C16.23.1 Leader and 008 ....................................................................................... 38
C16.23.2 006 Field in LC Integrating Resource Records ........................................ 38
C16.1 GENERAL
These guidelines apply primarily to LC monograph and integrating resource bibliographic records.

See the following sources for information on specific data elements and local fields used in LC serial bibliographic records:

1) CONSER Editing Guide, Section E;
2) ABA Serials: LC Local Fields Used in Serial Bibliographic Records (http://www.loc.gov/staff/lstraining/abawkflow/ser/cat/LocalFields_F.pdf).

Note: These symbols conventionally represent here the following values in MARC 21 content designation:

# = blank space
$ = subfield delimiter

Abbreviations used in this document include:

PCC= Program for Cooperative Cataloging

C16.2 ORDER OF VARIABLE DATA FIELDS

<table>
<thead>
<tr>
<th>Order of Variable Fields in LC ILS Bibliographic Records</th>
</tr>
</thead>
<tbody>
<tr>
<td>★ 906 (Local Processing Data)</td>
</tr>
<tr>
<td>★ 925 (Local Selection Decision)</td>
</tr>
<tr>
<td>★ 955 (Local Functional Identifying Information)</td>
</tr>
<tr>
<td>After 906-925-955, order other variable fields in “century blocks”: 0XX &gt; 1XX &gt; 2XX &gt; 3XX &gt; 4XX &gt; 5XX &gt; 6XX &gt; 7XX &gt; 8XX &gt; other 9XX.</td>
</tr>
<tr>
<td>0XX (Numbers and codes): 010, 040, etc. Generally in tag number order – but not required to resequence if imported records have a different order.</td>
</tr>
<tr>
<td>1XX (Main entry)</td>
</tr>
<tr>
<td>2XX (Title, edition, imprint, etc.): 240, 245, 260, etc. In tag number order</td>
</tr>
<tr>
<td>3XX (Extent, etc.)                                     In tag number order</td>
</tr>
<tr>
<td>4XX (Series statement): 490 generally In order as input</td>
</tr>
<tr>
<td>5XX (Notes) Generally in tag number order – but not required to resequence if imported records have a different order.</td>
</tr>
<tr>
<td>6XX (Subject &amp; genre access fields) Generally predominant subject(s) before secondary ones – not necessarily tag number order – as instructed in Subject Headings Manual H 80 and other documentation</td>
</tr>
</tbody>
</table>
When using an existing bibliographic record to derive a new record for another resource, input or retain only those local fields needed for the resource that the new record represents; delete unwanted local data fields that came from the source copy, as necessary.

When importing records one by one, assess the result of each merger: delete duplicate or wrong local fields inserted by the loading process; add needed local fields that were not provided.  (See DCM B13.11 for more guidelines about mergers using Z-Processor, etc.)

Accept duplicate local fields and similar imperfections that result from batch loading processes, rather than retrieve and evaluate batch loaded records individually.

Note: Some local fields and practices described here have no current use.  They are identified to clarify their presence in LC records, but this does not authorize their further use.

C16.4  249 FIELD: LOCAL VARYING FORM OF TITLE (R) [Limited use]

C16.4.1  Content Designation Summary

Has same indicators and subfields as MARC 21 field 246.

First Indicator – Note Controller/Title Added Entry

0 : Note, no title added entry [Only value used]

Second Indicator – Type of Title

# : No information provided [Only value used]
C16.4.2  **General Description and Instructions**  
Title needed **locally** as an access point, such as a variant used by a vendor. *LC monograph and integrating resource catalogers:* Generally do not change or delete in existing records.

```
249 0# $i ACQUIRE Title: $a Alberta statutes and rules of court judicially considered
```

C16.5  **590: LOCAL NOTE (R)**

C16.5.1  **Content Designation Summary**

*First and Second Indicators*

# : Undefined

*Subfields*

  a : Text of note (NR)

C16.5.2  **General Description and Instructions**

*LC local binding practice:* Record details of local binding in 590 when LC divides a very thick volume into parts before binding (see DCM C6).

```
```

*LC holdings of multipart (Discontinued):* Before October 2012, LC staff input or updated 590 with LC’s local holdings when a copy cataloging record’s contents note included parts not held in LC. After September 2012, those notes are no longer added or updated, although some remain in existing records. (See DCM B13.7.2.1 for further information.)

```
590 ## $a LC has: pts. 1-2, 4-7 only.  
(Added before October 2012 because 505 listed titles of parts 1-7. Do not imitate.)
```

LC records **may** exhibit other, discontinued uses of 590. Leave those as found but do not imitate them.

C16.6  **591: LOCAL WITH NOTE (R)**  

C16.6.1  **Content Designation Summary**

*First and Second Indicators*

# : Undefined

*Subfields*

  a : Text of note (NR)

C16.6.2  **General Description and Instructions**

Local information notes used when LC had different resources **locally** bound together or combined on the same microfilm reel. Has no active uses now in LC. Do not input in new records; generally do not change or delete in existing records.

C16.7  **592: LOCAL ACQUISITION NOTE (R)**
C16.7.1  Content Designation Summary
First and Second Indicators
# : Undefined

Subfields
  a : Text of note (NR)

C16.7.2  General Description and Instructions
Notes with LC local acquisition information or handling instructions. Newer LC records more often use acquisitions module notes, but 592 can still be used.

  592 ## $a Send loose-leaf replacement pages unchecked to ST&B.
  592 ## $a order cancelled; Blackwell's reports this title discontinued.

C16.8  859: LOCAL ELECTRONIC LOCATION AND ACCESS (R)

C16.8.1  Content Designation Summary
Has same indicators and subfields as MARC 21 field 856.

C16.8.2  General Description and Instructions
Electronic location information for a resource not necessarily accessible from LC. Has same information as 856, but does not display in the OPAC. CONSER serial records in the LC ILS and records for some Web resources initiated by LC use 859.

  859 ## $3 The United States, Spain, and the American Frontier: Historias Paralelas. Selections from the Library of Congress Geography and Map Division $u http://hdl.loc.gov/loc.hisp/esphtml.0004 $q u

C16.9  890: LOCAL VISIBLE FILE ENTRY (R) [Limited use]

C16.9.1  Content Designation Summary
First and Second Indicators
# : Undefined

Subfields
  a : Visible file entry (NR)
  i : Control number (R)

C16.9.2  General Description and Instructions
Visible file entry formerly used in LC’s manual Serial Record. Appears in a monograph or integrating resource record when there was a pre-ILS serial check-in record for loose-leaf updates. Generally do not change or delete 890 found in those records.

  890 ## $a Labor law reporter ... $i 66-1961
C16.10  906: LOCAL PROCESSING DATA (NR) [High use]

C16.10.1  General

C16.10.1.1  Content designation summary

First and Second Indicators

# : Undefined

Subfields

a : Distribution controller (NR)
b : Local record completion state (NR)
c : Local processing workflow (NR)
d : Priority (NR)
e : CIP/PCN flag (NR)
f : Century flag (NR)
g : Stakeholder code (NR)

C16.10.1.2  General description and instructions

Data supporting management of bibliographic control and processing of bibliographic records at LC.

906 ## $a 0 $b ibc $c orignew $d 2 $e epcn $f 20 $g y-gencatlg
906 ## $a 7 $b cbc $c copycat $d 2 $e ncip $f 20 $g y-genmusic
906 ## $a 0 $b acq $c acqwork $d u $e ncip $f 20 $g z-acqworks

C16.10.2  Subfields

C16.10.2.1  $a Distribution controller (NR)

Code controlling whether the Cataloging Distribution Service distributes the record outside LC or not.

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Do Not Distribute Record</td>
<td>Used in IBC records and others not being distributed outside LC.</td>
</tr>
<tr>
<td>7</td>
<td>Distribute Record</td>
<td>Used in completed records ready for distribution outside LC.</td>
</tr>
<tr>
<td>p</td>
<td>Never Distribute Record</td>
<td>Used in some classified map records and some visual material records.</td>
</tr>
</tbody>
</table>

C16.10.2.2  $b Local record completion state (NR)

Code indicating (a) the state of the record with respect to whether its cataloging has been completed or not or (b) support of a function other than cataloging.

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>acq</td>
<td>Acquisition Support Record</td>
<td>Record supporting acquisitions but not cataloging or circulation</td>
</tr>
<tr>
<td>bbc</td>
<td>Basic Bibliographic Control</td>
<td>a) Completed less-than-full record for a serial that LC does not retain or retains non-permanently, or</td>
</tr>
</tbody>
</table>
### The LC Local Bibliographic Record and Local Data Fields

#### C16.10.2.3 $c$ Local processing workflow (NR)

Code indicating the "cataloging stream" in which the record was created or that ABA needs to count for statistics.

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>acqwork</strong></td>
<td>Acquisition Processing Stream</td>
</tr>
<tr>
<td><strong>copycat</strong></td>
<td>LC Copy Cataloging Stream</td>
</tr>
<tr>
<td><strong>gpocoop</strong></td>
<td>GPO Cooperative Cataloging Stream (obsolete)</td>
</tr>
</tbody>
</table>

### Former SERLOC record that failed to merge with a serial bibliographic record

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>cbc</strong></td>
<td>Completed Bibliographic Control</td>
</tr>
</tbody>
</table>

- (a) Completed full, core, LC BSR, or minimal level bibliographic record, or
- (b) Completed CIP pre-publication cataloging

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>cbu</strong></td>
<td>Completed Bibliographic Control (Unverified)</td>
</tr>
</tbody>
</table>

Completed record that was “unverified” in MUMS before it migrated to LC ILS – Changed to “cbc” if the record is updated

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>cir</strong></td>
<td>Circulation Support Record</td>
</tr>
</tbody>
</table>

Record supporting circulation but not acquisitions or cataloging

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ibc</strong></td>
<td>Initial Bibliographic Control</td>
</tr>
</tbody>
</table>

Record still in its “initial” state, with all or some of its intended cataloging not yet completed

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>par</strong></td>
<td>Partial Bibliographic Control</td>
</tr>
</tbody>
</table>

Record with some aspect(s) of processing beyond IBC completed, but other aspect(s) not yet completed

**Optionally** used by sections with local determination of what it means – *Examples include but are not limited to:*
- Descriptive work completed but subject work not yet completed
- Cataloging except authority work completed

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>rip</strong></td>
<td>Revised CIP Cataloging/Revised CIP Data</td>
</tr>
</tbody>
</table>

CIP cataloging revised prior to the resource’s publication for which revised CIP data should be sent to the publisher

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>rix</strong></td>
<td>Revised CIP Cataloging/No Revised CIP Data</td>
</tr>
</tbody>
</table>

CIP cataloging revised prior to the resource’s publication for which revised CIP data should not be sent to the publisher

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>vip</strong></td>
<td>CIP Verification in Process</td>
</tr>
</tbody>
</table>

Record with CIP verification in process or being initiated for a resource that has been received – Changed to "cbc" when completed

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>und</strong></td>
<td>Undetermined</td>
</tr>
</tbody>
</table>

---

*Note: The descriptions and codes are based on the information provided in the Descriptive Cataloging Manual.*
<table>
<thead>

C16.10.2.7  $g Stakeholder code (NR)

C16.10.2.7.1 General

Two-part code consisting of a one-letter maintenance prefix separated by a hyphen from an eight-letter stakeholder code.

The maintenance prefix indicates whether or not to do maintenance of the record completely within the LC ILS system (depending on where the “master” record resides).

<table>
<thead>
<tr>
<th>Letter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>n-</td>
<td>Staff do not do maintenance completely within LC ILS, usually because the “master” record is in another system (for example, LC CONSER serials in OCLC) and staff do maintenance there.</td>
</tr>
<tr>
<td>y-</td>
<td>Staff do maintenance completely within LC ILS according to established guidelines.</td>
</tr>
<tr>
<td>z-</td>
<td>Cataloging staff do not do maintenance, because the record supports a function other than cataloging (for example, acquisitions).</td>
</tr>
</tbody>
</table>

Nonroman record maintenance: Follow instructions in DCM M3.3.2.5 for maintaining monograph records with data in nonroman scripts, regardless of whether 906 $g has “n-rlinjack,” “y-rlinjack,” or “y-nonroman” (see C16.10.2.7.3). Nonroman cataloging staff change “n-rlinjack” in 906 $g to “y-rlinjack” if they update the record; other staff do not (see DCM M3.3.2.5).

The eight-letter stakeholder code, indicates the service area that has main responsibility for the bibliographic record.

C16.11 920: LOCAL SELECTION DECISION (NR) [No active use]

### C16.11.1 Content Designation Summary

**First and Second Indicators**

# : Undefined

**Subfields**

- **a**: Selection decision (R)

### C16.11.2 General Description and Instructions

In older records, used (a) for selection information or (b) for note “LC HAS REQ'D # OF SHELF COPIES” as part of processing added copies. No active uses now.

Input selection information in 925 fields in new records. Generally do not change or delete 920 fields found in existing records. Instead of changing selection information in 920, record new or changed selection information in 925. Generally do not create a new 925 for the same selection decision as in an existing 920.

