13.3. ANALYSIS OF MONOGRAPHIC SERIES AND MULTIPART MONOGRAPHS.

LC practice:

On June 1, 2006, LC announced a change in policy applying to all bibliographic resources (monographs, serials, and integrating resources) in series. LC now analyzes and classifies separately all parts of monographic series and of multipart monographs with the exception of those categories listed at the end of this LCRI. As of the same date, LC does not give “controlled” access points for series in new LC original cataloging (CIP and non-CIP) bibliographic records, does not update series access points in existing bibliographic records, and does not consult, make, or update series authority records. (Exception for consulting SARs: see LCRI 25.5B for determining “conflict.”) LC will “pass through” the series information already in bibliographic records used by LC as copy (CIP/LC partner records, PCC records, and non-PCC (including Casalini) records).

PCC practice:

Transcription of the series statement is mandatory if applicable. Searching for series authority records, tracing the series, and the creation and maintenance of series authority records are optional.

Monographic Series

When a publication in a monographic series that is analyzed in full lacks a title other than that of the comprehensive title or has a title that is dependent on the comprehensive title, prepare a separate bibliographic record for that part, regardless of whether the part is numbered or not. Apply the following when preparing the record.

- 1) Transcribe the comprehensive title as the common title of the analytic.
- 2) If there is numbering only, transcribe the numbering as the section title; if there is numbering and also a dependent title, transcribe the numbering as enumeration (cf. 12.1B6) and the dependent title as the section title; if there is a dependent title but no numbering, transcribe the dependent title as the section title.
- 3) Do not formulate a series statement for the analytic record.

Multipart Monographs

- 1) *Classified separately.* When a part of a multipart monograph that is classified separately lacks a title other than that of the comprehensive title or has a title that is dependent on the

comprehensive title, prepare a separate bibliographic record for that part, regardless of whether the part is numbered or not. Apply the following when preparing the record:

a) Transcribe the comprehensive title as the common title of the analytic.

b) If there is numbering only, transcribe the numbering as the section title; if there is numbering and also a dependent title, transcribe the numbering as enumeration or alphabetic designation and the dependent title as the section title; if there is a dependent title but no numbering, transcribe the dependent title as the section title.

c) Do not formulate a series statement for the analytic record.

245 10 \$a Recent trends in elementary education. \$n

(1) *Mixture of independent and dependent titles.* If a multipart monograph consists of parts whose individual titles are a mixture, i.e., some are independent of the comprehensive title and some are dependent on it, give a regular series statement in the records of the analytics with *independent* titles.

For the analytics with *dependent* titles, use the technique described in 1) above, i.e., do not give a series statement on the record for the analytic.

21.3B. CHANGES OF PERSONS OR BODIES RESPONSIBLE FOR A WORK. SERIALS AND INTEGRATING RESOURCES.

Remote Access Electronic Resources

Original URI (Uniform Resource Identifier) is still active but the original resource is no longer available. If the resource located at the URI represents a completely different resource from that described in the bibliographic record (i.e., for an integrating resource, not just a subsequent iteration of that resource), make a new entry for the new resource now at the original URI. *LC practice:* See LCRI 9.7B for guidelines about updating the bibliographic record for the original resource.

Serials

LC/PCC practice: Listed below are other conditions for making a new entry for a serial.

1) The title of a serial used as the uniform title heading on an entry for a translation changes.

```
130 0# $a Inzhenernyĭ zhurnal. Mekhanika tverdogo tela.
    $l English.
```

```
245 10 $a Mechanics of solids.
```

```
130 0# $a Izvestiia. Mekhanika tverdogo tela. $l English.
```

```
245 10 $a Mechanics of solids.
```

