.

However, certain ways of employing anti-personnel landmines may easily lead to injuries indiscriminately being inflicted upon combatants and civilians. The risks for such results are especially high if such mines are laid, perhaps in very large numbers, by aircraft. The limits of the mines will often be very uncertain with this method. The results are apt to be particularly cruel if the mines are not equipped with self-destruction devices which will function reliably after a relatively short time. The risk of indiscriminate effects may be reduced also through marking of minefields – this is not possible, however, when the mines are scattered over a vast area.³⁵¹

315. A draft text entitled “The Regulation of the Use of Land-Mines and Other Devices” proposed to the Ad Hoc Committee on Conventional Weapons established by the CDDH by Denmark, France, Netherlands and UK elaborated upon an earlier proposal made at the Conference of Government Experts on the Use of Certain Conventional Weapons in Lugano in 1976. This draft text suggested a number of measures including: the compulsory recording of pre-planned minefields (Article 2); a prohibition on the use of remotely delivered mines unless these mines were self-neutralising or the target area was marked (Article 3); and the prohibition of manually emplaced mines in towns or civilian areas unless “they are placed on or in the close vicinity of a military objective” or “due precautions are taken to protect civilians from their effects” (Article 4).³⁵² The proposal was generally favourably received and was explicitly supported by the FRG and Libya.³⁵³

316. A draft article was introduced in the Ad Hoc Committee on Conventional Weapons established by the CDDH by Austria, Mexico, Sweden, Switzerland, Uruguay and SFRY which read, *inter alia*, as follows:

1. It is forbidden to use mines and devices to which this article applies in an area containing a concentration of civilians and in which combat between ground forces is not taking place or is not imminent unless effective precautions are taken to protect civilians from their effects.
2. The location of pre-planned minefields shall always be recorded. Minefields laid during combat and the location of certain explosive and non-explosive devices shall be recorded as far as possible. These records shall be preserved in order to make possible the subsequent removal of the mines and devices and to make the records public when it is necessary.
3. The use of remotely-delivered mines is prohibited unless
 - (a) each such mine is fitted with a neutralizing mechanism which renders the mine harmless within a period of . . . , and
 - (b) they are used within the combat zone.³⁵⁴

317. A proposal submitted by Austria, Denmark, France, Mexico, the Netherlands, Spain, Sweden, Switzerland and the UK to the Ad Hoc Committee on Conventional Weapons established by the CDDH provided that:

1. Scope of application

The proposals relate to the use in armed conflict on land of the mines and other devices defined therein . . .

established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/201 within CDDH/IV/226, pp. 581–582.

³⁵² Denmark, France, Netherlands and UK, Proposal entitled “The Regulation of the Use of Land-Mines and Other Devices” submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/213 within CDDH/IV/226, pp. 588–591.

³⁵³ CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.30, 26 May 1976, p. 308 (FRG); *Official Records*, Vol. XVI, CDDH/IV/SR.40, 19 May 1977, p. 411 (Libya).

³⁵⁴ Austria, Mexico, Sweden, Switzerland, Uruguay and SFRY, “Draft article on the Use of Land Mines and the Use of Certain Explosive and Non-Explosive Devices” submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/222 within CDDH/IV/226, p. 593.

3. Recording of the location of minefields and other devices

- (1) The Parties to a conflict shall record the location of:
 - (a) all pre-planned minefields laid by them; and
 - (b) all areas in which they have made large-scale and pre-planned use of explosive or non-explosive devices.
- (2) The Parties shall endeavour to ensure the recording of the location of all other minefields, mines and explosive and non-explosive devices which they have laid or placed in position.
- (3) All such records shall be retained by the Parties and the location of all recorded minefields, mines and explosive or non-explosive devices remaining in territory controlled by an adverse Party shall be made public after the cessation of hostilities.

4. Restrictions on the use of remotely delivered mines

The use of remotely delivered mines is prohibited unless:

- (a) each such mine is fitted with an effective neutralizing mechanism, that is to say a self-actuating or remotely controlled mechanism which is designed to render a mine harmless or cause it to destroy itself when it is anticipated that the mine will no longer serve the military purpose for which it was placed in position;
or
 - (b) the area in which they are delivered is marked in some definite manner in order to warn the civilian population,
and, in either case, they are only used within an area containing military objectives.
5. Restrictions on the use of mines and other devices in populated areas
- (1) This proposal applies to mines (other than remotely delivered [anti-tank] mines), explosive and non-explosive devices, and other manually-emplaced munitions and devices designed to kill, injure or damage and which are actuated by remote control or automatically after a lapse of time.
 - (2) It is prohibited to use any object to which this proposal applies in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either:
 - (a) they are placed on or in the close vicinity of a military objective belonging to or under the control of an adverse Party; or
 - (b) effective precautions are taken to protect civilians from their effects.³⁵⁵

318. The Final Report of the CCW Conference submitted to the UN General Assembly stated in connection with Article 3 of the 1980 Protocol II to the CCW that "the parties must take whatever measures are open to them to protect civilians wherever they are. They may use records for this purpose by, for example, marking minefields or otherwise warning the civilian population of the dangers of mines and booby traps."³⁵⁶

³⁵⁵ Austria, Denmark, France, Mexico, Netherlands, Spain, Sweden, Switzerland and UK, Proposal submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, Working Group Document CDDH/IV/GT/4*, *Official Records*, Vol. XVI, CDDH/408/Rev. 1, pp. 544–546.

³⁵⁶ UN Conference on Prohibitions or Restrictions of Use of Certain Conventional Weapons Which May be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, Second Session, Geneva, 15 September–10 October 1980, Final Report to the UN General Assembly, UN Doc. A/CONF.95/15, 27 October 1980, p. 9.

319. The 25th International Conference of the Red Cross in 1986 adopted a resolution on work on international humanitarian law in armed conflicts at sea and on land in which it urged all States to become parties to the 1980 CCW and its Protocols "as early as possible so as ultimately to obtain universality of adherence". It also noted "the dangers to civilians caused by mines... employed during an armed conflict and the need for international co-operation in this field consistent with Article 9 of Protocol II attached to the 1980 Convention".³⁵⁷

320. In a resolution adopted in 1995 on challenges posed by calamities arising from armed conflict, the 93rd Inter-Parliamentary Conference called on States "to lay down a ban on anti-personnel mines" during the review of the 1980 CCW, and, pending their total prohibition:

- (a) to stipulate that all anti-personnel mines must be equipped with effective self-destruction devices;
- (b) to ban all mines which cannot be easily localized and to recommend specifications to this end;
- (c) to broaden the Convention to cover all internal conflicts.³⁵⁸

321. The 26th International Conference of the Red Cross and Red Crescent in 1995 adopted a resolution on the protection of the civilian population in period of armed conflict in which it urged "all States which have not yet done so to become party to the [1980 CCW] and in particular to its Protocol II on landmines, with a view to achieving universal adherence thereto" and further underlined "the importance of respect for its provisions by all parties to armed conflict".³⁵⁹

322. In the Final Declaration of the ICRC Regional Seminar for Asian Military and Strategic Studies Experts in 1997, the participants called upon States of the Asian region but also the international community to consider the following urgent measures especially

for those States which are not yet Parties, adherence to the 1980 United Nations Convention on Certain Conventional Weapons, including its Protocol II on landmines (as amended on 3 May 1996), and for current States party to this Convention that have not yet done so adherence to its amended Protocol II at the earliest possible date to ensure its early entry into force.³⁶⁰

³⁵⁹ 26th International Conference of the Red Cross and Red Crescent, Geneva, 3–7 December 1995, Res. II, § G(g).

³⁶⁰ ICRC Regional Seminar for Asian Military and Strategic Studies Experts, Manila, 20–23 July 1997, Final Declaration, Anti-personnel Mines: What Future for Asia?, p. 3–4.

IV. Practice of International Judicial and Quasi-judicial Bodies

323. In a resolution on anti-personnel mines adopted in 1995, the ACiHPR urged African States to “participate in large numbers in the 1996 CCW Review Conference to press for the introduction of a clause on the prohibition or restriction of the use of mines in that Convention”.³⁶¹

V. Practice of the International Red Cross and Red Crescent Movement

324. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces that:

Mines other than remotely delivered, booby-traps and other devices may be use in populated areas:

- a) when they are placed on or in the close vicinity of a military objective belonging to or under the control of the enemy; or
- b) when measures are taken to protect civilians persons (e.g. warning signs, sentries, issue of warnings, provision of fences).

The location shall be recorded of:

- a) pre-planned minefields;
- b) areas where large-scale and pre-planned use is made of booby-traps;
- c) other minefields, mines and booby-traps, when the tactical situation permits.

Remotely delivered mines may be used:

- a) only within an area
 - being itself a military objective, or
 - containing military objectives; and
- b) when their location can be accurately recorded, or an effective neutralizing mechanism is used on each mine;
- c) subject to effective advance warning to the civilian population, when the tactical situation permits.³⁶²

325. In May 1993, in a publication entitled “Mines: A Perverse Use of Technology”, the ICRC condemned the indiscriminate use of anti-personnel mines.³⁶³

326. At its Birmingham Session in 1993, the Council of Delegates adopted a resolution on mines, in which it urged States

which have not yet done so to ratify the 1980 United Nations Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May be

³⁶¹ ACiHPR, Res. 4 (XVII), 13–22 March 1995, §§ 1 and 2.

³⁶² Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, §§ 924–930.

³⁶³ ICRC, *Mines: A Perverse Use of Technology*, May 1993, extracts reprinted in Louis Maresca and Stuart Maslen (eds.), *The Banning of Anti-Personnel Landmines*, Cambridge University Press, Cambridge, 2000, pp. 257–263.

Deemed to be Excessively Injurious or to Have Indiscriminate Effects and to seek, during the forthcoming Review Conference, effective means to deal with the problem caused by mines by reinforcing the normative provisions of the Convention and by introducing implementation mechanisms.³⁶⁴

327. At the Second Session of the Meeting of Governmental Experts to prepare the CCW Review Conference in May 1994, the ICRC made several different proposals on prohibitions and restrictions on anti-personnel mines. While the ICRC's preferred option was a blanket prohibition on the use, manufacture, stockpiling and transfer of anti-personnel mines, it also proposed an alternative prohibiting the use, manufacture, stockpiling or transfer of certain types of mines including: mines that are not easily detectable; mines with anti-handling devices; mines without an effective self-destruction mechanism; and "anti-vehicle mines that are not equipped with an effective integrated self-neutralizing mechanism together with an effective locating mechanism".³⁶⁵

328. In 1994, in a statement before the First Committee of the UN General Assembly, the ICRC, after expressing its support for a total ban on anti-personnel mines, added that "as a minimum all anti-personnel mines should automatically and reliably render themselves harmless within a specified period of time".³⁶⁶

329. In 1995, in a position paper on landmines, the ICRC stated that "if States are unable, in the short term, to agree to a total prohibition on the use of anti-personnel mines, the ICRC proposes, as a minimum, the banning of all anti-personnel landmines lacking effective self-destruct mechanisms". The paper also outlined other "essential minimum steps" that must be taken in order to protect civilians and to facilitate mine clearance including: the prohibition of mines that are not easily detectable; an extension of the 1980 CCW to cover all internal conflicts; reinforcing implementation mechanisms for the 1980 CCW; and encouraging universal adherence to the 1980 CCW.³⁶⁷

330. At its Geneva Session in 1995, the Council of Delegates adopted a resolution on anti-personnel landmines in which it expressed its "great concern about the indiscriminate effects of anti-personnel landmines and the consequences for civilian populations and humanitarian action".³⁶⁸

³⁶⁴ International Red Cross and Red Crescent Movement, Council of Delegates, Birmingham Session, 29–30 October 1993, Res. 3, § 1.

CCW/CONF.I/GE/CRP.24, 27 May 1994, reprinted in Louis Maresca and Stuart Maslen (eds.), *The Banning of Anti-Personnel Landmines*, Cambridge University Press, Cambridge, 2000, pp. 322–324.

³⁶⁶ ICRC, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/49/PV.10, 24 October 1994, p. 11.

³⁶⁷ ICRC, Position Paper No. 1 Landmines and Blinding Weapons: From Expert Group to the Review Conference, February 1995, reprinted in Louis Maresca and Stuart Maslen (eds.), *The Banning of Anti-Personnel Landmines*, Cambridge University Press, Cambridge, 2000, pp. 328–331.

³⁶⁸ International Red Cross and Red Crescent Movement, Council of Delegates, Geneva Session, 1–2 December 1995, Res. 10, § 1.

331. In 1996, in a statement before the First Committee of the UN General Assembly, the ICRC welcomed the improvements that had been made in the 1996 Amended Protocol II to the CCW. These improvements included: the extension of the Protocol to non-international conflicts; protections for humanitarian workers; annual meetings of States parties; and a requirement that States punish serious violations of the Amended Protocol. The ICRC went on to make the case for a total ban on the basis that “the new limitations on the use of anti-personnel mines are both weak and complex” and “the implementation of new provisions on detectability and self-destruction can be delayed for up to nine years after entry into force of the revised Protocol”.³⁶⁹

332. At its Geneva Session in 1999, the Council of Delegates adopted a resolution on the Movement strategy on landmines in which it approved the Movement Strategy on Landmines, one of the core elements of which was to “achieve universal adherence to and effective implementation of the norms established by the Ottawa Convention and amended Protocol II to the 1980 Convention on Certain Conventional Weapons”.³⁷⁰

VI. Other Practice

333. In 1986, in a report on landmines in El Salvador and Nicaragua, Americas Watch listed the following uses of landmines, booby-traps and related devices among those that “should be prohibited in the conduct of hostilities in both countries”:

1. Their direct use against individual or groups of unarmed civilians where no legitimate military objective, such as enemy combatants or war material, is present. Such uses of these weapons are indiscriminate.
2. The direct use against civilian objects, i.e., towns, villages, dwellings or buildings dedicated to civilian purposes where no military objective is present. Such weapons’ use is also indiscriminate.
3. The use of any remotely delivered mines which are not effectively marked and have *no* self-actuating or remotely controlled mechanism to cause its destruction or neutralization once its military purpose has been served. Such mines are “blind weapons” and their use is indiscriminate as to time.
4. The use of hand delivered mines, such as Claymore varieties, and booby-traps in or near a civilian locale containing military objectives which are deployed *without* any precaution, markings or other warnings, or which do *not* self-destruct or are *not* removed once their military purpose has been served. Such uses are similarly indiscriminate.³⁷¹ [emphasis in original]

³⁶⁹ ICRC, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/51/PV.8, 18 October 1996, p. 9.

³⁷⁰ International Red Cross and Red Crescent Movement, Council of Delegates, Geneva Session, 29–30 October 1999, Res. 10, § 1.

³⁷¹ Americas Watch, *Land Mines in El Salvador and Nicaragua: The Civilian Victims*, New York, December 1986, pp. 100–101.

334. According to the Report on the Practice of El Salvador, the FMLN acknowledged in 1987 that landmines are important for its strategy, but has stated that they were directed exclusively against the army.³⁷² The report alleges that the FMLN did not comply with the requirement of sign-posting minefields.³⁷³

335. Rule B4 of the Rules of International Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IIHL, states that:

In application of the general rules listed in section A above, especially those on the distinction between combatants and civilians and on the immunity of the civilian population, mine, booby-traps and other devices within the meaning of Protocol II to the [1980 CCW] may not be directed against the civilian population as such or against individual civilians, nor used indiscriminately.

...

To ensure the protection of the civilian population referred to in the previous paragraphs, precautions must be taken to protect them from attacks in the form of mines, booby-traps and other devices.³⁷⁴

336. In 1993, an armed opposition group declared that it neither placed landmines in places which might be frequented by civilians, nor used them during raids.³⁷⁵

337. In 1994, an armed opposition group stated that it only used anti-tank mines which were detonated remotely. It also systematically informed the ICRC of mined locations.³⁷⁶

338. An editorial in *Economic and Political Weekly* in 1997 stated that India was in favour of a "'phased approach' [to restrictions on the use of anti-personnel mines] which will for the present allow the use of land-mines in the defence of countries' borders".³⁷⁷

339. In 1998, in report on violations of the laws of war by both sides in Angola, Africa Watch stated that "it is prohibited to use landmines near a civilian object, even if it contains military objectives, without any precautions, markings or other warnings or if such devices do not self-destruct or are not removed after their military purpose has been served".³⁷⁸

C. Measures to Reduce the Danger Caused by Landmines

I. Treaties and Other Instruments

Treaties

340. Article 5(1) of the 1980 Protocol II to the CCW provides that:

The use of remotely delivered mines is prohibited unless such mines are only used within an area which is itself a military objective or which contains military objectives, and unless:

- (a) their location can be accurately recorded in accordance with Article 7(1)(a); or
- (b) an effective neutralizing mechanism is used on each such mine, that is to say, a self-actuating mechanism which is designed to render a mine harmless or cause it to destroy itself when it is anticipated that the mine will no longer serve the military purpose for which it was placed in position, or a remotely-controlled mechanism which is designed to render harmless or destroy a mine when the mine no longer serves the military purpose for which it was placed in position.

341. Article 7 of the 1980 Protocol II to the CCW provides that:

1. The parties to the conflict shall record the location of:
 - (a) all pre-planned minefields laid by them; . . .
 - . . .
2. The parties shall endeavour to ensure the recording of the location of all other minefields, mines . . . which they have laid or placed in position.
3. All such records shall be retained by the parties who shall:
 - (a) immediately after the cessation of active hostilities:
 - (i) take all necessary and appropriate measures, including the use of such records, to protect civilians from the effects of minefields, mines . . . and either
 - (ii) in cases where the forces of neither party are in the territory of the adverse party, make available to each other and to the Secretary-General of the United Nations all information in their possession concerning the location of minefields, mines . . . in the territory of the adverse party; or
 - (iii) once complete withdrawal of the forces of the parties from the territory of the adverse party has taken place, make available to the adverse party and to the Secretary-General of the United Nations all information in their possession concerning the location of minefields, mines . . . in the territory of the adverse party;
 - (b) when a United Nations force or mission performs functions in any area, make available to the authority mentioned in Article 8 such information as is required by that Article;
 - (c) whenever possible, by mutual agreement, provide for the release of information concerning the location of minefields, mines . . . particularly in agreements governing the cessation of hostilities.

342. Article 8 of the 1980 Protocol II to the CCW stipulates that:

1. When a United Nations force or mission performs functions of peacekeeping, observation or similar functions in any area, each party to the conflict shall, if requested by the head of the United Nations force or mission in that area, as far as it is able:
 - (a) remove or render harmless all mines or booby-traps in that area;
 - (b) take such measures as may be necessary to protect the force or mission from the effects of minefields, mines and booby-traps while carrying out its duties; and
 - (c) make available to the head of the United Nations force or mission in that area, all information in the party's possession concerning the location of minefields, mines and booby traps in that area.
2. When a United Nations fact-finding mission performs functions in any area, any party to the conflict concerned shall provide protection to that mission except where, because of the size of such mission, it cannot adequately provide such protection. In that case it shall make available to the head of the mission the information in its possession concerning the location of minefields, mines and booby-traps in that area.

343. Upon ratification of the 1980 CCW, Canada stated that:

With respect to Protocol II [to the 1980 CCW], it is the understanding of the Government of Canada that:

- (a) Any obligation to record the location of remotely delivered mines pursuant to sub-paragraph 1(a) of article 5 refers to the location of mine fields and not to the location of individual remotely delivered mines.
- (b) The term "pre-planned", as used in sub-paragraph 1(a) of article 7, means that the position of the minefield in question should have been determined in advance so that an accurate record of the location of the minefield, when laid, can be made.
- (c) The phrase 'similar functions' used in article 8, includes the concepts of 'peace-making', 'preventive peace-keeping' and 'peace-enforcement' as defined in an agenda for peace (United Nations document A/47/277 of 17 June 1992).³⁷⁹

344. Upon ratification of the 1980 CCW, the Netherlands stated that "with regard to article 8, paragraph 1, of Protocol II: It is the understanding of the Government of the Kingdom of the Netherlands that the words 'as far as it is able' mean 'as far as it is technically able'."³⁸⁰

345. Upon accession to the 1980 CCW, Israel stated that:

With respect to Protocol II [to the 1980 CCW], it is the understanding of the Government of Israel that:

- (i) Any obligation to record the location of remotely delivered mines pursuant to sub-paragraph 1(a) of article 5 refers to the location of mine fields and not to the location of individual remotely delivered mines;

³⁷⁹ Canada, Declaration made upon ratification of the CCW, 24 June 1994, § 3.

³⁸⁰ Netherlands, Declaration made upon ratification of the CCW, 18 June 1987, § 3.

- (ii) the term pre-planned, as used in sub-paragraph 1(a) of article 7, means that the position of the minefield in question should have been determined in advance so that an accurate record of the location of the minefield, when laid, can be made.³⁸¹

346. Article 9 of the 1980 Protocol II to the CCW provides that:

After the cessation of active hostilities, the parties shall endeavour to reach agreement, both among themselves and, where appropriate, with other States and with international organizations, on the provision of information and technical and material assistance – including, in appropriate circumstances, joint operations – necessary to remove or otherwise render ineffective minefields, mines . . . placed in position during the conflict.

347. Article 1(2) of the 1996 Amended Protocol II to the CCW provides that:

This Protocol shall apply, in addition to situations referred to in Article I of this Convention, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.

348. Article 3(2) of the 1996 Amended Protocol II to the CCW provides that:

Each High Contracting Party or party to a conflict is, in accordance with the provisions of this Protocol, responsible for all mines, booby-traps, and other devices employed by it and undertakes to clear, remove, destroy or maintain them as specified in Article 10 of this Protocol.

349. Article 6(1) of the 1996 Amended Protocol II to the CCW states that “it is prohibited to use remotely-delivered mines unless they are recorded in accordance with sub-paragraph I (b) of the Technical Annex”.

350. Article 9 of the 1996 Amended Protocol II to the CCW provides that:

1. All information concerning minefields, mined areas, mines, booby-traps and other devices shall be recorded in accordance with the provisions of the Technical Annex.
2. All such records shall be retained by the parties to a conflict, who shall, without delay after the cessation of active hostilities, take all necessary and appropriate measures, including the use of such information, to protect civilians from the effects of minefields, mined areas, mines, booby-traps and other devices in areas under their control.

At the same time, they shall also make available to the other party or parties to the conflict and to the Secretary-General of the United Nations all such information in their possession concerning minefields, mined areas, mines, booby-traps and other devices laid by them in areas no longer under their control; provided, however, subject to reciprocity, where the forces of a party to a conflict are in the territory of an adverse party, either party may withhold such information from the Secretary-General and the other party, to the extent

³⁸¹ Israel, Declarations and statements of understanding made upon accession to the CCW, 22 March 1995, § c.

that security interests require such withholding, until neither party is in the territory of the other. In the latter case, the information withheld shall be disclosed as soon as those security interests permit. Wherever possible, the parties to the conflict shall seek, by mutual agreement, to provide for the release of such information at the earliest possible time in a manner consistent with the security interests of each party.

3. This Article is without prejudice to the provisions of Articles 10 and 12 of this Protocol.

351. Article 10 of the 1996 Amended Protocol II to the CCW provides that:

1. Without delay after the cessation of active hostilities, all minefields, mined areas, mines . . . shall be cleared, removed, destroyed or maintained in accordance with Article 3 and paragraph 2 of Article 5 of this Protocol.
2. High Contracting Parties and parties to a conflict bear such responsibility with respect to minefields, mined areas, mines . . . in areas under their control.
3. With respect to minefields, mined areas, mines . . . laid by a party in areas over which it no longer exercises control, such party shall provide to the party in control of the area pursuant to paragraph 2 of this Article, to the extent permitted by such party, technical and material assistance necessary to fulfil such responsibility.
4. At all times necessary, the parties shall endeavour to reach agreement, both among themselves and, where appropriate, with other States and with international organizations, on the provision of technical and material assistance, including, in appropriate circumstances, the undertaking of joint operations necessary to fulfil such responsibilities.

