Important reminders:

1. All the rules and examples we will be dealing with today are under the principle of AACR2. This session does not touch on RDA: Resource Description Access, the future upcoming cataloging instruction.
2. Not all examples discussed here are live examples from the database although most of them are. Don't be surprised if you can not find the exact record in OCLC.

21.1B1

Some corporate bodies are subordinate to other bodies (e.g., the Peabody Museum of Natural History is subordinate to Yale University; the Annual General Meeting is subordinate to the Canadian Library Association).

Consider ad hoc events (such as athletic contests, exhibitions, expeditions, fairs, and festivals) and vessels (e.g., ships and spacecraft) to be corporate bodies.

When & Where to Add Cross-references

- Where –
 - AACR2 Chapter 24
 - LCRI 24, 26.3

AACR2 26.3A7-

Refer from different forms of [heading](#) under which a [corporate body](#) might reasonably be sought.

Basic rule is to give entry to variant forms, especially if you have reason to think they might be searched.

26.1 Make a *see* reference from a form of the name of a person or a corporate body or title of a work that might reasonably be sought to the form that has been chosen as a name or uniform title heading, or as a title entry.

26.3 Refer from a name used by a body, or found in reference sources, that is significantly different from that used in the heading for that body.

Conference 4XX References

- Conferences are a type of corporate body
 - Most cross-reference rules that apply to corporate bodies apply to conferences as well
 - Variant forms including variant languages, direct entry cross-reference of subordinate heading, inverted forms, etc.

Conference References : Inverted Form

LCRI 26.3A3

- Inverted references are required when
 - heading begins with the name of the sponsor and/or
 - word for “conference” is not the first element of the heading
- Do not make inverted cross-references from subject words in conference names
- Do not add qualifiers to inverted references

Note: Please note the difference for inverted headings between conference names – don't make them for subject words – and government bodies entered under jurisdiction – do make them for subject words.

Conference References : Inverted Form

LCRI 26.3A3

- Make an inverted reference from the first word following the name or the abbreviation of the name of a sponsor when the name of the sponsor is the first element of the conference name

LCRI 24. 13 Type 6

If a named meeting (cf. LCRI 21.1B1) contains the entire name of a corporate body (as defined above), enter the meeting subordinately to the heading for the body if the name contains, in addition to the name of the body, no more than a generic term for the meeting or not more than a generic term *plus one or more of the following elements: the venue of the meeting; number, date, or other sequencing element.*

Reference - Routinely make a reference from the entire name of a body entered under type 6. Note, however, if the name also fits 24.13, type 1, a reference from the entire name is unnecessary.

This is an ongoing conference. No qualifiers provided.

LCRI [24.4. Additions](#) - [24.4C. Two or more bodies with the same or similar names](#)
- 24.4C5 - Institutions

When adding the name of a higher or related corporate body to a corporate name, give the name of the body in the form and language on which the heading for the body is based (not necessarily the catalog-entry form for the institution). Use in the qualifier the body's current name. However, if a qualifier is added to the name of a body that no longer exists, use in the qualifier the name of the body that was appropriate at the time the body ceased.

Normally, make references only to connect immediately adjacent headings, thus creating a chain of *see also* references leading from one heading to another. However, if the relationship is not clear, it is permissible to connect several headings without the use of the [subfield \\$w](#)

The available information about the relationship is not clear and/or there is not enough information readily available to determine the chronological relationships. Simple *see also* references without the [subfield \\$w](#) are used to connect the headings. All the headings are connected by *see also* references.

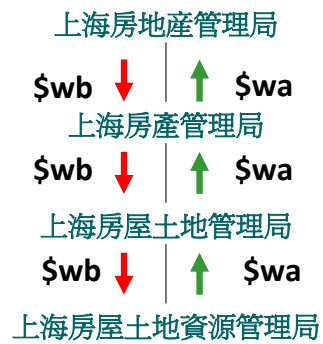

Add 670 and/or 675 to justify 5XX references

Note: Jinling da xue is both an earlier name and later name to Nanjing da xue. The two headings are connected by simple see also 5xx without \$wa and \$wb. But Jinling da xue has no relationship with Zhong yang da xue.