**Examples of former practice (Do not imitate):**

920 ## $a Keep 1
920 ## $a sg18 10-17-94; DO NOT ACQUIRE per Law Library Selection Office; retained for vertical file only 12-13-95
920 ## $a ** LC HAS REQ'D # OF SHELF COPIES **

C16.12 922: LOCAL BOOK SOURCE (NR) [No active use]

### C16.12.1 Content Designation Summary

**First and Second Indicators**

# : Undefined

**Subfields**

- **a**: Book source acquisition information (R)

### C16.12.2 General Description and Instructions

In older records, used for source of material code, other acquisition information, or code “lccopycat” for some former copy cataloging pilots. No active uses now.

Do not input new 922 fields. Generally do not change or delete in existing records.

**Examples of past practice (Do not copy):**

922 ## $a ax [source = Exchange]

C16.14 925: LOCAL SELECTION DECISION (R) [High use]

C16.14.1 General

C16.14.1.1 Content designation summary

First Indicator–Current Decision

0: Current decision
1: Former decision

Second Indicator

#: Undefined

Subfields

a: Selection decision for LC (NR)
b: Number of shelf copies/sets desired (NR)
c: Acquisition conditions (NR)
d: Disposition of unwanted material with outside agency (R)
e: Comment related to selection decision (R)
h: Custodial division (R) (Only in Copyright records)
x: Responsibility for selection decision (NR)
y: Office copy request (R)
z: Reference assignment request (R)

C16.14.1.2 General description and instructions

Information related to selection of the resource for LC use. Mandatory in new bibliographic records that represent published resources, but not in those for resources that are unique, such as manuscripts and rare books. Generally do not create a new 925 for the same selection decision as in 920 already present in a completed record.

Changes in selection information: LC staff most often record changes in selection information by modifying the existing 925 for the current decision. Field 925 is repeatable and the first indicator allows using paired 925 0# and 925 1# for changed decisions; but that is an option sometimes applied in individual cases, not prescribed practice. But see DCM C16.14.3.3.

C16.14.2 Subfields

C16.14.2.1 $a Selection decision for LC (NR)

Mandatory, standard statement of decision to retain or not in LC.

<table>
<thead>
<tr>
<th>acquire</th>
<th>LC retains shelf copies of the resource.</th>
</tr>
</thead>
<tbody>
<tr>
<td>do not acquire</td>
<td>LC does not retain shelf copies of the resource.</td>
</tr>
<tr>
<td>undetermined</td>
<td>LC has not received the resource and it is not possible to make a decision prior to receipt.</td>
</tr>
</tbody>
</table>

925 0# $a acquire $b 2 shelf copies $x policy default
925 0# $a do not acquire $d NLM $x Sel Off
925 0# $a undetermined $x ers beonline+
Note: Records with current “do not acquire” decisions are suppressed from LC’s OPAC and have other properties described in DCM C7.2.1. Changing from “do not acquire” to “acquire” also necessitates “unsuppressing,” adding subfield $b in 925, creating holdings and item records, and other changes for normal processing.

C16.14.2.2 $b Number of shelf copies/sets desired (NR)
Statement of number of copies LC has decided to retain. Mandatory when subfield $a has an “acquire” decision. Absent when subfield $a has “do not acquire” or “undetermined.”

925 0# $a acquire $b 1 shelf copy ...
925 0# $a acquire $b 2 shelf copies ...
925 0# $a acquire $b 3 shelf copies ...

etc.

C16.14.2.3 $c Acquisition conditions (NR)
Statement of any conditions on how a resource may be acquired.

925 0# $a acquire $b 1 shelf copy $c if unable to acquire via copyright, then purchase ...
925 0# $a acquire $b 2 shelf copies $c Copy 2 reported missing in inventory 04-15-1998; do not replace by purchase per HSS (ejj) ...

C16.14.2.4 $d Disposition of unwanted material with outside agency (R)
Identification of an agency outside LC to which resources not wanted in LC are to be sent.

925 0# $a do not acquire $d NAL ...
925 0# $a do not acquire $d NLM ...

C16.14.2.5 $e Comment related to selection decision (R)
Information concerning the selection decision that is not better recorded in another subfield of 925.

925 0# $a acquire $b 1 shelf copy $e changed from do not acquire, 6-23-2004 ...

C16.14.2.6 $x Responsibility for selection decision (NR)
Mandatory statement of who is responsible for making the selection decision recorded in subfield $a (preferably followed by a date).

<table>
<thead>
<tr>
<th>“policy default”</th>
<th>decision is based on general LC policy, not made actively by a selection officer</th>
<th>925 0# $a acquire $b 1 shelf copy $x policy default</th>
</tr>
</thead>
<tbody>
<tr>
<td>initials</td>
<td>selection/recommending officer made or changed decision (see officers’ initials at: <a href="http://www.loc.gov/staff/cpc/recommending.html">www.loc.gov/staff/cpc/recommending.html</a>)</td>
<td>925 0# $a acquire $b 1 shelf copy $x jpm 2005-02-14</td>
</tr>
<tr>
<td></td>
<td></td>
<td>925 0# $a do not acquire $x KCC, 2011-05-10</td>
</tr>
</tbody>
</table>
The LC Local Bibliographic Record and Local Data Fields

“Sel Off”

| selection/recommending officer made or changed decision but initials cannot be recorded for some reason |

| C16.14.2.7 | $y Office copy request (R) |
| Statement alerting staff to assign an extra copy (beyond number of copies retained per subfield $b) to an LC office unit that requested one. (Does not cause acquisition; only indicates desire for an unwanted copy if one is received.) Name requesting unit and requester (preferably followed by a date). |

925 0# $a acquire $b 1 shelf copy $x LS 04-15-99 $y o-APLO, S.Hayduchok, 07-22-99

On request, PSD can input 925 $y in LC ILS for those who cannot do so themselves. Then the next copy is sent to PSD, where staff process it and delete 925 $y.

C16.14.2.8 | $z Reference assignment request (R) |
| Statement alerting staff to assign an extra copy (beyond number of copies retained per subfield $b) to an LC reference collection that requested one. (Does not cause acquisition; only indicates desire for an unwanted copy if one is received. Name requesting reference location and requester (preferably followed by a date)). |

925 0# $a acquire $b 2 shelf copies $x policy default $z r-MRR BIOG, J. Robinson, 07-29-00
925 0# $a acquire $b 1 shelf copy $x policy default $z jr 20020328 reference copy for r-MRR

On request, PSD can input 925 $z in LC ILS for those who cannot do so themselves. Then the next copy is sent to PSD, where staff process it and delete 925 $z. (However, reference staff send an extra copy selected from discards to PSD with a request for processing, without using 925 $z.)