352. Article 12 of the 1996 Amended Protocol II to the CCW provides that:

1. Application
 - (a) With the exception of the forces and missions referred to in sub-paragraph 2(a) (i) of this Article, this Article applies only to missions which are performing functions in an area with the consent of the High Contracting Party on whose territory the functions are performed.
 - (b) The application of the provisions of this Article to parties to a conflict which are not High Contracting Parties shall not change their legal status or the legal status of a disputed territory, either explicitly or implicitly.
 - (c) The provisions of this Article are without prejudice to existing international humanitarian law, or other international instruments as applicable, or decisions by the UN Security Council of the United Nations, which provide for a higher level of protection to personnel functioning in accordance with this Article.
2. Peace-keeping and certain other forces and missions
 - (a) This paragraph applies to:
 - (i) any United Nations force or mission performing peace-keeping, observation or similar functions in any area in accordance with the Charter of the United Nations;
 - (ii) any mission established pursuant to Chapter VIII of the Charter of the United Nations and performing its functions in the area of a conflict.
 - (b) Each High Contracting Party or party to a conflict, if so requested by the head of a force or mission to which this paragraph applies, shall:

- (i) so far as it is able, take such measures as are necessary to protect the force or mission from the effects of mines, booby-traps and other devices in any area under its control;
 - (ii) if necessary in order effectively to protect such personnel, remove or render harmless, so far as it is able, all mines, booby-traps and other devices in that area; and
 - (iii) inform the head of the force or mission of the location of all known minefields, mined areas, mines, booby-traps and other devices in the area in which the force or mission is performing its functions and, so far as is feasible, make available to the head of the force or mission all information in its possession concerning such minefields, mined areas, mines, booby-traps and other devices.
3. Humanitarian and fact-finding missions of the United Nations System
- (a) This paragraph applies to any humanitarian or fact-finding mission of the United Nations System.
 - (b) Each High Contracting Party or party to a conflict, if so requested by the head of a mission to which this paragraph applies, shall:
 - (i) provide the personnel of the mission with the protections set out in sub-paragraph 2(b) (i) of this Article; and
 - (ii) if access to or through any place under its control is necessary for the performance of the mission's functions and in order to provide the personnel of the mission with safe passage to or through that place:
 - (aa) unless on-going hostilities prevent, inform the head of the mission of a safe route to that place if such information is available; or
 - (bb) if information identifying a safe route is not provided in accordance with sub-paragraph (aa), so far as is necessary and feasible, clear a lane through minefields.
4. Missions of the International Committee of the Red Cross
- (a) This paragraph applies to any mission of the International Committee of the Red Cross performing functions with the consent of the host State or States as provided for by the Geneva Conventions of 12 August 1949 and, where applicable, their Additional Protocols.
 - (b) Each High Contracting Party or party to a conflict, if so requested by the head of a mission to which this paragraph applies, shall:
 - (i) provide the personnel of the mission with the protections set out in sub-paragraph 2(b) (i) of this Article; and
 - (ii) take the measures set out in sub-paragraph 3(b) (ii) of this Article.
5. Other humanitarian missions and missions of enquiry
- (a) Insofar as paragraphs 2, 3 and 4 above do not apply to them, this paragraph applies to the following missions when they are performing functions in the area of a conflict or to assist the victims of a conflict:
 - (i) any humanitarian mission of a national Red Cross or Red Crescent Society or of their International Federation;
 - (ii) any mission of an impartial humanitarian organization, including any impartial humanitarian demining mission; and
 - (iii) any mission of enquiry established pursuant to the provisions of the Geneva Conventions of 12 August 1949 and, where applicable, their Additional Protocols.
 - (b) Each High Contracting Party or party to a conflict, if so requested by the head of a mission to which this paragraph applies, shall, so far as is feasible:

- (i) provide the personnel of the mission with the protections set out in sub-paragraph 2(b) (i) of this Article, and
 - (ii) take the measures set out in sub-paragraph 3(b) (ii) of this Article.
6. Confidentiality
All information provided in confidence pursuant to this Article shall be treated by the recipient in strict confidence and shall not be released outside the force or mission concerned without the express authorization of the provider of the information.
7. Respect for laws and regulations
Without prejudice to such privileges and immunities as they may enjoy or to the requirements of their duties, personnel participating in the forces and missions referred to in this Article shall:
- (a) respect the laws and regulations of the host State; and
 - (b) refrain from any action or activity incompatible with the impartial and international nature of their duties.

353. Upon ratification of the 1996 Amended Protocol II to the CCW, Canada stated that "it is understood that the maintenance of a minefield referred to in Article 10, in accordance with the standards on marking, monitoring and protection by fencing or other means set out in Amended Protocol II, would not be considered as a use of the mines contained therein".³⁸²

354. Upon acceptance of the 1996 Amended Protocol II to the CCW, France stated that:

France takes it that article 4 and the Technical Annex to amended Protocol II do not require the removal or replacement of mines that have already been laid . . .

The provisions of amended Protocol II such as those concerning the marking, monitoring and protection of zones which contain anti-personnel mines and are under the control of a party, are applicable to all zones containing mines, irrespective of the date on which those mines were laid.³⁸³

355. Article 5 of the 1997 Ottawa Convention provides that:

1. Each State Party undertakes to destroy or ensure the destruction of all anti-personnel mines in mined areas under its jurisdiction or control, as soon as possible but not later than ten years after the entry into force of this Convention for that State Party.
2. Each State Party shall make every effort to identify all areas under its jurisdiction or control in which anti-personnel mines are known or suspected to be placed and shall ensure as soon as possible that all anti-personnel mines in mined areas under its jurisdiction or control are perimeter-marked, monitored and protected by fencing or other means, to ensure the effective exclusion of civilians, until all anti-personnel mines contained therein have been destroyed. The marking shall at least be to the standards set out in the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, as amended on 3 May 1996, annexed to the Convention

³⁸² Canada, Reservations and statements of understanding made upon ratification of Amended Protocol II to the CCW, 5 January 1998, § 3.

³⁸³ France, Declarations made upon acceptance of Amended Protocol II to the CCW, 23 July 1998.

on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects.

3. If a State Party believes that it will be unable to destroy or ensure the destruction of all anti-personnel mines referred to in paragraph 1 within that time period, it may submit a request to a Meeting of the States Parties or a Review Conference for an extension of the deadline for completing the destruction of such anti-personnel mines, for a period of up to ten years.

356. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article 1 of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.

Other Instruments

357. Article 15 of the 1956 New Delhi Draft Rules provides that “if the Parties to the conflict make use of mines, they are bound . . . to chart the minefields. The charts shall be handed over, at the close of active hostilities, to the adverse Party, and also to other authorities responsible for the safety of the population.”

358. Article II(8) of the 1992 N’Sele Ceasefire Agreement provides that “ceasefire” shall imply “a ban on . . . the hindering of operations to remove mines”.

359. Paragraphs 79 and 80 of the 2000 Cairo Declaration adopted at the Africa-Europe Summit states that there is a need to intensify efforts “in the fields of mine clearance, assistance thereto, as well as with respect to mine victims and mine awareness”. The States present at the Summit declared that they would “continue to co-operate towards a comprehensive resolution of the landmine problem in Africa, in particular by addressing the issue of the removal of existing landmines”.

II. National Practice

Military Manuals

360. Argentina’s Law of War Manual reproduces the content of Article 7 of the 1980 Protocol II to the CCW.³⁸⁴

³⁸⁴ Argentina, *Law of War Manual* (1989), § 4.24(2).

361. Australia's *Commanders' Guide* states that "the location of minefields... is to be recorded".³⁸⁵ As regards remotely delivered mines, it states that "either the location of minefields containing remotely delivered mines must be accurately recorded or the mines themselves must be equipped with an effective neutralising mechanism which destroy or renders them harmless after a period of time".³⁸⁶

362. Australia's *Defence Force Manual* states that:

The location of all pre-planned minefields and areas in which there has been large scale and pre-planned use of booby-traps must be recorded. A record should also be kept of all other minefields, mines and booby traps so that they may be disarmed when they are no longer required.³⁸⁷

The manual further states that:

Remotely delivered mines can only be used within the area of a military objective if their location can be accurately recorded and they can be neutralised when they no longer serve the military purpose for which they were placed in position. Either each mine must have an effective self neutralising or destroying mechanism or a remotely controlled mechanism designed to render the mine harmless or destroy it.³⁸⁸

363. Belgium's *Law of War Manual* states, with reference to the 1980 CCW, that remotely delivered minefields are only permitted if the location of the mines is mapped.³⁸⁹

364. Cameroon's *Instructors' Manual* states that the restrictions contained in the 1980 Protocol II to the CCW must be scrupulously applied in order to avoid civilian casualties. The manual provides, therefore, that the use of mines, booby-traps and other devices must follow the rules on recording and publication of the location of mines and minefields as defined in Article 7 of the Protocol.³⁹⁰

365. Canada's *LOAC Manual* states that "the location of all pre-planned minefields... must be recorded. A record should also be kept of all other minefields [and] mines... so that they may be disarmed when they are no longer required".³⁹¹ It stresses that "Canada's obligation to clear minefields after the cessation of hostilities will vary depending upon circumstances such as the degree of jurisdiction or control exercised over the territory, the terms of any peace accord and any other bilateral or multilateral arrangement".³⁹²

³⁸⁵ Australia, *Commanders' Guide* (1994), § 942.

³⁸⁶ Australia, *Commanders' Guide* (1994), § 940.

³⁸⁷ Australia, *Defence Force Manual* (1994), § 423.

³⁸⁸ Australia, *Defence Force Manual* (1994), § 425.

³⁸⁹ Belgium, *Law of War Manual* (1983), p. 38.

³⁹⁰ Cameroon, *Instructors' Manual* (1992), p. 123.

³⁹¹ Canada, *LOAC Manual* (1999), p. 5-5, § 46.

³⁹² Canada, *LOAC Manual* (1999), p. 5-2, § 19.

366. According to France's LOAC Teaching Note, employing landmines (except anti-personnel mines) is allowed on the condition that their exact location is recorded. It further provides that "at the end of hostilities the mine fields have to be indicated and as far as possible neutralised".³⁹³

367. France's LOAC Manual states that employing landmines (except anti-personnel mines) is allowed on the condition that their exact location is recorded. It further states that "at the end of hostilities the mine fields have to be indicated and as far as possible neutralised".³⁹⁴

368. Germany's Military Manual states that:

The location of minefields [and] mines... shall be recorded: the parties to the conflict shall retain these records and, whenever possible, by mutual agreement, provide for their publication (Weapons Conv., Prot. 2, Art. 7). In the Federal Armed Force the territorial command authorities are responsible for the mining documentation.

It adds that:

After the cessation of an international armed conflict, the parties to the conflict shall, both among themselves and, where appropriate, with other states or international organizations, exchange information and technical assistance necessary to remove or otherwise render ineffective minefields [and] mines.³⁹⁵

With respect to remotely delivered mines, the manual, quoting Article 5(1) of the 1980 Protocol II to the CCW, provides that "after emplacement their location shall be accurately recorded".³⁹⁶

369. Israel's Manual on the Laws of War states that "it is incumbent on every army to keep a record of a minefield laid during combat. Any mine manufactured after the Convention came into force must contain a metal piece of at least 8 grams to enable its detection by a mine detector."³⁹⁷

370. Kenya's LOAC Manual states that "the location shall be recorded of: pre-planned minefields... other minefields, mines... when the tactical situation permits". With respect to remotely delivered mines, the manual states that their use is allowed when "their location can be accurately recorded or an effective neutralizing mechanism is used on each mine".³⁹⁸

371. The Military Manual of the Netherlands reproduces the content of Article 7 of the 1980 Protocol II to the CCW.³⁹⁹

³⁹³ France, *LOAC Teaching Note* (2000), p. 7.

³⁹⁴ France, *LOAC Manual* (2001), p. 55, see also p. 82.

³⁹⁹ Netherlands, *Military Manual* (1993), pp. IV-6/IV-10.

372. New Zealand's Military Manual cites Article 7 of the 1980 Protocol II to the CCW and states that "all feasible efforts will be made to record the location of all minefields".⁴⁰⁰

373. Spain's LOAC Manual contains the same provisions as Article 7 of the 1980 Protocol II to the CCW.⁴⁰¹

374. Sweden's IHL Manual states that:

According to Protocol II [to the 1980 CCW], the parties to a conflict shall record the locations of all pre-planned minefields . . . The parties shall retain all mine records and, after cessation of hostilities, shall make them available to the adversary – this provision, however, is not obligatory in a case where the latter party still has combat forces on the wrong side of the frontier.⁴⁰²

With respect to remotely delivered mines, the manual states that "the protocol [II to the 1980 CCW] states the special precautionary measures to be observed in the form of recording the locations of the mine fields, or the use of self-destruction mechanisms".⁴⁰³

375. Switzerland's Basic Military Manual states that large-scale minefields must be mapped, and after the cessation of hostilities, in order to protect the civilian population, these maps shall be handed over to the adverse party and to the UN. In this context, the manual refers to Articles 6 to 9 of the 1980 Protocol II to the CCW.⁴⁰⁴

376. The UK LOAC Manual, under the heading "Future Developments", considers the possibility of a treaty imposing "an obligation to record minefields and to fit remotely delivered mines with self-neutralising mechanisms or to record their location".⁴⁰⁵

377. The US Air Force Commander's Handbook states that "the party establishing a minefield should always keep a record of its location."⁴⁰⁶

378. The US Naval Handbook states that international law "requires that, to the extent possible, belligerents record the location of all minefields in order to facilitate their removal upon the cessation of hostilities. It is the practice of the United States to record the location of minefields in all circumstances."⁴⁰⁷

National Legislation

379. Albania's Anti-personnel Mines Decision provides that "all the areas of the Republic of Albania infested with mines must be determined and cleared by 2009".⁴⁰⁸

⁴⁰⁰ New Zealand, *Military Manual* (1992), § 514. ⁴⁰¹ Spain, *LOAC Manual* (1996), § 3.2.a.(4).

⁴⁰⁶ US, *Air Force Commander's Handbook* (1980), § 6-5.

⁴⁰⁷ US, *Naval Handbook* (1995), p. 448, § 9.3.

⁴⁰⁸ Albania, *Anti-personnel Mines Decision* (2000), § 7.

380. South Korea's Conventional Weapons Act provides that:

1. The Commander of the military unit that emplaced mines . . . must record and maintain the following information on the emplaced field:
 - a. Precise location and boundary of the emplaced area;
 - b. Type, number, emplacing method, type of fuse and life time of the emplaced mine . . . and
 - c. Location of every emplaced mine (except for remotely-delivered anti-personnel mines) . . .
2. The Commander of the military unit that emplaced mines must manage the information, which was recorded and maintained as prescribed by paragraph 1 in accordance with the Military Secrets Protection Act.⁴⁰⁹

381. Malaysia's Anti-personnel Mines Act provides that:

Where an area is identified as a mined area or is suspected to be a mined area, the Minister shall, wherever possible, ensure that such area is perimeter-marked and protected by fencing or otherwise employ such means as necessary so as to notify civilians of the presence of anti-personnel mines.⁴¹⁰

National Case-law

382. No practice was found.

Other National Practice

383. In 1994, during the debate in the UN General Assembly that preceded the adoption of Resolution 49/215, Afghanistan stated that it and "many others expect the Secretary-General to enhance the role of the existing Mine Clearance and Policy Unit . . . in order, *inter alia*, to study on a continuous basis the problem of land-mines and mine-clearance in war-stricken countries". It further stated that "all States that have spread land-mines in other countries must provide maps of the minefields".⁴¹¹

384. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Canada advocated the "automatic and compulsory marking" of remotely delivered minefields.⁴¹²

385. In 1995, during a debate in the First Committee of the UN General Assembly, Côte d'Ivoire stated that it welcomed the establishment of the UN fund for assistance in demining.⁴¹³

⁴⁰⁹ South Korea, *Conventional Weapons Act* (2001), Article 8.

⁴¹⁰ Malaysia, *Anti-personnel Mines Act* (2002), Section 6.

⁴¹³ Côte d'Ivoire, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/50/PV.6, 18 October 1995, p. 2.

386. In 1995, during a debate in the First Committee of the UN General Assembly, Ethiopia stated that it “welcomed the outcome of the July 1995 international meeting on mine clearance and the pledges made there”.⁴¹⁴

387. In 1994, during the debate in the UN General Assembly that preceded the adoption of Resolution 49/215, Honduras stated that it was “grateful for the work the Secretary-General has done in connection with the establishment of a fund for assistance in mine clearance” and that it supported the mine-clearance work of the OAS in the Central America region.⁴¹⁵

388. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Italy stated that “the obligation to record the location of minefields and to fit a neutralizing mechanism on remotely delivered mines provided a satisfactory guarantee for the civilian population”.⁴¹⁶

389. In 1995, during a debate in the First Committee of the UN General Assembly, Libya raised the issue of the clearance of mines on its territory dating from the Second World War and stated that it had “asked the countries concerned, bilaterally or through the United Nations, to provide us with maps of the minefields, to help us in the necessary demining operations and to pay compensation for the damage these mines have caused”.⁴¹⁷

390. In 1993, during a debate in the First Committee of the UN General Assembly, Pakistan stated that it would have preferred “a more comprehensive approach to the issue of uncleared anti-personnel mines” and that “issues relating to self-neutralizing mines should also be considered”.⁴¹⁸

391. In 1995, during a debate in the First Committee of the UN General Assembly, Pakistan stated that “millions of indiscriminately used mines threaten civilian populations in over 60 countries. There must be a global commitment to remove these mines, especially those in developing countries.”⁴¹⁹

392. At the First Annual Conference of High Contracting Parties to Amended Protocol II to the CCW in 1999, Pakistan stated that it would convert its entire stock of anti-personnel mines to detectable mines.⁴²⁰

393. In 1995, during a debate in the First Committee of the UN General Assembly, Peru stated that it supported the “establishment of a voluntary fund to

finance information and training programmes on de-mining” and stated that it would definitely contribute to the fund.⁴²¹

394. In 1995, during a debate in the First Committee of the UN General Assembly, Poland stated that it had “pledged to make an important contribution to the United Nations Voluntary Trust Fund for Assistance in Mine Clearance”.⁴²²

395. At the CCW Preparatory Conference in 1978, Sweden stated that certain limitations on the use of conventional weapons should be agreed upon by the participants including “that minefields on land must be charted when they were laid, so that they could be cleared at the end of hostilities and not remain as permanent hazards to life”.⁴²³

396. In 1995, during a debate in the First Committee of the UN General Assembly, Thailand stated that it appreciated “the efforts of the United Nations in drawing up a comprehensive mine clearance programme, in launching mine awareness activities, and, more importantly, in establishing the United Nations Voluntary Trust Fund for land mine-affected countries”.⁴²⁴

397. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the US supported “reasonable and feasible requirements for recording the location of minefields”.⁴²⁵

398. In 1994, a State declared that its armed forces laid mines according to plans or pre-planned maps as required by international law.⁴²⁶

III. Practice of International Organisations and Conferences

United Nations

399. In a resolution adopted in 1995, the UN Security Council noted “the desire of the Government of Rwanda to address the problem of unexploded landmines, and the interest on the part of other States to assist with the detection and destruction of these mines”. It underlined “the importance the Council attaches to efforts to eliminate the threat posed by unexploded landmines in a number of States, and the humanitarian nature of demining programmes”.⁴²⁷

400. In a resolution adopted in 1996 on the situation in Cyprus, the UN Security Council called upon the military authorities on both sides “to clear

all minefields . . . inside the buffer zone without further delay, as requested by UNFICYP".⁴²⁸

401. In a resolution adopted in 1996 on the situation in Angola, the UN Security Council emphasised "the need for the political will to speed up demining efforts to enable the free circulation of people and goods and to restore public confidence".⁴²⁹ In another resolution adopted the same year, the Council noted the progress being made in the area of demining in Angola and encouraged "both parties to intensify their demining efforts".⁴³⁰ In October 1996, the UN Security Council adopted a further resolution on Angola in which it expressed "serious concern about interference by UNITA with mine-clearing activities" and called upon "both parties to intensify their demining efforts".⁴³¹ In another resolution adopted in 1996, the UN Security Council expressed its support "for various United Nations demining activities in Angola, including plans aimed at enhancing national demining capacity".⁴³²

402. In two resolutions adopted in 1997 concerning Croatia, the UN Security Council called upon the parties to "cooperate fully with the United Nations military observers and to ensure their safety and freedom of movement, including through the removal of landmines".⁴³³

403. In a resolution adopted in 1993, the UN General Assembly expressed its concern about the damaging effects of uncleared landmines.⁴³⁴

404. In a resolution adopted in 1994, the UN General Assembly expressed its will to reinforce "international co-operation in the area of . . . the removal of minefields, mines and booby-traps".⁴³⁵

405. In two resolutions adopted in 1994 and 1995, the UN General Assembly recognised "the importance of recording, where appropriate, the location of mines". It further called upon:

Member States, especially those that have a capacity to do so, to provide the necessary information and technical and material assistance, as appropriate, and to locate, remove, destroy or otherwise render ineffective minefields, mines booby-traps and other devices, in accordance with international law.⁴³⁶

Both resolutions were adopted by consensus.

406. In three resolutions adopted in 1994 and 1996, the UN General Assembly expressed:

⁴²⁸ UN Security Council, Res. 1062, 28 June 1996, § 6(c).

⁴²⁹ UN Security Council, Res. 1055, 8 May 1996, § 11.

⁴³⁰ UN Security Council, Res. 1064, 11 July 1996, § 15.

⁴³¹ UN Security Council, Res. 1075, 11 October 1996, § 20.

⁴³² UN Security Council, Res. 1087, 11 December 1996, § 17.

⁴³³ UN Security Council, Res. 1093, 14 January 1997, § 4; Res. 1119, 14 July 1997, § 2.

⁴³⁴ UN General Assembly, Res. 48/75K, 13 December 1993.

⁴³⁵ UN General Assembly, Res. 49/79, 15 December 1994, preamble.

⁴³⁶ UN General Assembly, Res. 49/215, 23 December 1994, preamble and § 9; Res. 50/82, 14 December 1995, preamble and § 10.

grave concern at the indiscriminate use of anti-personnel landmines in Cambodia and the devastating consequences and destabilising effects of such mines have on Cambodian society, and encourages the Government of Cambodia to continue its support for the removal of these mines.⁴³⁷ [emphasis in original]

The resolutions were adopted without a vote.

407. In a resolution adopted in 1996, the UN General Assembly welcomed the adoption of the 1996 Amended Protocol II to the CCW and expressed its will to reinforce “international cooperation in the area of . . . the removal of minefields [and] mines”.⁴³⁸

408. In a resolution adopted in 1998, the UN General Assembly reaffirmed “its deep concern at the problem caused by the presence of mines and other unexploded devices”. It emphasised “the importance of recording the location of mines, of retaining all such records and making them available to concerned parties upon cessation of hostilities”. The General Assembly recognised “the important role that the international community, particularly States involved in the deployment of mines, can play in assisting mine clearance in affected countries” and urged:

Member States, regional, governmental and non-governmental organizations and foundations to continue to extend full assistance and cooperation to the Secretary-General and, in particular, to provide him with information and data as well as other appropriate resources that could be useful in strengthening the coordination role of the United Nations in mine action.⁴³⁹

409. In a resolution adopted in 1999 on the situation of human rights in Kosovo, the UN General Assembly called upon “all parties, in particular those of the Federal Republic of Yugoslavia (Serbia and Montenegro), to clear the area forthwith of all landmines and booby-traps and to work with the relevant international bodies to this end”.⁴⁴⁰

410. In a resolution adopted in 1996, the UN Commission on Human Rights, concerned by the impact of anti-personnel landmines, encouraged Cambodia to “continue its efforts to remove these mines”.⁴⁴¹

411. In 1997, in a report on assistance in mine clearance, the UN Secretary-General noted that the UN had developed quite an extensive mine-clearance

⁴³⁷ UN General Assembly, Res. 49/199, 23 December 1994, § 13; Res. 50/178, 22 December 1995, § 13; Res. 51/98, 12 December 1996, § 25.

