allow those on the waiting list an  
opportunity to register.

### FEDLINK Orientation to Federal Libraries and Information Centers Series: National Library of Education

The National Library of Education is the federal government's center of expertise for education information. Created in 1867 and named a national library in 1994, the library includes historical and contemporary collections to support the research and policy work of Department of Education. A part of the department's Institute of Education Sciences, the library focuses on evidence-based research in education. Library staff also participates in supporting the ERIC (Education Resources Information Center) database.

To celebrate  
National Library  
Week this year, the  
National Library of  
Education invites  
other federal  
librarians to tour  
their facility and see  
the new compact

shelving in the closed stacks area. Included in the visit will be a presentation on the lives of the first education commissioners and their participation in librarianship and libraries between 1838 and 1906. Additionally, the library staff will share innovations in customer service that led FEDLINK to name the National Library of Education the Large Federal Library of the Year in 2016.