C16.14.3 | Added Service Copy (ASC) Procedures (Keep 1 Copy) |

RO = Recommending Officer
ROI = Recommending Officer’s Initials
SO = Selection Officer
SOI = Selection Officer’s Initials

C16.14.11.1 | Background |
As indicated above, field 925 is the field used to state the selection policy applicable to a particular resource. In June 2014 a change was implemented in the “keep” default for most U.S. monographs received at the Library and assigned to the General Collections. The change was to keep 1 shelf copy instead of 2 shelf copies except for certain exempt classes and categories of materials. This change impacts the use of field 925 in the following ways: 1) to state the selection policy applicable to a resource; 2) to permit recording the preferences of an RO at the pre-publication stage in a CIP record; 3) to record various explicit conditions applicable to the process of discarding ASCs to reflect the new ASC policy (this procedure is called the
“retrospective” (retro) workflow). The present statement records the conventions used to indicate various conditions under the ASC procedures in field 925.

The change to a single-copy policy applies to monographs in the general collections, to those in the custody of the Humanities and Social Sciences Division’s Machine-Readable Collection, and to those in the Law Library.

Note that the following portions of the General Collections are exempt from the single-copy policy for monographs and continue to be handled under a “keep 2 copies” selection practice for American imprints (except for materials that were previously keep 1). These exemptions apply both to new receipts and to retrospective existing titles.

CR: Heraldry
CS71: Genealogy
DU620-629: Hawaii
DU640-647: Northern Mariana Islands and Guam
DU819: American Samoa
E (entire class): U.S. History
F below 1,000: U.S. local history (including Hawaii, Puerto Rico, and the U.S. territories that are classed elsewhere)
F1951-1983: Puerto Rico
F2096: St. Croix (United States Virgin Islands)
F2098: St. John (United States Virgin Islands)
F2105: St. Thomas (United States Virgin Islands)
F2136: United States Virgin Islands
HF: commerce
HG: finance
HJ: public finance
JJ: political institutions and public administration (North America)
JK: political institutions and public administration (United States)
Z (entire class): Bibliography, Library Science, Information Resources (General) Subject encyclopedias and dictionaries
Additionally, all monograph titles that are selected for reference assignments are selected in 2 copies.

The exempt titles in law are mainly in classes KF and KI; they are managed by the USPRLL Law Section.

C16.14.3.2 NEW WORKFLOW (resources being newly received)

C16.14.3.2.1 Non-Exempt title

925 0# $a acquire $b 1 shelf copy $x policy default

This formulation is used in some Voyager templates and in electronic workflows (ECIP; EPCN). For Z-Processor, the software will check the target record for an 050 field, and if one is present will set the 925 subfield $b according to whether the class is non-exempt or exempt. If no 050 is present, subfield $b will be set to “1 shelf copy”.

CR: Heraldry
CS71: Genealogy
DU620-629: Hawaii
DU640-647: Northern Mariana Islands and Guam
DU819: American Samoa
E (entire class): U.S. History
F below 1,000: U.S. local history (including Hawaii, Puerto Rico, and the U.S. territories that are classed elsewhere)
F1951-1983: Puerto Rico
F2096: St. Croix (United States Virgin Islands)
F2098: St. John (United States Virgin Islands)
F2105: St. Thomas (United States Virgin Islands)
F2136: United States Virgin Islands
HF: commerce
HG: finance
HJ: public finance
JJ: political institutions and public administration (North America)
JK: political institutions and public administration (United States)
Z (entire class): Bibliography, Library Science, Information Resources (General) Subject encyclopedias and dictionaries
Additionally, all monograph titles that are selected for reference assignments are selected in 2 copies.

The exempt titles in law are mainly in classes KF and KI; they are managed by the USPRLL Law Section.

C16.14.3.2 NEW WORKFLOW (resources being newly received)

C16.14.3.2.1 Non-Exempt title

925 0# $a acquire $b 1 shelf copy $x policy default

This formulation is used in some Voyager templates and in electronic workflows (ECIP; EPCN). For Z-Processor, the software will check the target record for an 050 field, and if one is present will set the 925 subfield $b according to whether the class is non-exempt or exempt. If no 050 is present, subfield $b will be set to “1 shelf copy”.
Should an SO determine that 2 copies of a non-exempt title should be selected, that decision is justified by the selection officer’s initials and the date:

925 0# $a acquire $b 2 shelf copies $x Sel/rjc 2014-04-21

If any explanation is needed, selectors will use subfield $e (Comments related to sel.).

**C16.14.3.2.2 Recommending Officers Requests**

Once a month, ROs are provided a view of the CIP records created during the previous month, offering them the opportunity to request keeping 2 copies based on content or to request a copy be assigned to a reading room or a reference collection. Designated ROs add these requests in subfield $z of field 925 as follows:

**Request** to keep 2 copies for content:

RO: 925 0# $a acquire $b 1 shelf copy $x policy default $z request keep 2 copies (content), [ROI] 2014-06-18

An SO confirms the request and indicates the confirmation by adjusting the same 925 field with SOI:

925 0# $a acquire $b 2 shelf copies $x Sel/rjc 2014-06-20 $z request keep 2 copies (content), [ROI] 2014-06-18

**Request** to assign copy to a RR or Ref. Coll.:

RO: 925 0# $a acquire $b 1 shelf copy $x policy default $z request assign copy to [RR or Ref. Coll.], [ROI] 2014-06-18

An SO confirms the request and indicates the confirmation by adjusting the same 925 field with SOI:

925 0# $a acquire $b 2 shelf copies $x Sel/rjc 2014-06-20 $z request assign copy to [RR or Ref. Coll.], [ROI] 2014-06-18

In the unlikely event an SO denies an RO’s request, subfield $b remains the same in the 925 field, the SO adds SOI in subfield $x, and an explanation in subfield $e:

925 0# $a acquire $b 1 shelf copy $x [SOI] 2014-06-20 $e [explanation for denial] $z request keep 2 copies (content), [ROI] 2014-06-18

**C16.14.3.2.3 Exempt title**

925 0# $a acquire $b 2 shelf copies $x policy default (ex.)

or

925 0# $a acquire $b 2 shelf copies $x Sel/rjc, 2014-04-21

Exempt titles are based on classification or nature of resource. See DCM C16.14.3.1. Workflows are such that exempt selections can only finally be set once a call number has been assigned. This may be the case when certain software is used.
In other cases, the 925 may need to be adjusted at the time the call number is assigned. In either case if the class is exempt, the 925 reflects this:

925 0# $a acquire $b 2 shelf copies $x policy default (ex.)

