Recording Laboratory AFS L22

Songs of the Chippewa

From the Archive of Folk Song

Recorded and Edited by Frances Densmore

Library of Congress  Washington  1950
**PREFACE**

The albums of Indian songs, edited by Miss Frances Densmore, make available to students and scholars the hitherto inaccessible and extraordinarily valuable original recordings of Indian music which now form a part of the collections of the Archive of Folk Song in the Library of Congress. The original recordings were made with portable cylinder equipment in the field over a period of many years as part of Miss Densmore's research for the Bureau of American Ethnology of the Smithsonian Institution. The recordings were subsequently transferred to the National Archives, and, finally, to the Library of Congress, with a generous gift from Eleanor Steele Reese (Mrs. E. P. Reese) which has made possible the duplication of the entire 3,591 cylinders to more permanent 16-inch acetate discs and the issuance of selected recordings in the present form. The total collection is unique and constitutes one of the great recorded treasures of the American people.

Miss Frances Densmore of Red Wing, Minn., was born May 21, 1867, and has devoted a rich lifetime to the preservation of Indian music. Her published works include volumes on Chippewa Music, Teton Sioux Music, Northern Ute Music, Mandan and Hidatsa Music, Papago Music, Pawnee Music, Yuman and Yaqui Music, Cheyenne and Arapaho Music, Choctaw Music, Music of the Indians of British Columbia, Nootka and Quallute Music, Music of the Tule Indians of Panama, and other related subjects. Now, as a fitting complement to these publications, Miss Densmore has selected from the thousands of cylinders the most representative and most valid—in terms of the sound quality of the original recordings—songs of the different Indian tribes. With the recordings, she has also prepared accompanying texts and notes—such as those contained in this pamphlet—which authentically explain the background and tribal use of the music for the interested student.

This album, and the series of which it forms a part, is a valuable addition to the history, folklore, and musicology of our North American continent. Its value is increased for us with the knowledge that much of the music has, unfortunately, disappeared from the American scene. To Miss Densmore, and other Smithsonian collectors, as well as to the Indian singers who recorded for them, we must be grateful for rescuing this music from total oblivion.

PHONETICS

Vowels have the Continental sounds, except û as in “but.” The diphthong ai is pronounced as in “aisle,” and au is pronounced like ow in “allow.”

Consonants are pronounced as in English, except that c represents the sound of sh, j the sound of zh, tc the sound of tch in “watch,” and dj the sound of j in “judge.” The letter ñ, or ñg, represents the sound of ng in “thing.”

SONGS OF THE CHIPPEWA

by FRANCES DENSMORE

INTRODUCTION

The songs presented herewith were selected from 340 songs recorded and transcribed in a study of Chippewa music made for the Bureau of American Ethnology, Smithsonian Institution, by the writer. They were recorded in 1907-10 on the principal reservations in Minnesota and the Lac du Flambeau Reservation in Wisconsin. It was an opportune time for the work as a few of the old leaders and warriors were still living. These men realized that the old songs were disappearing and consented to record them when told “their voices would be preserved in Washington, in a building that would not burn down.” In fulfillment of that promise, the American people may now have copies of their recordings—songs of their dreams, dances and games, songs of the warpath and camp, love songs and the songs with which they treated the sick, as well as songs of their religious organization, the Miđe’wīwin (Grand Medicine Society).

These songs, thirty in all, were recorded by sixteen singers, four of whom were women. Several of the men and three of the women spoke practically no English, and, with few exceptions, the singers were about 70 years of age, several being much older.

A favorable approach to the Minnesota Chippewa was aided by certain men and women of mixed blood, living on the White Earth Reservation. Most of these were relatives of William W. Warren, the historian of the tribe. His sister, Mrs. Mary Warren English, was my principal interpreter; another sister, Mrs. Julia Warren Spears, gave information; and his niece, Mrs. Charles W. Mee, commended the work to the Indians and interpreted when necessary. They also recorded songs, one of which, recorded by Mrs. Spears, is included in this album (B13). I became acquainted with these members of the tribe and with some of the singers in June 1905, when attending a certain celebration at White Earth.

