Romanization System

The modified Hepburn system of romanization as employed in *Kenkyusha's New Japanese-English Dictionary* (4th edition) is used. For the syllabic nasal, *n* is always used preceding *b*, *m*, and *p*. Romanization for words of foreign (i.e., non-Japanese) origin follows the American National Standard system for the romanization of Japanese, e.g., ベトナム(Betonamu); ヴェトナム(Vetonamu).

Word Reading

The reading of Japanese words follows standard Japanese language usage, insofar as this can be determined from standard Japanese dictionaries. A current modern reading is preferred to an obsolete one, except where the usage of standard authorities has established a particular reading for a particular name or book title. The characters 日本 are romanized as *Nihon* unless the usage of standard authorities has established a particular reading; e.g., Dai *Nippon* Teikoku, *Nippon*'ichi, *Nippon* eitaigura, etc. If there are various readings, the reading that appears most frequently in dictionaries is used first (245 field) and it is possible to provide another reading in a 246 3- field.