⁴³⁸ UN General Assembly, Res. 51/49, 10 December 1996, preamble.

⁴³⁹ UN General Assembly, Res. 53/26, 31 December 1998, preamble and § 10.

⁴⁴⁰ UN General Assembly, Res. 53/164, 25 February 1999, § 12. (The resolution was adopted by 122 votes in favour, 3 against and 34 abstentions. Against: Belarus, India and Russia. Abstaining: Angola, Antigua and Barbuda, Belize, Bhutan, Botswana, Cameroon, Central African Republic, China, Colombia, DRC, Côte d’Ivoire, Cuba, Eritrea, Ethiopia, Gabon, Ghana, Guinea, Guinea-Bissau, Jamaica, Laos, Mozambique, Myanmar, Namibia, Nepal, Peru, Philippines, Singapore, Sri Lanka, FYROM, Trinidad and Tobago, Ukraine, Tanzania, Venezuela and Zimbabwe.)

⁴⁴¹ UN Commission on Human Rights, Res. 1996/54, 3 March 1995, § 22.

programme, but that a more precise global assessment of the mine problem was needed in order to tackle the issue properly.⁴⁴²

Other International Organisations

412. No practice was found.

International Conferences

413. A draft text submitted by Denmark, France, the Netherlands and the UK to the Ad Hoc Committee on Conventional Weapons established by the CDDH, which elaborated upon an earlier proposal made at the Lugano Conference, dealt with the problems created by landmines and "other devices". A number of measures were suggested, including the compulsory recording of pre-planned minefields.⁴⁴³ The proposal was positively received by the States present and was explicitly supported by the FRG and Libya.⁴⁴⁴

414. A proposal was introduced by Austria, Mexico, Sweden, Switzerland, Uruguay and SFRY to the Ad Hoc Committee on Conventional Weapons established by the CDDH, which provided that the use of remotely delivered mines was prohibited unless "each such mine is fitted with a neutralizing mechanism" and "they are used within the combat zone".⁴⁴⁵

415. Austria, Denmark, France, Mexico, Netherlands, Spain, Sweden, Switzerland and UK submitted a proposal to the Ad Hoc Committee on Conventional Weapons established by the CDDH which provided that parties to a conflict "shall record the location of (a) all pre-planned minefields laid by them; and (b) all areas in which they have made large-scale and pre-planned use of explosive or non-explosive devices". The final part of the section on recording required parties to retain these records and "the location of all recorded minefields, mines and explosive or non-explosive devices remaining in territory controlled by an adverse Party shall be made public after the cessation of active hostilities".⁴⁴⁶

⁴⁴² UN Secretary-General, Report on Assistance in Mine Clearance, UN Doc. A/52/679, 11 December 1997, §§ 107-111.

⁴⁴³ Denmark, France, Netherlands and UK, Proposal entitled "The Regulation of the Use of Land-Mines and Other Devices" submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/213 within CDDH/IV/226, pp. 588-591.

⁴⁴⁴ CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.30, 26 May 1976, p. 308 (FRG); *Official Records*, Vol. XVI, CDDH/IV/SR.40, 19 May 1977, p. 411 (Libya).

⁴⁴⁶ Austria, Denmark, France, Mexico, the Netherlands, Spain, Sweden, Switzerland and UK, Proposal submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, Working Group Document CDDH/IV/GT/4*, *Official Records*, Vol. XVI, CDDH/408/Rev. 1, pp. 544-546.

416. In 1980, the Secretariat of the 1979–1980 CCW Conference issued a note concerning the recording and publication of minefields, mines and booby-traps commenting on the draft Protocol II to the CCW and stating that:

The accurate recording of the location of minefields and related weapons is only one aspect of the obligation which should be imposed on the parties in order to ensure the protection of a United Nations force or mission . . . The recording should not only cover the boundaries of the fields but also the number, type and pattern of distribution of the mines, as well as details of any anti-lifting devices attached to them.⁴⁴⁷

417. The Final Report of the CCW submitted to the UN General Assembly stated in connection with Article 3 of the 1980 Protocol II to the CCW that:

The parties must take whatever measures are open to them to protect civilians wherever they are . . . The parties may, if they wish, assist in this process by providing, either unilaterally or by mutual agreement, or through the Secretary-General of the United Nations, information about the location of minefields, mines and booby traps.⁴⁴⁸

418. The 25th International Conference of the Red Cross in 1986 adopted a resolution on work on international humanitarian law in armed conflicts at sea and on land in which it urged all States to become parties to the 1980 CCW and its Protocols “as early as possible so as ultimately to obtain universality of adherence”. It noted “the dangers to civilians caused by mines, booby-traps and other devices employed during an armed conflict and the need for international co-operation in this field consistent with Article 9 of Protocol II attached to the 1980 Convention”.⁴⁴⁹

419. The 26th International Conference of the Red Cross and Red Crescent in 1995 adopted a resolution on the protection of civilians in armed conflict in which it urged:

all States and competent organizations to take concrete action to increase their support for mine-clearance efforts in affected States, which will need to continue for many decades, to strengthen international co-operation and assistance in this field and, in this regard, to provide the necessary maps and information and appropriate technical and material assistance to remove or otherwise render

⁴⁴⁷ UN Conference on Prohibitions or Restrictions of Use of Certain Conventional Weapons Which May be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, Second Session, Geneva, 15 September–10 October 1980, Note by the Secretariat on the Draft Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, UN Doc. A/CONF.95/CW/4, 15 September 1980.

⁴⁴⁸ UN Conference on Prohibitions or Restrictions of Use of Certain Conventional Weapons Which May be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, Second Session, Geneva, 15 September–10 October 1980, Final Report of the Conference to the UN General Assembly, Doc. A/CONF.95/15, 27 October 1980, p. 9.

⁴⁴⁹ 25th International Conference of the Red Cross, Geneva, 23–31 October 1986, Res. VII, § B(2) and (5).

ineffective minefields, mines and booby traps, in accordance with international law.⁴⁵⁰

420. In a resolution adopted on the occasion of the 50th anniversary of the Geneva Conventions in 1999 on the contribution of parliaments to ensuring respect for and promoting International humanitarian law, the 102nd Inter-Parliamentary Conference urged “States that produce or use this pernicious weapon [antipersonnel landmines], . . . to provide financial and technical assistance for (i) de-mining efforts, especially in heavily mined areas, (ii) victim assistance programmes, including rehabilitation and retraining activities, and (iii) mine awareness activities to reduce the risk of accidents”.⁴⁵¹

IV. Practice of International Judicial and Quasi-judicial Bodies

421. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

422. In 1995, in a position paper on landmines, the ICRC stated that “certain essential minimum steps must be taken to protect civilians and facilitate mine clearance” including the prohibition of “all mines which are not easily detectable”.⁴⁵²

423. At its Geneva Session in 1995, the Council of Delegates adopted a resolution on anti-personnel landmines in which it encouraged “all measures to alleviate the suffering of victims and to remove mines already in place”.⁴⁵³

424. In 1996, in a statement before the First Committee of the UN General Assembly, the ICRC welcomed the improvements that had been made in the 1996 Amended Protocol II to the CCW, including: the extension of the Protocol to non-international conflicts; clear assignment of responsibility for mine clearance; and requirements that the location of all mines be recorded.⁴⁵⁴

425. At its Geneva Session in 1999, the Council of Delegates adopted a resolution on the Movement strategy on landmines in which it approved the Movement Strategy on Landmines. One of the core elements of the strategy was to:

⁴⁵⁰ 26th International Conference of the Red Cross and Red Crescent, Geneva, 3–7 December 1995, Res. II, § G(h).

⁴⁵¹ 102nd Inter-Parliamentary Conference, Berlin, 10–15 October 1999, Resolution on the contribution of parliaments to ensuring respect for and promoting international humanitarian law on the occasion of the 50th anniversary of the Geneva Conventions, § 15.

cooperate with mine-clearance organizations according to humanitarian priorities, by developing mine-awareness activities and providing medical assistance to clearance teams, in accordance with the *Guidelines on Red Cross/Red Crescent involvement in mine-clearance activities*, adopted at the 1997 session of the Council of Delegates.⁴⁵⁵

VI. Other Practice

426. In 1994, an armed opposition group stated that it systematically informed the ICRC of mined locations.⁴⁵⁶

427. In 1998, in a report on violations of the laws of war by both sides in Angola, Africa Watch stated that "it is prohibited to use landmines near a civilian object, even if it contains military objectives, without any precautions, markings or other warnings or if such devices do not self-destruct or are not removed after their military purpose has been served".⁴⁵⁷

⁴⁵⁵ International Red Cross and Red Crescent Movement, Council of Delegates, Geneva Session, 29–30 October 1999, Res. 10, § 1.

INCENDIARY WEAPONS

A. Use of Incendiary Weapons against Civilians and Civilian Objects (practice relating to Rule 84)	§§ 1–183
Use of incendiary weapons in general	§§ 1–107
Use of incendiary weapons against civilians and civilian objects in particular	§§ 108–183
B. Use of Incendiary Weapons against Combatants (practice relating to Rule 85)	§§ 184–215
Use of incendiary weapons in general	§ 184
Use of incendiary weapons against combatants in particular	§§ 185–215

A. Use of Incendiary Weapons against Civilians and Civilian Objects

Use of incendiary weapons in general

I. Treaties and Other Instruments

Treaties

1. No practice was found.

Other Instruments

2. Section 6.2 of the 1999 UN Secretary-General's Bulletin states that "the use of certain conventional weapons, such as...incendiary weapons is prohibited".

II. National Practice

Military Manuals

3. Canada's Code of Conduct provides that the use of "tracer rounds for other than marking" is forbidden.¹

4. Colombia's Basic Military Manual prohibits the use of weapons which "cause unnecessary and indiscriminate, widespread, long-term and severe damage to people and the environment. This includes, *inter alia*:...incendiary

¹ Canada, *Code of Conduct* (2001), Rule 3, § 10(c).

weapons, whose production, importation, possession and use is also prohibited by Article 81 of the National Constitution."²

National Legislation

5. Andorra's Decree on Arms prohibits the use of incendiary weapons.³

6. Hungary's Criminal Code as amended prohibits incendiary weapons. It provides that:

- (1) Any person who uses or orders the use of a weapon or instrument of war prohibited by international treaty in a theatre of military operation or in an occupied territory against the enemy, civilians or prisoners of war commits a felony offence and shall be punishable by imprisonment of between 10 to 15 years or life imprisonment.
- (2) Any person who makes preparations for the use of a weapon prohibited by international treaty commits a felony offence and shall be punishable by imprisonment of up to five years.
- (3) For the purpose of Subsections (1)-(2) the following shall be construed as weapons prohibited by international treaty:

- ...
- b) the following weapons listed in the Protocols to the Convention signed at Geneva on 15 October 1980 on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, as promulgated by Law-Decree 2 of 1984...

- ...
3. incendiary weapons specified in Point 1 of Article 1 of Protocol III.⁴

7. Under the Penal Code as amended of the SFRY (FRY), the use of, or the order to use, "means or methods of combat prohibited under the rules of international law, during a war or an armed conflict" is a war crime.⁵ The commentary on the Penal Code as amended states that "the following weapons and means of combat are considered to be prohibited: ... napalm bombs and other incendiary weapons".⁶

National Case-law

8. No practice was found.

Other National Practice

9. A draft provision prohibiting the use of incendiary weapons was proposed to the Ad Hoc Committee on Conventional Weapons established by the CDDH by Afghanistan, Algeria, Austria, Colombia, Egypt, Kuwait, Lebanon, Mali,

² Colombia, *Basic Military Manual* (1995), pp. 49-50.

³ Andorra, *Decree on Arms* (1989), Chapter 1, Section 3, Article 2.

⁴ Hungary, *Criminal Code as amended* (1978), Article 160/A, §§ 1, 2 and 3(b)(3).

⁵ SFRY (FRY), *Penal Code as amended* (1976), Article 148(1).

⁶ SFRY (FRY), *Penal Code as amended* (1976), commentary on Article 148(1).

Mauritania, Mexico, Norway, Sudan, Sweden, Switzerland, Venezuela and SFRY. It stated that:

Incendiary weapons shall be prohibited for use.

- A. This prohibition shall apply to:
the use of any munition which is primarily designed to set fire to objects or to cause burn injury to persons through the action of flame and/or heat produced by a chemical reaction of a substance delivered on the target. Such munitions include flame-throwers, incendiary shells, rockets, grenades, mines and bombs.
- B. This prohibition shall not apply to:
 1. Munitions which may have secondary or incidental incendiary effects, such as illuminants, tracers, smoke, or signalling systems;
 2. Incendiary munitions which are designed and used specifically for defence against aircraft or armoured vehicles.⁷

A slightly revised proposal was later presented to the Committee by Afghanistan, Algeria, Austria, Côte d'Ivoire, Egypt, Iran, Kuwait, Lebanon, Lesotho, Mali, Mauritania, Mexico, Norway, Romania, Sudan, Sweden, Switzerland, Tunisia, Tanzania, Venezuela, SFRY and Zaire. This proposal changed the second exception (B2) to "munitions which combine incendiary effects with penetration or fragmentation effects and which are specifically designed for use against aircraft, armoured vehicles and similar targets".⁸

10. In 1973, with respect to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Australia stated that it "reaffirms the principles [in international agreements prohibiting the employment in war of weapons calculated to cause unnecessary suffering] and their application to the use of all classes of weapons, particular napalm". It further stated that it "does not possess aerial or mechanized napalm-type weapons and does not intend to acquire them".⁹

11. In 1977, during a debate in the First Committee of the UN General Assembly, Austria stated that development, production and use of incendiary weapons should be banned.¹⁰

⁷ Afghanistan, Algeria, Austria, Colombia, Egypt, Kuwait, Lebanon, Mali, Mauritania, Mexico, Norway, Sudan, Sweden, Switzerland, Venezuela and SFRY, Proposal submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/20 at CDDH/IV/226, p. 556.

⁸ Afghanistan, Algeria, Austria, Côte d'Ivoire, Egypt, Iran, Kuwait, Lebanon, Lesotho, Mali, Mauritania, Mexico, Norway, Romania, Sudan, Sweden, Switzerland, Tunisia, Tanzania, Venezuela, SFRY and Zaire, Proposal submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/Inf.220 at CDDH/IV/226, pp. 560-561.

⁹ Australia, Reply of 21 September 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 4.

¹⁰ Austria, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.13, 27 October 1977, p. 28.

12. In 1973, with respect to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Barbados stated that it “supports the conclusions contained in chapter V of the report”, namely “the necessity of working out measures for the prohibition of the use, production, development and stockpiling of napalm and other incendiary weapons” (see *infra*).¹¹

13. In 1972, during a debate preceding the adoption of Resolution 3032 (XXVII) in which the UN General Assembly called upon “all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular the Hague Conventions of 1899 and 1907”, Belgium stated that this paragraph contained a very clear reference to napalm.¹²

14. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Canada stated that “both considerations of limitations on the use of specific weapons, such as napalm and other incendiary weapons, and efforts to promote the further development of the international humanitarian law of armed conflict, should be undertaken quickly and effectively”.¹³

15. In 1972, during a debate on Resolution 2932 A (XXVII) in the First Committee of the UN General Assembly, Chile stated that it preferred a firmer resolution, but that it accepted that the process banning incendiary weapons had not been developed to that point and acquiesced with the draft proposal. Regarding napalm, it stated that “international law is extremely out of date and deficient” and added that “it is urgent that the United Nations adopt all necessary measures and arrive at a legal instrument prohibiting its production, stockpiling and use”.¹⁴

16. In 1973, during a debate in the First Committee of the UN General Assembly, China stated that it was against the use of incendiary weapons and condemned Israel’s use of them in the Yom Kippur War in 1973.¹⁵

17. At the 18th International Conference of the Red Cross, China condemned the use of napalm by US forces in the Korean War, stating that “foreign invaders

¹¹ Barbados, Reply of 22 February 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 4.

also wantonly bombarded the undefended cities and villages located far from the front line, for many times used the most inhumane napalm bombs".¹⁶

18. In 1977, during a debate in the First Committee of the UN General Assembly, Colombia supported the elimination of incendiary weapons.¹⁷

19. In 1973, with respect to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Cyprus concurred with the conclusions of the report and recommended that "both the General Assembly and the ICRC be involved in the measures for the prohibition of the use, production, development and stockpiling of napalm and other incendiary weapons".¹⁸

20. In 1973, with respect to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Czechoslovakia assured the UN Secretary-General that the competent Czechoslovak authorities were prepared to "exert every effort to achieve a solution leading to the final prohibition of the use of napalm and other incendiary weapons".¹⁹

21. In 1972, during a debate on Resolution 2932 A (XXVII) in the First Committee of the UN General Assembly, Ecuador stated that no pretext could justify the use of incendiary weapons and that the effects were especially grave in colonial conflicts in less-developed nations.²⁰

22. In 1973, in its reply on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Finland deemed it important "to continue discussions and studies in order to find various ways and means to restrict the use of inhuman weapons and methods of warfare". It recommended that the issue of incendiary weapons be discussed at the upcoming CDDH.²¹

23. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Finland stated that:

¹⁶ China, Statement of 30 July 1952 at the 18th International Conference of the Red Cross, Toronto, 26 July–7 August 1952, reprinted in *Documents on Foreign Affairs of the People's Republic of China*, World Knowledge Press, Beijing, Vol. 2, pp. 82–83.

¹⁸ Cyprus, Reply of 5 April 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 5.

¹⁹ Czechoslovakia, Reply of 31 August 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 6.

²⁰ Ecuador, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/PV.1883, 3 November 1972, p. 6.

²¹ Finland, Reply of 21 September 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 7.

9. In view of the development of modern weaponry and warfare and their consequences on the civilian population, it was of prime importance to reach early agreement on general principles prohibiting or restricting the use of specific weapons. . . . Reports . . . showed clearly that the deployment of extremely cruel weapons, such as napalm and other incendiary weapons, seemed to be most frequent in cases where their strict military value was least, namely, when directed against civilian targets. The suffering they caused was disproportionate to any military advantage gained.
10. . . . The Ad Hoc Committee should endeavour to define [specific categories of conventional weapons] and prepare a list mentioning, at least, napalm and other incendiary weapons.²²

24. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of the FRG stated that "he did not think . . . that the time had come to renounce flame weapons. Security considerations prevented not only his country, but many others, from doing so." He added that:

Although his country had to look for solutions which were sound from a security point of view, it did not wish to minimize the seriousness of wounds caused by napalm and other flame weapons. Although he agreed with the United Kingdom representative, who had pointed out that with the elimination of napalm a number of burn casualties would be reduced by only a fairly small percentage, he favoured the widespread endeavours to prohibit the sources of those grave injuries.²³

25. At the CCW Preparatory Conference in 1979, the FRG stated that proposals made by delegations "for a total ban" on incendiary weapons or for "a ban with explicit exceptions" were:

not only inconsistent with the mandate [set out in UN General Assembly Resolution 32/152] but were based on an unproven hypothesis, namely that incendiary weapons were excessively injurious in all circumstances. The exceptions, for their part, would give rise to a definite paradox since, if there was not excessive injury under all circumstances, it was illogical to start from the idea of a total ban.²⁴

26. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Guatemala stated that "it is necessary to make renewed efforts for the legal prohibition of the use of weapons that cause unnecessary suffering in all armed conflicts, especially the mass use of incendiary weapons".²⁵

²² Finland, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 9, §§ 9–10.

²³ FRG, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.32, 1 June 1976, p. 336, §§ 30 and 32.

²⁴ FRG, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF./II/SR.24, 9 April 1979, p. 6, § 23.

²⁵ Guatemala, Reply of 10 August 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 8.

27. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of India stated that:

His delegation, for its part, was of the opinion that a country should not be placed at a disadvantage when the defence of its territory was at stake. It should accordingly be entitled to use incendiary weapons against the enemy on its own soil. Once the enemy had been driven back beyond the international borders, however, the use of incendiary weapons against him would be illegal. His delegation therefore proposed a complete prohibition of the use of incendiary weapons by the armed forces of a country outside that country's own borders or the borders of its allies. It thought that that proposal would provide a fair solution to a very complicated problem.²⁶

28. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Iran stated that "given a general consensus within the international community to take action on these weapons, the Government of Iran would think that the most practical approach would be to consider a prohibition on the use of all incendiary weapons".²⁷

29. According to the Report on the Practice of Iran, in February 1981, an Iranian colonel announced that Iraq had used incendiary bombs against the Iranian city of Marivan. He called this act a "crime" and stated that these weapons were banned.²⁸

30. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Iraq stated that:

27. ... His Government considered incendiary weapons to be completely inhumane. The sufferings caused by their use could not be minimized, especially as such weapons did not discriminate between civilian and military objectives. There was a tendency for military forces to be more cautious in employing them in attacks, out of regard for the protection of their own forces, but in cities incendiary weapons could present a serious danger to the civilian population.

28. Some delegations seemed to favour criteria which would not prohibit the use of incendiary weapons altogether. In his opinion it was impossible to establish such criteria because of the inherently lethal nature of those weapons. That point had already been brought up by the Secretary-General of the United Nations in his 1972 report entitled "Napalm and other incendiary weapons and all aspects of their possible use" ... His delegation was in full agreement with the conclusions in that report to the effect that all efforts should be made to prohibit the use of incendiary weapons in warfare.²⁹

²⁹ Iraq, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.27, 19 May 1976, p. 279, §§ 27-28.

31. At the CCW Preparatory Conference in 1978, Iraq stated that it “desired the prohibition of certain incendiary weapons”.³⁰
32. According to the Report on the Practice of Iraq, Iraq has “restrictions and limitations” on the use of incendiary weapons.³¹
33. At the CCW Preparatory Conference in 1978, Japan declared that while it “was not sure it would be practicable to ban completely” all incendiary weapons, the use of incendiary weapons containing yellow phosphorus should be prohibited.³²
34. According to the Report on the Practice of Jordan, the “Jordanian army was constantly bombarded with napalm bombs throughout the 1967 War. Jordan condemned officially the use by Israel of these horrible weapons.”³³
35. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Kuwait stated that it “will whole-heartedly support any action that may be taken by the United Nations to prevent the use of napalm in armed conflicts and especially against the civilian population”.³⁴
36. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Kuwait stated that:

16. There were several types of weapon which could be included in the category of incendiary weapons, and military authorities would claim that their use was necessary without concerning themselves with the humanitarian side of the question.
17. Several types of incendiary weapons such as napalm, flame-throwers and incendiary munitions, should be prohibited forthwith, regardless of military considerations. The other incendiary weapons should be classified as defensive or offensive, and as anti-personnel or anti-matériel. Incendiary weapons would thus be divided into two categories from the operational point of view.
18. His delegation suggested that incendiary weapons used indiscriminately against members of the armed forces and the civilian population should be prohibited. It also suggested that incendiary weapons used against civilian objects should be prohibited. It considered, moreover, that incendiary weapons other than napalm and flame-throwers should be used only for defence or for attacking military matériel. It would support any measure designed to prohibit or restrict the use of destructive weapons.³⁵

³⁵ Kuwait, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.10, 19 February 1975, pp. 94–95, §§ 16–18.

37. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Madagascar welcomed the establishment of the Committee and stated that this "would enable the [CDDH] to . . . draw up rules prohibiting the use of napalm and other incendiary weapons" and that "the Government of Madagascar condemned the use of incendiary weapons and all methods of destruction employing napalm or phosphorus, which caused terrible injuries. In such cases no argument or subterfuge could prevail over humanitarian law."³⁶

38. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Mexico stated that it was in favour of the total prohibition of the use of incendiary weapons, including napalm, to be achieved by an international agreement.³⁷

39. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Mexico stated that:

33. . . . The ban on incendiary weapons should, in fact, be a total one.

34. He expressed satisfaction that the United Nations General Assembly had reflected the wishes of international opinion regarding the prohibition of incendiary weapons.³⁸

40. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Mexico, with respect to the draft protocol relative to the prohibition of the use of incendiary weapons submitted by Norway (see *infra*), stated that:

The actual content of the Norwegian proposal . . . was discouraging in so far as it appeared to constitute a further attempt to restrict the use of incendiary weapons on the basis of the targets attacked, whereas negotiations thus far had been directed towards the total prohibition of incendiary weapons, or at least of some of them. The extensive information considered at previous meetings of the Committee and at the two sessions of the Conference of Government Experts showed that incendiary weapons were particularly cruel and caused wounds which were difficult to treat. The same sources also showed that the military effectiveness of such weapons was limited, that their tactical value lay mainly in the terror which fire inspired in everyone except trained troops, and that substitutes could be used in practically all the circumstances for which incendiary weapons were employed. Moreover, such weapons were *par excellence* weapons which caused superfluous injury. [The prohibition to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering] was absolute. To accept restrictions on the use of incendiary weapons on the basis

³⁶ Madagascar, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.10, 19 February 1975, p. 103, § 55.

³⁷ Mexico, Reply of 29 August 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 11.

³⁸ Mexico, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.10, 19 February 1975, p. 98, §§ 33–34.

of the targets attacked would entail the acceptance of one of two assumptions: either incendiary weapons did not cause superfluous injury and therefore did not fall within the meaning of the absolute prohibition laid down in article 33, paragraph 2; or else the Ad Hoc Committee was going to limit the scope of what had already been approved in Committee III. His delegation could accept neither of those assumptions.³⁹

41. At the CCW Preparatory Conference in 1978, Mexico stated that its earlier proposal on the prohibition of incendiary weapons ought to be a base for the future treaty.⁴⁰ It proposed the following:

Art. 1. It is prohibited to use incendiary weapons . . .

Art. 2. The prohibition referred to in the foregoing article shall apply to the use of any munition which is primarily designed to set fire to objects or to cause burn injury to persons through the action of flame and/or heat produced by chemical reaction of the substance delivered on the target. Such munitions include flame-throwers, incendiary shells, rockets, grenades, mines and bombs.

Art. 3. The prohibition referred to in article 1 above shall not apply to munitions which may have secondary or incidental incendiary effects, such as illuminants, tracers, smoke or signalling systems.⁴¹

42. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Mongolia stated that it "fully associates itself with the views of the consultant expert as to the necessity of working out measures for the prohibition of the use, production, development and stockpiling of napalm and incendiary weapons".⁴²

43. At the CDDH, Mozambique stated that "while this Conference is meeting here, the people of Mozambique are being bombed by the illegal and racist régime of Ian Smith, which is using napalm and other materials causing superfluous injury".⁴³

44. In 1992, during a debate in the First Committee of the UN General Assembly, the Netherlands implied that universal adherence to the 1980 CCW would give it effect in internal conflicts.⁴⁴

³⁹ Mexico, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.25, 13 May 1976, p. 259, § 33.

⁴⁴ Netherlands, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/47/PV.26, 5 November 1992, p. 21.

45. In 1973, during a debate in the Sixth Committee of the UN General Assembly, New Zealand stated that it “believed that there was a strong case for a total prohibition of the use of napalm and other incendiary weapons”.⁴⁵

46. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of New Zealand stated that:

38. ...As the New Zealand delegation had already said in the United Nations General Assembly and as was also stated in [a] working paper, a rule prohibiting the use of napalm and other incendiary weapons in all circumstances was much more likely to be complied with than a restriction on particular uses...

39. So far as concerned the principle of prohibiting or restricting the use of napalm and other incendiary weapons, he recalled that on a number of occasions since 1973 his Government had stated its position, which was that, while the paramount requirement was to protect civilians, such protection should not be restricted to civilians. If the use of incendiaries was prohibited only in particular circumstances or against particular targets, there would be substantial difficulties of implementation. There was a strong case for a total prohibition of such weapons.⁴⁶

47. At the CCW Preparatory Conference in 1979, Nigeria expressed “great concern over the fact that the negotiations on incendiary weapons had not yielded positive results”. It hoped, on behalf of the African bloc, that the Conference would result in “a treaty or convention restricting or prohibiting certain conventional weapons deemed to be excessively injurious or to have indiscriminate effects”.⁴⁷

48. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Norway stated that a prohibition on production, development and stockpiling of incendiary weapons would be extremely complicated to implement, since production of incendiary weapons was easy. Consequently, it preferred a total prohibition of the use of some or all incendiary weapons.⁴⁸

49. Norway submitted a “Draft Protocol Relative to the Prohibition of the Use of Incendiary Weapons” to the Ad Hoc Committee on Conventional Weapons established by the CDDH which read, *inter alia*, as follows:

⁴⁵ New Zealand, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.6/SR.1453, 4 December 1973, p. 308.

⁴⁶ New Zealand, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.10, 19 February 1975, pp. 99–100, §§ 38–39.

⁴⁷ Nigeria, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF/II/SR.24, 9 April 1979, p. 5, § 17.

⁴⁸ Norway, Reply of 11 September 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 16.

Article 1 – Field of application

The present Protocol shall apply in the situations referred to in articles 2 and 3 common to the Geneva Conventions of August 12, 1949 for the Protection of War Victims.

...

Article 3 – General prohibition

With the further limitations spelled out in the present Protocol and subject to the provisions of [AP I], incendiary weapons may only be used against objects that are military objectives in the sense of article 47, paragraph 2 of the said Protocol, including in close support of friendly forces.

The use of incendiary weapons against personnel is prohibited.

Nevertheless, the presence of combatants or civilians within or in the immediate vicinity of legitimate targets as described in this article does not render such targets immune from attacks with incendiary weapons.

...

Article 5 – Precaution in attack

Any use of incendiary weapons is subject to article 50 of [AP I].

In addition, it is prohibited to launch an attack with incendiary weapons except when:

- (a) the location of the target is known and properly recognized, and
- (b) all feasible precaution is taken to limit the incendiary effects to the specific military objectives and to avoid incidental injury or incidental loss of lives.

Article 6 – Protection against environmental effects

Before deciding upon the launching of attack with incendiary weapons, special care must be taken to ensure that environmental effects as described in article 48 *bis* of [AP I] will be avoided.⁴⁹

50. In 1977, during a debate in the First Committee of the UN General Assembly, Peru stated that incendiary weapons should be prohibited.⁵⁰

51. In 1995, in an official communiqué released by the Joint Command of the Peruvian armed forces, Peru denied having used flame-throwers in its conflict with Ecuador.⁵¹

52. A 1998, in statement issued in reply to a question from the ICRC on the customary norms of IHL of the Philippines, the Philippine Department of Foreign Affairs declared that the Philippines had renounced the use of napalm.⁵²

53. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General

⁴⁹ Norway, Draft protocol relative to the prohibition of the use of incendiary weapons submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/207 within CDDH/IV/226, pp. 567–569.

on napalm and other incendiary weapons and all aspects of their possible use, Poland stated that it considered that the report could “serve as a suitable basis for further considerations of the direction and manner of negotiating with a view to reaching an agreement on the prohibition of the use of incendiary weapons and, subsequently, their total elimination from military arsenals”.⁵³

54. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Poland stated that “napalm and other incendiary weapons . . . should be banned”.⁵⁴

55. At the CCW Preparatory Conference in 1979, Poland stated that “it was disappointing” that the Conference had not reached an agreement on the prohibition or restriction of incendiary weapons. It hoped that “the extensive debate on the total prohibition of the use of such weapons in inhabited areas would eventually lead to the elimination of at least the most drastic and indiscriminate weapons in that category”.⁵⁵

56. At the International Conference on the Protection of War Victims in 1993, Russia declared that “in order to protect the civilian population against indiscriminate weapons . . . incendiary weapons . . . should be completely banned in internal conflicts”.⁵⁶

57. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of Sudan stated that “recent experience had shown the untold sufferings produced by the use of . . . incendiary weapons. His country was ready to co-operate with the ICRC in its endeavours to ensure respect for all the rules laid down concerning their prohibition.”⁵⁷

58. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Sweden stated that “if total prohibition of use were attained as regards some or all incendiary weapons the question of a ban on production, development and stockpiling, etc. could subsequently be taken up”.⁵⁸

59. In 1977, during a debate in the First Committee of the UN General Assembly, Sweden stated that it, “together with many others”, was convinced that

⁵³ Poland, Reply of 25 September sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 17.

⁵⁸ Sweden, Reply of 5 June 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 23.

incendiary weapons could be restricted and partially banned without “upsetting any military balance”.⁵⁹

60. At the CCW Preparatory Conference in 1979, Sweden stated that “no category of conventional weapons had evoked greater public revulsion than incendiary weapons, including napalm” and that, given the difficulty of applying partial bans on incendiary weapons, it was of the view that a “complete prohibition was the preferable course”.⁶⁰

61. In 1987, during a debate in the First Committee of the UN General Assembly, Sweden stated that further restrictions on incendiary weapons should be enacted.⁶¹ It reiterated this view in 1992.⁶²

62. At the CCW Preparatory Conference in 1978, Switzerland stated that “although civilians and combatants could be distinguished in theory, it was impossible to do so in practice” and therefore it “advocated the total prohibition of the main types of incendiary weapons”.⁶³

63. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Syria endorsed “all the provisions contained in the report, and in particular, those concerning the ban on [napalm and other incendiary weapons]”.⁶⁴

64. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Togo stated that the CDDH “should prohibit the use of weapons such as napalm, incendiary and area weapons”.⁶⁵

65. In 1977, during a debate in the First Committee of the UN General Assembly, Turkey stated that it supported the prohibition or restrictions on incendiary weapons, but held that it would only be effective if it reflected a consensus in the world community.⁶⁶

66. In 1969, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), the USSR stated that:

⁵⁹ Sweden, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.32, 15 November 1977, p. 26.

⁶³ Switzerland, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF./I/SR.12, 12 September 1978, p. 2, § 3.

⁶⁴ Syria, Reply of 31 July 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 23.

⁶⁵ Togo, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.1, 13 March 1974, p. 16, § 45.

⁶⁶ Turkey, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/32/PV.44, 25 November 1977, p. 23.

For the purpose of crushing the resistance of the Arabs [in the territories occupied by Israel], the aggressors from Israel are continuing to use napalm, which is forbidden by international law.

The criminal, inhuman acts of the imperialist States are a shameful violation of international law, and also of the resolutions of the International Conferences of the Red Cross.⁶⁷

67. In 1972, during a debate in the Sixth Committee of the UN General Assembly, the USSR stated that it "was in favour of the prohibition of means of warfare which were particularly cruel, because their use was incompatible with the norms of international law. One such means was napalm."⁶⁸

68. In 1975, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of the UAE stated that "he himself would be grateful if the Diplomatic Conference succeeded in prohibiting certain deadly weapons which were already condemned by world public opinion, such as napalm and other incendiary weapons".⁶⁹

69. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of the UK stated that:

18. His country had at present no requirement for napalm, but that it possessed other weapons capable of causing death by burning... His delegation could not subscribe to [a] prohibition [of these weapons].

19. The United Kingdom, which was seriously concerned about the suffering caused by flame weapons, was participating actively in negotiations designed to ascertain ways in which the international community might reduce such suffering.

...

21. ... Incendiary weapons could be both effective and discriminating...

22. The issue at stake was the right of States to use incendiary weapons when they felt their security threatened. It was not easy to deny them that right; but at the same time there was good reason to believe that the great majority of delegations at the current Conference would be happy to see some limitation on the use of such weapons... The Netherlands proposal [submitted as an annex to a working paper on incendiary weapons, see *supra*] provided an excellent basis for negotiation, and it was greatly to be hoped that the Committee would reach agreement along these lines.⁷⁰

70. At the CCW Preparatory Conference in 1978, the US felt that an "early agreement" on the use of incendiary weapons was unlikely and that "continued

⁶⁷ USSR, Reply dated 30 December 1969 to the UN Secretary-General regarding the preparation of the study requested in paragraph 2 of General Assembly Resolution 2444 (XXIII), annexed to Report of the Secretary-General on respect for human rights in armed conflicts, UN Doc. A/8052, 18 September 1970, Annex III, p. 120.

insistence on the total prohibition of such weapons, or prohibition of their use against people, would preclude the possibility of agreement" as "a compromise could be reached only if consideration was given both to humanitarian concerns and to military requirements and if the effects of alternative weapons were taken into account".⁷¹

71. In 1977, during a debate in the First Committee of the UN General Assembly, Zaire stated that development, production and use of incendiary weapons should be banned.⁷²

72. According to the Report on the Practice of Zimbabwe, it is not the military practice of Zimbabwe to use incendiary weapons.⁷³

73. In 1978, during an armed conflict between two States, one of the States denounced the use of napalm and phosphorous bombs based on international law and conventions.⁷⁴

III. Practice of International Organisations and Conferences

United Nations

74. UN General Assembly Resolution 2932 A (XXVII), adopted in 1972, was the first to deal with incendiary weapons. The resolution referred to the "proposals for both the elimination and non-use of incendiary weapons" that were advanced at disarmament negotiations in 1933 and noted that "similar proposals had been repeatedly made in recent years". The resolution deplored "the use of napalm and other incendiary weapons in all armed conflicts".⁷⁵ The resolution's provision deploring the use of incendiary weapons in "all armed conflicts" was part of an amendment sponsored by Jordan, Kenya, Syria and Uganda.⁷⁶

75. In a resolution adopted following the CE (1972), the UN General Assembly expressed its concern that no agreement had been reached concerning, *inter alia*, weapons that cause unnecessary suffering. It reiterated its call upon "all parties to armed conflicts to observe the international humanitarian rules which are applicable, in particular the Hague Conventions of 1899 and 1907".⁷⁷

76. In a resolution adopted in 1972, the UN General Assembly deplored "the use of napalm and other incendiary weapons in all armed conflicts".⁷⁸

⁷¹ US, Statement at the CCW Preparatory Conference, Doc. A/CONF.95/PREP.CONF.1/SR.5, 1 September 1978, p. 3, § 7.

⁷⁸ UN General Assembly, Res. 2932 A (XXVII), 29 November 1972, § 3.

77. In several resolutions between 1973 and 1977, the UN General Assembly invited the upcoming CDDH to “seek agreement” on rules prohibiting or restricting the use of incendiary weapons.⁷⁹

78. In a resolution adopted in 1973, the UN General Assembly stated that:

The efficacy of these general principles [of international law prohibiting the use of weapons which are likely to cause unnecessary suffering and means and methods of warfare which have indiscriminate effects] could be further enhanced if rules were elaborated and generally accepted prohibiting or restricting the use of napalm and other incendiary weapons.⁸⁰

79. In a resolution adopted in 1974, the UN General Assembly condemned “the use of napalm and other incendiary weapons in armed conflicts in circumstances where it may affect human beings or may cause damage to the environment and/or natural resources”. It also urged “all States to refrain from the production, stockpiling, proliferation, and use of such weapons pending the conclusion of agreements on the prohibition of these weapons”.⁸¹

80. In a resolution adopted in 1980, the UN General Assembly welcomed the successful conclusion of the 1980 CCW and its Protocols and commended the Convention and the three annexed Protocols to all States “with a view to achieving the widest possible adherence to these instruments”.⁸²

81. In numerous resolutions adopted between 1981 and 1998, the UN General Assembly urged all States that had not done so to accede to the 1980 CCW and its Protocols.⁸³

82. In a resolution adopted in 1996, the UN Sub-Commission on Human Rights listed napalm as “a weapon of mass destruction or with indiscriminate effects”. It also stated that “the use of napalm is incompatible with human rights and humanitarian law”.⁸⁴

83. In 1969, in his report on respect for human rights in armed conflict, the UN Secretary-General stated that there was no consensus on the legal status of incendiary weapons. Some experts stated that napalm could be used discriminately and that this use must be controlled.⁸⁵

⁸³ UN General Assembly, Res. 36/93, 9 December 1981, § 1; Res. 37/79, 9 December 1982, § 1; Res. 38/66, 15 December 1983, § 3; Res. 39/56, 12 December 1984, § 3; Res. 40/84, 12 December 1985, § 3; Res. 41/50, 3 December 1986, § 3; Res. 42/30, 30 November 1987, § 3; Res. 43/67, 7 December 1988, § 3; Res. 45/64, 4 December 1990, § 3; Res. 46/40, 6 December 1991, § 3; Res. 47/56, 9 December 1992, § 3; Res. 48/79, 16 December 1993, § 3; Res. 49/79, 15 December 1994, § 3; Res. 50/74, 12 December 1995, § 3; Res. 51/49, 10 December 1996, § 3; Res. 52/42, 9 December 1997, § 3; Res. 53/81, 4 December 1998, § 5.

⁸⁴ UN Sub-Commission on Human Rights, Res. 1996/16, 29 August 1996, § 1 and preamble.

⁸⁵ UN Secretary-General, Report on respect for human rights in armed conflicts, UN Doc. A/7720, 20 November 1969, p. 62.

84. In 1973, in his report on napalm and other incendiary weapons and all aspects of their possible use, the UN Secretary-General noted that Article 22 of 1907 Hague Convention (IV), “the right of belligerents to adopt means of injuring the enemy is not unlimited”, and Article 23(e) prohibiting means of warfare which caused unnecessary suffering were applicable to incendiary weapons. These principles were deemed to be of a customary nature. The report concluded by bringing “to the attention of the General Assembly the necessity of working out measures for the prohibition of the use, production, development and stockpiling of napalm and other incendiary weapons”.⁸⁶

85. The UN Secretariat’s survey on respect for human rights in armed conflicts in 1973 analysed practice and doctrine on incendiary weapons. A majority of the sources supported the view that there were restrictions on the use of incendiary weapons.⁸⁷

Other International Organisations

86. In 1985, in a report on the deteriorating situation in Afghanistan, the Rapporteur of the Parliamentary Assembly of the Council of Europe stated that “according to several concordant accounts, . . . chemical substances and incendiary bombs producing gases of various colours have been discharged”. In this respect, he added that the report of the Special Rapporteur of the UN Commission on Human Rights deserved mention.⁸⁸ In that report, the UN Special Rapporteur had recommended that “the parties to the conflict, namely government and opposition forces, should be reminded that it is their duty to apply fully the rules of international humanitarian law without discrimination”.⁸⁹

87. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe invited:

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

...

- b. ratify, if they have not done so, . . . the United Nations Convention of 1980 on the prohibitions or restrictions on the use of certain conventional weapons and its protocols . . .

⁸⁶ UN Secretary-General, Report on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/8803/Rev.1, April 1973, p. 56.

⁸⁸ Council of Europe, Parliamentary Assembly, Rapporteur, Report on the deteriorating situation in Afghanistan, Doc. 5495, 15 November 1985, pp. 7–8, § 16(e).

⁸⁹ UN Commission on Human Rights, Special Rapporteur on the Situation of Human Rights in Afghanistan, Report, Recommendations, reprinted in Council of Europe, Parliamentary Assembly, Doc. 5495, Appendix 1, 15 November 1985, p. 11, § 190.

- j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.⁹⁰

88. In a resolution adopted in 1994 on respect for IHL and support for humanitarian action in armed conflicts, the OAU Council of Ministers invited "all States that have not yet become party to the...[1980] CCW, to consider, or reconsider, without delay the possibility of doing so in the near future".⁹¹

89. In two resolutions adopted in 1994 and 1996 on respect for IHL, the OAS General Assembly urged member States to accede to the 1980 CCW.⁹²

90. In 1994, the OIC denounced the use of napalm by Serb forces during the conflict in Bosnia and Herzegovina.⁹³

International Conferences

91. No practice was found.

IV. Practice of International Judicial and Quasi-judicial Bodies

92. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

93. No practice was found.

VI. Other Practice

94. In 1979, in a letter to the ICRC, an armed group confirmed its commitment to IHL and denounced the use of "all kinds of prohibited weapons such napalm bombs".⁹⁴

95. *Jane's Infantry Weapons* reported that the DNG incendiary smoke hand grenade, which contains "a charge of stabilised red phosphorus composition which gives both incendiary and smoke-producing effects", is being produced in Austria.⁹⁵ *Jane's Ammunition Handbook* also reported that the 81 mm

⁹⁵ Terry J. Gander (ed.), *Jane's Infantry Weapons*, Jane's Information Group, Coulsdon, Twenty-fourth edition, 1998–1999, pp. 506.

smoke/incendiary bomb RPI Mk 3, which is filled in order to “provide a greater fire raising capability while still producing a useful amount of screening smoke”, is being manufactured in Austria.⁹⁶

96. *Jane's Infantry Weapons* reported that Brazil's arsenal contains the Hydroar LC T1 M1 flame-thrower.⁹⁷ Furthermore, according to the *Jane's Air-Launched Weapons*, AV-BI bombs are being manufactured in Brazil and included in its arsenal.⁹⁸

97. According to *Jane's Air-Launched Weapons*, Chile produces and possesses napalm bombs.⁹⁹

98. According to *Jane's Infantry Weapons*, China's PLA stockpiles the NORINCO portable flame-thrower, which is also offered for export sale.¹⁰⁰ *Jane's Ammunition Handbook* also reports that the PLA stockpiles the 82 mm incendiary bomb Type 53 for 82 mm mortars which “is filled with an unidentified incendiary agent (probably red phosphorus) in the form of pellets”.¹⁰¹

99. According to *Jane's Infantry Weapons*, “various European countries” stockpile the Haley and Weller E108 incendiary grenade. The grenade “was developed for use as a sabotage and a destruction weapon . . . It burns at a temperature in excess of 2,700° C and will melt through 2mm of steel.”¹⁰²

100. According to *Jane's Infantry Weapons*, “the former Warsaw-pact nations and others” use the RPO-A Schmel Rocket Infantry flame-thrower and the LPO-50 flame-thrower.¹⁰³

101. *Jane's Infantry Weapons* reported that the DM 24 incendiary smoke hand grenade is being produced in Germany. The grenade is an “incendiary mass”, which “burns for about five minutes at a temperature of approximately 1,200°C. This heat ignites any combustible material the burning mass touches.”¹⁰⁴

⁹⁶ Terry J. Gander and Charles Q. Cutshaw (eds.), *Jane's Ammunition Handbook*, Jane's Information Group, Coulsdon, Seventh edition, 1998–1999, p. 414.

¹⁰⁴ Terry J. Gander (ed.), *Jane's Infantry Weapons*, Jane's Information Group, Coulsdon, Twenty-fourth edition, 1998–1999, p. 520.