The recording of Chippewa songs was begun in September 1907, at Onigum on the Leech Lake Reservation. I had visited this locality the previous

June and heard the members of the Mide' wiwin sing their songs around Flat Mouth, their dying chief. His death took place a few days later, and I remained for his burial. All this was remembered by the Indians when I returned and asked them to record songs.

My first recording equipment was an Edison phonograph which was then the best equipment available. The next summer, it was replaced by a Columbia gramophone with four heavy springs. At that time the Indians were not generally accustomed to phonographs and few, if any, had seen the making of records. One Chippewa woman, after talking to phonographs and few, if any, of the Indians, exclaimed, "How did it learn that song so quick? That is a hard song."

Each class of Chippewa song has its accompanying instrument. The hand-drum which is common to many tribes is used with game songs and by a man when singing alone; a large drum is used at dances, the singers sitting on the ground around it, each with his own drumstick; the doctor uses a gourd or disc-shaped rattle; and a waterdrum and gourd rattle are used in the ceremonies of the Mide' wiwin. Indians are accustomed to singing with some form of accompaniment, but the drum and rattle overpower the voice if used when songs are recorded. Therefore it was necessary to find, by experiment, some form of accompaniment that would satisfy the Indian singer and also record the rhythm of the drum or rattle. Pounding on a pan was too noisy, but this and other forms of accompaniment will be heard in the present series. Songs were often recorded in an Indian schoolroom during vacation, and an empty chalk box was found an excellent substitute for a drum. Inside the box I put a crumpled paper that touched the sides of the box but did not fill it. The box was closed and struck sharply with the end of a short stick, producing a sound that was heard clearly on the record. This was percussion without resonance, and made possible the transcribing of the rhythm of the native accompaniment.

The wishes of the singer were consulted, as far as possible, in the recording of his songs. One singer might insist that no one should hear him sing, while another might ask that a friend be present or that the record be played for his friends. The songs of E'niwob'e were recorded in his home at Lac du Flambeau. The activities of the family went on as usual but did not disturb him.

The songs heard at Indian dances are generally small in compass, but a tabulated analysis of 340 Chippewa songs shows that 3 percent have a compass of 14 tones, 30 percent have a compass of 12 tones, 11 percent have a compass of 10 tones, and 21 percent have a compass of an octave.3

In listening to these records it should be borne in mind that they were made in the field and intended only for the use of the collector. Also, that sounds recorded on wax cylinders are amplified by electric copying. The purpose was to preserve the old melodies and, so far as possible, the old technique in singing them. The several renditions of a song often show slight differences, and it is impossible to indicate in musical notation the by-tones and embellishments that are heard in some songs. Such freedom is allowed an expert singer of our own race and is not shown in our notation. The Indians value skill in singing, but they appreciate the fine old songs, though sung by men with weak voices. The words of Chippewa songs are generally few in number but many songs are highly poetic.

With an understanding of these peculiarities, Chippewa music may be recognized as part of the native culture of the tribe.

**DREAM SONGS**

A1-6

Many Indian songs were not composed in our use of that term, but were said to come to the mind of the Indian when he was in a "dream" or trance, often induced by fasting. The Indian believed this condition put him in communication with supernatural powers that would help him in some undertaking, and that he could restore the communication by singing the song and complying with some other conditions. In this way he could secure the help of supernatural powers at any time. He might sing his "dream song" when going to war, when treating the sick, or giving demonstrations of various sorts to show his power. The meaning of the words of the dream song were known only to himself and referred to the subject of his dream. In time the song became familiar and others might sing it, but the song would not have its old power. Some songs of this sort are very old, and the words have been forgotten. Such are many songs of today—the dream songs of forgotten men.