2) The physical medium in which the serial is issued changes as expressed in the specific material designation in the physical description area (not a reproduction or the same serial in another manifestation, e.g., a braille edition). Such a change could be from paper to microfiche, from paper to online, etc.

```
245 00 $a New Zealand national bibliography.
    (Issued only in paper copy through Nov. 1983)
```

```
130 0# $a New Zealand national bibliography (Microfiche)
```

```
245 00 $a New Zealand national bibliography.
    (Issued Dec. 1983- only in microfiche; not a microfiche
    edition of paper copy issues)
```

However, if the option to provide a term in common usage for the specific material designation has been used in the description, do not make a new entry if the change is between terms in common usage that can both be categorized by a more general term in the specific material designation. For example, if the common term “CD-ROMs” was used in the original description and the format changes to DVD-ROMs, do not create a new entry (both carriers would have the same designation “computer optical disc” if the option at 9.5B1 were not followed).

21.3B

245 00 \$a AIAA meeting papers on disc \$h [electronic resource].
300 ## \$a computer optical discs ; \$c 4 3/4 in.
500 ## \$a On CD-ROMs, 1996-2007; on DVD-ROMs, 2008-

3) The edition statement changes (see rule 12.1F1) and the change indicates a change in subject matter or a change in physical medium.

Integrating Resources

LC/PCC practice:

Updating loose-leafs. If the edition statement changes and/or if the publisher issues a new base volume or volumes, apply the following guidelines:

1) Do not make a new entry for a gradual replacement edition (i.e., the author or publisher considers the publication to be a new edition and issues a replacement title page with a new edition statement but does not issue a new base volume); update the information in the edition area and give a note about the change in the edition statement (see LCRI 12.7B9.2).

2) Generally, do not consider the following to be a new resource: a new base volume with pages having various dates in the header/footer, etc., or having other indications that the same or a different publisher has just reissued the content of an existing resource as of its latest iteration. If the resource is not yet represented in the catalog, include a "Description based on" note to clarify that the iteration being cataloged is not the first iteration of a new resource. If the edition statement changed, give a note about the new edition statement (see rule 12.7B9.2).

3) Generally, consider the following to be a new resource: a new base volume having a new date in the header/footer, etc., that is consistent throughout the base volume. If both resources lack edition statements and the main entry/title proper of the two resources are the same, in the new record supply in brackets an edition statement (e.g., using the year of publication, distribution, etc.: "[2003 ed.]") (see rule 1.2B4).

4) Generally, consider the following to be a new resource: a new base volume having pages with no revision dates but the pages in the original base volume had revision dates.

5) In case of doubt, make a new record.

Updating remote access electronic resources: If the edition statement changes (rule 12.1F1), make a new entry only if the resource described in the existing record continues to exist as a resource separate from the new resource to be cataloged.

22.18A. FULLER FORMS.

For names that conflict, see 22.17-22.20.

For references, apply the provisions of LCRI 26.

Apply the optional provision. This means adding within parentheses the full form of an initial or abbreviation used in the heading when the full form is known with certainty. (In some cases of doubt, do not add the full form.) Do not search solely to discover this information if there is no conflict.

When adding the full form, observe the following guidelines:

1) If the initial occurs in the forename portion of the surname-forename heading, give in the parenthetical addition not only the full form but also the other forenames that appear in the forename portion of the heading. However, do not include a particle or prefix that appears in the forename portion. Place the parenthetical addition directly after the forename portion and before any other addition (e.g., date, title).

100 1# \$a Bvindi, Francis A. A. L. \$q (Francis A. A.

2) If the initial occurs in the name entered as a given name, etc., give in the parenthetical addition all the names that appear in the heading. Place the parenthetical addition directly after the given name and before any other addition (e.g., date, title).

100 1# \$a A. Samad Said \$q (Abdul Samad Said), \$d 1935-

100 1# \$a M. Alicia \$q (Mary Alicia), \$c Sister, S.C.N.

3) For names that are represented in the heading by an abbreviation rather than an initial (cf. LCRI 22.1B), give in the parenthetical addition the full name for the particular person.