102. According to *Jane's Air-Launched Weapons*, Russia produces and possesses ZB-500GD and ZB-500ShM, which are "napalm type fire bombs".¹⁰⁵

103. *Jane's Infantry Weapons* reported that the arsenal of South Africa's National Defence Force contains a red phosphorus hand grenade and the M1A1 60 mm red phosphorus bomb. The effect of the grenade is to:

spread the burning red phosphorous granules over the immediate area. The grenade can be used in a defensive role where screening smoke is required and as an offensive weapon when the acrid smoke and incendiary effect can be used for bunker or room clearance. The burning granules will also ignite various materials.¹⁰⁶

104. *Jane's Infantry Weapons* reported that the EXPAL incendiary hand grenade is being produced in Spain. There are three versions of this grenade: the GWP, which "is filled with white phosphorous and therefore has applications as a smoke-producer, an antipersonnel weapon or as an incendiary grenade"; the GRP, which "has a primary role as a smoke-producer but will also act as an incendiary device with easily ignited substances"; and the CTE grenade, which "is filled with thermite and is therefore purely an incendiary device which will ignite anything capable of being burned".¹⁰⁷ Furthermore, according to *Jane's Air-Launched Weapons*, Spain produces and possesses BIN incendiary bombs.¹⁰⁸

105. *Jane's Infantry Weapons* reported that the arsenal of the Taiwan Army and Marine Corps contains the Type 67 flame-thrower.¹⁰⁹

106. *Jane's Infantry Weapons* reported that the arsenal of the US army contains the AN-M14 TH3 incendiary hand grenade. The grenade is used "primarily to provide a source of intense heat to destroy equipment. It generates heat to 2,200°C. The grenade filler will burn from 30 to 45 seconds... The grenade is normally hand thrown, although it may be rifle-launched using a special M2 series projection adapter."¹¹⁰ Furthermore, according to *Jane's Air-Launched Weapons*, the US produces and possesses M 116 napalm bombs.¹¹¹

107. According to *Jeune Afrique Economie* in 1996, Portugal allegedly used napalm in the conflict in Angola.¹¹²

Use of incendiary weapons against civilians and civilian objects in particular

I. Treaties and Other Instruments

Treaties

108. Article 1(1) of the 1980 Protocol III to the CCW defines “incendiary weapon” as:

Any weapon or munition which is primarily designed to set fire to objects or to cause burn injury to persons through the action of flame, heat, or a combination thereof, produced by a chemical reaction of a substance delivered on the target.

- (a) Incendiary weapons can take the form of, for example, flame throwers, fougasses, shells, rockets, grenades, mines, bombs and other containers of incendiary substances.
- (b) Incendiary weapons do not include:
 - i. Munitions which may have incidental incendiary effects, such as illuminants, tracers, smoke or signalling systems;
 - ii. Munitions designed to combine penetration, blast or fragmentation effects with an additional incendiary effect, such as armour-piercing projectiles, fragmentation shells, explosive bombs and similar combined-effects munitions in which the incendiary effect is not specifically designed to cause burn injury to persons, but to be used against military objectives, such as armoured vehicles, aircraft and installations or facilities.

109. Article 1(5) of the 1980 Protocol III to the CCW provides that “‘feasible precautions’ are those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations”.

110. Article 2 of the 1980 Protocol III to the CCW restricts the use of incendiary weapons in order to protect civilians and civilian objects. It provides that:

1. It is prohibited in all circumstances to make the civilian population as such, individual civilians or civilian objects the object of attack by incendiary weapons.
2. It is prohibited in all circumstances to make any military objective located within a concentration of civilians the object of attack by air-delivered incendiary weapons.
3. It is further prohibited to make any military objective located within a concentration of civilians the object of attack by means of incendiary weapons other than air-delivered incendiary weapons, except when such military objective is clearly separated from the concentration of civilians and all feasible precautions are taken with a view to limiting the incendiary effects to the military objective and to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects.
4. It is prohibited to make forests or other kinds of plant cover the object of attack by incendiary weapons except when such natural elements are used to cover, conceal or camouflage combatants or other military objectives, or are themselves military objectives.

111. Upon ratification of the 1980 CCW, Canada stated that:

With respect to Protocol III, it is the understanding of the Government of Canada that the expression “clearly separated” in paragraph 3 of Article 2 includes both spatial separation or separation by means of an effective physical barrier between the military objective and the concentration of civilians.¹¹³

112. Upon ratification of the 1980 CCW, France declared that:

With reference to the scope of application defined in article 1 of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, . . . it will apply the provisions of the Convention and its three Protocols [I, II and III] to all armed conflicts referred to in articles 2 and 3 common to the Geneva Conventions of 12 August 1949 [international and non-international armed conflicts].¹¹⁴

113. Upon accession to the 1980 CCW, Israel stated that:

With reference to the scope of application defined in article 1 of the Convention, the Government of the State of Israel will apply the provisions of the Convention and those annexed Protocols to which Israel has agreed [I, II and III] to become bound to all armed conflicts involving regular forces of States referred to in article 2 common to the Geneva Conventions of 12 August 1949, as well as to all armed conflicts referred to in article 3 common to the Geneva Conventions of 12 August 1949.¹¹⁵

114. Upon ratification of the 1980 CCW, the UK stated that:

The United Kingdom accepts the provisions of article 2(2) and (3) on the understanding that the terms of those paragraphs of that article do not imply that the air-delivery of incendiary weapons, or of any other weapons, projectiles or munitions, is less accurate or less capable of being carried out discriminately than all or any other means of delivery.¹¹⁶

115. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.

¹¹³ Canada, Declaration made upon ratification of the CCW, 24 June 1994, § 4.

¹¹⁴ France, Reservations made upon ratification of the CCW, 4 March 1988.

¹¹⁵ Israel, Declarations and statements of understanding made upon accession to the CCW, 22 March 1995, § a.

¹¹⁶ UK, Declarations made upon ratification of the CCW, 13 February 1995, § d.

3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

Other Instruments

116. No practice was found.

II. National Practice

Military Manuals

117. Argentina's Law of War Manual reproduces the content of Article 1(1), (2) and (3) and Article 2 of the 1980 Protocol III to the CCW.¹¹⁷

118. Australia's Commanders' Guide states that "incendiary weapons should only be used against military targets. Incendiaries include weapons such as "napalm, flame-throwers, tracer rounds and white phosphorous".¹¹⁸

119. Australia's Defence Force Manual states that:

416. Incendiary weapons include any weapon or munition which is designed to set fire to objects or to cause burn injury to humans through the action of flame, heat or a combination of the two causes by a chemical reaction of a substance delivered on a target. They include flame throwers, shell, rockets, grenades, mines, bombs and other containers of incendiary materials.

417. Incendiary weapons do not include munitions which have incidental incendiary effects such as illuminants, tracers, smoke or signalling devices; nor do they include munitions designed to combine penetration, blast or fragmentation effects with an additional incendiary effect, such as armour piercing projectiles, fragmentation shells, explosive bombs and similar combined effects ammunition in which the incendiary effect is not specifically designed to cause burn injury to humans, but to be used against military objectives such as armoured vehicles, aircraft and installations and facilities.

418. Specific rules prohibit the use of incendiary weapons:

- (a) in all circumstances to attack the civilian population, individual citizens or civilian objects with air delivered incendiary weapons;
- (b) in all circumstances to make any military objective located within a concentration of civilians the object of attack by air delivered incendiary weapons;
- (c) to make any military objective located within a concentration of civilians the object of an attack by other than air delivered incendiary weapons, except where the military objective is clearly separated from the civilians and all feasible precautions are taken to minimise incidental loss of civilian life and damage to civilian objects (separation in this context can mean a barrier (such as an air raid shelter or a hill) or distance; and
- (d) on forests or plant cover except when the forests or plant cover are either being used to cover, conceal or camouflage military objectives or are themselves military objectives (if it is necessary to use incendiaries on a forest to clear a

¹¹⁷ Argentina, *Law of War Manual* (1989), §§ 4.25 and 4.26.

¹¹⁸ Australia, *Commanders' Guide* (1994), § 314, see also §§ 933–934.

field of fire or facilitate an advance or attack against an enemy, the forest has become a military objective and may legitimately be attacked).¹¹⁹

120. Belgium's Law of War Manual defines incendiary weapons in accordance with Article 1 of the 1980 Protocol III to the CCW and states that:

The use of such [incendiary] weapons against persons is prohibited because they cause unnecessary suffering, but their use against military objectives, such as bunkers, tanks, depots, etc. is permitted. However, if these military objectives are located inside a civilian concentration, their use is prohibited, except when the object is clearly separate from the concentration of civilians and all precautions are taken to avoid any loss of life among the civilian population and any damage to civilian objects. Their use against forests is also prohibited, except when they constitute a military objective or are used to conceal combatants or other military objectives.¹²⁰

121. Cameroon's Instructors' Manual restates the definition of incendiary weapons found in Article 1 of the 1980 Protocol III to the CCW and, with reference to Article 2 of the Protocol, states that "the only restrictions applicable to such arms concern their use against non-military objectives, against the environment and against military objectives located in areas of civilian concentration".¹²¹

122. Canada's LOAC Manual restates the definition of incendiary weapons and the restrictions concerning their application contained in Articles 1 and 2 respectively of the 1980 Protocol III to the CCW.¹²²

123. Ecuador's Naval Manual states that:

Incendiary weapons such as tracing ammunition, heat-producing bombs, flame throwers, napalm and any other incendiary weapons or agents, are considered lawful. Persons selecting these weapons for use should employ them in such a way as to minimize uncontrolled and indiscriminate effects on the civilian population, in a manner compatible with the fulfilment of the mission and the security of the forces.¹²³

124. France's LOAC Teaching Note states that "the use of incendiary weapons is strictly limited to military objectives" and that "it is forbidden to launch an attack with incendiary weapons against military objectives located near or within a concentration of civilians".¹²⁴

125. France's LOAC Manual states that "the use of incendiary weapons is strictly limited to military objectives" and that "it is forbidden to launch an attack with incendiary weapons against military objectives located near or within a concentration of civilians".¹²⁵ It also states that "it is possible to

¹¹⁹ Australia, *Defence Force Manual* (1994), §§ 416–418.

¹²⁰ Belgium, *Law of War Manual* (1983), p. 38.

¹²¹ Cameroon, *Instructors' Manual* (1992), pp. 123–124, § 441.

¹²² Canada, *LOAC Manual* (1999), p. 5-4, §§ 33, 34 and 36.

¹²³ Ecuador, *Naval Manual* (1989), § 9-6.

¹²⁴ France, *LOAC Teaching Note* (2000), p. 6.

¹²⁵ France, *LOAC Manual* (2001), p. 54.

use incendiary weapons when the military target is clearly separated from the civilian concentration and all feasible precautions are taken with a view to limiting the incendiary effects to the military objective, when the tactical situation allows it".¹²⁶ As regards napalm and flame-throwers, the manual repeats the same provision and quotes Article 1 of the 1980 Protocol III to the CCW.¹²⁷

126. Germany's Military Manual states, with reference to the 1980 Protocol III to the CCW, defines incendiary weapons in accordance with the Protocol and further states that:

422. When incendiary weapons are used, precautions shall be taken which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.

423. The civilian population as such, individual civilians and civilian objects shall be granted special protection. They shall never be made the object of attack by incendiary weapons.

424. It is prohibited in all circumstances to make any military objective located within a concentration of civilians the object of attack by incendiary weapons.

425. It is further prohibited to use incendiary weapons against forests or other kinds of plant cover except when such natural elements are used to cover, conceal or camouflage a military objective, or are themselves military objectives.¹²⁸

127. Israel's Manual on the Laws of War states that:

Incendiary arms are not banned. Nevertheless, because of their wide range of cover, this protocol of the CCW Convention is meant to protect civilians and forbids making a population centre a target for an incendiary weapons attack. Furthermore, it is forbidden to attack a military objective situated within a population centre employing incendiary weapons. The protocol does not ban the use of these arms during combat (for instance, in flushing out bunkers).¹²⁹

128. Kenya's LOAC Manual defines incendiary weapons in accordance with Article 1 of the 1980 Protocol III to the CCW and states that the "conditions for permitted use" are:

Incendiary weapons which are not air-delivered may be used:

- (a) when the military objective is clearly separated from a concentration of civilian persons; and
- (b) subject to precautions to limit incendiary effects to the military objective, when the tactical situation permits.

Air-delivered incendiary weapons may be so used only in attack against a military objective located outside concentrations of civilian persons.¹³⁰

¹²⁶ France, *LOAC Manual* (2001), p. 24. ¹²⁷ France, *LOAC Manual* (2001), pp. 86 and 79.

¹²⁸ Germany, *Military Manual* (1992), §§ 420–425.

¹²⁹ Israel, *Manual on the Laws of War* (1998), p. 16.

¹³⁰ Kenya, *LOAC Manual* (1997), Précis No. 3, p. 5.

129. The Military Manual of the Netherlands defines incendiary weapons in accordance with Article 1 of the 1980 Protocol III to the CCW. It further specifies that:

The general rules with regard to the protection of the civilian population apply, namely, in the first place, that the civilian population, individual civilians and civilian objects may not be attacked. Furthermore, it is forbidden to attack military objectives located inside a concentration of civilians by air-delivered incendiary weapons. Attacks by incendiary weapons which are not air-delivered are permitted provided two conditions are fulfilled:

- The military objective has to be clearly separated from the concentration of civilians.
- Precautionary measures have to be taken to limit the incendiary effect to the military objective and to avoid collateral damage to civilians and civilian objects.¹³¹

130. New Zealand's Military Manual restates Article 2 of the 1980 Protocol III to the CCW.¹³²

131. Russia's Military Manual prohibits "any weapons which strike indiscriminately or whose use causes superfluous injury and destruction" and specifically refers to the 1980 Protocol III to the CCW.¹³³

132. Spain's LOAC Manual defines incendiary weapons in accordance with Article 1 of the 1980 Protocol III and restates the restrictions of the use of incendiary weapons contained in Article 2 of the Protocol.¹³⁴

133. Sweden's IHL Manual states that:

[The 1980] Protocol III [to the CCW] contains restrictions applying where incendiary weapons are used. This protocol does not constitute a total prohibition of the use of incendiary weapons – which Sweden and other states had proposed. However, the protocol lays down such heavy restrictions on their use that there is reason to characterize it as a *partial prohibition of incendiary weapons*.

A great bone of contention has been how incendiary weapons are to be defined. Agreement has now been reached on a definition by which "incendiary weapon" covers any weapon or ammunition primarily designed to set fire to objects or to cause burn injuries to persons through the action of flames, heat or a combination of these. Incendiary weapons do not include those with incidental incendiary effects, such as illuminants or tracers. Nor shall armour-piercing projectiles and explosive shells that act through penetrating, blast or fragmentation effects in combination with the incendiary effect be considered as incendiary weapons.

...

This new rule [in Article 2 of Protocol III] affords civilians considerably better protection than hitherto against incendiary weapons.

...

¹³¹ Netherlands, *Military Manual* (1993), pp. V-13/14, § 11.

¹³² New Zealand, *Military Manual* (1992), §§ 513 and 620.

¹³³ Russia, *Military Manual* (1990), § 6(h). ¹³⁴ Spain, *LOAC Manual* (1996), § 3.2.a.(3).

There is a need to supplement the present Protocol III so that the agreement constitutes a *complete prohibition of incendiary weapons*. In this way, protection of civilians could be further enhanced.¹³⁵ [emphasis in original]

134. Switzerland's Basic Military Manual, with reference to the 1980 Protocol III to the CCW, states that "it is forbidden to use incendiary weapons against civilian objects or against a military objective that is not clearly separated from a concentration of civilians".¹³⁶

135. The US Rules of Engagement for Vietnam stated that "the use of incendiary type munitions in inhabited or urban areas will be avoided unless friendly survival is at stake or it is necessary for the accomplishment of the commander's mission".¹³⁷

136. The US Air Force Pamphlet states that:

The potential of fire to spread beyond the immediate target area has also raised concerns about uncontrollable or indiscriminate effects affecting the civilian population or civilian objects. Accordingly, any applicable rules of engagement relating to incendiary weapons must be followed closely to avoid controversy. The manner in which incendiary weapons are employed is also regulated by the other principles and rules regulating armed force... In particular, the potential capacity of fire to spread must be considered in relation to the rules protecting civilians and civilian objects... For example, incendiary weapons should be avoided in urban areas, to the extent that other weapons are available and as effective.¹³⁸

137. The US Naval Handbook states that:

Incendiary devices such as tracer ammunition, thermite bombs, flame throwers, napalm, and other incendiary weapons and agents, are lawful weapons. Where incendiary devices are the weapons of choice, they should be employed in a manner that does not cause incidental injury or collateral damage that is excessive in light of the military advantage anticipated by the attack.¹³⁹

National Legislation

138. Under Estonia's Penal Code, "large scale use of incendiary weapons under conditions where the military objective cannot be clearly separated from civilian population, civilian objects or the surrounding environment" is a war crime.¹⁴⁰

139. Under Hungary's Criminal Code as amended, employing "incendiary weapons" as defined in the 1980 Protocol III to the CCW is a war crime.¹⁴¹

National Case-law

140. No practice was found.

¹³⁸ US, *Air Force Pamphlet* (1976), § 6-6(c). ¹³⁹ US, *Naval Handbook* (1995), § 9.7.

¹⁴⁰ Estonia, *Penal Code* (2001), § 103.

¹⁴¹ Hungary, *Criminal Code as amended* (1978), Section 160/A(3)(b)(3).

Other National Practice

141. In 1971, in an Australian report on the protection of the civil population against the effects of certain weapons, it was stated that:

In respect of napalm and other weapons of an incendiary nature the Army recognises certain complexities of classification. It contemplates no less than three types of weapon:

- a. "flame weapons" such as napalm bombs and flame throwers which employ or involve the projection of a flaming (petroleum or other) substance;
- b. pure heat weapons; and,
- c. electronic/nuclear (sub-atomic) weapons of the nature of laser rays or any development of that general conception.

This is not an exhaustive classification and ignores the atom weapon, whether as a bomb or otherwise.

Presently only napalm bombs and flamethrowers are available or in use. They present problems of economic use. Currently they are not used against any human target but only against structures although their use against structures is possibly less useful if a structure is unmanned by enemy personnel.

Even if not used against human targets flame weapons do present an advantage as a means of generating fear and despondency, even if not of terror and even if no enemy is actually harmed by them or is within range.

Their weight and lack of economy in use is a problem which may cause flame throwers to be discarded in favour of more sophisticated and longer ranging means of dispersing their (napalm) content.

These weapons as presently existing are not held to contravene international law if used in accepted fashion and not indiscriminately against humans or against inanimate targets so as to involve innocent civilians as little as possible. However, it is conceivable that new or "unconventional" uses of these weapons may be alleged to be contrary to law, depending upon interpretation of the Hague Rules and any extension of them.¹⁴²

142. In an annex to a working paper on incendiary weapons submitted by Australia, Denmark and Netherlands to the Ad Hoc Committee on Conventional Weapons established by the CDDH, the Netherlands proposed the following rules:

2. Rules

- (a) As a consequence of the rules of international law applicable with respect to the protection of the civilian population against the effects of hostilities, it is prohibited to make any city, town, village or other area containing a concentration of civilians the object of attack by means of any incendiary munition.
- (b) Specific military objectives that are within such an area may be made the object of attack by means of incendiary munitions, provided that the attack is otherwise lawful and that all feasible precautions are taken to limit the

¹⁴² Australia, Report on the protection of the civil population against the effects of certain weapons, May 1971, pp. 2-3, Report on the Practice of Australia, 1998, Chapter 3.5.

incendiary effects to the specific military objectives and to avoid incidental loss of civilian life or injury to civilians.

- (c) In order to reduce to a minimum the risks posed to civilians by the use of flame weapons, it is prohibited to make any specific military objective that is within such an area the object of aerial attack by means of napalm or other flame munition unless that objective is located within an area in which combat between ground forces is taking place or is imminent.¹⁴³

This proposal was later subject to slight revision.¹⁴⁴

143. At the CCW Preparatory Conference in 1978, Australia and the Netherlands sponsored a draft proposal which divided incendiary weapons into "incendiary" and "flame" munitions and stated that "it is prohibited to make any concentration of civilians the object of attack by means of any incendiary munition". The proposal further stated that "specific military objectives that are situated within a concentration of civilians" may be attacked with incendiary weapons if "all feasible precautions are taken to limit the incendiary effects to all specific military objectives and to avoid incidental loss of civilian life or injury to civilians". The final part of the proposal provided that, in order to:

reduce to a minimum the risks posed to civilians by the use of flame weapons, it is prohibited to make any specific military objective that is situated within a concentration of civilians the object of aerial attack by means of napalm or other flame munitions unless that objective is located within an area in which combat between ground forces is taking place or appears to be imminent.¹⁴⁵

144. In 1979, towards the end of CCW Preparatory Conference, Australia and the Netherlands submitted a further draft proposal on incendiary weapons. The proposal provided that "as a consequence of the rules of international law applicable with respect to the protection of civilians against the effects of hostilities, it is prohibited to make the civilian population as such as well as individual civilians the object of attack by means of incendiary munitions". It also prohibited aerial attacks with napalm or other flame munitions against military targets situated within concentrations of civilians. Attacks with incendiary munitions against military objectives in civilian concentrations were not prohibited, "provided the attack is otherwise lawful and that all feasible precautions are taken to limit the incendiary effects to the

military objective and to avoid incidental loss of civilian life and injury to civilians".¹⁴⁶

145. At the First Review Conference of States Parties to the CCW in 1995, Australia stated that "the restrictions laid down in the Convention regarding the use of incendiary devices . . . were strong and clear".¹⁴⁷

146. Towards the end of the CCW Preparatory Conference in 1979, Austria, Egypt, Ghana, Jamaica, Mexico, Romania, Sweden, Venezuela, SFRY and Zaire, which had earlier sponsored a proposal which called for a total ban, submitted a proposal which restricted the ban on the use of incendiary weapons to use against civilians, military objectives located within a concentration of civilians and unprotected combatants.¹⁴⁸

147. In 1974, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Brazil stated that "there were good humanitarian reasons for the international community to agree at least on restricting the use of incendiary weapons against targets which were not exclusively military".¹⁴⁹

148. In 1973, in its reply on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, Denmark stated that it wanted to work out an agreement restricting or prohibiting the use of napalm and other incendiary weapons. It added that "the aim of such agreements should be to restrict or prohibit the use of napalm and other incendiary weapons, especially in circumstances where these weapons have an indiscriminate effect against the civilian population".¹⁵⁰

149. At the CCW Preparatory Conference in 1978, Denmark and Norway presented a proposal which stated that "it is prohibited to make the civilian population or individual civilians the object of attack by incendiary weapons" and that "it is prohibited to make any military objective located within a concentration of civilians the object of attack by incendiary weapons delivered by aircraft, except when that military objective is clearly separated and distinct from the civilian population". The final rule contained in the proposal provided that:

Whenever an attack is made by incendiary weapons in accordance with the above provisions and other applicable rules of international law, all feasible precautions

¹⁵⁰ Denmark, Reply of 28 August 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 6.

shall be taken to limit the effects of such attack to the military objective itself with a view to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects.¹⁵¹

150. In 1977, during a debate in the First Committee of the UN General Assembly, Egypt advocated the prohibition or restriction of incendiary weapons.¹⁵²

151. In 1987, the French Ministry of Foreign Affairs explained that the reasons for which France refused to ratify the 1980 Protocol III to the CCW was the provision relating to the use of incendiary weapons against military objectives located within a concentration of civilians. It considered the provision to be “too imprecise, thus unrealistic”.¹⁵³

152. In 1973, in its reply on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, India stated that possible agreement could only be found on restrictions of use against civilian objects. It stated that it would “take an active interest in, and promote” a prohibition of all inhumane weapons, including incendiary weapons, against civilian targets, with due regard for the principles of reciprocity and right of retaliation.¹⁵⁴

153. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, India stated that it “fully supported the idea of expanding the scope of the CCW to cover armed internal conflicts”.¹⁵⁵

154. At the CCW Preparatory Conference in 1978, Indonesia submitted a draft proposal, which developed the proposal it had submitted during the CDDH.¹⁵⁶ The proposal prohibited the use of incendiaries, except against:

military objects other than personnel, provided that these objects are not within civilian population centres and against combatants holding positions in field fortifications such as bunkers and pillboxes where the use of alternate weapons will inevitably render more casualties.¹⁵⁷

155. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, Japan stated that:

21. A consensus had been reached at the first session of the Conference of Government Experts that attacks in which incendiary weapons were used against cities with a concentration of civilians were indiscriminate and should be prohibited.
22. The working paper on incendiary weapons . . . submitted by eleven countries, including Japan, had been intended to start the prohibition or restriction of the use of such weapons from the point at which a minimum consensus had been reached, and had therefore been completely realistic.¹⁵⁸

156. At the CCW Preparatory Conference in 1978, Japan declared that while it "was not sure it would be practicable to ban completely weapons of that kind [incendiaries] other than those which employed yellow phosphorus, it would be useful to prohibit their use in indiscriminate attacks on cities or populated areas".¹⁵⁹

157. In 1992, prior to the adoption of UN General Assembly Resolution 47/37 on the protection of the environment in times of armed conflict, Jordan and the US submitted a memorandum entitled "International Law Providing Protection to the Environment in Times of Armed Conflict", which stated that:

For States parties the following principles of international law, as applicable, provide additional protection for the environment in times of armed conflict:

Article 2(4) of [the 1980 Protocol III to the CCW] prohibits States parties from making forests or other kinds of plant cover the object of attack by incendiary weapons except when such natural elements cover, conceal or camouflage combatants or other military objectives, or are themselves military objectives.¹⁶⁰

158. In 1973, in its reply on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, the Netherlands supported restrictions on the use of incendiary weapons, especially to protect civilians.¹⁶¹

159. At the CCW Preparatory Conference in 1979, New Zealand stated that "it shared the view expressed by the overwhelming majority of delegations concerning the need for stronger provisions for the protection of civilians and civilian centres against all incendiary weapons".¹⁶²

¹⁶¹ Netherlands, Reply of 30 August 1973 sent to the UN Secretary-General, reprinted in Report of the Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, UN Doc. A/9207, 11 October 1973, p. 13.

