

Strikes and Lockouts H 2100

1. Subdividing the heading *Strikes and lockouts*. When subdividing the heading **Strikes and lockouts**, use established names of industries rather than groups of employees as subdivisions. Establish each such usage in the subject authority file; add a 450 field reference of the type [*heading for industry*]-**Strikes and lockouts**; add no 550 fields. Provide for geographic subdivision in each case by selecting the **May Subd Geog** radio button in the Subject Heading Proposal System template. *Example:*

```
150 ## $a Strikes and lockouts $x Banks and banking
450 ## $a Banks and banking $x Strikes and lockouts
```

```
[not 150 ## $a Strikes and lockouts $x Bank employees
450 ## $a Bank employees $x Strikes and lockouts]
```

Some older headings established in LCSH do not conform to the policy of using the established name of the industry. Continue to use the headings. *Example:*

```
150 ## $a Strikes and lockouts $x Automobile industry
450 ## $a Automobile industry and trade $x Strikes and lockouts
```

If a heading has already been established using a group of employees as a subdivision, continue to use the heading. If two headings have been established for the same topic, one subdivided by the name of the industry and the other by the group of employees, cancel the latter heading and use only the former.

2. Establishing headings for individually named strikes.

a. Strikes not limited to a single employer or firm and not limited to a single city or U.S. county. Construct the heading as follows:

```
150 ## $a [generally accepted name or designation in
English], [place], [year(s)]
```

For [*place*], use the name of the country, except in the case of a strike limited to a province of Canada, a constituent country of Great Britain, or a state of the United States.

2. Establishing headings for individually named strikes.

a. Strikes not limited to a single employer or firm and not limited to a single city or U.S. county. (Continued)

Add a 550 (broader term) field from the heading **Strikes and lockouts**–[*name of industry*]– [*country (or first order division, when appropriate)*]. For general strikes, add the 550 field from the heading **General strikes**–[*place*]. *Examples:*

```
150 ## $a Coal Strike, U.S., 1977-1978
550 ## $w g $a Strikes and lockouts $x Coal mining
      $z United States

150 ## $a Coal Strike, Colo., 1913-1914

550 ## $w g $a General strikes $z Sri Lanka
```

b. Strikes not limited to a single employer or firm but limited to a single city or U.S. county. Construct the heading as follows:

```
150 ## $a [generally accepted name or designation in
          English], [city (or U.S. county), larger
          jurisdiction], [year(s)]
```

Note: Former LC practice was to establish strikes of this type as subdivisions under the city or county.

e. Strikes against an educational institution. Establish strikes by employees against an educational institution according to the instructions in sec. 2.c. or 2.d., above, depending upon whether the educational institution is in a single city. For student strikes against an educational institution, subdivide the name heading for the institution by the free-floating topical subdivision –**Student strike, [date]** (cf. H 1151).