The first three dream songs were recorded at a small Chippewa village in northern Minnesota. This

---

3 Chippewa Music II, Bull. 53, Bur. Amer. Ethn., p. 21
village is located on a long point of land which divides the upper and lower portions of Red Lake and is called Waba'c'ntg by the Chippewa, meaning "where the wind blows from all sides." The white people call it Cross Lake as it is across the lake from the Red Lake Agency. The first encroachment of civilization on this isolated group of Indians was in 1901 when the Government started a day school in that locality. The Indians opposed it with all their power, but after it was established they became adjusted to it and were interested in keeping their children in school. In 1909, when these songs were recorded, most of these Indians were members of the M'vine'w'n, observing its rites and ceremonies. They seldom heard the music of the white race, and, therefore, never had a piano, organ, or any other tuned instrument. When he was a little boy he "sat with the old men," listening to their singing and learning their songs. Now he "sings the songs that the old men made up in their dreams." He sang with an artificial tone which is heard in his recordings. It is a throaty tone with a vibrato quality. He discovered the ability to sing with this tone when he was a boy and had cultivated it ever since. No information was obtained with this song except that it was a dream song, used in the Woman's dance.

A3--DREAM SONG (b) (Cat. no. 325, no. 136, Bull. 53.)

Like the song next preceding, this was recorded at Waba'c'ntg, Minnesota, in 1909, by Awun'akum'gick'n who said it was used in the Woman's dance.

The second three dream songs were recorded by Ga'gandac' (One whose sails are driven by the wind), who was commonly known by his English name, George Walters. He was a man of middle age, living at White Earth, Minnesota, and was a prominent singer at all tribal gatherings. His songs were recorded "circa" 1908.

A4--SONG OF THE THUNDERS (Cat. no. 207, no. 113, Bull. 45.)

In this song the dreamer feels himself carried through the air.

na'ningo'dinunk' Sometimes
niwbaba'cawen'dan I go about pitying
niyaw' myself.
baba'maciyan' while I am carried by the wind
gic'gun' across the sky.

A5--"THE APPROACH OF THE STORM" (Cat. no. 209, no. 115, Bull. 45.)

The Indian generally approaches in silence unless he announces his coming by making some sound. This song concerns a manido' (spirit) that lives in the sky and rules the storm. He is friendly, and the distant thunder is his manner of letting the Indian know of his approach. Hearing this, the Indian will hasten to put tobacco on the fire so that the smoke may ascend as a friendly signal or response to the manido'.

This song was recorded by a younger singer about
a year before it was recorded by Ga’gandac’. On comparing the two records it is found that they differ less in rhythm than in melodic progressions. The younger singer used the same tones, but in some parts of the song he used the intervals in a slightly different order. The characteristic rhythm is identical in the two records.

abit ‘ From the half
gicigu ‘ of the sky
ecigwen ‘ that which lives there
kabide ‘ bwewidun ‘ is coming, and makes a noise.

A6—“MY VOICE IS HEARD” (Cat. no. 208, no. 114, Bull. 45.)

No explanation was given of the words in this song but it seems probable that the thunder is speaking. It is one of the dream songs that are surrounded by mystery but sung in gatherings of the people.

This melody has a compass of 12 tones and contains interesting mannerisms of rendition. The tempo of the drum is slightly faster than that of the voice.

misiwé ‘ All over
akfn ‘ the world
nin ‘ debwe ‘ widum ‘ my voice resounds.

WAR SONGS

A7—10

In war as in all his undertakings, the Chippewa depended upon help from supernatural powers. He appealed to these powers by means of songs and he carried “war charms” as well as combinations of herbs known as “war medicine.” The song came to him in a dream and the herbs were secured from old men of the tribe who were generally members of the Mide ‘ wítwín. A personal war song was recorded by Odjfb’we, the leader of the Chippewa warriors during the time of Hole-in-the-day, who was assassinated in 1868. After recording this song the aged man bowed his head, saying that he feared he would not live long as he had given away his most precious possession.

The tribal war songs included those that were sung before the departure of a war party, songs of the warpath and battle, songs of the victorious return and the scalp dance. Examples of these are presented.

A7—“I WILL START BEFORE NOON” (Cat. no. 276, no. 129, Bull. 45.)

This and the song following were recorded in 1907-10 at White Earth, Minnesota, by Ga’tcit-cig’cig (Skipping a day), who selected his songs with care. He recorded six songs comprising three war songs, a love song, a dance song, and the popular “folk song” concerning We’ nóbo’jo and the ducks. The singer said that he learned this war song from his father who was a warrior and in the old days was often sent in advance of the war party as a scout. Before starting on such an expedition he sang this song. The Chippewa words on the record are not correctly pronounced and contain many interpolated syllables. The song has a compass of 12 tones the highest tone being A, second space, treble staff. The tones are those of a major triad and sixth.

tcinau ‘ hwakweg ‘ I will start on my journey
chtibwa ‘ wabúmní ‘ igoyan ‘ before I am seen.

A8—SONG IN HONOR OF CIMAU’GANIC (Cat. no. 277, no. 130, Bull. 45.)

In the old days it was customary for a woman to go out and meet a returning war party. If a scalp had been taken, she received it at the hand of the leader and danced in front of the war party as it neared the camp, singing and waving the scalp. This song concerns such an event. The singer said that he had heard it sung by a woman on such an occasion. Sometimes several women went to meet the warriors, but one always preceded the others and received the scalp. The return to the camp was followed by the scalp dance. Each scalp was fastened to a hoop at the end of a pole and passed from one man to another, each man holding it aloft as he danced around a pile of gifts. This is an old song in which the name of Cimau’ganíc has replaced the name of a former warrior. This was in accordance with custom, one melody often containing the names of several warriors in succession, the words of praise being the same for each. The words mean “Cimau’ganíc killed in war.”

In recording this song Ga’tcitcig’cig imitated the singing of a woman. The same technique was used in love songs and in songs of the scalp dance. It is characterized by a peculiar nasal tone and a gliding from one pitch to another (Cf.B14, B15). The nucleus of this performance consists of five measures,
inis in which the words occur. This is heard four times
in the recording. The intervening measures show a
similar basic rhythm with various melodic progressions.

A9—WAR SONG (Cat. no. 411, no. 88, Bull. 53.)

This song was recorded at Lac du Flambeau, Wis-
consin, by E’niwob’e (Sits farther along) in 1910. He
is a conservative Indian, respected by all who
know him, and is the owner of two houses, one in
the Indian village and the other on his farm where
he spends the summer. He did not remember the
fighting between the Chippewa and Sioux in Wis-
consin, but his father, said to be 90 years of age,
recalled the war dances of that time.

No information was obtained concerning this song.

A10—“IN THE SOUTH” (Cat. no. 426, no. 87,
Bull. 53.)

This, like the song next preceding, was recorded
at Lac du Flambeau, Wisconsin, in 1910 by E’niwob’e
(Sits farther along). No information concerning
it was available. A peculiarity in the manner of
rendition is the sounding of a tone slightly above
the intended pitch and descending downward in a
glisssando. This is heard clearly in the second mea-
ure.

cə’wimọ́ng’ in the south
bőnə’siwug’ the birds
gə’bimonda’ goziwa’ are heard singing.

MISCELLANEOUS SONGS

A11—“THE ENTIRE WORLD” (Cat. no. 297, no.
167, Bull. 53.)

This was said to be the music of a very old dance
and no information was available concerning the
dance or the meaning of the words. The rhythm is
vigorous and the song has a compass of 13 tones. It
was recorded at Waba’cįfįg, Minnesota, by Ki’mi-
won (Rainy) in 1909.

E’negok wag’ The entire
akí’ world
nim’a’ wimigun’ weeps for me.

A12—WOMAN’S DANCE SONG (Cat. no. 295, no.
164, Bull. 53.)

The Woman’s dance is a feature of every gathering
of the Minnesota Chippewa and is said to have been
learned from the Sioux. Both men and women take
part and the dancers face the drum, side by side,
moving clockwise in a circle with a shuffling step.
An invitation to join the dance is accompanied by a
gift, and the first invitation is usually given by a
woman, the man responding with a gift of about the
same value. The gifts are generally some form of
beadwork and the dances hold them up for all to see
as they dance, making a picturesque scene. The
songs of this dance have no general characteristics
and are rather simple in melody and rhythm. This
song has no words. A ‘jide’giįg (Crossing Sky) re-
corded it at Waba’cįfįg, Minnesota, in 1909.

A13—MOCCASIN GAME SONG (Cat. no. 203, no.
144, Bull. 45.)