¹⁶² New Zealand, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF/II/SR.27, 18 April 1979, p. 8, § 72.

160. Norway submitted a “Draft Protocol Relative to the Prohibition of the Use of Incendiary Weapons” to the Ad Hoc Committee on Conventional Weapons established by the CDDH which read, *inter alia*, as follows:

Article 1 – Field of application

The present Protocol shall apply in the situations referred to in articles 2 and 3 common to the Geneva Conventions of August 12, 1949 for the Protection of War Victims.

...

Article 4 – Protection of the civilian population

Any use of incendiary weapons is subject to article 46 of [AP I].

In any city, town, village or other area containing a concentration of civilians, incendiary weapons may be used only provided that combat between ground forces is taking place in that area, or the military objective is clearly separated from the civilian population.¹⁶³

161. At the International Conference on the Protection of War Victims in 1993, Russia declared that “in order to protect the civilian population against indiscriminate weapons... incendiary weapons... should be completely banned in internal conflicts”.¹⁶⁴

162. At the CCW Preparatory Conference in 1979, during the debate on the second proposal made by Australia and the Netherlands, Syria criticised the proposal, stating that “in its present form, the proposal left serious doubts regarding the precautions taken to limit the incendiary effects and to avoid loss of human lives” and that “it had not been proved that napalm was more dangerous than other incendiary weapons”.¹⁶⁵

163. At the CCW Preparatory Conference in 1979, the USSR stated that it was “regrettable” that no agreement on restricting the use of incendiary weapons had been reached. It felt that the:

draft revised at the second session extended the scope of the prohibition of the use of incendiary weapons, particularly against military objectives situated within a concentration of civilians, and might constitute a good point of departure for the future work of the Conference.¹⁶⁶

164. At the CCW Preparatory Conference in 1979, the UK stated that:

The exchange of views in the past week had proved disappointing because some delegations had adopted extreme positions. These positions were doubtless dictated by humanitarian considerations which could in no sense be criticised. However, if

¹⁶³ Norway, Draft protocol relative to the prohibition of the use of incendiary weapons submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/207 within CDDH/IV/226, pp. 567–569.

¹⁶⁴ Russia, Statement at the International Conference for the Protection of War Victims, Geneva, 30 August–1 September 1993.

¹⁶⁵ Syria, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF/II/SR.23, 6 April 1979, p. 3, §§ 6–7.

¹⁶⁶ USSR, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF/II/SR.24, 9 April 1979, p. 5, § 16.

agreement was to be reached on anything specific that would be an advance over the present state of the law, the objective would plainly have to be a more limited one. The text of the proposal submitted by Australia and the Netherlands met precisely that need.¹⁶⁷

165. In 1976, during discussions in the Ad Hoc Committee on Conventional Weapons established by the CDDH, the representative of the US stated that:

36. ... The United States delegation could not accept any proposal which would have the effect of precluding the use of napalm or similar weapons in close-combat situations. It could therefore not accept total prohibition of the use of such weapons or prohibition of their anti-personnel use.
37. Her delegation recognized, however, that special limitations were appropriate in areas populated by civilians. It had carefully studied the proposal in the working paper submitted to the Lugano Conference [of Government Experts on the Use of Certain Conventional Weapons] by the Netherlands experts and introduced again in the Ad Hoc Committee [as an annex to a working paper, see *supra*] that the use of air delivered flame weapons should be prohibited in populated areas, except for the zone in which combat between ground forces was taking place or was imminent. Such a prohibition would preclude the use of air-delivered napalm against military targets in cities, towns or villages, such as ammunition and supply dumps, vehicle parks, convoys and barracks. Acceptance of that proposal would involve the abandonment of lawful uses of napalm against legitimate military targets. In view, however, of the concern that the use of air-delivered napalm in populated areas might prove dangerous to civilians, the United States delegation was prepared to accept the Netherlands proposal as a basis for serious negotiation, and was also prepared to consider any other proposals for protecting the civilian population from the effects of incendiary weapons.¹⁶⁸

166. At the CCW Preparatory Conference in 1979, the US explained that it:

could not accept a total ban on the use of incendiary weapons, because the weapons substituted for them would, in certain situations, be more destructive and consequently more injurious, and would thus be contrary to the spirit of article 57 of the Protocol on International Armed Conflict.

It went on to say that, while it could not accept a restriction on the use of incendiaries against combatants, "an agreement on limiting the use of incendiaries in areas containing civilian concentrations was appropriate and possible . . . The [Australia/Netherlands] proposal was the maximum that some of the principal interested parties at the Conference would be prepared to accept".¹⁶⁹

¹⁶⁸ US, Statement at the CDDH, *Official Records*, Vol. XVI, CDDH/IV/SR.27, 19 May 1976, p. 281, §§ 36–37.

¹⁶⁹ US, Statement at the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF/II/SR.28, 18 April 1979, pp. 2–3, §§ 5–6.

167. With respect to the decision by the US whether or not to use incendiary weapons during a strategic bombing campaign against North Korean industrial areas during the Korean War, it is reported that:

At the Target Selection Committee meeting General Weyland pointed out that someone would have to decide whether or not the B-29's could use incendiary munitions, and within a few days FEAF [Far Eastern Air Force] got the answer to this question – in the negative. Washington was very hesitant about any air action which might be exploited by Communist propaganda and desired no unnecessary civilian casualties which might result from fire raids. General Stratemeyer consequently directed General O'Donnell not to employ incendiaries without specific approval.¹⁷⁰

168. In transmitting the Protocols to the 1980 CCW to the US Senate, the US President stated that “the United States must retain its ability to employ incendiaries to hold high priority military targets such as those at risk in a manner consistent with the principle of proportionality which governs the use of all weapons under existing law”.¹⁷¹

III. Practice of International Organisations and Conferences

United Nations

169. In several resolutions between 1973 and 1977, the UN General Assembly invited the upcoming CDDH to “seek agreement” on rules prohibiting or restricting the use of incendiary weapons.¹⁷²

170. In a resolution adopted in 1973, the UN General Assembly called on the CDDH to “seek agreement on rules prohibiting or restricting the use of [incendiary] weapons.” The preamble to the resolution states that “the efficacy of the general principles of [IHL] could be further enhanced if rules were elaborated and generally accepted prohibiting or restricting the use of napalm and other incendiary weapons”.¹⁷³

171. Two UN General Assembly resolutions adopted on the same occasion in 1974 dealt with two different aspects of incendiary weapons. Resolution 3255 A contained an invitation to the CDDH to consider a prohibition or restriction on these weapons.¹⁷⁴ Resolution 3255 B condemned “the use of napalm and other incendiary weapons in armed conflicts in circumstances where it may

¹⁷⁴ UN General Assembly, Res. 3255 A (XXIX), 9 December 1974, § 3.

affect human beings or may cause damage to the environment and/or natural resources".¹⁷⁵

172. In a resolution adopted in 1980, the UN General Assembly welcomed the successful agreement on the 1980 CCW and its Protocols. It urged States to agree to be bound by the Convention and Protocols "with a view to achieving the widest possible adherence to these instruments".¹⁷⁶

173. In numerous resolutions, the UN General Assembly urged all States that had not yet done so to accede to the 1980 CCW and its Protocols.¹⁷⁷

174. In resolution adopted in 1994 on the situation of human rights in the former Yugoslavia, the UN General Assembly condemned "the use of... napalm bombs on civilian targets by Croatian Serb and Bosnian Serb forces".¹⁷⁸

175. In a resolution adopted in 1995, the UN Commission on Human Rights condemned "the use of... napalm bombs against civilian targets by Bosnian and Croatian Serb forces".¹⁷⁹

176. In a resolution adopted in 1997, the UN Sub-Commission on Human Rights declared that "the use on civilian population of napalm and fuel-air bombs violates Protocol III... of the 1980 Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons".¹⁸⁰

Other International Organisations

177. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe invited:

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

- ...
- b. ratify, if they have not done so, ... the United Nations Convention of 1980 on the prohibitions or restrictions on the use of certain conventional weapons [1980 CCW] and its protocols ...
- j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.¹⁸¹

¹⁷⁵ UN General Assembly, Res. 3255 B (XXIX), 9 December 1974, § 1.

¹⁸⁰ UN Sub-Commission on Human Rights, Res. 1997/36, 28 August 1997, preamble.

¹⁸¹ Council of Europe, Parliamentary Assembly, Res. 1085, 24 April 1996, § 8b and j.

178. In 1982, at the 7th Extraordinary Session of the UN General Assembly, Denmark expressed its concern on behalf of the EC over civilian casualties caused by Israel's use of phosphorous shrapnel during the invasion of Lebanon.¹⁸²

International Conferences

179. No practice was found

IV. Practice of International Judicial and Quasi-judicial Bodies

180. In the case concerning the events at La Tablada in Argentina before the IACiHR in 1997, the petitioners held that the military attack to retake the barracks was a "legal violation of all current legislation on this subject" and especially mentioned that the military had used white phosphorus or incendiary bombs.¹⁸³ The IACiHR stated that:

The Commission must note that even if it were proved that the Argentine military had used such weapons, it cannot be said that their use in January 1989 violated an explicit prohibition applicable to the conduct of internal armed conflicts at that time. In this connection, protocol III to the CCW cited by petitioners, was not ratified by Argentina until 1995. Moreover and most pertinently, Article 1 of the CCW states that the Incendiary Weapons Protocol applies only to interstate armed conflicts and to a limited class of national liberation wars. As such, this instrument did not directly apply to the internal hostilities at the Tablada. In addition, the Protocol does not make the use of such weapons per se unlawful. Although it prohibits their direct use against peaceable civilians, it does not ban their deployment against lawful military targets, which include civilians who directly participate in combat.¹⁸⁴

V. Practice of the International Red Cross and Red Crescent Movement

181. To fulfil its task of disseminating IHL, the ICRC has delegates around the world teaching armed and security forces the definition of incendiary weapons in accordance with Article 1 of the 1980 Protocol III to the CCW and that:

934. Incendiary weapons which are not air-delivered may be used:

- a) when the military object is clearly separated from a concentration of civilian persons; and
- b) subject to precautions to limit incendiary effects to the military objective, when the tactical situation permits.

935. Air-delivered incendiary weapons may be so used only in attack against a military objective located outside concentrations of civilian persons.¹⁸⁵

¹⁸² EC, Statement by Denmark on behalf of the EC at the 7th Extraordinary Session of the UN General Assembly, UN Doc. A/ES-7/PV. 26, 17 August 1982, pp. 14–17.

¹⁸⁴ IACiHR, *Case 11.137 (Argentina)*, Report, 18 November 1997, § 187.

¹⁸⁵ Frédéric de Mulinen, *Handbook on the Law of War for Armed Forces*, ICRC, Geneva, 1987, §§ 931–935.

VI. *Other Practice*

182. Rule B5 of the Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, adopted in 1990 by the Council of the IHL, states that:

In application of the general rules listed in Section A above, especially those on the distinction between combatants and civilians and on the immunity of the civilian population, incendiary weapons may not be directed against the civilian population as such, against individual civilians or civilian objects, nor used indiscriminately.¹⁸⁶

183. A journalist reported that in Grozny in 2000:

Incendiary bombs, incendiary cluster bombs and containers were extensively used to torch enemy-occupied objects and to destroy enemy manpower concentrations. At the time of these air raids there were several thousand Chechen fighters in Grozny and up to 100,000 civilians . . . Concrete evidence has been gathered by journalists and human rights groups on the use of different air-delivered incendiary weapons, including “vacuum” or “fuel” bombs against Grozny and other Chechen towns and villages. There is also concrete evidence that hundreds of civilians, including women and children, have been killed by such weapons.

The journalist went on to say that:

The use of prohibited incendiary weapons in violation of international agreements is a much more serious war crime than the abuse of civilians by troops and bombardments by “ordinary” bombs or shells. The Russian military knows that the use of incendiary weapons is severely limited by international agreements. Such weapons are not part of the normal inventory of Russian units. Military sources say the orders to forgo internationally outlawed air-delivered incendiary weapons and attack towns and villages “came from the highest authorities”. It is a legal fact that by using incendiary weapons Russia as a state committed a war crime.

Lastly, the journalist stated that “[General] Zolotov agreed with me that attacking Grozny with incendiary weapons was a terrible war crime”.¹⁸⁷

B. Use of Incendiary Weapons against Combatants

Use of incendiary weapons in general

184. The practice concerning the use of incendiary weapons in general in section A is relevant, *mutatis mutandis*, for this section but is not repeated here.

¹⁸⁶ IHL, Rules of International Humanitarian Law Governing the Conduct of Hostilities in Non-international Armed Conflicts, Rule B5, *IRRC*, No. 278, 1990, p. 402.

¹⁸⁷ Pavel Felgenhauer, “Endorsing War Crimes”, *Moscow Times*, 12 July 2001, p. 6 (citing an article by Russian General Leonid Zolotov).

Use of incendiary weapons against combatants in particular

I. Treaties and Other Instruments

Treaties

185. Upon signature of the 1980 CCW, China stated that “the Protocol [to the CCW] on Prohibitions or Restrictions on the Use of Incendiary Weapons does not stipulate restrictions on the use of such weapons against combat personnel”.¹⁸⁸

Other Instruments

186. Articles 6 and 8 of the 1938 ILA Draft Convention for the Protection of Civilian Populations against New Engines of War provide that:

Art. 6. The use of ... incendiary ... weapons as against any State, whether or not a party to the present convention, and in any war, whatever its character, is prohibited.

The application of this rule shall be regulated by the following ... articles.

...

Art. 8. The prohibition of the use of incendiary weapons shall apply to all projectiles specifically intended to cause fires except when used for defence against aircraft. The prohibition shall not apply:

- I. to projectiles specially constructed to give light or to be luminous;
- II. to pyrotechnics not normally likely to cause fires;
- III. to projectiles of all kinds which, though capable of producing incendiary effects accidentally, are not normally likely to produce such effects;
- IV. to incendiary projectiles designed specifically for defence against aircraft when used exclusively for that purpose;
- V. to appliances, such as flame-projectors, used to attack individual combatants by fire.

II. National Practice

Military Manuals

187. Australia’s Commanders’ Guide states that “there are no prohibitions on the use of incendiary weapons against combatants”.¹⁸⁹

188. Belgium’s Law of War Manual states that “the use of [incendiary] weapons against persons is prohibited because they cause unnecessary suffering, but their use against military objectives, such as bunkers, tanks, depots, etc. is permitted”.¹⁹⁰

¹⁸⁸ China, Declaration made upon signature of the CCW, 14 September 1981, § 3.

¹⁸⁹ Australia, *Commanders’ Guide* (1994), § 935.

¹⁹⁰ Belgium, *Law of War Manual* (1983), p. 38.

189. Canada's LOAC Manual stipulates that "the use of incendiary weapons against combatants is not prohibited unless such use results in superfluous injury or unnecessary suffering".¹⁹¹

190. Colombia's Basic Military Manual prohibits the use of weapons which "cause unnecessary and indiscriminate, widespread, long-term and severe damage to people and the environment. This includes, *inter alia*:... incendiary weapons, whose production, importation, possession and use is also prohibited by Article 81 of the National Constitution."¹⁹²

191. New Zealand's Military Manual states that "there are no provisions on the use of incendiaries against combatants in [the 1980 Protocol III to the CCW]. The use of incendiary weapons to cause unnecessary suffering is prohibited. A value judgement must be made in particular circumstances to determine whether or not the suffering caused is unnecessary."¹⁹³ The manual also recalls that "the UN Conference which negotiated the [1980 Protocol III to the CCW] was unable to agree on any requirement to protect combatants from the effects of incendiary weapons".¹⁹⁴

192. Sweden's IHL Manual states that:

[The 1980] Protocol III [to the CCW] contains restrictions applying where incendiary weapons are used.

...

At the same time it must be noted that it has not been possible to reach agreement on a rule that would also afford combatants protection against these weapons.

...

There is a need to supplement the present Protocol III so that the agreement constitutes a *complete prohibition of incendiary weapons*. In this way, protection of civilians could be further enhanced, and this should be extended to cover combatants. For, in fact, the latter also experience injury from incendiary weapons as unnecessary suffering.¹⁹⁵ [emphasis in original]

193. The UK Military Manual states that "the use of flame throwers when directed against military targets is lawful. However, their use against personnel is contrary to the law of war in so far as it is calculated to cause unnecessary suffering."¹⁹⁶

194. The US Field Manual states that "the use of weapons which employ fire, such as tracer flame-throwers, napalm and other incendiary agents, against targets requiring their use is not a violation of international law. They should not, however, be employed in such a way as to cause unnecessary suffering to individuals."¹⁹⁷

¹⁹¹ Canada, *LOAC Manual* (1999), p. 5-4, § 35.

¹⁹² Colombia, *Basic Military Manual* (1995), pp. 49-50.

¹⁹³ New Zealand, *Military Manual* (1992), §§ 513(7) and 620(7).

¹⁹⁴ New Zealand, *Military Manual* (1992), § 510(f), footnote 49 and § 617(f), footnote 37.

¹⁹⁵ Sweden, *IHL Manual* (1991), Section 3.3.2, pp. 81-83.

¹⁹⁶ UK, *Military Manual* (1958), § 110, footnote 1. ¹⁹⁷ US, *Field Manual* (1956), § 36.

195. The US Air Force Pamphlet states that:

Incendiary weapons, such as incendiary ammunition, flame throwers, napalm and other incendiary agents have widespread uses in armed conflict. Although evoking intense international concern, combined with attempts to ban their use, state practice indicates clearly they are regarded as lawful in situations requiring their use. Conventional incendiary weapons are normally employed against materiel targets and combatants in the vicinity of such targets, such as pill boxes, tanks, vehicles, fortifications, etc. Use in ground support of friendly troops in close contact with enemy troops is an important use. Such uses are justified by the military effectiveness of incendiary weapons demonstrated during World War I, World War II, Korea, Vietnam and other conflicts. Controversy over incendiary weapons has evolved over the years partly as the result of concern about the medical difficulties in treating burn injuries, as well as arbitrary attempts to analogise incendiary weapons to prohibited means of chemical warfare... Additionally, incendiary weapons must not be used so as to cause unnecessary suffering.¹⁹⁸

National Legislation

196. No practice was found.

National Case-law

197. No practice was found.

Other National Practice

198. Towards the end of the CCW Conference in 1979, Austria, Egypt, Ghana, Jamaica, Mexico, Romania, Sweden, Venezuela, SFRY and Zaire, which had earlier sponsored a proposal which called for a total ban, submitted a proposal which restricted the ban on the use of incendiary weapons to use against civilians and against "combatants except when they are in, or in the vicinity of, armoured vehicles, field fortifications or other similar objectives".¹⁹⁹

199. At the CCW Preparatory Conference in 1978, Denmark and Norway presented a proposal prohibiting, *inter alia*, making military personnel as such the object of attack by incendiary weapons except when "the personnel is engaged or about to engage in combat or being deployed for combat engagement" or "the personnel is under armoured protection, in field fortifications or under similar protection".²⁰⁰

200. At the CCW Preparatory Conference, Indonesia submitted a draft proposal, which developed the proposal submitted during the CDDH.²⁰¹ It

¹⁹⁸ US, *Air Force Pamphlet* (1976), § 6-6(c).

¹⁹⁹ Austria, Egypt, Ghana, Jamaica, Mexico, Romania, Sweden, Venezuela, SFRY and Zaire, Draft protocol on incendiary weapons submitted to the CCW Conference, UN Doc. A/CONF.95/CW/L.1, 26 September 1979, pp. 1-2.

²⁰⁰ Denmark and Norway, Draft proposal on incendiary weapons submitted to the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF./L.12, 13 September 1978.

²⁰¹ See Indonesia, Proposal concerning incendiary weapons submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/223 within CDDH/IV 226, p. 578.

proposed a prohibition of the use of incendiaries, except against “military objects other than personnel” and “against combatants holding positions in field fortifications such as bunkers and pillboxes where the use of alternate weapons will inevitably render more casualties”.²⁰²

201. With reference to a press conference by the King of Jordan in 1967, the Report on the Practice of Jordan states that “the Jordanian army was constantly bombarded with napalm bombs throughout the 1967 War. Jordan condemned officially the use by Israel of this horrible weapon.”²⁰³

202. Norway submitted a “Draft Protocol Relative to the Prohibition of the Use of Incendiary Weapons” to the Ad Hoc Committee on Conventional Weapons established by the CDDH which read, *inter alia*, as follows:

Article 1 – Field of application

The present Protocol shall apply in the situations referred to in articles 2 and 3 common to the Geneva Conventions of August 12, 1949 for the Protection of War Victims.

...

Article 3 – General prohibition

With the further limitations spelled out in the present Protocol and subject to the provisions of [AP I], incendiary weapons may only be used against objects that are military objectives in the sense of article 47, paragraph 2 of the said Protocol, including in close support of friendly forces.

The use of incendiary weapons against personnel is prohibited.

Nevertheless, the presence of combatants or civilians within or in the immediate vicinity of legitimate targets as described in this article does not render such targets immune from attacks with incendiary weapons.

...

Article 5 – Precaution in attack

Any use of incendiary weapons is subject to article 50 of [AP I].

In addition, it is prohibited to launch an attack with incendiary weapons except when:

- (a) the location of the target is known and properly recognized, and
- (b) all feasible precaution is taken to limit the incendiary effects to the specific military objectives and to avoid incidental injury or incidental loss of lives.²⁰⁴

203. At the CCW Preparatory Conference in 1979, during the general debate on the second proposal made by Australia and the Netherlands, Poland stated that it hoped that:

²⁰² Indonesia, Draft proposal on incendiary weapons submitted to the CCW Preparatory Conference, UN Doc. A/CONF.95/PREP.CONF./L.13, 22 March 1979.

²⁰³ Report on the Practice of Jordan, 1997, Chapter 3.5, referring to press conference by his Majesty the King of Jordan, 19 June 1967.

