Coronavirus (COVID-19) Guidance to Contractors – Vaccination and Testing

The Library COVID-19 protocols and related guidance are published by the Library and available at the following address: [https://www.loc.gov/about/pandemic-information/for-contractors/](https://www.loc.gov/about/pandemic-information/for-contractors/). This requirements described herein apply to contractor employees (including subcontractors) who have been issued Library badges and report to work on site at Library facilities.

1. **Vaccination and Testing Requirement.** The Library will no longer require certification of vaccination nor screening tests based on vaccination status.

2. **Follow Library COVID-19 Protocols.** All employees and contractors must continue to observe Library COVID-19 protocols when working on site at the Library. These protocols include wearing **masks at high or medium high community levels**, maintaining appropriate distance, and frequently washing and sanitizing hands. If a contractor’s employees fail to follow any of the Library’s COVID-19 protocols, the contracting officer (CO) will pursue appropriate contract remedies.

3. **Potential Violations.** Contractors must promptly report potential Library COVID-19 protocol violations by its employees, investigate the concern, and report to the results of the inquiry to the COR and the CO.

4. **Do Not Report On Site When Sick.** No one who has tested positive for COVID-19, who has been exposed to COVID-19, or who is experiencing symptoms identified on the Library’s [Daily Health Screening Tool for On-Site Work](https://www.loc.gov/about/pandemic-information/for-contractors/) may report to work on site at the Library. The contractor shall be responsible for sending a qualified replacement staff member or, with the approval of the COR, providing for adequate space for work to be conducted off site.
