

Revision to LC-PCC PS 10.0 for the establishment of family names in the LC/NACO Authority File:

LC-PCC PS 10.0

Marked up revision:

LC practice/PCC practice: Apply this chapter for distinctive family entities.

For subject cataloging policy, the authorized access point for family name authority record may now be used as a subject access point in addition to a subject access point for general family groupings. See the instructions in the *Subject Headings Manual* (SHM) instruction sheets H 1631 Genealogy and Family Names and H 1631.5 Family Names: Headings and References. Separate authority records will exist in the Library of Congress/NACO Authority File and the Library of Congress Subject Headings file.

EXAMPLE

RDA access point in bibl. record when a family is the creator

100 3# \$a Smythe (Family : \$d 1745-1995 : \$c Providence, R.I.)

Subject headings in bibl. record when a family is the subject of a resource

600 30 \$a Smith family.

600 30 \$a Smythe (Family : \$d 1745-1995 : \$c Providence, R.I.)

To allow this change in practice, code the 008/11 (Subj) "a"; 008/15 (Subj use) "a"; and do not provide a 667 SUBJECT USAGE note in the name authority record.

Modify existing name authority records for a specific family when using them as a subject access point for current cataloging or updates are otherwise needed.

- 008/11 (Subj) "n" to "a"
- 008/15 (Subj use) "b" to "a"
- delete the 667 SUBJECT USAGE note

Clean copy of revision:
