FRBR-Library Reference Model:
FRBR, FRAD & FRSAD – Updated & Consolidated

Kathy Glennan
Head, Music and Monographs Cataloging,
University of Maryland
ALA Representative to the RDA Steering Committee
May 5, 2016

FRBR-LRM

- A single, consistent model covering all aspects of bibliographic data
- Under development by IFLA since 2010
  - Worldwide review underway: comments due May 1
  - Approval expected in late 2016
- Remains a high-level conceptual model
- Uses entity-relationship modeling framework
- Focused on user tasks, not library operations
- Based on, and fully compatible with
  - CIDOC Conceptual Reference Model
  - Object-oriented FRBR (FRBRoo)

What’s Included?

- Terms and definitions that are applicable in a generic way
  - To all types of resources
  - To all relevant entities
- Entities serving as domain or range of at least one significant relationship that couldn’t be further generalized
What’s Excluded?

- Data elements that are
  - Too specialized
  - Specific to certain types of resources (with a few exceptions)
- Administrative metadata that does not support user tasks

(End-)User Tasks

- From FRBR:
  - Find
  - Identify
  - Select
  - Obtain
- From FRSAD:
  - Explore
- Deprecated:
  - FRAD:Contextualize (part of Explore)
  - FRAD:Justify (a library staff task)

Entities

- Key conceptual objects of interest to users
  - Only 11 included
- Defined in general, inclusive terms
- Superclasses/subclasses introduced
  - Any instance of a subclass is also an instance of the superclass (the “IsA” relationship)
    - Any relationship or attribute that applies to the superclass also applies to subclass without having to be declared
    - But not vice versa
### Entities

<table>
<thead>
<tr>
<th>Entity</th>
<th>Definition</th>
<th>Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Res</td>
<td>Any entity in the universe of discourse</td>
<td>Superclass; Revision of FRSAD: Theme</td>
</tr>
<tr>
<td>Work</td>
<td>The intellectual or artistic content of a distinct creation</td>
<td>FRSAD Group 1</td>
</tr>
<tr>
<td>Expression</td>
<td>A distinct constellation of signs conveying intellectual or artistic content</td>
<td>FRSAD Group 1</td>
</tr>
<tr>
<td>Manifestation</td>
<td>A set of all carriers that are assumed to share the same characteristics as to intellectual or artistic content and aspects of physical form. The set is defined by both the overall content and the production plan for its carrier or carriers</td>
<td>FRSAD Group 1</td>
</tr>
<tr>
<td>Item</td>
<td>A physical object carrying signs resulting from a production process and intended to convey intellectual or artistic content</td>
<td>FRSAD Group 1</td>
</tr>
<tr>
<td>Nomen</td>
<td>A designation by which an entity is known</td>
<td>FRSAD: Nomen &amp; FAD: Name</td>
</tr>
<tr>
<td>Agent</td>
<td>An entity capable of exercising responsibility relationships relating to works, expressions, manifestations or items</td>
<td>New: superclass of Collective Agent &amp; Person</td>
</tr>
</tbody>
</table>

### Entities

<table>
<thead>
<tr>
<th>Entity</th>
<th>Definition</th>
<th>Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Item</td>
<td>A physical object carrying signs resulting from a production process and intended to convey intellectual or artistic content</td>
<td>FRSAD Group 1</td>
</tr>
<tr>
<td>Nomen</td>
<td>A designation by which an entity is known</td>
<td>FRSAD: Nomen &amp; FAD: Name</td>
</tr>
<tr>
<td>Agent</td>
<td>An entity capable of exercising responsibility relationships relating to works, expressions, manifestations or items</td>
<td>New: superclass of Collective Agent &amp; Person</td>
</tr>
</tbody>
</table>

### Entities

<table>
<thead>
<tr>
<th>Entity</th>
<th>Definition</th>
<th>Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Collective Agent</td>
<td>A gathering or organization of persons bearing a particular name and acting as a unit</td>
<td>New: encompasses FAD:Family &amp; FRBR/FRAD: Corporate Body</td>
</tr>
<tr>
<td>Person</td>
<td>An individual human being</td>
<td>FRSAD Group 2 (not FAD:Person)</td>
</tr>
<tr>
<td>Place</td>
<td>A given extent of space</td>
<td>Repurposed from FRSAD: Place</td>
</tr>
<tr>
<td>Time-span</td>
<td>A temporal extent having a beginning, an end and a duration</td>
<td>New: Not related to FRBR:Event</td>
</tr>
</tbody>
</table>
Deprecated Entities