The moccaisin game is the principal form of gam-
bling practiced by the Chippewa at the present time.
In this game four bullets or balls are hidden under
four moccasins. One bullet or ball is marked and it
is the object of the opposing players to locate this
with as few “guesses” as possible. A characteristic of
moccaisin game songs is a rapid drumbeat with slow-
er tempo of the voice, as in this song. The drumbeat
of these songs is a strongly accented stroke followed
by a very short unaccented stroke.

This is the song of a determined player. It is the
only song that was recorded by Nita’miga’bo
(Leader standing), and was recorded at White Earth,
Minnesota, 1907-10.

nin’giįgî’ I will go home,
niwe’ niyawan’ if I am beaten,
nin’genadîn’ after more articles
minawa’ge te’goyan’ to wager.

A14—“WE HAVE SALT” (Cat. no. 268, no. 168,
Bull. 53.)

The age of this song is indicated by the words. In
the early days the Chippewa had no salt. A treaty
known as the “Salt Treaty” was concluded at Leech
Lake, Minnesota, on August 21, 1847, with the Pil-
lager Band of Chippewa. This treaty stipulated that
the Indians should receive five barrels of salt annual-
ly for five years. This is the song of a member of the Pillager Band, boasting of the salt they have received by this treaty. The song was recorded about 1909 by Henry Selkirk, a man of Scotch-Chippewa ancestry living at White Earth, Minnesota.

\[
\begin{align*}
\text{ma'no} & \quad \text{Let} \\
\text{kigade'awen'îm'go'mn} & \quad \text{them despise us,} \\
\text{ji'wita'gtn} & \quad \text{salt} \\
\text{gi'dayamn'} & \quad \text{we have} \\
\text{a'jawa'kwa} & \quad \text{here, beyond the belt of timber} \\
\text{gi'dayamn'} & \quad \text{we live.}
\end{align*}
\]

**SONGS USED IN THE TREATMENT OF THE SICK B1—3**

Two classes of native doctors treated the sick among the Chippewa, both using songs in their treatment. One class comprised the older members of the Mide’ wiwfn who used the songs and secret herbs of that organization. Members of the second class did not always belong to the Mide’ wiwfn. They claimed to receive their power in their dreams and gave demonstrations to impress the people with that power. Both classes used affirmations, one affirming the great power of the Mide’ wiwfn and the other affirming the power of their own supernatural helpers. Several healing songs of the Mide’ wiwfn were recorded but the songs presented here were selected from songs of the second sort recorded at White Earth and Waba’cfig, Minnesota. One of the singers (Main’gans) treated the sick in the manner that will be described; the other (Ki’ miwun) was familiar with the custom. Such a doctor treated the sick by singing, shaking his rattle, passing his hands over the body of the patient, and apparently swallowing one or more tubular bones which he afterward removed from his mouth. Each of these actions was considered indispensable to the treatment. There is a similarity in the melodic pattern of these three songs. This adds to their interest as they were attributed to different sources.

**B1—“THE APPROACH OF THE THUNDER-BIRDS”** (Cat. no. 311, no. 141, Bull. 53.)

This song was said to have been sung after a demonstration with the tubular bones and the treatment which followed. The words refer to the dream in which the doctor received his power. The recording is realistic. After the second rendition a sharp, hissing sound was made by the singer who said that the Chippewa doctor makes such a sound as he breathes or “blows” on the person whom he is treating. After the third rendition there is recorded a shrill whistle which he is said to make when the bones issue from his mouth. The song was recorded by Ki’ miwun (Rainy) at Waba’cfig, Minnesota, in 1909.

\[
\begin{align*}
\text{ka’wita’kumi’g’i’ckaman’} & \quad \text{I am going around} \\
\text{aki’} & \quad \text{the world,} \\
\text{midwe’kumi’g’i’ckaman’} & \quad \text{I am going through} \\
\text{aki’} & \quad \text{the world.}
\end{align*}
\]

**B2—“GOING AROUND THE WORLD”** (Cat. no. 246, no. 110, Bull. 45.)

This song was recorded by Main’gans (Little Wolf) of White Earth who treated the sick in the manner that has been described. He said that he sang three songs when treating a sick person, the melody being the same in the first and third songs. He sang the first song after he had looked at the sick person and decided that he could help him. The words are translated: “I am singing and dreaming in my poor way over the earth, I who will again disembark upon the earth.” Then he sang a song which indicates that he received his power from a bear, the words being, “The big bear, to his lodge I go often.” His third song is here presented. As stated, the melody is the same as in the song which preceded his treatment. The song was probably recorded in 1908.

\[
\begin{align*}
\text{ka’wita’kumi’g’i’ckaman’} & \quad \text{I am going around} \\
\text{aki’} & \quad \text{the world,} \\
\text{midwe’kumi’g’i’ckaman’} & \quad \text{I am going through} \\
\text{aki’} & \quad \text{the world.}
\end{align*}
\]

**B3—“SITTING WITH THE TURTLE”** (Cat. no. 309, no. 139, Bull. 53.)

No information was obtained concerning this song except that it was used by the same medicine man as the first song in this group. It is evidently the song of a man who received his power from the great turtle (mi’ktnak’). The form of the words suggests a lengthy conference with the turtle and, perhaps, a return to the turtle for the renewing of his power. The story of the dream, like the name of the medicine man who received the song, has been lost, but the melody and words remain a tradition among his people. This song was recorded by Ki’ miwun (Rainy) at Waba’cfig, Minnesota, in 1909.

\[
\begin{align*}
\text{mi’ktnak’} & \quad \text{Turtle,} \\
\text{niwi’tabim’u} & \quad \text{I am sitting with him.}
\end{align*}
\]
SONGS OF THE MIĐE' WĪWIN

The native religion of the Chippewa is the Miđe' (Grand Medicine), and its organization is the Miđe'-wīwin (Grand Medicine Society) which consists of eight degrees. Both men and women may become members and are advanced from one degree to another on receiving certain instructions and bestowing valuable gifts. There are series of songs for initiation into each degree, and such songs for initiation into the first, second, third and sixth degrees were recorded. There are also songs for treating the sick, which is an important function of the society, and songs for success in various undertakings. The songs of the Miđe'-wīwin are estimated as several hundred in number. All are recorded in mnemonics on strips of birchbark.

A peculiarity of Miđe’ songs is the use of meaningless vowel syllables between the words and interpolated in the words. Explosive vowel syllables are often given between renditions of songs, similar to the ejaculations that take place during an initiation ceremony.

This series opens with three songs of initiation into the first and second degree of the Miđe'-wīwin, recorded in 1907-10 by Mā'gans (Little Wolf), a prominent member of the organization at White Earth, Minnesota.

B4—SONG OF THE MANIDO’ (Cat. no. 238, no. 2, Bull. 45.)

Mā'gans (Little Wolf) said this song was taught him by the old man who initiated him into the Miđe'-wīwin and that he sang it himself when acting as an initiator. In explanation of the song he said, through the interpreter, that the Chippewa lived on Lake Superior before coming to Minnesota and therefore many traditions of the Miđe'-wīwin are connected with water. Long ago a manido’ (spirit) came to teach the Miđe’ to the Indians and stopped on a long point of land which projects into Lake Superior at the present site of Duluth. The words of this song refer to that incident. Between the words may be heard the meaningless vowel syllables that characterize Miđe’ songs.

nawau' On the center of a peninsula
ni' bawiwān I am standing.

4 This term is applied to individual members of the organization and is also used as an adjective.

B5—DANCING SONG (Cat. no. 239, no. 3, Bull. 45.)

This is similar to the song next preceding except that the person to be initiated would dance while it was sung. It may also be sung in the ceremonial lodge after the initiation.

o'goti'tći' yane’ In form like a bird
siwa’ wigane’ it appears.

B6—ESCORTING THE CANDIDATE FOR INITIATION (Cat. no. 237, no. 10, Bull. 45.)

In the middle of the ceremonial lodge is a pole with symbolic decorations and beside this pole is a pile of blankets to be used as gifts. The leader of the ceremony escorts the candidate to a seat on the pile of blankets, facing west. He moves slowly at first, then very rapidly, ejaculating we ho ho ho and shaking his rattle while this song is sung. Like the two songs next preceding, this was recorded by Mā'gans (Little Wolf) at White Earth, Minnesota, in 1907-10.

nikān’ Our Miđe’ brother,
ɡiwa’ niwa’sē’ you are going around
Miđe’ wīgān the Miđe’ lodge.

B7—SONG OF THE FIRE-CHARM (Cat. no. 197, no. 86, Bull. 45.)

This and the song next following are examples of the songs that are sung in the lodges during the evenings that precede an initiation of the Miđe’ wīwin and at the dances which follow the ceremony. They are connected with the use of “rare medicines,” the term “medicine” being applied to any substance connected with mysterious power. Their use may be to accomplish some definite purpose or to impress the people with the power of the Miđe’. The songs can be sung only by those who received them in dreams or purchased the right to sing them from someone who received them in that manner. O’dēni’gūn (Hip bone) who recorded this and the song next following was said to be one of the most powerful medicine men on the White Earth Reservation. His songs were recorded in 1908.

Concerning the next song, O’dēni’gūn said that
fire, like everything else, came to the people through the Míde'. At first they were afraid of it but soon learned that it was useful. Once an old medicine man showed that he could stand in a fire and not be burned. He put "medicine" on his feet and stood in the fire, chewing "medicine" and spitting the juice on his body. The flames came up to his body but he was not harmed. O'déni'gún said that probably some of the oldest Míde' still know the secret of this medicine and could take hold of hot stones without being burned. The words are continuous throughout the melody. A slow voice-rhythm and rapid drum-beat are noted in this as in some other songs of mental stress.

**B8—SONG OF THE FLYING FEATHER (Cat. no. 191, no. 81, Bull. 45.)**

Before recording this song O'déni'gún related its story, saying that a man and wife lived in a wigwam, but after a time the woman ran away. The man went to an old Míde' and asked him to bring her back. The old man replied "Your wife will come back tonight. I am sure of this because the sound of my drumming is heard all over the world, and when she hears it she cannot help coming back." So he began to drum and sing this song and the man's wife came back to him. Then the old man gave him a charm so that his wife could never run away again.

mìgwùn' The feather
o'dono'dijigons' the body of the Míde'wiwín
endimo' nondjiigans' (member of the Míde'wiwín).

**B9—BURIAL SONG FOR A MEMBER OF THE MÍDE'WIWIN (Cat. no. 284, no. 175, Bull. 53.)**

Two burial songs for members of the Míde'wiwín were recorded by Na'waji'bigo'kwe (Woman dwelling among the rocks) who had taken four of the eight degrees in the Míde'wiwín. Her home was on the White Earth Reservation in Minnesota, where her songs were recorded about 1908. There is a peculiar gentleness in both the burial songs. They are cheerful, yet plaintive, and do not contain the ejaculations that occur in the ceremonial songs of the Míde'wiwín. The first song (not presented) contained the words, "You shall depart. To the village you take your steps." The "village" of departed spirits seems to have been considered a pleasant place as another song contained the words, "Toward calm and shady places I am walking on the earth."

This is the second burial song recorded by Na'waji'bigo'kwe and is addressed to Nëniwa', a member of the Míde'wiwín.

Nëniwa' (name of a man),
Nëniwa' let us stand,
gi' gawa' bandan' and you shall see
nìaw' my body
ëñèn' daman' as I desire.

**LOVE SONGS**

**B10-16**

A favorite form of musical expression among the Chippewa is the love song and many such songs are known to be very old. Thirty-four love songs were recorded and transcribed, these having been collected at White Earth, Red Lake and Waba'cftîg in Minnesota and on the Lac du Flambeau Reservation in Wisconsin. The love songs are freer in melodic progressions and generally slower in tempo than other classes of Chippewa songs, and also differ from a majority of other songs in having the words continuous throughout the melody. Words are often improvised to familiar melodies. The love songs are sung by older men and women with a strained, drawling, nasal tone that cannot be imitated by young singers. The same technique was formerly used in songs of the scalp dance. In addition to the love songs commonly known and sung by the people were the songs connected with "love charms" that formed part of the magic of the Míde'wiwín.