²⁰⁴ Norway, Draft protocol relative to the prohibition of the use of incendiary weapons submitted to the Ad Hoc Committee on Conventional Weapons established by the CDDH, *Official Records*, Vol. XVI, CDDH/IV/207 within CDDH/IV/226, pp. 567–569.

the extensive debate on the total prohibition of the use of such weapons in inhabited areas would eventually lead to the elimination of at least the most drastic and indiscriminate weapons in that category, and might help to restrict the use of incendiaries against military personnel when they inflicted unnecessary suffering.²⁰⁵

204. In 1969, in the context of the adoption of UN General Assembly Resolution 2444 (XXIII), the USSR stated that:

For the purpose of crushing the resistance of the Arabs [in the territories occupied by Israel], the aggressors from Israel are continuing to use napalm, which is forbidden by international law.

The criminal, inhuman acts of the imperialist States are a shameful violation of international law, and also of the resolutions of the International Conferences of the Red Cross.²⁰⁶

205. In 1973, in response to Resolution 2932 A (XXVII) in which the UN General Assembly asked States to comment on the report of the UN Secretary-General on napalm and other incendiary weapons and all aspects of their possible use, the UK emphasised that incendiary weapons must not be used to create unnecessary suffering and recommended further study of this issue.²⁰⁷

206. At the CCW Preparatory Conference in 1979, the US explained that it could not accept a restriction on the use of incendiaries against combatants for two reasons. First, "troops in or near the targets attacked with incendiaries would inevitably be killed, and commanding officers would risk being charged with violating the antipersonnel restriction". Second, "the establishment of any rule embodying a comprehensive set of exceptions would not change present practices and its effect would be purely cosmetic".²⁰⁸

207. Course material from the US Army War College, which is also used by the US Marine Corps, states that "a) Incendiaries are lawful when utilized for the purpose(s) for which they were designed. b) There is NO prohibition on the use of napalm or flame-throwers against enemy personnel."²⁰⁹

BLINDING LASER WEAPONS

Blinding Laser Weapons (practice relating to Rule 86)	§§ 1–106
Laser weapons specifically designed to cause permanent blindness	§§ 1–90
Laser systems incidentally causing blindness	§§ 91–106

Blinding Laser Weapons**Laser weapons specifically designed to cause permanent blindness***I. Treaties and Other Instruments**Treaties*

1. Article 1 of the 1995 Protocol IV to the CCW provides that:

It is prohibited to employ laser weapons specifically designed, as their sole combat function or as one of their combat functions, to cause permanent blindness to unenhanced vision, that is to the naked eye or to the eye with corrective eyesight devices. The High Contracting Parties shall not transfer such weapons to any State or non-State entity.

2. Article 4 of the 1995 Protocol IV to the CCW specifies that “for the purpose of this protocol ‘permanent blindness’ means irreversible and uncorrectable loss of vision which is seriously disabling with no prospect of recovery. Serious disability is equivalent to visual acuity of less than 20/200 Snellen measured using both eyes.”

3. The 1995 Protocol IV to the CCW was adopted by consensus, although a number of States would have preferred a stronger text that included a prohibition of blinding as a method of warfare and indicated this orally during negotiations and at the final plenary session.¹ Discussions on Article 1, which refers to “laser weapons specifically designed as their sole combat function or as one of their combat functions”, turned on whether it was enough to indicate “specifically designed”, and one State, the UK, would have preferred “primarily designed”. The issue was that the systems concerned could easily be designed

¹ Austria, Australia, Belgium, Denmark, Ecuador, Finland, France, Germany, Iran, Mexico, Netherlands, Norway, Poland, Romania, Russia and Sweden.

to aim at both electro-optical systems and human eyes, and therefore alternative formulations were abandoned in favour of this explicit description that would cover dual use systems.

4. Upon acceptance of the 1995 Protocol IV to the CCW, Austria, Belgium, Canada, Greece, Ireland, Italy, Liechtenstein and South Africa stated that "the provisions of . . . Protocol [IV] which by their contents or nature may also be applied in peacetime, shall be observed at all times".²

5. Upon acceptance of the 1995 Protocol IV to the CCW, Australia stated that "the provisions of Protocol IV shall apply in all circumstances".³

6. Upon acceptance of the 1995 Protocol IV to the CCW, Germany declared that "it will apply the provisions of Protocol IV under all circumstances and at all times".⁴

7. Upon acceptance of the 1995 Protocol IV to the CCW, Israel declared that:

With reference to the scope of application defined in Article 1 of the Convention, the Government of the State of Israel will apply the provisions of the Protocol on Blinding Laser Weapons as well as the Convention and those annexed Protocols to which Israel has agreed to become bound, to all armed conflicts involving regular armed forces of States referred to in article 2 common to the Geneva Convention of 12 August 1949, as well as to all armed conflicts referred to in Article 3 common to the Geneva Convention of 12 August 1949.⁵

8. Upon acceptance of the 1995 Protocol IV to the CCW, the Netherlands declared that "the provisions of Protocol IV which, given their content or nature, can also be applied in peacetime must be observed in all circumstances".⁶

9. Upon acceptance of the 1995 Protocol IV to the CCW, Sweden stated that:

Sweden intends to apply the Protocol to all types of armed conflict . . .

Sweden has since long strived for explicit prohibition of the use of blinding lasers which would risk causing permanent blindness to soldiers. Such an effect, in Sweden's view is contrary to the principle of international law prohibiting means and methods of warfare which cause unnecessary suffering.⁷

10. Upon acceptance of the 1995 Protocol IV to the CCW, Switzerland stated that "the provisions of Protocol IV shall apply in all circumstances".⁸

² Austria, Declaration made upon acceptance of Protocol IV to the CCW, 27 July 1998; Belgium, Declaration made upon acceptance of Protocol IV to the CCW, 10 March 1999; Canada, Declaration made upon acceptance of Protocol IV to the CCW, 25 June 1998; Greece, Declaration made upon acceptance of Protocol IV to the CCW, 5 August 1997; Ireland, Declaration made upon acceptance of Protocol IV to the CCW, 27 March 1997; Italy, Declaration made upon acceptance of Protocol IV to the CCW, 13 January 1999; Liechtenstein, Declaration made upon acceptance of Protocol IV to the CCW, 19 November 1997; South Africa, Declaration made upon acceptance of Protocol IV to the CCW, 26 June 1998.

³ Australia, Declaration made upon acceptance of Protocol IV to the CCW, 22 August 1997.

⁴ Germany, Declaration made upon acceptance of Protocol IV to the CCW, 27 June 1997.

⁵ Israel, Declaration upon acceptance of Protocol IV to the CCW, 30 October 2000.

⁶ Netherlands, Declaration made upon acceptance of Protocol IV to the CCW, 25 March 1999.

⁷ Sweden, Declaration made upon acceptance of Protocol IV to the CCW, 15 January 1997.

⁸ Switzerland, Declaration made upon acceptance of Protocol IV to the CCW, 24 March 1998.

11. Upon acceptance of the 1995 Protocol IV to the CCW, the UK stated that “the application of its provisions will not be limited to the situations set out in Article 1 of the [1980 CCW]”.⁹

12. In 2001, States parties to the 1980 CCW decided to amend Article 1 of the Convention, governing its scope. This amendment states that:

1. This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims, including any situation described in paragraph 4 of Article I of Additional Protocol I to these Conventions.
2. This Convention and its annexed Protocols shall also apply, in addition to situations referred to in paragraph 1 of this Article, to situations referred to in Article 3 common to the Geneva Conventions of 12 August 1949. This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature, as not being armed conflicts.
3. In case of armed conflicts not of an international character occurring in the territory of one of the High Contracting Parties, each party to the conflict shall be bound to apply the prohibitions and restrictions of this Convention and its annexed Protocols.

Other Instruments

13. No practice was found.

II. National Practice

Military Manuals

14. Bosnia and Herzegovina’s Military Instructions states that “it is prohibited to use . . . ‘blinding’ weapons”.¹⁰

15. Canada’s LOAC Manual provides that “laser weapons specifically designed, as their sole combat function or one of their combat functions, to cause permanent blindness to unenhanced vision (i.e., the naked eye or to the eye with corrective eyesight devices) are prohibited”.¹¹

16. France’s LOAC Teaching Note includes blinding laser weapons in the list of weapons that “are totally prohibited by the law of armed conflict” because of their inhuman and indiscriminate character.¹²

17. France’s LOAC Manual incorporates the content of Article 1 of the 1995 Protocol IV to the CCW.¹³ It further includes blinding laser weapons in the list of weapons that “are totally prohibited by the law of armed conflict” because of their inhuman and indiscriminate character.¹⁴

18. Germany’s IHL Manual states that “new weapon developments may also violate a specific prohibition or general principles of international

⁹ UK, Declaration made upon acceptance of Protocol IV to the CCW, 11 February 1999.

¹⁰ Bosnia and Herzegovina, *Military Instructions* (1992), Item 11, § 1.

¹³ France, *LOAC Manual* (2001), p. 80. ¹⁴ France, *LOAC Manual* (2001), p. 54.

humanitarian law, e.g. the use of laser weapons which are specifically intended to cause permanent blindness to the adversary".¹⁵

19. According to Israel's Manual on the Laws of War, the 1995 Protocol IV to the CCW "states that it is forbidden to employ weapons that use laser beams for the operational objective of causing blindness to an unprotected eye".¹⁶

20. The US Naval Handbook states that:

Directed energy devices, which include laser... are not proscribed by the law of armed conflict. Lasers may be employed as a range finder or for target acquisition with the possibility of ancillary injury to enemy personnel, or directly against combatants as an anti-personnel weapon. Their use does not violate the prohibition against the infliction of unnecessary suffering.¹⁷

21. The Annotated Supplement to the US Naval Handbook states that the position defined in the Naval Handbook

is no longer completely accurate with respect to antipersonnel weapons. There have been various efforts over the years to prohibit the use of lasers as antipersonnel weapons... [The 1995] Protocol IV [to the CCW] prohibits the use or transfer of laser weapons specifically designed to cause blindness to unenhanced vision.¹⁸

National Legislation

22. Austria's Law on the Prohibition of Blinding Laser Weapons states that "the acquisition, possession, development, transportation, production, trade and arrangement of acquisition and sale of blinding laser weapons and specific parts of them are prohibited". It punishes "whoever, and even if only by negligence, contravenes the prohibition of § 2 of this Federal Law".¹⁹

23. Under Hungary's Criminal Code as amended, employing "blinding laser weapons" as defined in the 1995 Protocol IV to the CCW is a war crime.²⁰

24. Luxembourg's Blinding Laser Weapons Act prohibits the use and the transfer of blinding laser weapons to another State or an entity other than a State.²¹

National Case-law

25. No practice was found.

Other National Practice

26. In 1997, in its response to the Joint Standing Committee On Treaties, the Australian government stated that:

¹⁵ Germany, *IHL Manual* (1996), § 302. ¹⁶ Israel, *Manual on the Laws of War* (1998), pp. 16–17.

¹⁷ US, *Naval Handbook* (1995), pp. 452–454, § 9.8.

¹⁸ US, *Annotated Supplement to the Naval Handbook* (1997), § 9.8, footnote 45.

¹⁹ Austria, *Law on the Prohibition of Blinding Laser Weapons* (1998), §§ 2(1) and 3.

²⁰ Hungary, *Criminal Code as amended* (1978), Section 160/A(3)(b)(4).

²¹ Luxembourg, *Blinding Laser Weapons Act* (1999), Article 3.

There is no evidence of any actual use of blinding laser weapons. Against this background, constructing and implementing arduous verification mechanisms was not regarded as a vital element of Protocol IV to the CCW. Should future developments indicate a need for verification and compliance measures, the Australian government would consider the options accordingly. . . In the face of the global community's overwhelming support for the achievements of Protocol IV and the absence of any consensus on a need to tighten its provisions, the Australian Government considers the text to be essentially adequate in dealing with the limited problem at hand. However, should persuasive evidence of any substantive weaknesses emerge, the Government will, through official review processes including the Review Conference in 2001, explore options for ensuring that effect is given to the intent behind Protocol IV.²²

27. In 1995, during a debate in the First Committee of the UN General Assembly, Burkina Faso called for "the halting of the use of laser weapons, particularly those which lead to irreversible blindness".²³

28. In 1995, during a debate in the First Committee of the UN General Assembly, Chile called the 1995 Protocol IV to the CCW imperfect.²⁴

29. At the First Review Conference of States Parties to the CCW (Second Session) in 1996, China made the following statement:

The Chinese delegation positively appraises the important results achieved by this conference. We adopted a new Protocol banning the use and transfer of blinding laser weapons which are specially designed to cause permanent blindness to naked eyes. This is the first time in human history that a kind of inhumane weapon is declared illegal and prohibited before it is actually used. This is significant.²⁵

30. In 1995, in reply to questions in parliament, the French President stated that "it should be stressed that France also subscribes to the objective of a prohibition on the deliberate blinding of persons as a method of warfare".²⁶

31. In 1995, the German government expressed its support for a prohibition on the use and production of blinding laser weapons.²⁷ In August 1995, in answer to questions in parliament, a Minister of State noted that the government knew of no German companies that were involved in the development or testing of blinding laser weapons. He added that blinding laser weapons were not part of NATO planning, that the German Department of Defence had never placed an

order for the development or purchasing of such weapons and that it did not intend to do so in the future.²⁸

32. At the First Review Conference of States Parties to the CCW (First Session) in 1995, Germany stated that “while the review of Protocol II was the top priority of the Conference, other conventional weapons which were excessively injurious or might have indiscriminate effects should not be ignored”. Therefore Germany was strongly in favour of prohibiting blinding laser weapons.²⁹

33. At the Third Preparatory Committee for the Second Review Conference of States Parties to the CCW in 2001, India stated that it “fully supported the idea of expanding the scope of the CCW to cover armed internal conflicts”.³⁰

34. The Report on the Practice of Indonesia states that Indonesia has prohibited the use of blinding laser weapons.³¹

35. In 1991, during a debate in the First Committee of the UN General Assembly, Ireland stated that it might support the proposal to ban blinding laser weapons.³²

36. According to the Report on the Practice of Jordan, Jordan does not use, manufacture or stockpile anti-personnel lasers and it does not plan to do so in the future.³³

37. In 1992, during a debate in the First Committee of the UN General Assembly, the Netherlands implied that universal adherence to the 1980 CCW would give it effect in internal conflicts.³⁴

38. A working paper submitted by the Netherlands to the First Review Conference of States Parties to the CCW (First Session) in 1995 evaluated existing customary law relating to the use of blinding lasers prior to the negotiation and adoption of Protocol IV. It stated that the “use of antipersonnel lasers whose sole purpose is to cause permanent blindness in military personnel is . . . illegal under the current laws of armed conflicts”. It noted, however, one possible exception to this under the then existing law, namely:

One exception might be cases in which blinding an opponent with a highly discriminate weapon such as a laser would be more humane than using a different method or means. This instance could occur if, for example, a sniper were to hide himself in a civilian environment. In this case other, more conventional methods of disabling

the sniper can be expected to cause a large number of civilian casualties that could be prevented through the use of a laser.³⁵

39. In the Ad Hoc Committee on Conventional Weapons of the CDDH, Sweden stated that:

It might be thought that the mere suspicion that a new or improved type of weapon might cause greater suffering or have more indiscriminate effects than its predecessor would constitute a basis for serious negotiations on the prohibition of such weapons on humanitarian grounds. It might be argued, for instance, that because laser weapons, if used against personnel, were likely to cause permanent damage to, or a complete loss of eyesight, they should be considered unnecessarily cruel. His delegation was inclined to that opinion and accordingly urged the great Powers to desist from further work in that direction and to agree on rules prohibiting the use of such weapons. If that were not possible, because some countries might consider that laser weapons would prove to be of considerable military value, for instance, in combating attacking missiles, it might still prove possible to negotiate an agreement prohibiting their use against any target other than a military target. It was possible that laser weapons would never be used against personnel because of their relative complexity and high cost, but there could be no certainty of that. It would therefore be worth while prohibiting such use.³⁶

40. At the 25th International Conference of the Red Cross in 1986, Sweden and Switzerland submitted a draft resolution which stated that:

The development of laser technology for military use includes a risk that laser equipment of armed forces can be specifically used for antipersonnel purposes on the battlefield, such as causing permanent blindness of human beings, and that such use may be considered already prohibited under existing international law.³⁷

This wording was not retained, and the resolution adopted instead stated that the Conference noted "that some governments have voiced their concern about the development of new weapons technologies the use of which, in certain circumstances, could be prohibited under existing international law".³⁸

41. In 1987, during debates in the First Committee of the UN General Assembly, Sweden stated that "the use of blinding laser weapons designed to cause permanent blindness would be in clear contravention of fundamental principles of the law of warfare" and that "the International Community should consider a ban on the use of laser weapons for such purposes".³⁹

³⁵ Netherlands, Working paper submitted to the First Review Conference of States Parties to the CCW (First Session), UN Doc. CCW/CONF.I/MCIII/WP.1, 26 September 1995, p. 9.

42. In 1991, during a debate in the First Committee of the UN General Assembly, Sweden stated that it would seek consensus on a resolution on the prohibition of blinding laser weapons at the International Conference of the Red Cross and Red Crescent to be held in 1991 in Budapest (but eventually cancelled).⁴⁰

43. In 1992, during a debate in the First Committee of the UN General Assembly, Sweden advocated prohibitions or restrictions on blinding laser weapons.⁴¹

44. In 1994, in a working paper submitted to the Group of Governmental Experts to prepare the First Review Conference of States Parties to the CCW, Sweden proposed the following provision: "It is prohibited to use laser beams as an anti-personnel method of warfare, with the intention or expected result of seriously damaging the eyesight of persons."⁴²

45. In 1995, during a debate in the First Committee of the UN General Assembly, Sweden stated that for ten years it had been calling for a ban on blinding laser weapons.⁴³

46. In 1987, during a debate in the First Committee of the UN General Assembly, the USSR stated that it had no objection to a ban on anti-personnel laser weapons.⁴⁴

47. In 1998, in a letter to the ICRC President, the UK Secretary of Defence stressed that "the UK's Armed Forces have never planned to use weapons intended to cause permanent blindness. The capabilities of weapons systems under development which employ lasers, and the concepts of operation for their use, are already consistent with the [1995 Protocol IV to the CCW]."⁴⁵

48. Prior to the adoption of the 1995 Protocol IV to the CCW, the US was developing a number of laser systems intended to blind either personnel and/or optical systems. An evaluation in 1988 by the Office of the Judge Advocate General concluded that such weapons would not cause unnecessary suffering and therefore would not be illegal.⁴⁶ During the meetings of governmental experts preparatory to the Review Conference, the US opposed the adoption of a Protocol on the subject. The system that was closest to deployment was the "Laser Countermeasure System" (LCMS also referred to as the PLQ-5),

⁴⁵ UK, Letter from the Secretary of Defence to the ICRC President, 23 March 1998.

⁴⁶ US, Department of the Army, Office of the Judge Advocate General, Memorandum on Use of Lasers as Antipersonnel Weapons, Doc. DA PAM 27-50-191, 29 September 1988, reprinted in *The Army Lawyer*, November 1988, p. 3.

mounted on an M16 rifle, for which the army hoped to have government approval for manufacture in June 1995. This system was described as having “the primary objective to detect, jam and suppress threat fire control, optical and electro-optical systems”.⁴⁷ It certainly had the capacity to blind at considerable distances and its use for this purpose was not excluded.⁴⁸ Congress decided to delay its decision on whether to give approval for manufacture.⁴⁹ As a result of pressure from a number of Congressmen,⁵⁰ the Department of Defense reconsidered its policy. In September 1995, the Secretary of Defense announced that “the Department of Defense prohibits the use of lasers specifically designed to cause permanent blindness of unenhanced vision and supports negotiations prohibiting the use of such weapons”.⁵¹ A Department of Defense News Briefing in October 1995 indicated that “with lasers, we have an opportunity to stop a proliferation of a new and dangerous weapon, we hope. We are now engaged in discussions at the Conference on Conventional Weapons in Vienna to do just that. Secretary Perry felt strongly that we should take a lead role in that by swearing off the development and use of lasers intentionally designed to blind people.”⁵²

49. A controversial analysis of the 1995 Protocol IV to the CCW by the Judge Advocate General of the US Department of the Army in 1995 stated that the Protocol was only applicable in international armed conflict, and not in operations such as “non-combatant evacuation, peacekeeping or counter terrorism missions, or in internal conflicts”. It also stated that the “State Parties that negotiated and adopted (by consensus) the laser Protocol did not conclude that use of a laser to blind an enemy combatant causes unnecessary suffering, or that use of a laser to blind an individual enemy combatant was illegal”.⁵³ Further to concern expressed at this interpretation by a US Senator,⁵⁴ the Secretary of Defense replied as follows:

Regretting any confusion created by the internal November 1995 memo, I would like to take this opportunity to reaffirm the Department’s policy. As you know, it is US policy to prohibit the use of weapons specifically designed to permanently blind... It was not the intent of the States Parties to Protocol IV to prohibit only

⁵⁴ US, Letter from Senator Patrick Leahy to the Secretary of Defense, 18 April 1996.

mass blinding . . . As you note, there is no prohibition in CCW on research, development or production. Nevertheless, the Department has no intent to spend money developing weapons we are prohibited from using. We certainly would not want to encourage other countries to loosely interpret the treaty's prohibitions, by implying that we want to develop or produce weapons we are prohibited from using. . . On the question of individual blinding, your interpretation is correct. Under both CCW and DoD policy, laser weapons designed specifically to cause permanent blindness may not be used against an individual enemy combatant.⁵⁵

50. On 5 October 1995, namely after the adoption of new policy and during the final negotiations of Protocol IV to the CCW, the US army cancelled the LCMS programme.⁵⁶

51. During the final plenary session of the First Review Conference of States Parties to the CCW (Second Session) in 1996, the US stated that it "supported expansion of the scope of Protocol IV and it is the policy of the US to refrain from the use of laser weapons prohibited by Protocol IV at all times".⁵⁷

52. The guidelines on blinding laser weapons issued in 1997 by the US Secretary of Defense state that:

The Department of Defense prohibits the use of lasers specifically designed to cause permanent blindness and supports negotiations to prohibit the use of such weapons. However, laser systems are absolutely vital to our modern military. Among other things, they are currently used for detection, targeting, range-finding, communications and target destruction. They provide a critical technological edge to US forces and allow our forces to fight, win and survive on an increasingly lethal battlefield. In addition, lasers provide significant humanitarian benefits. They allow weapon systems to be increasingly discriminate, thereby reducing collateral damage to civilian lives and property. The Department of Defense recognizes that accidental or incidental eye injuries may occur on the battlefield as the result of the use of lasers not specifically designed to cause permanent blindness. Therefore, we continue to strive, through training and doctrine, to minimize these injuries.⁵⁸

53. In 1997, in his message to the US Senate transmitting the 1995 Protocol IV to the CCW for consent to ratification, the US President stated that "these blinding lasers are not needed by our military forces. They are potential weapons of the future, and the US is committed to preventing their emergence and use." Regarding the scope of the Protocol, whilst recognising that it was officially that of international armed conflicts, the same message indicated that

“it is US policy to apply the Protocol to all such conflicts, however they may be characterized, and in peacetime”.⁵⁹

54. According to the Report on the Practice of Zimbabwe, Zimbabwe is opposed to the use of laser weapons.⁶⁰

III. Practice of International Organisations and Conferences

United Nations

55. In several resolutions adopted between 1995 and 1999, the UN General Assembly urged all States that had not yet done so to become parties to the 1980 CCW and its Protocols. The General Assembly expressed its satisfaction that the 1995 Protocol IV to the CCW had entered into force on July 1998 and recommended that States express their consent to be bound by the Protocol, with a view to widest possible adherence to this instrument at an early date.⁶¹

56. During the negotiation of Protocol IV to the CCW in Vienna in 1995, the UNDP representative stated that he was speaking “on behalf of the International Initiative Against Avoidable Disability promoted by UNDP, WHO and UNICEF”. He held that “the laser weapons had now been designed specially to blind personnel” and believed that “the use of such a weapon is abhorrent to the conscience of humanity”.⁶²

Other International Organisations

57. In a resolution on anti-personnel mines adopted in 1996, the ACP-EU Joint Assembly called upon the European Council to adopt a new joint action before the final session of the CCW Review Conference, stipulating that all EU members should ratify the 1995 Protocol IV to the CCW, ban the development and production of blinding laser weapons and proceed to the destruction of the existing stocks of blinding laser weapons.⁶³

58. In a resolution adopted in 1996, the Parliamentary Assembly of the Council of Europe emphasised that it appreciated the ICRC’s “diplomatic efforts to secure the banning of certain particularly cruel weapons, such as . . . laser weapons that blind victims. In this connection, it welcomes the recent adoption of the [1995 Protocol IV to the CCW].”⁶⁴ The Parliamentary Assembly also invited:

⁶³ ACP-EU, Joint Assembly, Resolution on anti-personnel mines, 22 March 1996, *Official Journal of the European Community*, No. C 254, 1996, Item 4, § 2(c), (e) and (f).

