Genetic regulation
[QH450]
Here are entered works on the control of the type and rate of cellular processes by regulation of the activity of specific genes controlling individual biochemical reactions. Works on the various mechanisms of cellular control such as structural control, biochemical control, cell differentiation, etc., are entered under Cellular control mechanisms.

Gravitation (Not Subd Geog) [QB331]

Here are entered works relating to measurement of the resultant effect of the gravitational attraction and centrifugal repulsion between any body and a planet or other celestial body, including works on earth's gravity. Theoretical works on the phenomenon of gravitation, i.e. the attraction between masses anywhere in the universe, and on determinations of the constant of gravitation. Works relating to measurement of the resultant effect of the gravitational attraction and centrifugal repulsion between any body and a planet or other celestial body, including works on earth's gravity are entered under the heading Gravitation.