The words of Chippewa love songs are generally expressive of sadness, loneliness and disappointment. The only instances of love songs expressing personal affection were a few songs with improvised words said to be addressed by a wife to her husband.

The three songs next following are typical Chippewa love songs.

**B10—"YOU DESIRE VAINLY" (Cat. no. 430, no. 107, Bull. 53.)**

This song was recorded at Lac du Flambeau, Wis-
consin, in 1910 by Mec'kawiga'bau (Stands family). Sixteen songs were recorded by this singer including songs of the Drum-presentation ceremony in which he was a leader. He owned a house and a few acres of land near the Indian village. The phonograph was taken to his house for recording his songs and two that were recorded by his wife (Cf. B12).

gi' daga'wada'n' You desire vainly
dij'i'msu'wî'n'nonan' that I seek you;
a'n'fca' the reason is:
gici'mè I come
baön'djikayan' to see your younger sister.

B11—"WORK STEADILY" (Cat. no. 270, no. 170, Bull. 53.)

Many of the Chippewa love songs can be sung by either a man or a woman but this is a woman's song. It was recorded by Maifi'gana (Little Wolf) at White Earth, about 1908. The tempo is slow, as in a majority of Chippewa love songs, the fourth above the apparent keynote is prominent and the melody has a peculiar, pleading quality.

aś'ngwa'm's'm' Be very careful
thalmö'k'yi'n' to work steadily;
segama'kamigo' I am afraid they will take you
niau away from me.

B12—"weeping for my love" (Cat. no. 443, no. 110, Bull. 53.)

This song was recorded by Dij'i'siî'sino'kwe (Deceiving woman), the wife of Mec'kawiga'bau. As stated, they recorded songs in their home at Lac du Flambeau, Wisconsin, in 1910. She recorded two love songs, naively insisting that her husband depart while she recorded them and be recalled to hear them, when they were played on the phonograph.

I go around weeping for my love (Free translation)

B13—"I HAVE FOUND MY LOVER" (Cat. no. 286, no. 177, Bull. 53.)

Mrs. Julia Warren Spears, who recorded this and one other love song, was a sister of William W. Warren, historian of the tribe. (Cf. footnote p. 2) She was born in 1833 at La Pointe, the Chippewa village on Madeline Island in Lake Superior. When she was 17 years of age her brother William was employed to escort the first party of Chippewa that came to Minnesota. They numbered about 800 and she was the only woman. She never returned to La Pointe to live, and in later years made her home with her daughter, Mrs. Charles W. Mee, at White Earth, where the songs were recorded, probably in 1908.

Mrs. Spears said that when she was a little girl on Madeline Island, about 15 years of age, her friend and playmate was a pretty Indian girl, the only daughter of a chief. This Indian girl "was always singing two songs." The writer heard Mrs. Spears sing them at intervals over a period of several years and the renditions never varied in any respect. One was a song of happiness and the other was a sad little song, said to be sung when the girl's lover was leaving on a long journey. The first song is presented and expresses the girl's joy at finding her lover. Attention is directed to the compass of the melody which includes 12 tones, beginning on the highest and ending on the lowest tone of the compass, a melodic pattern noted in many Chippewa love songs. Nōi is a woman's exclamation of surprise.

niî Oh,
nîn'dîn'en'dûm I am thinking,
niî Oh,
nîn'dîn'en'dûm I am thinking
mē'kawî'nin I have found
nîn'mu'cên my lover;
niî Oh,
nîn'dîn'en'dûm I think it is so.

The two songs next following were recorded by a woman of unique personality whose name was Manido'gicî'go'kwe (Spirit day woman). She was a member of the Mide' 'wîwin and recorded two Mîde' songs connected with the use of "love medicine." Like other songs of that organization, they were represented by "song pictures," and she drew these when she recorded the songs. In one of these pictures a woman is drawing a man by the hand, though he appears reluctant. Neither of these songs is in the present series.

This interesting woman lived alone in a log cabin, on a point of land extending into a small lake. Back of the cabin stretched the forest, broken only by a wagon road whose single track was marked by stumps beneath and drooping branches overhead. There she and her dogs guarded the timber of her government allotment, and there I called upon her, being allowed to photograph her in the door of her