⁶⁴ Council of Europe, Parliamentary Assembly, Res. 1085, 24 April 1996, § 6.

in particular, the governments of the member states of the Council of Europe, of the states whose parliaments enjoy or have applied for special guest status with the Assembly, of the states whose parliaments enjoy observer status, namely Israel, and of all other states to:

- ...
- b. ratify, if they have not done so, ... the United Nations Convention of 1980 on the prohibitions or restrictions on the use of certain conventional weapons [1980 CCW] and its protocols ...
 - j. promote extension of the aforesaid United Nations Convention of 1980 to non-international armed conflicts, and inclusion in its provisions of effective procedures for verification and regular inspection.⁶⁵

59. In a resolution adopted in 1995, the European Parliament:

G. welcomed the agreement on a Protocol to the Convention on Certain Conventional Weapons to restrict the use and transfer of blinding laser weapons, but regretted that the Protocol fails to ban the production of blinding laser weapons and provides loopholes for the production, use and transfer of some blinding laser weapons, including those that target optical systems;

H. believed that deliberate blinding as a method of warfare is abhorrent and in contravention of established custom, the principles of humanity and the dictates of the public conscience;

I. believing that deliberate blinding as a method of warfare is abhorrent and in contravention of established custom, the principles of humanity and the dictates of the public conscience ...

- 2. Urged Member States to ratify the laser weapon Protocol without delays or reservations;
- 3. Welcomed the decision to convene a follow-up conference ... and calls on all Member States to use this opportunity to promote a comprehensive ban on ... all blinding laser weapons.⁶⁶

60. In 1995, the EU Council of Ministers adopted a common position stating that the member States shall "actively promote" the adoption of a Protocol on blinding laser weapons.⁶⁷

61. In 1995, in answer to a question from the European Parliament, the European Commission stated that it was "fully associated with the common position of the Member States".⁶⁸

62. In 1995, in answer to a question from the European Parliament, the Council of Ministers explained the EU common position and stated that

⁶⁵ Council of Europe, Parliamentary Assembly, Res. 1085, 24 April 1996, § 8(b) and (j).

“certain of the Union’s partners have adopted similar positions to that of the Union”.⁶⁹

63. In a resolution adopted in 1995, the OAU Council of Ministers urged all member States to accede to the 1980 CCW and expressed its support for the adoption of “a Protocol banning laser blinding weapons”.⁷⁰

64. In a resolution adopted in 1996, the OAU Council of Ministers expressed “satisfaction with the adoption of a Protocol banning blinding laser weapons by the Review Conference” and called upon “all Member States to consider adhering to it”.⁷¹

65. In a resolution adopted in 1996 on respect for IHL, the OAS General Assembly urged member States to accede to the 1980 CCW.⁷²

International Conferences

66. The expert report prepared for the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects held in Lucerne in 1974 noted that “use of lasers as anti-personnel devices is unlikely due to low cost-effectiveness for this purpose. Laser could, of course, have antipersonnel effects in addition to primary antimatériel purposes”.⁷³

67. A report on the discussion concerning laser weapons which took place at the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects held in Lucerne in 1974 states that:

261. Experts noted that lasers had already found military application in certain range-finding, guidance and communication systems. The opinion was expressed by one expert that certain laser weapons were feasible and might appear rather soon. Other experts, however, stated their doubts about the military practicability of such weapons, citing the high level of complexity and running costs likely to be involved if anything but the most specialized applications were envisaged. With regard to such specialized applications, there was some discussion of the potential of laser radiation weapons in an anti-aircraft or anti-missile role; the view was expressed that, having regard to energy requirements and to the transmissivity of the atmosphere at different altitudes to possible wavelengths of laser radiation, laser weapons of this type, if they were feasible at all, would probably only be usable from large aircraft.

262. With regard to the effects on the human body of laser radiation, two types of likely injury were cited. The first was burn injury. The second was ocular injury, already a well recognized hazard to users of existing laser devices, and one which stems from the natural capacity of the ocular lens to focus incident light, thereby

concentrating its power, and hence its effect, on the retina. The resultant damage may lead to partial or total blindness. One expert observed that the degree of laser damage to human tissue depended on the wavelength of the incident radiation, and he stated that the most powerful forms of laser currently available did not in fact operate at the most damaging wavelengths.

...

Evaluation

277. Some experts were of the opinion that, because the effects of potential future weapons could have important humanitarian implications, it was necessary to keep a close watch in order to develop any prohibitions or limitations that might seem necessary before the weapon in question had become widely accepted.⁷⁴

68. At the Conference of Government Experts on the Use of Certain Conventional Weapons held in Lugano in 1976, one expert stated that "laser weapons would appear at the beginning of the eighties, and this expectation would necessitate a watch to be kept on the military use of the laser beam, especially in an anti-personnel capacity, so as to prevent its causing a greater incidence of casualties among combatants".⁷⁵

69. At the Conference of Government Experts on the Use of Certain Conventional Weapons held in Lugano in 1976, one expert read out paragraph 277 of the report of the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects held in Lucerne in 1974 (see *supra*) and pointed out that it was a text with which most experts could agree. He further stated that:

In view of the fact that the laser beam could cause blindness, its use as an anti-personnel weapon would have very grave consequences even if the combatants aimed at had protective equipment. To completely forbid its use against people was therefore desirable and also possible, but its unqualified prohibition was impossible, as it might be extremely useful against strategically important targets.⁷⁶

70. In a resolution adopted in 1995 on the challenges posed by calamities arising from armed conflict, the 93rd Inter-Parliamentary Conference called on States "to ban blinding laser weapons in an additional Protocol".⁷⁷

71. At the First Review Conference of States Parties to the CCW in 1995, a consensus emerged during the negotiations that blinding laser weapons must not be used in any armed conflict.⁷⁸ A number of States supported the Austrian

⁷⁷ 93rd Inter-Parliamentary Conference, Madrid, 27 March–1 April 1995, Resolution on the international community in the face of the challenges posed by calamities arising from armed conflicts and by natural or man-made disasters: the need for a coherent and effective response through political and humanitarian assistance means and mechanisms adapted to the situation, § 16(e).

⁷⁸ ICRC, Working paper on war crimes submitted to the Preparatory Committee for the Establishment of an International Criminal Court, New York, 14 February 1997, p. 29.

proposal that would have applied the Protocol "in all circumstances including armed conflict and times of peace".⁷⁹ The proposal retained was that the scope of the Protocol should be the same as that agreed on for the new 1980 Protocol II to the CCW also in the process of being negotiated in another Committee.⁸⁰ The lack of agreement on the 1996 Amended Protocol II to the CCW (for reasons other than its scope) meant that that Protocol could not be adopted at the Vienna session of the Conference. States decided to go ahead and adopt the Protocol IV nonetheless, even though the extension of the scope of application to internal armed conflict could not be included. At the final session of the First Review Conference, in May 1996, the suggestion was made to return to Protocol IV and add the same scope of application clause that was finally agreed on for Protocol II. All States were in favour, with the sole exception of one State, which declared that it opposed this alteration purely because of its principled opposition to extending IHL instruments to non-international armed conflict. At the same time, however, that State declared that it was opposed to the production and use of blinding laser weapons and that it had no intention of using these weapons in any type of conflict.⁸¹

72. The 26th International Conference of the Red Cross and Red Crescent in 1996 welcomed the adoption of the 1995 Protocol IV to the CCW "as an important step in the development of international humanitarian law" and emphasised "the prohibition on the use or transfer of laser weapons specifically designed to cause permanent blindness". The Conference further welcomed "the general agreement achieved at the Review Conference that the scope of application of this Protocol should apply not only to international armed conflicts".⁸²

73. The Final Declaration of the First Review Conference of States Parties to the CCW (Second Session) in 1996 contained the following statement in relation to blinding laser weapons:

Welcoming the adoption of Protocol IV on Blinding Laser Weapons as a codification and progressive development of the rules of international law,
Noting that a number of issues could be considered in the future, for example at a review conference, taking into account scientific and technological developments, including the questions of proliferation on the production, stockpiling and transfer of blinding laser weapons and the question of compliance with regard to such weapons, as well as other pertinent issues, such as the definition of "permanent blindness", including the concept of field of vision.

⁷⁹ First Review Conference of States Parties to the CCW (First Session), UN Doc. CCW/CONF.I/MCIII/WP.2, 26 September 1995, Article 1(2).

⁸⁰ First Review Conference of States Parties to the CCW (First Session), UN Doc. CCW/CONF.I/4, 12 October 1995, § 5. (The report of the Main Committee (III) stated that "during the course of negotiations on the draft text, the Committee decided to leave the question of scope, as referred to in Article 1, to the decision of the Drafting Committee of the Review Conference, pending the agreed text on scope negotiated in Main Committee II".)

⁸¹ ICRC archive document.

⁸² 26th International Conference of the Red Cross and Red Crescent, Geneva, 3–7 December 1995, Res. II, § H(c), (d) and (f).

The High Contracting Parties solemnly declare:

Their satisfaction at the adoption of the Protocol on Blinding Laser Weapons (Protocol IV) to the Convention,

Their conviction of the importance of the earliest possible entry into force of Protocol IV,

Their desire that all States, pending the entry into force, respect and ensure respect of the substantive provisions of Protocol IV to the fullest extent possible,

Their recognition of the need for achieving the total prohibition of blinding laser weapons, the use and transfer of which are prohibited in Protocol IV,

Their wish to keep the issue of the blinding effects related to the use of laser systems under consideration.⁸³

74. In the Final Declaration of the Second Review Conference of the CCW in 2001, States Parties expressed their determination “to encourage all States to become Parties to the Protocol [on blinding laser weapons] as soon as possible”. States Parties also reaffirmed “the recognition by the First Review Conference of the need for the total prohibition of blinding laser weapons, the use and transfer of which are prohibited in Protocol IV”.⁸⁴

IV. Practice of International Judicial and Quasi-judicial Bodies

75. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

76. Research, analysis and discussion on blinding laser weapons that helped lead to the adoption of the 1995 Protocol IV to the CCW took place largely in the context of a series of expert meetings on this subject convened by the ICRC.⁸⁵

77. At the Group of Governmental Experts to prepare the First Review Conference of States Parties to the CCW in 1994, the ICRC made a proposal to the effect that:

1. Blinding as a method of warfare is prohibited.
2. Laser weapons may not be used against the eyesight of persons.⁸⁶

78. In 1994, in the First Committee of the UN General Assembly, the ICRC addressed the issue of blinding laser weapons in the following terms:

⁸³ First Review Conference of States Parties to the CCW (Second Session), UN Doc. CCW/CONF.I/16, Final Declaration, 22 April to 3 May 1996, §§ 14–20.

⁸⁴ Second Review Conference of States Parties to the CCW, Geneva, 11–21 December 2001, UN Doc. CCW/CONF.II/2, Final Declaration, 25 January 2002, p. 11.

⁸⁵ Louise Doswald-Beck (ed.), *Blinding Weapons: Reports of the meetings of experts convened by the International Committee of the Red Cross on Battlefield Laser Weapons 1989–1991*, ICRC, Geneva, 1993, 371 pp.

⁸⁶ ICRC, Working paper submitted to the Group of Governmental Experts to prepare the First Review Conference of States Parties to the CCW, UN Doc. CCW/CONF.I/GE/CRP.28, 12 August 1994.

The ICRC is very pleased that a large number of States have either formally or informally indicated their support for a Protocol on the subject of blinding weapons . . . This preventive step will save the world from the horrifying prospect of large numbers of persons being suddenly blinded for life by certain laser weapons that could soon be both inexpensive and easily available.⁸⁷

79. In 1996, at the close of the session of the First Review Conference of States Parties to the CCW that adopted Protocol IV, the head of the ICRC delegation made the following formal statement:

The adoption of the Protocol on blinding laser weapons represents a victory for civilization over barbarity. Above and beyond the text of the Protocol, what we will remember about the decision taken today, and what the people of the world will understand, is that States do not accept the idea that men might deliberately blind other men, in any circumstances whatsoever.⁸⁸

80. In 1995, in the First Committee of the UN General Assembly, the ICRC made the following statement:

The adoption, on 13 October 1995, of Protocol IV, on blinding laser weapons, is a major achievement. To our knowledge, this is the first time since 1868 that a weapon has been prohibited before it could be used on the battlefield. Thus, humanity has been spared the horror that such blinding weapons would have created. Quite apart from the actual wording of the instrument, the effect of its adoption is a strong message that States will not tolerate the deliberate blinding of people in any circumstances. Thus, it is a triumph of civilization over barbarity. It is also a major achievement that this Protocol includes a prohibition on the transfer of blinding laser weapons. The ICRC sincerely hopes that States will adhere to it as quickly as possible and will take all appropriate measures to ensure respect for its provisions.⁸⁹

VI. Other Practice

81. *Jane's Defence Weekly* and other journalists alleged that the UK had deployed prototypes of blinding laser weapons in the war in the South Atlantic.⁹⁰

82. According to the Human Rights Watch Arms Project, "two Stingray prototypes were deployed [by the US], but not used, in the Gulf War".⁹¹

⁸⁷ ICRC, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/49/PV.10, 24 October 1994, p. 11.

⁸⁹ ICRC, Statement before the First Committee of the UN General Assembly, UN Doc. A/C.1/50/PV.11, 26 October 1995, pp. 25–26.

⁹⁰ Simon O'Dwyer-Russell, "Navy's top secret laser was tried out in Falklands", *Sunday Telegraph*, 7 January 1990; Fermin Gallego and Mark Daly, "Laser Weapons in Royal Navy Service", *Jane's Defence Weekly*, 13 January 1990, pp. 48–49.

⁹¹ Human Rights Watch Arms Project, *US Blinding Laser Weapons*, Washington D.C., May 1995, p. 1.

83. Prior to the adoption of Protocol IV, there were a number of programmes developing blinding laser weapons. The extent of these is not known, not all of them having been confirmed. Some research on the extent of such developments was undertaken by the Human Rights Watch Arms Project, which published a report in 1995 in which it indicated that such weapons were being researched or developed in China, France, Germany, Israel, Russia, UK, Ukraine and US.⁹²

84. There were reports that a Chinese company NORINCO had developed a portable blinding laser weapon that was displayed in March 1995 at defence exhibitions in Manila and Abu Dhabi. According to *Jane's Intelligence Review*, the Chinese ZM-87 was the first openly offensive laser to be marketed.⁹³ In October 1995, China ratified the 1995 Protocol IV to the CCW.

85. In a public statement in April 1995, the WMA stated that "the development of antipersonnel lasers as blinding weapons represent[s] one of the biggest public health issues facing the world today. The World Medical Association fully supports the ICRC in its efforts to combat this growing menace."⁹⁴

86. In two press releases in 1995, Human Rights Watch condemned the use of blinding laser weapons. In the first, it stated that "blinding laser weapons are cruel and inhumane weapons that would cause unnecessary suffering to countless soldiers and possibly civilians".⁹⁵ In the second, it emphasised its belief that "blinding laser weapons are an excessively cruel weapon, and that the use of blinding laser weapons is repugnant to the public conscience and should therefore be banned".⁹⁶ These statements were based on a Human Rights Watch report, "Blinding Laser Weapons, the Need to Ban a Cruel and Inhuman Weapon", in which it stated that:

Given the long-term effects on a country of permanently blinding large numbers of soldiers, the intentional blinding by lasers or any other weapon cannot justify whatever minimal military utility might be gained in the short run. Tactical lasers, including weapons that are often referred to as anti-material or anti-sensor such as LCMS, have the capacity for directly causing blindness and in some cases are intended to cause blindness. This characteristic renders them essentially antipersonnel and requires that they be banned.⁹⁷

⁹⁷ Human Rights Watch Arms Project, *Blinding Laser Weapons: the Need to Ban a Cruel and Inhumane Weapon*, Vol. 7, No. 1, Washington, D.C., September 1995.

87. At the First Review Conference of States Parties to the CCW in 1995, the World Blind Union supported a ban on blinding laser weapons.⁹⁸

88. At the First Review Conference of States Parties to the CCW in 1995, the World Veterans Association supported a ban on blinding laser weapons.⁹⁹

89. At the First Review Conference of States Parties to the CCW in 1995, the Cristoffel-Blindenmission of Germany stated that it considered laser weapons to be an "inhumane weapon system". It therefore made an urgent appeal:

to ban any use of laser beams against other people within international conflicts and civil wars; to forbid the development, production, storage, trading and use of such weapons; and to provide for implementation and verification of the Protocol, including sanctions if necessary.¹⁰⁰

90. In a resolution adopted in 1995, the Blinded Veterans Association of the US stated that:

Laser weapons with the potential to blind are cruel and inhumane weapons, and we as a society must not accept blinding as a method of warfare... The Blinded Veterans Association actively supports efforts to seek an international prohibition on the use of lasers for the purpose of blinding as a method of warfare.¹⁰¹

Laser systems incidentally causing blindness

I. Treaties and Other Instruments

Treaties

91. Articles 2 and 3 of the 1995 Protocol IV to the CCW provide that:

In the employment of laser systems, the High Contracting Parties shall take all feasible precautions to avoid the incidence of permanent blindness to unenhanced vision. Such precautions shall include training of their armed forces and other practical measures.

Blinding as an incidental or collateral effect of the legitimate military employment of laser systems, including laser systems used against optical equipment, is not covered by the prohibition of this Protocol.

Other Instruments

92. No practice was found.

⁹⁸ World Blind Union, Statement at the First Review Conference of States Parties to the CCW (First Session), Vienna, 28 September 1995, UN Doc. CCW/CONF.I/SR.6, 5 October 1995, p. 12, § 56; see also Louise Doswald-Beck, "New Protocol on Blinding Laser Weapons", *IRRC*, No. 312, 1996, p. 276.

⁹⁹ World Veterans Federation, Statement at the First Review Conference of States Parties to the CCW (First Session), Vienna, 28 September 1995, UN Doc. CCW/CONF.I/SR.6, 5 October 1995, p. 17, § 82; see also Louise Doswald-Beck, "New Protocol on Blinding Laser Weapons", *IRRC*, No. 312, 1996, p. 276.

¹⁰¹ Blinded Veterans Association, National Convention, Resolution 26-95, 26 August 1995.

II. National Practice

Military Manuals

93. Canada's LOAC Manual states that:

Blinding as an incidental or collateral effect of the legitimate military employment of laser systems is not covered by the prohibition. For example, the legitimate use of a laser targeting system in a tank is lawful even if one of its collateral effects may be to cause blindness. However, such a laser targeting system could not be deliberately used to blind enemy combatants.¹⁰²

94. Israel's Manual on the Laws of War states that "in the employment of arms applying laser technology for purposes other than causing blindness (i.e. for ranging purposes), it is incumbent on the states to take all precautionary measures to prevent unintentional blinding".¹⁰³

95. The Annotated Supplement to the US Naval Handbook states that "while blinding as an incidental effect of 'legitimate military employment' of range finding or target acquisition lasers is not prohibited by [the 1995 Protocol IV to the CCW], parties thereto are obligated 'to take all feasible precautions' to avoid such injuries".¹⁰⁴

National Legislation

96. No practice was found.

National Case-law

97. No practice was found.

Other National Practice

98. In 1997, in its response to the Joint Standing Committee On Treaties, the Australian government stated that:

Efforts are under way to increase the safety of these [laser] systems. For example, the Defence Department's Defence Science and Technology Organization has a program aimed at making laser range-finders safer through the development and use of lasers which can be operated in the eye-safe region of the electromagnetic spectrum.¹⁰⁵

99. In 1998, in a letter to the ICRC President, the UK Secretary of Defence stressed that "the capabilities of weapons systems under development which employ lasers, and the concepts of operation for their use, are already consistent with the [1995 Protocol IV to the CCW]".¹⁰⁶

¹⁰² Canada, *LOAC Manual* (1999), p. 5-3, § 30.

¹⁰⁶ UK, Letter from the Secretary of Defence to the ICRC President, 23 March 1998.

100. In 1995, in a US Department of Defense policy statement on blinding lasers, the need for some restrictions, aside from the prohibition of deliberate blinding, was explained in the following fashion:

Laser systems are absolutely vital to our modern military. Among other things, they are currently used for detection, targeting, range-finding, communications and target destruction. They provide a critical technological edge to US forces and allow our forces to fight, win and survive on an increasingly lethal battlefield. In addition, lasers provide significant humanitarian benefits. They allow weapons systems to be increasingly discriminate, thereby reducing collateral damage to civilian lives and property. The Department of Defense recognizes that accidental or incidental eye injuries may occur on the battlefield as the result of the use of legitimate laser systems. Therefore we continue to strive, through training and doctrine, to minimize these injuries.¹⁰⁷

III. Practice of International Organisations and Conferences

United Nations

101. No practice was found.

Other International Organisations

102. No practice was found.

International Conferences

103. The Final Declaration of the First Review Conference of States Parties to the CCW in 1996 stated that:

Welcoming the adoption of Protocol IV on Blinding Laser Weapons as a codification and progressive development of the rules of international law . . .

The High Contracting Parties solemnly declare:

Their conviction of the importance of the earliest possible entry into force of Protocol IV,

Their desire that all States, pending the entry into force, respect and ensure respect of the substantive provisions of Protocol IV to the fullest extent possible,

Their wish to keep the issue of the blinding effects related to the use of laser systems under consideration.¹⁰⁸

IV. Practice of International Judicial and Quasi-judicial Bodies

104. No practice was found.

V. Practice of the International Red Cross and Red Crescent Movement

105. No practice was found.

¹⁰⁸ First Review Conference of States Parties to the CCW (Second Session), Final Declaration, UN Doc. CCW/CONF.I/16, 22 April–3 May 1996, § 14 and §§ 17–19.

VI. Other Practice

106. In 1995, in its report on blinding laser weapons, Human Rights Watch stated that:

Laser target designators and range finders are of great military utility and may reduce the number of casualties or ensure more precise attacks on military targets. Still, experts believe that because they can cause significant injury and permanent blindness, combatants remain under a legal obligation to weigh the human consequences of even these instruments. Perhaps the most important consideration is to ensure that laser range finders and target designators are not abused and used intentionally against the eyesight of individuals and outside their missions. Government officials have expressed the fear that personnel using such lasers might be charged with war crimes if an individual is blinded. However, soldiers and their commanders always are required to know the legitimate and illegitimate, unacceptable uses of weapons.¹⁰⁹