- FRBR Group 2: *Family, Corporate Body*
  - Part of *Collective Agent*
- FRBR Group 3: *Concept, Object, Event, & Place*
  - Removed
- FRAD: *Identifier & Controlled Access Point*
  - Considered types of *Nomen*
- FRAD: *Rules & Agency*
  - Library staff tasks; not in scope

Attributes

- Data describing an entity
  - Can be represented as a string or a thing
  - LRM not exhaustive: retains only the most significant (37 in total)
    - None are required
    - Record if applicable, easily ascertainable & relevant
    - Repeatability not addressed
    - None defined for *Collective Agent* – just use those for *Agent*

New: Manifestation Statement

- A statement appearing in the manifestation and deemed to be significant for users to understand how the resource represents itself
  - Includes transcribed elements such as
    - Complete ISBD Area 1
    - Edition statement
    - Publication statement (or its individual parts)
    - Series statement
  - Can have sub-types
Relationships

- Links two entities and provides context for them
- LRM declares 34, in general, abstract way
  - Top level: **Res is associated with Res**
  - LRM implementations can introduce sub-types
  - Reciprocals
    - Work is part of Work // Work has part Work
- Chains & short-cuts:
  - Person IsA Agent + Agent created Work
  - Person created Work [implicit]

Relationships

- WEMI still core:
  - Work is realized through Expression
  - Expression is embodied in Manifestation
  - Manifestation is exemplified by Item
- Added:
  - Res has appellation Nomen
  - Res has association with Place
  - Res has association with Time-span
- Subject relationship:
  - Work has subject Res

Relationships

- Responsibility relationships:
  - Work was created by Agent
  - Expression was created by Agent
  - Manifestation was created by Agent
  - Manifestation is distributed by Agent
  - Manifestation is produced by Agent
  - Item is owned by Agent
  - Item was modified by Agent
Relationships

- Other relationships (not a complete list)
  - Work is transformation of Work
  - Nomen is equivalent to Nomen
  - Expression was derived into Expression
  - Manifestation has reproduction
  - Collective Agent succeeds Collective Agent
  - Place has part Place

New: Representative Expression

- If representative of the work (such as the original expression), this serves as the basis of the Work description
- Only one expression serves in this role
  - Includes important attributes used to identify the work – even though they are technically expression attributes
    - Language
    - Intended audience
    - Medium of performance
    - Key
    - Scale

 aggregates

- Three distinct types
  - Aggregate collections of expressions
    - Independently created, published together
  - Aggregates resulting from augmentation
    - Single work supplemented with dependent work(s) like a preface or illustrations
  - Aggregates of parallel expressions
    - Two language expressions of the same work, published together
  - Not whole-part
Aggregating Work

- Not a discrete section of the resulting manifestation
  - May not even be an identifiable part
- Does not contain the *aggregated works* themselves
- Modeled as a *Manifestation* embodying multiple *Expressions*
  - *Works* and *Expressions* treated identically regardless of publication form
    - *Expressions* may be published alone, or with other expressions in a *Manifestation*

Serials

- Function like aggregates
- LRM regards *any* serial as a distinct instance of the *Work* entity
  - Any serial *Work* can be said to have only one *Expression* and only one *Manifestation*
  - *Work-to-Work* relationships link the paper & online editions of a journal
- Look to PRESSoo for a more specific conceptual model for serials

Impact on RDA?

- LRM will serve as a guide for further RDA development
  - As a faithful implementation, RDA will retain basic structure of the entities, relationships, and attributes
    - Will remove placeholder chapters for FRBR Group 3 entities
  - Expansions likely needed
    - Addition of specialized attributes, sub-types, etc. expected
  - Opportunity for other changes to structure of RDA instructions at the same time