There may be times when an SO needs to determine the selection and manually adjust the 925:

925 0# $a acquire $b 2 shelf copies $x Sel/rjc, 2014-04-21

Note the SO’s initials are sufficient justification. Conversely, there are situations when, even though the class is exempt, an SO determines to keep only 1 copy.

925 0# $a acquire $b 1 shelf copy $x Sel/rjc, 2014-04-21

Note again that the SO’s initials are sufficient justification. If any explanation is needed, selectors will use subfield $e (Comments related to sel.) to provide it.

C16.14.3.3 RETROSPECTIVE WORKFLOW (retro)

This is the workflow in which already existing ASCs are assessed and withdrawn according to the guidelines for the retro workflow. An ASC is retained if it is involved in a reference situation, is deacidified, or national holdings are minimal as determined by a search of OCLC. The standard guideline is that if there is an existing 925 field it is modified to show that it is the previous selection policy and a new 925 showing it is the current selection policy is created. If no 925 is present, only a current 925 reflecting the current selection policy is used.

C16.14.3.3.1 Non-exempt title

925 0# $a acquire $b 1 shelf copy $x policy default
925 1# $a acquire $b 2 shelf copies $x policy default
[1 copy is withdrawn; HR and IR set accordingly]

An RO requests to retain in RR or a reference collection:

925 0# $a acquire $b 2 shelf copies $x ROI, 2014-03-10 (ref.)

An RO requests to retain in c-GenColl for content:

925 0# $a acquire $b 2 shelf copies $x ROI, 2014-03-10

An ASC is retained because it has been deacidified:

925 0# $a acquire $b 2 shelf copies $x policy default (deacid.)

In the retro workflow candidates for withdrawal are searched in OCLC and if holdings there are below a certain number, the LC ASC is retained:

925 0# $a acquire $b 2 shelf copies $x policy default (minimal hldgs.)

C16.14.3.3.2 Exempt title
Exempt titles will not be reviewed as part of the retro process.

C16.16.1.2 General description and instructions

Charge statements (see C16.16.1.3) recording information of two kinds:

1) tracking locations of items that are in process (see C16.16.2);
2) identifying completion of specific functional aspects of the cataloging process (see C16.16.5)

For the latter, 955 has subfields $b$-$m$, $t$, and $w$ defined for different stages of the cataloging workflow that have been completed (see C16.16.6). ABA managers derive statistical reports from data in those subfields. Units outside ABA, especially those with incompatible workflows, do not use these subfields.

Although 955 is repeatable, use one 955 for main tracking/identifying information in a record. Input additional, temporary 955 fields for special added copy and added volume tracking procedures (see C16.16.3 and C16.16.4).

C16.16.1.3 Field 955 charge statements

In each 955 charge statement, input the following elements in the following order:

1) four-character alpha/numeric staff or section code;
2) date in form yyyy-mm-dd.

Following those, when appropriate, also input:

3) information about where item was sent and for what action.

ABA staff input different charge statements in separate subfields without semicolons between them. Units outside ABA may input all charges in one 955 $a$ separated by semicolons.

955 ## $b$ jg02 2003-01-08 $c$ jg02 2003-01-08 to subj. $d$ jg16 2003-01-14 $e$ jg08 2003-01-14 to Dewey (Current practice in ABA)

955 ## $a$ kklo 2001-07-18 in p&p; kklo 2001-07-23 to aale; aale 2001-07-30 to p&p storage (Acceptable practice outside ABA)

Input 955 charges in chronological order of processing, not necessarily in alphabetical order by subfield codes.

... $d$ xz05 2005-04-11 $c$ xz07 2005-04-13 ...
(Someone did subject cataloging first; then someone else did descriptive cataloging afterward)
C16.16.2 Tracking Locations of In-Process materials

Location information in a 955 charge represents either:

1) location where an action is done or location which accepts the item in custody—represented by staff/section code at beginning of statement; or
2) location to which an item is sent for custody, assistance, etc.—represented by “to” and destination (for example, “to BCCD”) at the end of the statement.

Input a “to” location when discharging an item from your section and sending it to another unit. It is optional, not mandatory, to track “to” locations between different persons or actions in the same section.

... $e jj93 2005-03-16 to Dewey
(After end-stage processing, someone mandatorily tracked sending item out for Decimal classification)

... $d jj10 2005-02-07 to shelflisting ...
(After subject cataloging, someone optionally tracked submitting item for shelflisting in same section)

... $d zq03 2005-04-06 $e zq99 2005-04-11 to BCCD
(After subject cataloging, someone did not track submitting item for shelflisting in same section. After shelflisting/end-stage processing, someone mandatorily tracked sending item to BCCD)

See DCM B5 Appendix 1 (section B5.6.3.3) about when to charge in-process monographs and integrating resources and who should charge them. See DCM B6 about referring items for cataloging assistance.

Example

955 ## $b zz12 2008-10-18 $i zz03 2008-10-25 to BCCD
(Someone created IBC record. Someone else did whole item cataloging, shelflisting, and end-stage processing and then sent item to BCCD)

C16.16.3 Tracking Added Copies

“Added copy” here is a copy of a resource received after another copy was received for processing (as tracked in the first 955). Track receipt of an added copy in subfield $a in an additional, temporary 955 field with a message about where it is sent, for example:

955 ## ... $c sh27 2004-02-12 ...
955 ## $a pv10 2002-08-03 ADDED COPIES: another copy to [code]

Track completion of added copy processing in 955 $t (see C16.16.6.11) and delete temporary 955 fields for added copies at that time.
C16.16.4  Tracking added volumes

“Added volume” here is part of a resource received after other part(s) were received for processing (as tracked in the first 955). Track receipt of added volumes in subfield $a in additional, temporary 955 fields with messages about where they are sent, for example:

```
955 ## ... $c jf03 2003-11-22 ...
955 ## $a pv11 2004-01-28 ADDED VOLS: v. 2 to [code]
955 ## $a px02 2004-02-04 ADDED VOLS: v. 3 to [code]
```

Track completion of added volume processing in 955 $c and delete temporary 955 fields for added volumes at that time.

```
955 ## ... $c jf03 2005-03-22 $c jf16 2004-03-04 v. 2-3 added
(Temporary 955 fields with “ADDED VOLS:” deleted)
```

C16.16.5  Identifying Functional Aspects of Cataloging

When you complete a cataloging function, input a charge (per C16.16.1.2-C16.16.1.3) in its corresponding 955 subfield (see C16.16.6 about $b-$m, $t, and $w). Input an “umbrella” subfield covering multiple functions (such as subfield $i) when the same person does them all.

```
... $i cc17 2005-01-16 ...
not ... $c cc17 2005-01-16 $d cc17 2005-01-16 ...
(Same person did whole item cataloging, that is, descriptive and subject cataloging)
```

There is no 955 subfield for review during cataloging and there is no requirement to record review in 955. Sections may choose to record reviewers’ identities informally in subfield $a following the work reviewed.

```
... $c zz92 2005-02-14 $a zz90 2005-02-16 (rev.) ...
(Someone did descriptive cataloging; someone reviewed that)
```

Note: Some 955 subfields have context-sensitive definitions and identify different functions in different workflows (for example, CIP versus non-CIP cataloging).

