EQUIPMENT AT COINTRIN AIRPORT

Agreement signed at Bern April 30, 1947
Entered into force April 30, 1947

61 Stat. 3859; Treaties and Other
International Acts Series 1736

Agreement between the Swiss Government and the Government of
the United States of America Regarding SCS-51 Equipment at
Cointrin Airport, Geneva, Switzerland

The Swiss Government Agrees:

1. To operate and maintain the SCS-51 equipment continuously in a
manner adequate for the air traffic operating into and away from Cointrin
Airport, Geneva, where this equipment is now located, and along the recog-
nized international air routes converging on that airdrome; and, in order to
insure the standard of service, the Swiss Government agrees to abide by
approved International Civil Aviation Organization (ICAO) standards of
operation \(^1\) unless changed by other international agreement to which the
Governments of the United States and Switzerland are parties. Allowance is
to be made, of course, for possible unavoidable interruption of the continuous
operation which may result from breakdown in the equipment; but every
effort will be made to repair any electrical or mechanical defects of the
equipment as soon as may be possible.

2. To install and place into operation parts of the SCS-51 equipment
not yet installed as soon as the necessary special parts already ordered will
have been delivered and assembled. It is understood that in the interest of
safety of air traffic every possible step will be taken to hasten the putting into
operation of the whole equipment.

3. To provide the full service of the SCS-51 to all aircraft on a non-
discriminatory basis.

4. To continue the operation of SCS-51 equipment in its original loca-
tion at Cointrin Airport, Geneva, or at a new location mutually agreed upon
between the Governments of the United States and Switzerland until this
equipment may be replaced in accordance with standards promulgated by

\(^{\text{1}}\) See interim agreement opened for signature at Chicago Dec. 7, 1944 (EAS 469),
the International Civil Aviation Organization or until it is determined by
the Governments of Switzerland and the United States that there is no longer
need for the original equipment.

5. To authorize the United States air carrier or the Civil Aeronautics
Administration of the United States to designate a technical advisor to as-
sist and advise the agency designated by the Swiss Government to operate
the SCS–51 so far as it relates to the safety and efficiency of the operation of
United States aircraft, and in conformity with approved International Civil
Aviation Organization standards of operation. This designation is to con-
tinue as long as it is useful to the United States air carrier. The Swiss agency
will not, however, be bound to act on the advice given should it be found
contrary to Swiss interests.

THE GOVERNMENT OF THE UNITED STATES OF AMERICA THROUGH
EITHER THE UNITED STATES ARMY OR THE CIVIL AERONAUTICS ADMINIS-
TRATION OR A DESIGNATED PRIVATE AGENCY AGREES:

1. To include in the sale of the basic installation one year’s supply of
maintenance parts and expendable supplies to the extent that the Theater’s
surplus stocks permit.

2. To do everything possible to assist the Swiss Government or its repre-
sentative in purchasing through regular commercial channels maintenance
parts and expendable supplies for the operation of the SCS–51.

Done at Bern in duplicate this 30th day of April, 1947.