22.18A

100 1# \$a Brownridge, Wm. \$q (William)
100 1# \$a Fdez.-Rivera García, Manuel \$q (Fernández-

Exceptions

1) Do not apply 22.18A to a name in which the letters of the forename initials used in the heading differ from the letters used in the full forename.

100 1# \$a Reḍḍi, Vai. Si. Vi., \$d 1926-

100 1# \$a Ajgaonkar, G. F.
not 100 1# \$a Ajgaonkar, G. F. \$q (Gundu Phatu)

2) Do not apply 22.18A to a heading for a married woman that consists of her husband's surname and initial(s).

100 1# \$a Renfro, Roy E., \$c Mrs.
400 1# \$a Renfro, Helen Kay
not 100 1# \$a Renfro, Roy E. \$q (Roy Edward), \$c Mrs.

3) Do not add the fuller form to an existing heading falling into either of the following categories:

a) The name authority record for it has already been coded "AACR 2" or "AACR 2 compatible" (including in either case those labeled "preliminary"—008 byte 33 = d).

In August 2007, the policies on “AACR2 compatible” headings were relaxed by introducing guidelines permitting the revision of “AACR2 compatible” headings but requiring the revision under certain circumstances. See LCRI 22.1 for additional details.

b) The heading is represented by an access point on an existing bibliographic record in the catalog (i.e., the file against which the cataloging and searching is done) and is otherwise in accord with current policy.

26.2. NAMES OF PERSONS.

Preliminary Note

These guidelines are applicable primarily when establishing headings initially.

Recording Variant Forms of Name

Record all forms of name found on the chief source of the work being cataloged (including CIP title pages). For forms of name that are not on the chief source but that are found in the normal course of examining the work, be selective: record only those forms that are judged to add important information identifying the author (most commonly, a fuller form of name) or to justify tracing a needed reference. In particular, do not record a form that consists of a surname alone when that form is a variant. References are traced only from recorded forms. See the guidelines below when deciding which recorded forms require references.

Referring from Variant Forms

1) Normally, do not trace a reference from the old catalog heading. However, if judged useful by the cataloger or for specified projects, a linking reference may be made. If the form of the resulting reference (i.e., the way it is structured, *not* its degree of fullness) is not in accord with current policy, code it "do not make" and trace another reference constructed according to current policy.

2) Trace a reference from each variant that affects the primary elements of the name. For the normal, inverted heading this means variations in all elements to the left of the comma and in the first element to the right of the comma. Do not trace a reference that would normalize to the same form as the heading or a see reference on the same record, or to the same form as a heading on another record.

3) Refer from other variants (i.e., those that do not affect the primary entry elements) when it is judged the access to the catalog would be improved, e.g., when the heading is a common-sounding name.

4) Make one reference from each possible entry element of the name chosen as the heading, including each *separate* particle or prefix but excluding connectives such as "y" and "und." (In this connection, ignore the "Bure" example in AACR2 rule 26.2A3; this is based on actual usage, not an arbitrary permutation of the heading.)

5) Generally, make only one reference from each variant in each script, normally constructing it in the form in which it would be constructed if chosen as the heading (cf. specific instructions in LCRI 26.1, including the exception for nonroman script references). In addition, if applicable, make *one* reference under each surname element, other than particles and prefixes, not already referred from. Normally, do not otherwise make references that are "variants of the variant," except for variants of nonroman references judged useful by the cataloger (e.g., to provide traditional vs. simplified Chinese characters, fuller forms of initials).

26.2

6) In constructing references, prefer forms corresponding to usage over forms corresponding to qualifiers (*cf.* the last example below).

Follow these principles when creating new headings, and follow them, also, as closely as possible when evaluating references on existing authority records and when creating automated authority records for headings found in the machine files (or in the manual catalog, if this has been consulted). For already evaluated reference structures, generally, allow the references to stand that are not provided for in these instructions.