Examples

```
955 ## ... $i sb15 2004-05-14 $e sb21 2004-05-20 ...
(Subfield $i tracks whole item cataloging. Subfield $e here tracks shelflisting and end-stage processing)
```

```
955 ## $a ... $i le03 2002-04-23 $e le02 2002-04-23 ...
$f le28 2003-06-03 to BCCD
(Subfield $i tracks whole item cataloging and subfield $e tracks shelflisting by someone else. Subfield $f tracks CIP verification and CIP verification end-stage processing, followed by routing to BCCD)
```
The LC Local Bibliographic Record and Local Data Fields

C16.16.6 Subfields

C16.16.6.1 $a Tracking information (R)
Used in ABA for location tracking, for messages about processing, or for processing not covered by other 955 subfields. (Before October 2008, also used in ABA for IBC processing, added copies, and Dewey Decimal Classification. Used for functional tracking charges before $b-$m, $t, and $w were defined.)

May be used outside ABA instead of $b-$m, $t, and $w (see C16.16.1.3).

955 ## $b zz17 2008-10-24 $a zz00 2008-10-24
(Subfield $b tracks IBCR processing. Subfield $a tracks the item’s location still in that section)

955 ## $b zz21 2008-11-01 $i zz07 2008-11-05 $a zz01 2008-11-06 (rev.) ...
(Subfield $b tracks IBCR processing. Subfield $i tracks whole item cataloging, and subfield $a tracks someone’s review of the whole item cataloging)

955 ## $a marcadia import ...
(Subfield $a identifies source of cataloging copy)

C16.16.6.2 $b IBC/BBC processing (R)
Tracking for Initial Bibliographic Control (IBC)/Basic Bibliographic Control (BBC) processing by any means, such as creation in LC ILS, derivation from an existing record, adaptation of a vendor record, or import from an external source.

C16.16.6.3 $c Descriptive cataloging (R)
Tracking for descriptive cataloging when only that is done. Also used for added volumes processing and the descriptive aspect of copy cataloging.

C16.16.6.4 $d Subject cataloging (R)
Tracking for subject cataloging, along with shelflisting and end-stage processing done at the same time. Also used for subject cataloging in added volumes processing. Used for Children’s and Young Adults’ Cataloging Program subject cataloging of juvenile materials. Sections may also use 955 $d for the subject aspect of copy cataloging, if they choose.

955 ## ... $c lf06 2001-09-08 $d lf07 2001-10-05 to lb00 $d lb04 2001-11-30 ...
(First subfield $d tracks completion of subject cataloging; second one tracks CYA subject cataloging)

C16.16.6.5 $e Shelflisting and ordinary end-stage processing (R)
Tracking for shelflisting, along with ordinary non-serial end-stage processing, when the person only does those things (that is, not subject cataloging or whole item cataloging at the same time).

Exceptions: Use subfield $f for CIP end-stage processing in CIP verification. Use subfield $g for end-stage processing of serials, in addition to subfield $e if shelflisting is also done.
C16.16.6.6 $f CIP verification (R)
Tracking for verification of bibliographic data in a CIP record after LC receives the published item, along with any end-stage processing done at the same time.

C16.16.6.7 $g Serials end-stage processing (R)
Tracking for end-stage processing of serials in LC workflows. Used in addition to 955 $e if both shelflisting and end-stage processing for the serial are done.

C16.16.6.8 $h Minimal level cataloging (MLC) (R)
Tracking for minimal level cataloging of any kind of resource.

C16.16.6.9 $i Whole item cataloging (R)
Tracking for combination of descriptive and subject cataloging, along with shelflisting or end-stage processing, done by same person at same time. Also used for whole item copy cataloging.

C16.16.6.10 $j-$n [Used only for serials]
Used only for serials. See 955 section of ABA Serials: LC Local Fields Used in Serial Bibliographic Records (http://www.loc.gov/staff/lstraining/abawkflow/ser/cat/LocalFields_F.pdf).

C16.16.6.11 $t Added copy (R)
Tracking for processing done to add a holdings record and item record(s) for another copy to an existing LC record. Not used for added volume processing (which is recorded in subfield $c).

C16.16.6.12 $w Dewey Decimal Classification (R)
Tracking for assignment and inputting of a Dewey Decimal Classification (DDC) number.
C16.17  963: LOCAL RELATED CIP OR PCN DATA (R)

### Content Designation Summary

**First and Second Indicators**

# : Undefined

**Subfields**

- **a**: Publisher contact name/phone (R)
- **b**: Miscellaneous note (R)
- **c**: Congressional loan legend (R)

#### General Description and Instructions

Temporary data used in Cataloging-in-Publication (CIP), Preassigned Card Number (PCN), and International Standard Serial Number (ISSN) records. Subfield $c$ contains information to indicate item is needed on a priority basis by Congress.

For CIP and PCN records, 963 is deleted when 263 (Projected Publication Date) is deleted because published item has been received and cataloging completed.

Roman numeral “II” in 963 $b$ plus note in 952 signals that a cataloger wants to see a CIP item when LC receives it.

963 ## $a$ Frank Calderon, 908-827-2684, Random House

One or more codes indicating content designation checks, data validation, and other enhancements made on a PREMARC record or on specified field(s) in one.

Code appended to a MARC field tag indicates maintenance on that field rather than the entire record. Fourth digit following field tag and preceding code identifies which occurrence of that field got maintenance. (For example, “7002cd” indicates content designation checked in record’s second 700.) Blank spaces separate multiple codes.

C16.21.2  General Description and Instructions

Local location information used to generate LC ILS holdings records.
There are some current uses, such as by Geography and Map Division, reference collections, and LC’s overseas and Copyright offices, and the Digital Collections Management & the Services Division exchange of information with Hathi Trust. Staff involved in these projects have authorization and training to input and change 991. Otherwise, generally do not input 991 in new records and do not change or delete 991 in existing records (usually left over from migration to LC ILS).

</tbody>
</table>
M6.1 SUMMARY

DCM M6 presents LC policies on setting session defaults and preferences in the LC ILS cataloging module. M6.2 provides background. M6.3 indicates settings recommended or required in LC.

DCM M6 supersedes former Bibliographic Workflow Training Document #1.

