CDS Announcement

Undistributed Bibliographic Records

CDS recently encountered a problem in the distribution of some bibliographic records (See April 4, 2014 notice at <http://www.loc.gov/cds/notices/140404.pdf>). The problem has been corrected.

The records which previously failed distribution processing have been collected and are now being distributed. The approximately 10,000 records, from the mid-March/early April timeframe, are contained in the daily books file for June 12, 2014 and will be in the MDS weekly bibliographic distribution issues (books, computer files, maps, music, visual materials) for June 17, 2014.

MDS Serial records were distributed separately and are not included. CDS regrets the delay in distribution of these records.
