mental fountain. The covered entrances for pedestrians from the avenue front into the market square will also be laid with wood pavement, as above.

G. Sewer. — Through the center of the square, from north to south, an egg-shaped sewer of brickwork laid in cement will be built, into which all the large-sized drain-pipes from the different sections of the whole improvement will discharge in a manner so as to sweep off all the rainwater, waste, and soil, and also to drain efficiently the ground of the whole square.

General Conditions. — The specifications and drawings are intended to co-operate, so that anything exhibited in the drawings and not mentioned in the specifications, or vice versa, is to be executed the same as if both were mentioned in the specifications, and set forth in the drawings, to the true meaning and spirit of said drawings. All the work to be done under the direction and according to the designs of the architect of the company. It is to be understood that these specifications are intended to include all and everything necessary to the completion of all the improvements in a good, substantial, and workmanlike manner, and modern style, with best, sound materials for each and every part and department, at the company's own cost.