Note: It is most effective to consult DCM M6 with a cataloging session open and the Session Defaults and Preferences dialog box displayed (see M6.2.2).

M6.2 INTRODUCTION

M6.2.1 Background

Session defaults and preferences are choices for LC ILS cataloging module sessions that are set on individual workstations. They reduce effort and help avoid errors by automatically prompting data, system functions, and other variables that you use most often when you are cataloging.

Security parameters established in your profile by your LC system administrator determine some session defaults. Signing on using your operator ID invokes those.

Use the instructions in M6.2.2 to set other preferences on your workstation. LC policies recommend or require certain settings, as presented in M6.3.

Some defaults and preferences depend on factors in your work assignment, such as the specific cataloging workflow and type of material. Change your settings as necessary to assist you in doing work with different parameters (for example, copy cataloging, added copies, reference materials). It helps to organize your work in order to avoid switching preferences constantly.

Note: The information here is current for in LC. If there has been any further LC ILS system upgrade, consult PSD for advice on changes in recommended cataloging session defaults and preferences.

For more background information on cataloging defaults and preferences, see the Voyager 8.2 Cataloging User’s Guide on the LC Integrated Library System Program’s intranet at www.loc.gov/staff/ils/voy8.2docs/V82_Cataloging.pdf.

M6.2.2 Setting Session Defaults and Preferences

With an LC ILS cataloging module session open, view or change defaults and preferences by selecting “Options / Preferences” from the menu bar. That opens the Session Defaults and Preferences dialog box. Options within the dialog box are organized on different “tabs,” which are accessible by clicking the tab labels at the top.

On each tab, input or change the settings by means of the mechanisms provided: select from a list, click an option so that it is checked or not checked, or input data. Save selections by clicking “OK.” Close the dialog box by clicking “Cancel” if there are no new settings or changes to save or if you do not want to save selections that you made.
Selections are stored when you exit the cataloging module session. Check the preferences on your workstation occasionally, however, to confirm they are what you need for your work, especially if you share the same workstation with other staff members.

### M6.3 RECOMMENDED SETTINGS

<table>
<thead>
<tr>
<th>TAB: Option</th>
<th>Recommended, Required, or Usual</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>GENERAL:</strong> Holdings/Item default location</td>
<td><strong>Most ABA staff:</strong> c-General Collections/CMD</td>
<td>Select the location that holdings and item records you create are most likely to use. <strong>Select a location other than GenColl if your work usually serves that location</strong> (for example, “c-Law Library” for a law cataloger).</td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Call Number Hierarchies</td>
<td><strong>Most ABA staff (work with full LC classification call numbers):</strong> LCclass-050a&amp;b</td>
<td>Select the hierarchy for the kind of call number most likely present in your work. This is necessary for the LC ILS to copy call number data from the bibliographic record into a holdings record’s 852 field.</td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Bibliographic Import/Replace Profile</td>
<td><strong>Most often:</strong> LCCNadd or LCCNmerge (Both now have the same result.)</td>
<td>Only in special workflows: Special materials workflow for which the profile was designed: smcdONLYmerge CIP verification workflow using “Z-Processor CIP Ver version” to search OCLC and import upgraded CIP records: CIP Ver Replace When using Transliterator (reset to LCCNadd when finished): CIP Ver Replace</td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Authority Import/Replace Profile</td>
<td><strong>Required always:</strong> ARLCCNadd</td>
<td></td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Delete records from work files once saved to database</td>
<td><strong>Required always:</strong> <strong>Checked</strong></td>
<td></td>
</tr>
<tr>
<td>TAB: Option</td>
<td>Recommended, Required, or Usual</td>
<td>Additional Information</td>
</tr>
<tr>
<td>-------------</td>
<td>-----------------------------------</td>
<td>------------------------</td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Delete records from import file once saved to database</td>
<td><strong>Required always: Checked</strong></td>
<td></td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Add a subfield ‘a’ to a new field</td>
<td>Your individual preference</td>
<td>Note: Setting chosen affects results of some macros.</td>
</tr>
<tr>
<td><strong>GENERAL:</strong> Display MARC Views maximized</td>
<td>Your individual preference</td>
<td></td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> Cataloging formats</td>
<td><strong>Required always: UnicodeLCMARC21</strong></td>
<td>“UnicodeLCMARC21” assures only valid MARC 21 tags, indicators, and subfields are saved to the database.</td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> Bypass MARC Validation</td>
<td>Usually: <strong>Not checked</strong></td>
<td>Exception: Change the preference to “checked” and thereby bypass MARC validation only when you cannot save a record because of a MARC validation problem, you cannot resolve the problem without assistance, and that assistance is not immediately available. After you save the problem record, reset the preference right away to “not checked.”</td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> Bypass MARC21 Character set validation</td>
<td><strong>Required always: Not checked</strong></td>
<td>“Not checked” assures only MARC 21 Unicode characters are saved to the database and invalid characters generate error messages.</td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> List all the errors / Show errors one at a time</td>
<td>Your individual preference</td>
<td></td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> Bypass Authority Control Validation</td>
<td><strong>Only creating IBCRs, shelflisting, end-stage processing: Checked</strong> <strong>Otherwise: Not checked</strong></td>
<td></td>
</tr>
<tr>
<td><strong>VALIDATION:</strong> Display All The Headings</td>
<td><strong>Recommended: Checked</strong></td>
<td>“Checked” causes the LC ILS authority validation window to display authority records that the system validated as well as those it did not, thereby making access to the authority records easier.</td>
</tr>
<tr>
<td>TAB: Option</td>
<td>Recommended, Required, or Usual</td>
<td>Additional Information</td>
</tr>
<tr>
<td>-------------</td>
<td>---------------------------------</td>
<td>------------------------</td>
</tr>
</tbody>
</table>
| **VALIDATION:** Heading Types | **Recommended:**
*Check all the heading types* | Exception: Staff who do not review subject access points may leave “Subdivision” **not** checked. |
| **VALIDATION:** Bypass Decomposition of accented characters for MARC21 | **Required always:** **Not checked** | “Not checked” causes the LC ILS to convert any **pre-composed** Unicode “letter + diacritic” combination (introduced, for example, by copying text from a Web page) into the **decomposed** form, that is, letter followed by combining diacritic, which MARC 21 requires. |
| **VALIDATION:** 856 link servers | [Do not input & do not change] | |
| **VALIDATION:** Bypass ISSN validation | [Leave blank] | Get more reliable ISSN validation by applying Validator (see DCM M7). |
| **WORK FLOW:** Retain last search | Your individual preference | Note: “Checked” is useful when doing a sequence of searches of the same kind. |
| **WORK FLOW:** Automatic truncation for non keyword searches | Your individual preference | |
| **WORK FLOW:** Display record directly if search results in only one title | Your individual preference | |
| **WORK FLOW:** Always create a holding when adding holdings to a bib (i.e., do not show existing holdings first) | *Creating IBC records:* **Checked**
*Otherwise:* **Not checked** | |
<p>| <strong>WORK FLOW:</strong> Display item record directly if item retrieve results in only one item | Your individual preference | |</p>
<table>
<thead>
<tr>
<th>TAB: Option</th>
<th>Recommended, Required, or Usual</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>WORK FLOW: Sequence new items at top</td>
<td>Recommended: <strong>Not checked</strong></td>
<td>Reminder: Put any incorrectly sequenced item records into correct order by clicking “Get Items” from the holdings record display and using “Move before” and “Move after.”</td>
</tr>
<tr>
<td>WORK FLOW: Sequence new e-items at top</td>
<td>[Disregard]</td>
<td></td>
</tr>
<tr>
<td>WORK FLOW: Check for Duplicate Item Barcodes</td>
<td>Required always: <strong>Checked</strong></td>
<td></td>
</tr>
<tr>
<td>WORK FLOW: Suppress confirmation message upon successful save</td>
<td>Recommended: <strong>Not checked</strong></td>
<td><strong>Not</strong> suppressing confirmation messages lets you know with certainty whether your record was saved to the database and therefore reduces additional, unnecessary “save” actions “just to be sure.”</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Item Type</td>
<td>Recommended: <strong>Type of item most likely in your work</strong></td>
<td>Select the type of item you are most likely to process, depending on your work assignment.</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Status</td>
<td>Usually: <strong>In Process</strong></td>
<td></td>
</tr>
<tr>
<td>ITEM DEFAULTS: Copy</td>
<td>Recommended: 0</td>
<td>Change number manually in item records when you know which copy you are processing.</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Pieces</td>
<td>Recommended: 1</td>
<td>Change number manually in item records when necessary.</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Self Check: Magnetic Media</td>
<td>Recommended: <strong>Not Checked</strong></td>
<td>LC currently does not use</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Self Check: Sensitize</td>
<td>Recommended: <strong>Checked</strong></td>
<td>“Sensitize” should be checked in new item records.</td>
</tr>
<tr>
<td>ITEM DEFAULTS: Other Options</td>
<td>[Leave blank or do not change]</td>
<td></td>
</tr>
<tr>
<td>TAB: Option</td>
<td>Recommended, Required, or Usual</td>
<td>Additional Information</td>
</tr>
<tr>
<td>------------</td>
<td>---------------------------------</td>
<td>------------------------</td>
</tr>
</tbody>
</table>
| FOLDERS/FILES: Templates | **Recommended:**  
Specify **Hldg** template:  
C:\Program Files(x86)\Endeavor\Voyager\Voyager\templates\Voyager\Original Defaults\Hold.tem  
*Do not specify Bib and Auth templates* | For each type of record, you can only specify one template to be used when you create a new record. That is only practical if you always use the same template for that type of record (usual for Hldg, unusual for Bib and Auth). |
| FOLDERS/FILES: Folders | **Recommended:**  
Specify **Template folder:**  
C:\Program Files(x86)\Endeavor\Voyager\VoyagerTemplates  
*Leave Work and Import folder options blank* | Reminder: Generally, do not specify or use special work folders in the LC ILS; let the LC ILS use its default work folder during addition of new records or modification of existing ones. Using work folders other than the default risks accidental errors. Do not use an import folder as a work folder in the LC ILS. |
| FOLDERS/FILES: Work Files | [Disregard and leave blank] | Reminder: Do not use work files in the LC ILS. |
| FOLDERS/FILES: Save to Local File | [Disregard and do not change] | |
| MAPPING: Expected Character Set of Imported Records/Local Import | Default (including with Z-Processors or OCLC Serial Preprocessor):  
MARC21 UTF-8  
*Switch settings to use Z-Client.*
Using Z-Client (MBRS, Music):  
MARC21 MARC-8 (non-Unicode) | |
<p>| MAPPING: MARC Mapping for OCR Data | [Disregard and do not change] | |
| COLORS/Fonts: Mark Views (variable fields): Bibliographic | Your individual preference | Preset: White background |
| COLORS/Fonts: Mark Views (variable fields): Holdings | Your individual preference | Preset: Blue background |</p>
<table>
<thead>

