BACKGROUND: Toy and movable books are materials in unique formats that involve reader participation such as moving illustrations, pushing buttons to play songs, or manipulating the book in various other ways. They are also called “action books” or “special effects books.”

Toy and movable books is the general subject heading used for these types of books, so they are easy to find in online catalogs. You may also search for specific types of toy and movable books by using narrower subject headings such as Glow-in-the-dark books, Lift-the-flap books, Musical books, Pop-up books, Scented books, Sound effects books, Split-page books, and Textured books.

Books that include accompanying material such as CD-ROMs, sound recordings, toys, jewelry, etc., are usually not considered toy and movable books.

This document provides guidance on applying descriptive and subject elements to common types of toy and movable books. While publishers continually find new and different ways to present information, especially to children, the principles below are widely applicable.

Toy and movables may be described in the MARC 520 field as part of the summary statement, or CYAC annotation. Toy and movable aspects may also be brought out in a MARC 500 note. Examples are provided at the end of this instruction sheet.

As of May 2021, CYAC catalogers started applying Library of Congress Genre/Form Terms (LCGFT) to children’s materials. Further information on LCGFT is located at https://www.loc.gov/aba/publications/FreeLCGFT/freelcgft.html.

500 ## $a Sound panel on extended back cover includes eight buttons keyed to illustrations in text that play sounds when pressed. Also includes a light that glows in the dark and can be turned on with a switch.

f. Sticker books. Books with accompanying stickers that are not meant to be used with the book are not considered toy and movables.

However, some books come with stickers that are required for the book to be used as intended. An example would be an early learning book that invites the reader to find the sticker for the appropriate article of clothing, dish of food, or piece of furniture and place it on the matching illustration. For such books, complete the cataloging as usual with the slight modification in the physical description.