If a source gives only an earlier or later name but not the name used in the heading, cite the source in a [675 field](#). Do not, however, divide a citation for successive issues of a serial; give the complete citation in a [670 field](#) if any volume contains the heading or in a [675 field](#) if no volume contains the heading.

Citing Internet Resources

DCM Z1 670

- 670 \$a (title of the internet resource) \$b location within the resource (information found)

670 Bai du bai ke WWW site, Nov. 15, 2010 \$b (李驰 = Li Chi; b. May, 1963, Zhenjiang, Jiangsu; founder of Shenzhen Shi tong wei tou zi guan li gong si)

670 Hospital Authority WWW site, Chinese version, May 25, 2011 \$b jian jie page (醫院管理局 = Yi yuan guan li ju; 醫管局 = Yi guan ju, founded 1990)

670 Title of the internet resource (IEEE homepage) \$b Conferences & Events page (... ..)

DCM Z1 Internet resources –

Give the title of the Internet resource and the date it was consulted in subfield \$a. In subfield \$b, give a location within the resource (e.g., home page, about page, HTML title, t.p. of .pdf), if appropriate, and the information found.

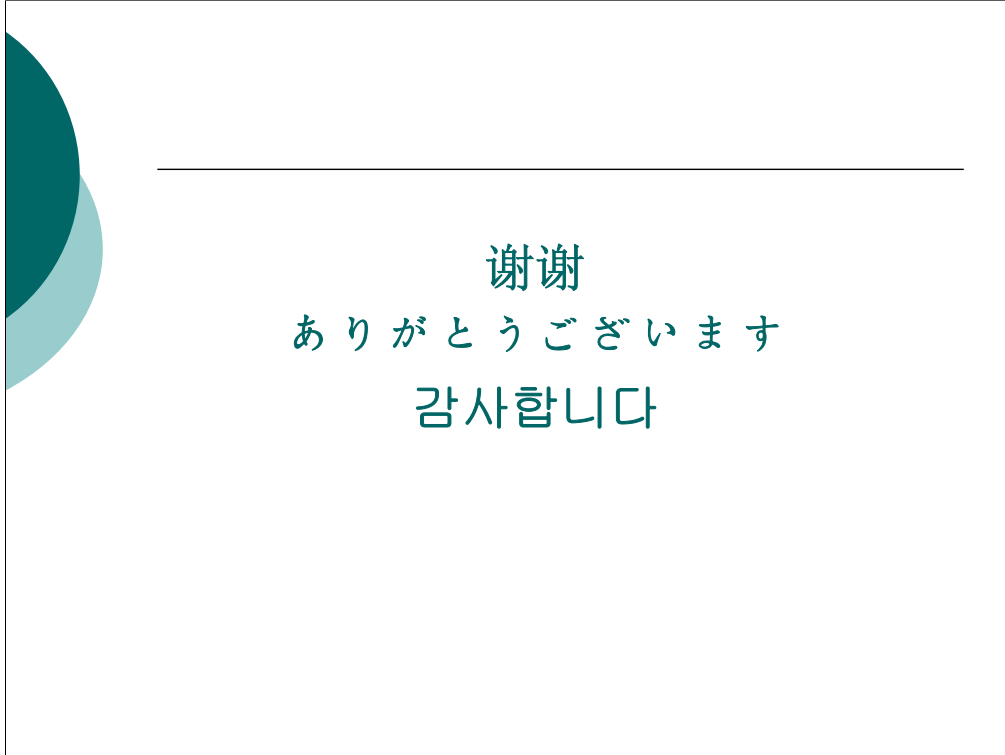

Catalogers may *optionally* provide a uniform resource identifier (URI) in the 670 citation to link to the cited resource if it contains significant information related to the established heading that cannot be cited succinctly in the authority record. If a URI is included, it must be given in [subfield \\$u](#).

NACO participants' Manual is another place to look for answers. But use caution as it is not updated in certain areas.

Good Cataloging Practice

- Search before adding a reference to avoid conflict
- Provide references and see also references following instructions - (AACR2, LCRI, DCM Z1, etc.)
