							H		h†

---

\*Character used in the Nunavik region of Québec.

†Character used in the territory of Nunavut.

## Inuktitut Romanization Table 2007 version

## Notes

1. A long vowel is represented in syllabics by a superscript dot, in romanization by doubling the letter (for example, *naaniit* ᓂᓇᐃᑦ; *Kuujjuaq* ຄູັຈູາᖑ).
  2. A circle over a character in the second column converts the vowel from *i* to *aai* (for example, *Aaisaak* ሃଆକ).
