Here are entered works on the study or science of codfish (Gadidae) and its relationships, especially as it develops from an individual's prolonged exposure to a person with alcoholism, chemical dependency, or drug dependence. Along with neglect of the self, preoccupation with or dependence on the person, a person with alcoholism, chemical dependency, or drug dependence develops from an individual's prolonged exposure to a person with alcoholism, chemical dependency, or drug dependence.

Madeline was a part of the Codfish family, and despite any neglect of the self, she found solace in her faith and the company of her friends. Codfish and their families are often portrayed as having strong bonds and a sense of community.