</table>
024 Other Standard Identifier

General

Do not add field 024 to an authority record. As of September 2018, there is a moratorium on adding this field in authority records (see http://www.loc.gov/aba/pcc/naco/documents/024-moratorium.pdf). An announcement will be made when catalogers may use this field again.

Maintenance:

LC/PCC catalogers are not required to maintain identifiers coded in the 024 field of NACO authority records. When an 024 field is present in a personal name record that is being reported for deletion (for example, in the case of a duplicate), LC/PCC catalogers should transfer the field to the record that is to be retained. When two personal name authority records are being collapsed into one, and each record has a different 024 field, LC/PCC catalogers should include both 024 fields in the updated record.
5XX  See Also From Tracings – General Information

General

When otherwise modifying a NAR that contain codes that are no longer used such as subfield $w position zero (0) code “d” or “f,” LC/PCC catalogers should upgrade the NAR to RDA.

LC/PCC catalogers applying RDA instructions may use subfield $i in conjunction with subfield $w code “r” for relationship designators. When applying RDA relationship designators in 5XXs, supply terms from Appendix I, J or K; capitalize the initial letter of the term and follow the term with a colon.

For information on the use of relationship designators and/or $w codes in a specific 5XX field, see the specific DCM Z1 section for that field.

Subfield $w – Control subfield

Follow the conventions in the authority format for use of subfield $w. Do not supply subfield $w unless a value other than “n” would be appropriate in one of the positions. When supplying subfield $w, give it as the first subfield in the field. Supply character positions preceding, but not succeeding, the value, e.g.,

$w a = to indicate a reference from an earlier authorized access point
$w b = to indicate a reference from a later authorized access point
$w r = to indicate that a subfield $i or subfield $2 is used to denote relationship information
$w nnn = to indicate a see also reference for multiple pseudonyms (record also contains a 663 field)

NARs

A see also reference tracing (5XX) must not normalize to the same as another see also reference in the same authority record, unless both 5XX fields contain a relationship designator in subfield $i, and the texts of the relationship designators are different.

SARs

LC series practice: As of June 1, 2006, LC does not create or update SARs.

PCC series practice: Transcription of the series statement is mandatory if applicable. Searching for series authority records, tracing the series, and the creation and maintenance of series authority records are optional.
