Pattern Headings: Diseases  H 1150

PATTERNS:  Cancer; Tuberculosis

TYPES OF HEADINGS COVERED BY THE PATTERN:  Headsings for individual or types of diseases and other medical conditions, including abnormalities, functional disorders, mental disorders, manifestations of disease, and wounds and injuries.  The category includes animal as well as human diseases but does not cover plant diseases.  Examples:  Bronchitis; Burns and scalds; Cleft palate; Down syndrome; Equine herpesvirus diseases; Fever in children; Gastrointestinal system-Motility-Disorders; Pain; Rabies; Sleep disorders; Schizophrenia; Sports injuries; Tuberculosis in poultry; Virus diseases.  Also included are headings for parts of the body divided by subdivisions for diseases, injuries, or other pathological conditions from the pattern list for organs and regions of the body (H 1164), for example,  Brain-Abscess; Breast-Cancer; Duodenum-Ulcers; Face-Abnormalities; Liver-Diseases; Skin-Infections; Spine-Wounds and injuries; and headings for chemical substances subdivided by -Metabolism-Disorders, for example,  Calcium-Metabolism-Disorders;  Proteins-Metabolism-Disorders.  Not covered are headings for medical or surgical procedures and the general heading Diseases.

CONFLICTS:  Any subdivision listed here can be used as a free-floating subdivision under any heading belonging to the category if it is appropriate and no conflict exists in the subject authority file.  Subject authority records may exist for headings employing variant phrases or subdivisions equivalent to subdivisions on this list.

LC practice:
If an exceptional variant form is to be retained, make a UF reference from the equivalent free-floating subdivision form following the procedures in H 195 if the reference does not yet exist.  Otherwise, submit a proposal to change the variant form along with all bibliographic records requiring correction following the procedures in H 193.

Note:  Most form subdivisions coded $v in this list may also be used as topical subdivisions coded $x when assigned to works about the form (see H 1075, sec. 1.d.).

NOTES

1Not established under Cancer or Tuberculosis. Use under other diseases and conditions as appropriate, for example, Backache–Chiropractic treatment.

2Further subdivide the subdivisions –Complications, –Relapse, –Surgery–Complications, and –vaccination–Complications by other subdivisions from this list as appropriate.

3Do not use –Cryosurgery, –Cytopathology, –Endoscopic surgery, –Imaging, –Interventional radiology, –Laser surgery, –Magnetic resonance imaging, –Pathophysiology, –Radionuclide imaging, –Reoperation, –Spectroscopic imaging, –Surgery, –Tomography, or –Ultrasound imaging under headings of the type [part of the body]–Diseases. Instead assign [part of the body]–Cryosurgery, [part of the body]–Pathophysiology, [part of the body]–Surgery; etc. (cf. H 1164).

4See H 1154.5 for further subdivisions used under legal topics.

5Use the heading [disease]–Mortality instead of [disease]–Patients–Mortality.

6Not established under Cancer; use Carcinogenesis instead.

7Do not use –Patients under headings for chronic or disabling conditions for which separate headings for the afflicted persons have been established, for example, use Blind [not Blindness–Patients]; Chronically ill [not Chronic diseases–Patients]; Deaf [not Deafness–Patients]; Mentally ill [not Mental illness–Patients].
See H 1100 for further subdivisions used under classes of persons.

8Use the heading [disease]–Psychological aspects instead of [disease]–Patients–Psychology. Do not use the subdivision –Psychological aspects under headings for psychological conditions or psychoses (e.g., Manic-depressive illness).
